THE KLEMME TIMES

Twenty-fifth Year Number 18 | Klemme, Iowa, Thursday, January 6, 1921 | $2.00 In Advance. $2.50 Outside of County

Clean both ways.

You want a Sheller to remove all the corn from the cob and keep all the trash out of the shelled corn. The Appleton Sheller does both *right*. It

shells every ear right

big or little, wet or dry because it has the most efficient shelling principle. Coil springs, instead of the ordinary flat springs, control the fingers that hold the ears against the shelling mechanism. This gives the rag irons greater flexibility, so that the smallest nubbin can't get through without being shelled clean, and the largest ears are shelled without crushing or choking The coiled springs won't break in cold weather, like ordinary flat springs. The feeder is so made that ears cannot get crosswise and choke. The Appleton

Cleans the corn right,

because it has the most efficient cleaning mechanism. U-shaped raised lip screen agitates both upward and forward—allows *all* shelled corn to fall through to cleaning pan below, where all trash and dirt is blown out.

APPLETON

CORN SHELLER

Because of simple construction—fewer chains, sprockets and gears—the Appleton *does more work with less power* —is much more durable, requires much less repair expense. Appleton Shellers are made in three power sizes and three styles, mounted and unmounted, with or without cob stacker, sacker wagon elevator and extension feeder.

We also have a full line of hand corn shellers in all sizes.

International Fee Grinders

are found very useful on any farm for grinding all kinds of feed. We can supply any size.

Kewanee Hog Waterers

should be ou every farm. Keep your hog water from freezing and watch your hogs gain in weight during cold weather.

Feeds of All Kinds

You will find our prices are always right on Oil Meal, Tankage, Bran, Middlings and Hog Mesl.

W. M. Baack

SPECTACULAR FIRE IN HANCOCK COUNTY

House and Contents Burned, 3 Hurt After Kerosene Can Explodes

CRYSTAL LAKE—A closngi scene for 1920 that will not soon be forgotten by the family of W. F. McFarland, residing on the T. H. Murray farm one mile west of here, occurred at 6 o'clock Friday morning when their residence caught fire and burned to the ground.

Mr. McFarland kindled the fire with kerosene. An explosion occurred that rocked the house and it was soon a mass of flames. There are everal in the family and most of them escaped with nothing but their clothing. A baby sick with pneumonia had to be removed to a neighbor's house. Everything was burned that was in the house, as the fire spread so rapidly that nothing could be saved. The explosion of the kerosene can set fire to Mr. McFarland's clothing. With the aid of his wife who came to his rescue after both of them and the infant in the room were quite severely burned, he managed to extinguish the fire in his clothing, but the flames in the house spread so rapidly that the other members of the family were forced to escape with only their night clothing on.

The contents of the house were a total loss and the house was burned t the ground.

ATTENDS CREAMERY SHORT COURSE

A. D. Gimer, buttermaker at the Klemme Creamery, left on Tuesday evening for Ames, Iowa, to attend the Annual Creamery Short Course which is in session there for ten days. Mr. Gimer intends to spend a week at the short course. He is always on the alert to learn more concerning the making of fine butter and whenever there is anything doing in that line A. D. is right there with both feet on the floor and his eyes and ears open. Now when he gets back we expect hm to make some fine samples of butter and Ye Editor will be the judge. (That is one way to get butter cheap.)

Consistency, Thou Art!

A man laughs at woman's vanity then straightens his tie, brushes back his pompadour, carefully adjusts his hat and walks into a soft-drink parlor.—Exchange.

VACATION OVER, SCHOOLS OF KLEMME OPEN MONDAY

Several New Teachers On The Staff This Semester

The Klemme schools opened again Monday after being closed for the annual two weeks Holiday Vacation.

Some changes have been made in the teaching staff for this semester as some of the teachers who taught last semester were found to be unsatisfatcory and the board asked them to resign, as they were not working in harmony with each other and so the board saw fit to get a new teaching staff that would accomplish better results. The new teachers on the staff are Miss McKahan, of Stewart, Iowa, who will teach English and History in the High School Department and who takes Miss Belkens place. Mrs. Lester Stille of this place wil teach in the seventh and eighth grades, she takes the position vacated by Miss Ebert. Mr. Wilson, of Cedar Falls, Iowa, has been chosen as Superintendent and is a very capable man for this important position. He fills the vacancy of the former superintendent Collins. Miss Sullivan, of Osage, Iowa, returns to again teach the primary department. Mrs. Gibbs of this city again teaches up to the seventh grade. In all, the Klemme schools have a very good teaching staff for this semester and school work should run smoothly under this corps of excellent teachers. Supt. Wilson is married and has a two year old son. He will move the family to this city just as soon as possible. He is a young man and takes an active interest in school work, and under his supervision we expect to see the school progress rapidly in all lines.

CLEAN THE SLATE

We have a lot of subscriptions which become due the first of the year. Those knowing themselves to be in arrears on the Klemme Times please call and settle as soon as convenient. We will mai out statements in a few days to all who are back on subscriptions or who are now due.

Editor

GOOD TIME HAD AT THE NEW YEAR'S DANCE

Both old and young congregated at the Idle Hour Theatre last Friday or New Year's Eve to enjoy the big good time dance which has become an annual event in Klemme. To satisfy all both old fashioned quadrilles, two-steps and other dances were enjoyed besides all the latest dances for the younger generation. A number were here from Goodell and some from Garner. About forty numbers were sold at the dance. Everybody had a good time and they did a good job of dancing the old year out and the new year in and to make a clean job of it they stayed until two o'clock a. m.

BEN GREIMAN MAKES MOTOR SLED

Ben Greiman, living near Klemme, has the real thing when it comes to getting over the ice and snow at real speed. Ben has converted his flivver into a regular motor sled by putting some quick detachable runners under the front wheels and putting chains on the rear wheels to supply the power. The thing will hit twenty-five or thirty like a dream and no snow is too deep for this contraption to go thru. To make it real light Ben took every thing off that could be amputated from the flivves and still make i run. A fine feature of the machine is that the runners can be removed or put on in a very few minutes.

JOE FRANCIS WILL HAVE CLOSING OUT SALE

Joe Francis, who lives on the Henry Church farm near Klemme, will soon move from this vicinity as he has purchased an eighty acre farm near Ottumwa, Iowa. In this week's issue of the Times he has a large sale ad., and it will be well to look over what he has to offer at the sale. The farm which he has purchased in southeastern Iowa is a very fine eighty acre piece of land, lies rolling and is well improved.

Olaf Brynteson, manager of the Western States Lbr. Co. returned on Monday from his holiday vacation spent vistiing his folks and other relatives and friends at Odeboldt, Iowa. "Ole" looks fine since getting back and we presume he spent most of his time eating ducks, geese, turkeys and other holiday grub.

ODD FELLOWS HELD INSTALLATION OF OFFICERS MONDAY NIGHT

Banquet, Speeches, Good Time, Is Report

The Klemme Odd Fellows had a real good time Monday night of this week when they met at the hall for their annual installation of officers. This is quite an event with the Odd Fellows and they found the opportunity ripe for a good time along with the ceremonies. After the new officers had been duly appointed to their various stations the evening was turned over to the serious busines of seeing who could eat the most. "Nick" Ell, "Bill" Trafford and "Fat" Kluckhohn were on the feed committee and they ure did things up brown. "Fat" gained an everlasting name for himself as Coffee King for he presided over the coffee pot and they say he is an expert. When his wife reads this he will perhaps be put on "Kitchen Police" duty to make the breakfast coffee. 'Bill" and "Nick" also come in for their share of the honors. Their cooking must have been good for we haven't heard of any Odd Fellows lieing from the effects of the food yet. Rev. Buriff was given the floor as chief speaker for the occasion and he kept the jolly crowd in an uproar with his catchy, funny stories. He somewhat took advantage of Nick Ell we hear, for he soft of handed it out to the Democrats and Nick was the only one present. The boys all report a good time and are looking forward to more such events this winter. The new officers elected are: Chris Gram, Noble Grand; J. P. Larsen, Vice Grand; M. O. Barr, Secretary; Albert Yahnke, Treasurer; Elmer Fuller, Warden; Wm. Trafford, Conductor. Other minor officers were also appointed, the names of which we did not get. An entire change was made throughout the lodge.

CHRISTMAS BABY

A fine twelve pound baby girl arrived at the home of Mr. and Mrs. Will Neuhring on Christmas Eve. They are rejoicing over their fine Christmas present.

WHERE DID THE WINTER GO?

During Christmas week we had a spell of real honest-to-goodness winter weather but the latter part of last week the weather man must have run out of cold air and snow for he turned on the heat and now there is very little snow left on the ground and the weather is warm. Some have even claimed that they saw flies on the sunny side of the buildings. This is an awfult rick for the weather man to pull when everybody have their cellars full of good old high priced coal. Wish now we hadn't bought any coal. Local sports are even fixing up their rods and reels to get ready for fishing again. Some swell winter alright.

We have got to hand it to Ed. Ell this week. We stepped into his garage office the other morning and noted quite a change in the appearance. First of all, he repainted the whole works and then put new linoleum on the floor, the office fixtures were changed about and some old unsightly cabinets were discarded. In all, the place looks pretty nifty and the only improvement we could suggest would be for "Nick" to replace "Shimmel," the book keeper, with a good looking stenographer.

Mr. and Mrs. Derk Mossel left on Saturady for Grand Rapids, Mich., to attend the funeral of her mother, Mrs. A. Duteen. On the return trip they will stop at Detroit to visit their son, John Mossel.—Meservey Register

Mrs. H. H. Meinders and daughter Jennie went to Klemme Friday evening to visit the former's daughters, Mrs. Andrew Nelson and Mrs. Ed. Bachman and family; also Mrs. Leo Wilkins and family of Goodell. Mrs. Walt Wooton had charge of the switchboard during their absence. Miss Jenie returned home Monday.—Meservey Register.

Mr. and Mrs. Wm. Smith and daughters Mabel and Mrs. J. N. Day and son Dorance all went to Garner Saturday to eat New Year's dinner with the Walter Ross family. John Day had to stay at home that day and stay at the store. We presume he had store crackers and cheese for his dinner that day.

Helps the Circulation.

One of the largest New York hotels supplies each of its guests, who aver ge 2,000 a day, with a free copy o a morning newspaper.

BEIER AUTO COMPANY, THE NEW FIRM

January first found a new firm ni Klemme, The Beier Auto Company, managed by Carl Beier, son of Henry Beier of this vicinity. Invoices were completed and the deal entirely closed on that date when C. W. Wiles turned over the keys to the new firm. Mr. Wiles has been actively engaged in the garage and automobile business in Klemme for several years and has been successful in this line. He turns the business over to the new firm and they take charge of one of the finest garages in this part of the state. Klemme is fortunate in having two very good automobile garages, the other one of which we speak being the Ed. G. Ell Garage. Carl Beier is a capable young man, a graduate mechanic and an energetic young man in every way and we predict that he will make a success of the business. Mr. Wiles will not retire, however, as he retained the agency for the Hart-Parr Tractor and will spend his time selling that machine. Mr. Beier plans to handle the same line of cars as did Mr. Wiles, he may however, make some few changes in the business. We wish both the old and the new proprietors success.

BUILD 45 MILES HARD ROADS

Complete Frst Part of 350 Miles of Contracts For Hard Surfacing

Iowa has 44.65 miles more of hard surface road than it had a year ago. If materials can be gotten together and other difficulties overcome, 300 miles of contracts can be let for work next year according to the Iowa Highway Commission.

Including the work done late last year the primary road system now has a total of 53 miles of hard road. Cerro Gordo county has a total of 15 miles of hard surface road and leads all other Iowa counties in this respect. Seven miles of this road was built before the present system went into effect. Floyd county built 11.5 miles in the past season and has only a few miles left to complete hard surfacing the primary roads. Polk county was third, completing five miles.

Many counties were held up in the work bya scarcity of contractors. On November first there was 92 projects under consideration in 64 counties. This includes grading of 914 miles, graveling of 203 miles and paving 166 miles.

Besides thec ompletion of the paving for the past year, 83 miles of graveling and 514 miles of permanent grading were also completed.

As a measure of prepardness, Iowa contractors are urged by the Highway Commission to get materials, machinery and other supplies ready for the spring work. The Commission will be glad to advise as to the best places for purchasing, where to store and any other information desired by local officials.

LAND PRICE IS TOO HIGH

Investigation Shows Iowa Land Increased Beyond Real Value.

Iowa land ncreased in value $121 per acre during the last five years, according to data gathered by the agricultural economics department of Iowa State College, in connection with the United States department of Agrciulture. During the time from March 1919, to March, 1920, the land was raised in value $63 per acre. It was found in most cases the higher priced sales were in advance of the earning capacity of the land.

Most of the deals were carried on by the farmers themselves, contrary to popular belief that it was the real estate men. Over 65 per cent of the buyers and 56 per cent of the sellers were farmers.

Nearly all the land is paying only 3 per cent on its capitalization while interest on loans is running up from 6 per cent. This large margin of credit, they point out is a difficult margin for the farmer of average ability to handle successfully.

Harry Buss, son of Elko Buss of this place, left Monday night for Lincoln, Nebraska, where he will enter the Auto & Tractor School. The youngm an is mechanically inclined and the course at this school will fit him out as a first class auto mechanic

Arthur Pulfrey and Keith Pollock, Garner high school boys put on their skates last Wednesday and skated to Klemme on the river. They took the afternoon train back as they said skating was not very good. They took this exercise to keep up their physical training for basket ball work

"It's Home-Made"

. . . the two liittle words that mean de licious, wholesome, healthfull food.

The only question is---have you the range to bake all the delicious goodies that you would like to.

We want to make home-made cooking as easy for you as we have made it for many other housewives. And so we are bringing to your attention two of the famous Globe ranges that make wholesome, home-made cooking easy for every one---the Globe Supreme and the Globe Superb.

You will find it decidely worth your time to examine the Globe Superb and Globe Supreme Ranges at your first opportunity.

Do you remember, as a child, that wonderful aroma which filled the house on baking day? And can't you remember, as if it were only yesterday, how mothers or grandmothers pies, cakes, puddings, bread, or biscuits used to taste?

Home-made cooking means just as much to your family today as it did to you then.

We also handle Globe Furnaces

COMRADES OF PERIL

By RANDALL PARRISH

Copyright A. C. McClurg & Co.

"I HATE HER."

Synopsis.—Tom Shelby, a rancher, rides into the frontier town of Ponca, looking for a good time after a long spell of hard work and loneliness on the ranch. Instead, he runs into a funeral—that of Dad Calkins, a retired army man of whom little is known. A girl, still in her teens, survives Calkins. McCarthy, a saloon keeper and Ponca's leading citizen, decides that the girl, now alone in the world, should marry. She agrees to pick out a husband from the score of men lined up in her home. To his consternation, she selects Shelby, who had gone along merely as a spectator. The wedding takes place and the couple set out for Shelby's ranch. With them is "Kid" Macklin, whom Shelby has hired as a helper. On the way the girl tells her husband her name is Olga Carlyn, and also tells him something of the peculiar circumstances of her life. Upon their arrival at the ranch Shelby is struck down from behind and left for dead. He recovers consciousness to find that Macklin and his wife have gone. He starts in pursuit. He learns his wife is an heiress, that her abduction has been carefully planned and that she has been taken to Wolves' Hole, a stronghold of the bandits and bad Indians. Reaching Wolves' Hole, he is discovered by "Indian Joe" and forced to accompany him into the hole. Here he claims to be one of the conspirators and is locked up pending developments. He confides in a Mexican girl, Pancha, in love with Macklin, who intends to marry Olga.

CHAPTER IX—Continued.

—9—

"Si senor; I know the way that others do not. I get you out, but," passionately, "eet is not to save you. I belong here—see; with Juan, my brother. I am born outlaw, yet she must go! That I resolve. If she stay here I keel her. But 'tis easier way to have her married to you, an' safe."

"You love Macklin?"

"Si, senor," proudly, "why not? He say he love me; yet she come. Madre de Dios! I hate her! She take my love! She! Eet shall not be. You swear, senor, that she go with you, an' never come back any more?"

"Yes, Pancha, I swear that. Once we are away she shall never come back," he answered soberly, impressed by the violence of her passion, "yet how is that to be done?"

She glanced apprehensively behind, still clinging tightly to her perch, lowering her voice again into its former cautious whisper.

"Listen, senor; I tell you. Eet is late now, for I wait before I come, an' think eet all out, so I know what to say. Indian Joe, he bad man, verra bad man, an' I much afraid. But now he sleep in there; I creep past while he breathe, an' not wake heem. 'Tis because he drank. Juan, my brother, go up to the cove to find Senor Handley, an' he not be back teel morning. Tonight eet must be done, an' so they will not know I helped. Is eet so?"

"Yes; I understand; yer have opportunity tonight; but I must get away so no one shall suspect yer had any hand in it."

"That 's eet," eagerly. "Indian Joe, he keel me if he found out; maybe my brother, too. I see heem keel men, quick, like that. Then he laugh. So

He Managed to Scrape Painfully Out of the Hole.

I think; he look in here, but not to search, so he not sure what might be. Perhaps there was a knife under the bed, he dropped somewhere what you found—see? Maybe you had eet hid in your boot—how he know that?"

"Yes, but I haven't, Pancha."

"So I know; but I breeng one—see," and she pressed the handle into his hand. "How he know how you get eet? Eet is strong, sharp, so you cut these bars, an' when morning come you are not here. Who knows how eet happen, senor? I am also asleep, an' you are gone; 'tis the mercy of God."

Shelby caught his breath to her expressive gestures, his fingers gripping the knife.

"I doubt if I can get through that hole," he said mournfully, "after the bars are cut. I'm pretty big."

"But you must, senor; there is no other way," she insisted impatiently. "The blade is strong, sharp; eet will dig out the log, but do not be long. See—there is a tree yonder; I will wait you there, an' show where you must go, so there be no trail. You come to me quick, but be still like death. Madre de Dios! 'tis the only way."

She was gone before he could protest again, vanishing into the black night so swiftly and silently he could only stare out helplessly through the bars. Yet she had left hope and determination behind. With teeth set he began the work, finding the steel blade effective against the tough hickory. It was no light job, at that, but he plied the knife desperately, possessing some skill and unusual strength of wrist and fingers. The stakes gave way one after the other, but he was not satisfied until he enlarged the opening somewhat by removing all bark from the logs, and prying loose the box frame. This required all of half an hour to accomplish, yet left an aperture through which he believed he might force his body. At that he found no room to spare; but, by venturing it head first, screwing his shoulders through one at a time, and drawing in his breath tightly, he managed to scrape painfully out of the hole, clawing at the rough outside bark for purchase, and finally coming down face first onto the solid earth. At that, he made little noise, but his flesh smarted, and for a moment he rested where he fell, confused and panting for breath. The night was so black there in the shadow of the great hills, he could scarcely determine directions, yet the girl had pointed toward the right, and, as soon as he could attain his feet, he advanced cautiously that way, with hands held out before him. The path was rocky and uneven, probably leaving little trace of his passage. She touched him before he was even aware of her near presence, and then she was but the dimmest outline, her face indistinguishable through the gloom.

"Speak low, senor," she whispered briefly. "Come with me this way."

He permitted her to lead him forward over ground sloping upward, but before they had thus advanced fifty yards, Shelby stopped, determined to question her purpose.

"Where are you taking me? To Olga?"

"No, senor; not now. I must leave you in safety first. Later I bring her to you. Why you ask? You not trust me?"

"Yes, I trust you, Pancha; but isn't it better that I understand the plan? Then we can work together."

She drew in a quick breath impatiently, her fingers clutching at his sleeve.

"Dios! this is not time to stand and talk, senor," she burst forth, "yet listen, if not do otherwise. There is no time left tonight in which to escape. I must be back in the house before Indian Joe wakes, or my brother returns. All I can hope to do is hide you where you not be found. Then we must plan what is best to do."

"You know where she is?"

"Si, senor; I know; yet eet will not be easy to get her away. She is not left unwatched, and nothing can be done tonight. I must watch and wait. Eet will only be safe when Senor Macklin and my brother are both away."

"You mean that I am to hide out yonder somewhere until you are ready?" he questioned. "Is that the scheme?"

"There is no other thing possible. Even that may fail. Senor, do not be a fool," she urged earnestly. "I know the danger of all this; you not realize even yet what eet means to be a prisoner in Wolves' hole. These men keel; it is their only law. I risk my life to do this, and there is but one chance of success. Alone, unaided, you can never get out of here—never. Why? you ask. Because, senor, every pass is under guard; they are never left open."

"Then how are we to go?"

"Along a path known only to myself and one other, senor. A young Indian found eet by accident and confided his secret to me! He come, and went that way for a year, but no one else know. Once he took me half way to top; eet is rough, yet can be followed. Now you see I am right?"

"I have no choice; I owe you my life already."

"Then do as I say, senor. I will leave you where you can never be found. I have food here in this sack. You must wait there hidden until I come. Eet may be a day, two days, three days; that make no difference. You have my pledge that I will bring her. I do not lie. Then you will do this, as I say?"

"Yes, Pancha."

"Gracias! eet will be at night when we come, and you will have to climb those rocks in the dark. You will need stout hearts for that trip; but eet is better to risk than stay here an' die, senor. Now I tell you—Indian Joe will believe you found that knife, and cut your way out alone; he will try to follow, an' he is like wolf on the trail. He will not believe you can get away; my brother is great tracker, an' they think eet easy to run you down. Me fool them, senor."

"But how? they will surely see your footprints."

"Mine!" she laughed softly. "Not to ever know them, senor—see; eet is man's boot I wear, and scarcely have stepped off solid rock. Now we go to the stream yonder, and then wade up through the water. There will be no trail. Let us not wait, senor."

The man followed without a word, touching her with one hand in guidance. They were upon a crest of solid rock, worn smooth by the ages, and so advanced unchecked for a hundred

"You Go on Alone From Here, Senor."

feet, until the ridge suddenly terminated at the bank of a narrow stream. A single step, and both were standing in the water, and she had grasped his hand.

"Eet is swift, but not deep," she said confidently. "I have waded eet many a time. We must hurry."

He took the bag of provisions and swung it across one shoulder and together they began plowing their way through the downward rush of water. It was tiresome, but they plunged steadily forward, finding the bottom firm. Shelby did not know how far they advanced, nor could he tell, in the darkness, the exact nature of their surroundings. His impression was that they were penetrating a narrow side ravine, between great overshadowing masses of outcropping stone, which intensified the gloom. Every step took them higher above the floor of the Hole, and, at times the stream became a veritable torrent, against which they scarcely could make progress. The girl kept close to the rocks on the right, and struggled forward bravely, never loosening her grasp on his hand. Meeting as he must the stronger sweep of the current, Shelby felt the strain, and was glad when she finally came to a halt.

"Eet's here," she said, "a few steps more, and I leave you. The greatest danger is my not getting back in time."

There was an opening in the solid rock of the wall, a mere crevice, so concealed by tangled shrubbery as to be invisible even in daylight. How she had recognized the spot in that darkness was a mystery; through the sense of feeling probably, for her hands instantly parted the interlaced branches, and she crept through them with Shelby, on his hands and knees, close behind. They emerged into a gulch, as though some giant ax of the gods had cleaved the very face of the cliff, a gulch dry, scarcely four feet in width, rock walled on either side, and almost a tunnel because of stunted growth, where dwarf oaks had found some lodgment in cracks and crevices. Pancha stopped, breathing heavily from the exertion of the climb.

"You go on alone from here, senor," she instructed, the words panting between her lips. "There is nothing to do but follow the gulch. A hundred yards and there is an opening at the right, a small cave. You will feel eet with your hand. You need have no fear to enter, and no one can ever find you there. That is where you will wait until I come."

Shelby tried in vain to distinguish her outlines; he could only be sure of her presence by the voice.

"Do not use any fire," she went on warningly, "or show yourself by daylight. They will seek you, and watch these cliffs. Eet may be several days before I will dare act; you must be patient. When we come I will bring arms, but I didn't dare touch any tonight."

"You will not tell me where my wife is being held?"

"What good, senor! You could aid her not at all. There is no great harm coming to her yet. Sacrista! why you worry about her? I bring her with me; did I not promise?"

"Yes, I trust you, Pancha," he said warmly, "and will do just what you say. But—but, don't you understand? If I knew where she was I would feel better."

She laughed almost scornfully.

"Bah! what the difference, senor? You not know if I told you. But 'tis not far away; perhaps by daylight you might see eet from up there; a log house all alone under the bluff. Yet you lie hid, senor, and trust all to me."

"I have promised that."

"Good, senor; I will go."

She drew her hand away, and he knew she was gone, although no movement of her figure could be distinguished. Shelby swung the bag of provisions again to his shoulder, and began feeling his way blindly forward. He had retained the knife, with which he had effected escape from the cabin, and, although the point of the blade had been broken, he did not feel entirely unarmed. There was no possibility for him to lose the way, the unbroken walls shutting him tightly in, so that even the star-decked sky was invisible, while the path he must follow led almost dizzily upward. It was boulder-strewn, and he fell twice, yet toiled steadily on, never permitting his hand to leave the guidance of the wall to the right, and carefully testing the placing of each foot in fear of some pitfall. He could neither judge time nor distance, yet it was long before light came into the sky, when he finally clambered over a rock barrier across the path, and came upon a shelf of stone, the left wall of this strange cavern abruptly disappearing. Fearful of what precipice might yawn there, as soon as he again attained his feet Shelby flattened himself against the one rock front remaining, scarcely daring to venture forward more than an inch or so at a time. A few feet brought him to the cave's mouth, a mere hole, scarcely wide or high enough to receive his body. He explored the black interior to the length of his arms, finding it larger within than at the entrance. She insisted there was no danger, and the silence seemed to prove the place contained no inhabitant. Doubtless the open shelf of rock would be exposed to view from the valley below with the first flush of day. To avoid discovery he must creep in out of sight.

This was accomplished without difficulty, the floor being fairly level, and the roof rising so that he could almost stand erect. Shelby explored every inch of the space, knife in hand, and not entirely satisfied until the task was completed. It was only a box of a place, less than fifteen feet long, and perhaps half as wide, narrowing at the top, as though in some great cataclysm of past ages two masses of rock had been hurled together, leaving this little jog between. It was hot in there, and Shelby, dragging after him the bag of provisions, removed his coat. A few moments later he rolled it into the form of a pillow, and lay down, staring up at the black vault.

He could think now, recall all that had occurred so swiftly, and weave this and that together. He had acted recklessly; there was no doubt of that. No one but a blind fool would have ever ventured alone into this place to free a prisoner. He should have ridden to Ponca, and called upon his friends for help; perhaps he might even have been able to obtain the services of a troop of cavalrymen from the fort down below—the major knew him and would believe his story. Why hadn't he done this? Why had he been so rash, and bull-headed? The answer flashed into his mind, as though some voice had spoken—it was love of Olga Carlyn! He knew it instantly; made no further effort to deceive himself. Lying there in that black silence, staring blindly upward, he saw the woman again as plainly as though in the flesh—saw her, and knew that he loved her. Her eyes smiled at him, with such wistfulness in their depths; there was nothing sullen about her expression any longer; she was all woman, and—he loved her.

He covered his eyes with an arm, and rolled over. God! wasn't there anything he could do but wait? He felt wild to act; to accomplish something; to strike some definite blow in her behalf. His wife! She was his wife—Olga Carlyn! It meant much to him now. How deathly still it was; how terribly dark. He felt hot and stifled there in the cave, yet did not move, or change his position, and so he finally fell asleep.

CHAPTER X.

The Darkness of the Cabin.

It was broad daylight—a dull gray within the small cave, but bright sunshine without—when Shelby aroused himself, and looked about in an instant of bewilderment. As the truth of his situation reasserted itself, he sat up, conscious of stiffness in every joint, yet reinvigorated by several hours of rest. He faced a day of inactivity, a hard demand upon a man of his temperament, and he was as slow as possible over a meager breakfast, his eyes continually wandering toward the narrow opening, as his mind again reviewed the occurrences of the day before.

Finally, unable to resist the temptation longer, he ventured to thrust his head through the entrance to learn something more definite as to his surroundings. All he could perceive was the shelf of rock, with a considerable coping about its outer edge, together with a few feet of the descending trail. On the other hand a new cleft appeared in the front of the cliff overshadowing him, and he suspicioned that the path he had followed the night previous continued upward—was, perhaps, that secret passageway which Pancha had said led finally to the top of the gorge, and along which she planned to guide their future escape. Beyond the outer edge of the shelf there was nothing but sky visible, and, believing the coping would conceal his movements from observation below, Shelby pushed his way out through the opening, and crept on hands and knees to where he cautiously could gaze over.

He was higher up on the cliff than he had previously realized, although its precipitous front yet towered menacingly above. The view below was like that of a distant picture, its details indistinct. He felt no longer any special fear of being observed, however, and leaned far enough forward to see clearly up and down the broad valley. His position lay somewhat removed, around the angle of a side ravine, so that he could not trace the entire course of the Cottonwood, or even discern the waterfall beneath which he had entered the Hole. Yet he had a glimpse of the main stream, could pick out what he believed to be the log house from which he had escaped, while, within a grove so as to be scarcely distinguishable, appeared the roof of another, smaller building. He would not have noticed this, but for a thin spiral of smoke arising from the chimney. Pancha had said the place where Olga was confined was visible from this spot. Could this be it? He stared down a long while, but without reward.

Yet there seemed to be much passing and repassing along the main valley; black, ill-defined figures of men on horseback almost constantly visible. He was surprised at the number, never having supposed that this colony of outlaws was so numerous. Another thing, while he could not clearly distinguish such small objects at that distance, the majority of these riders had the appearance of being Indians. Could they be Sioux warriors gathered here in preparation for some raid on the exposed settlements? or was it possible that the troops had already struck, and driven the remnants of scattered war parties into this Hole for refuge? In either case their presence in such numbers rendered his own position so much more precarious, and increased the danger surrounding Olga. He felt that, in spite of his pledge to the Mexican girl, he could not remain in his hiding place quietly, without endeavoring to learn more of what had actually occurred during the night.

Indeed he could perceive no reason why he should remain entirely inactive. At the very best she could accomplish nothing before night, and had held out very little hope for even then. There were no signs that he was being sought after down below. It might be that in the excitement of other happenings, his escape had been considered as of minor importance; that Indian Joe, convinced that he could never get out of the Hole unobserved, took no immediate interest in trailing him. What was the use, when he must eventually surrender? It would be a simple matter to steal cautiously down through that deep cleft in the rocks, as far, at least, as the stream below. He would be concealed all the way, and once there, hidden securely among those thick bushes, he might then learn what was actually occurring. It would be far better for him to know. Besides, this would be no disloyalty to Pancha; even if she sought him he would still be in the path she must follow, and, so long as he remained undiscovered, just where he was concealed could make no possible difference. The argument satisfied his mind, because he felt he must act; must make some effort of his own.

"See; touch me. You thought I was dead?"

(TO BE CONTINUED.)

Old Bell Splendidly Preserved.

In an old graveyard in County Antrim, Ireland, a farmer, while plowing, unearthed a bronze church bell weighing more than 160 lbs., and believed to be over 300 years old. The bell is in a splendid state of preservation, with a clear, powerful tone. The old Kirkmoyle parish church, where the find was made, has been in ruins since 1622.

Idleness.

I am not the only one that condemns the idle; for once when I was going to give our minister a pretty long list of the sins of one of our people that he was asking after, I began with: "He's dreadfully lazy." "That's enough," said the old gentleman, "all sorts of sins are in that one."—C. H. Spurgeon.

KREMOLA MAKES THE SKIN BEAUTIFUL
Does wonders for a bad complexion. Dealers or mail, $1.25. Dr. Campbell Co., 2975 Michigan Avenue, Chicago.

The Bitter Truth.

Joseph Hergesheimer, a writer of fiction, dined recently with a friend at a New York restaurant.

The novelist was condemning the prevalent commercial spirit in literature, and said:

"In true art money should never be an object."

At this point in the conversation the waiter brought in his extravagant bill and Mr. Hergesheimer, scanning the document, sighed and remarked:

"It is true that in art money should be no object—but it should be no objection, either, in these times."

Never permit a costive tendency to develop into a habit; if the habit exists have recourse at once to Garfield Tea.—Adv.

Synonyms.

Men who wrestled with the destructive French language over there will appreciate the spirit and sympathy of a certain French bride who now is mastering English.

"Ah!" she says, "your English is at once so difficult and so delightful. There are so many acts for you under one name. In my little book I keep a list of all you do when you "run in" or "run down" or "run out" and I find a new deed each day. And the synonyms—so many interesting words all for one dull object."

A few minutes later, speaking of a pleasant Sunday supper, she said: "And we had that so good American dish, bungalow cheese."

Women Who Suffer

Should find relief from their sufferings by taking the woman's temperance Tonic and Nervine, which has helped so many women, some of them right in your neighborhood. When the household cares and the worries of everyday life have dragged you down, made you unhappy, and there is nothing in life but headache, backache and worry, turn to the right prescription, one gotten up by Dr. Pierce fifty years ago, which has helped many thousands of women in this country. It is called Dr. Pierce's Favorite Prescription and can be had in every drug store in the land, in tablet or liquid form.

HASTINGS, NEBR.—"About seven years ago I became very miserable with weakness from which women suffer. I suffered with pains all the time. One of my neighbors urged me to take Dr. Pierce's Favorite Prescription because it had cured her of similar symptoms, so I decided to try it. I took four bottles of 'Favorite Prescription' before I felt satisfied as to my condition and feel certain that 'Favorite Prescription' saved me from the operating table and the surgeon's knife. Two years afterwards when the turn of life commenced, I took 'Favorite Prescription' again with the result that I came through strong and healthy and still maintain wonderful health."—MRS. MARTHA STRAYER, 515 South Denver Street.

A Delightful Diagnosis.

"Well, girlie, what did the oculist say about your eyes?"

Oh, he was the nicest young oculist you ever met."

"Heh?"

"Said my eyes were beautiful."

WOMEN NEED SWAMP-ROOT

Thousands of women have kidney and bladder trouble and never suspect it.

Womens' complaints often prove to be nothing else but kidney trouble, or the result of kidney or bladder disease.

If the kidneys are not in a healthy condition, they may cause the other organs to become diseased.

Pain in the back, headache, loss of ambition, nervousness, are often times symptoms of kidney trouble.

Don't delay starting treatment. Dr. Kilmer's Swamp-Root, a physician's prescription, obtained at any drug store, may be just the remedy needed to overcome such conditions.

Get a medium or large size bottle immediately from any drug store.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Adv.

Introducing Himself.

"I'm a little stiff from lacrosse."

"Oh, Wisconsin?"—Lampoon.

As usual, when a precedent is broken, it is proved that it shouldn't be.

Quinine in this form does not affect the head—Cascara is best Tonic Laxative—No Opiate in Hill's.

ALL DRUGGISTS SELL IT

Why Are Skin Diseases So Difficult to Overcome?

When your skin breaks out with itching eruptions, tetter, rash, eczema, psoryasis, or other terrifying disorders, temporary relief will do you but little good, for soon all the itching and irritation breaks out afresh with renewed fury, and you soon realize that local remedies such as ointments, salves and similar treatment will never rid you of your trouble.

These troubles originate in the blood, and if you expect real substantial relief you must treat them through the blood.

The best remedy for this purpose is S.S.S., the fine old blood remedy that purifies the blood of disease germs, and thus restores the skin to a normal and healthy condition.

Begin taking S.S.S. today, and write a complete history of your case, and our medical director will give you expert advice without charge. Address Chief Medical Adviser, 161 Swift Laboratory, Atlanta, Ga.

ARTIFICIAL DAY FAVORED BY HEN

Poultry Flock Given More Time for Eating and Exercising During Winter Season.

INCREASES EGG PRODUCTION

Many Farmers Find it Profitable to Illuminate Houses for Several Hours Each Day to Encourage the Pullets.

Domestic fowls originated in the tropics where the days and nights are of about equal length. As a result of this, the reproductive and digestive systems of the hen are developed to fit the environment of a 12-hour day and a 12-hour night. For this reason she is somewhat like an alarm clock, except that she must be wound up about every 12 hours instead of every 24. In the winter in the North, her digestive system strikes at about 3 or 4 o'clock in the morning. As she is unable to locate food in the dark she has no alternative but to wait until daylight or until the caretaker gets around to feed her.

Habits, Not Nature, Changed.

Up in the north-temperate zone

Large A-Shaped Coop Used by Government Poultry Farm in Artificial Lighting Experiments.

where during the fall and winter the nights are from 13 to 15 hours long the transplanted domestic fowl from the tropics has changed her habits but not her nature. During this time she takes her vacation when she has the least to eat and to do. This is from necessity rather than from choice, for, given an opportunity to eat, exercise, and enjoy herself for 12 hours a day, she lays nearly, if not quite so well, as during the summer months.

Acting on this theory many poultry keepers have found it profitable to light their poultry houses for several hours each day. This lengthened day, together with the right kind of feed and plenty of exercise, has been found to increase to a marked degree the number of eggs laid by pullets in the fall and winter. It does not pay to provide light for older hens. A 14-hour day for the laying flock during the winter months is the aim of those who are following this practice.

Experiments are being carried on by the United States Department of Agriculture at the government poultry farm at Beltsville, Md., for the purpose of securing more data on this phase of poultry work. The results secured thus far corroborate the testimony of others as to the value of illumination in hen houses.

The birds used in the government experiments are fed four times a day, at eight, twelve, four and some time after dark. This last feed is for the birds' breakfast. In addition to the four feeds a dry mash is kept constantly before the birds.

By means of an ordinary alarm clock an electric switch is turned on about 4:30 in the morning. Care is taken to increase the length of the time of illumination gradually or the effect on the birds would be disastrous. At the close of the season the decrease must be made slowly. From November 1, the opening of the pullet season, to April 1 is the time when lighting is usually provided for fowls.

To secure the desired results it is necessary not only to provide food ready for eating when the birds awake, but also water. In very cold weather some special means of heating it must be provided or the watering trough will be frozen over. The birds will not do well if drink is not available also. A small oil lamp under a bucket, an electric attachment for slightly heating the water, and a watering tank insulated somewhat after the idea of a fireless cooker are the methods used for keeping the water for the flock at a temperature above freezing.

How to Save Light.

In a pen 20 by 20 two lights rather than one should be used. A wide-angled reflector that will throw the light to all parts of the building also helps to get the best results from the amount of electricity used. To save illumination the windows should be placed when feasible on the south, east and west sides of the building.

SELECTING BEST COCKERELS

Male Bird Should Have Short, Stout Legs and Full Breast—Comb Is Good Index.

In selecting cockerels, they should have short, stout legs and full breasts. The comb is also a good index in judging the maturity of a male, as some are far ahead of others hatched at the same time. Good judgment goes a long way in selecting fowls.

HOME-MADE HIDES ARE TOO UNCERTAIN

It Does Not Pay Farmer to Tan His Own Leather.

Packing Houses Have Considerable Advantage Because of Ability to Carefully Grade Skins—Holes Are Avoided.

Apparently it doesn't pay the farmer to tan his own leather. The bureau of chemistry, United States Department of Agriculture, is conducting leather-making experiments upon the scale to which the average farmer would have to adjust his work, and specialists say that the results obtained thus far do not warrant general practice. Good leather can be made in individual tanneries, but the results are too uncertain to give reliable profits.

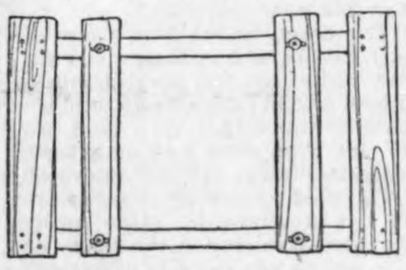
The work was taken up by the department when it became evident that the farmers were feeling the injustice of a transaction wherein they sold a whole cowhide for less than they paid out for a pair of work shoes—an occurrence not at all unusual. Investigation shows that the leather dealer is not entirely to blame for the low prices that the farmer receives for his hides. Too often the hide from the farm cow is taken off in a careless manner that leaves the skin full of cuts and holes—farm hides are never as uniform as those bought from the packing houses, where the animals are carefully graded and the skins removed by expert skinners. For that reason the hide buyer is always willing to pay more for the packer's product than he can offer the farmer.

Then, too, the farmer sells his cowhide to the junk dealer, who deducts his profit from the price he pays. Whenever it is possible to collect a number of hides and skins it will pay the owner to deal directly with a large dealer, the specialists say.

ADJUSTABLE CREEP FOR PIGS

Boards Held Perpendicularly by Bolts May Be Close Together or Far Apart.

Here is an adjustable hog creep that may be used to admit to a pen or feed lot pigs up to a certain size, and exclude all above that size. Usually the boards of a hog creep are horizontal but in this case they are perpendicular, says a writer in Successful Farm-



Adjustable Hog Creep.

ing. The hogs can always pass through without stooping, and since there is no board to rub along their backs there is less danger of injuring them. The two outside boards are nailed to the cross-pieces while the two middle boards are held in place by bolts which pass through elongated holes. These two middle boards may be close together or far apart depending upon the size of the hogs to be excluded.

INCREASE IN ALFALFA CROPS

Larger Yields Secured by Oregon and Washington Farmers by Application of Sulphur.

Farmers in Oregon and Washington have greatly increased their alfalfa crops by the application of sulphur. This practice is based upon the results of investigations by the experiment stations in these states as well as upon demonstrations of the use of sulphur on alfalfa conducted by the county agricultural agents in co-operation with specialists from the agricultural college. In Deschute county last year 285 tons of sulphur were used, at a total cost of a little more than $14,000, and the increased yield, reckoned at $20 a ton, was $120,000. In Jackson county 277 tons, costing about $13,000, are estimated to have increased the yield $110,000. In Klamath county 98 tons, costing $5,400, gave an estimated increase of $40,000, reckoning alfalfa at $15 a ton. Demonstrations in Josephine, Wallowa and Wasco counties give a similar ratio of results. The first experiments in sulphur fertilization in these states were made in 1912. Rapid development of the innovation was made possible through the system of county agents and key men who were practical farmers.

GUTTERS KEEP CELLARS DRY

Cement Ditches Carry Water From House Far Enough to Prevent Injury by Seepage.

A few homemade cement gutters will drain away the water from the gutter pipes and help keep a cellar dry. The cement ditch can be 8 inches wide, 2 inches thick and widened at the receiving end to resemble a shallow platter, says the United States Department of Agriculture. It should be sufficiently long to carry the water from the gutter pipe far enough from the house foundation to prevent seepage. If the work is set flush with the ground it offers no hindrance to passing feet or to the lawn mower.

No Wonder.

"How do you do, sir?" saluted the suave agent at the door. "I am offering to the few persons in each community who are of sufficient culture to appreciate it this valuable literary work, which undoubtedly—pardon me, but what is the matter with the lady at the telephone there? Is she having a fit or—"

"That's my wife," replied honest Farmer Fumblegate. "She is listening in on the party line while a lady who stutters is relating in confidence to another lady who is deaf the details of a right revolting scandal."—Kansas City Star.

Dont Forget Cuticura Talcum

When adding to your toilet requisites. An exquisitely scented face, skin, baby and dusting powder and perfume, rendering other perfumes superfluous. You may rely on it because one of the Cuticura Trio (Soap, Ointment and Talcum). 25c each everywhere.—Adv.

Got the Last Word.

Mrs. Scrapp—The doctor says I crave things that don't agree with me.

Scrapp—That's nothing. I once had the same trouble.

Mrs. Scrapp—When was that?

Scrapp—When I married you.

HELP THAT ACHING BACK!

Is your back giving out? Are you tortured with backache and stabbing pains? Does any exertion leave you "all played out?" Feel you just can't keep going? Likely your kidneys are to blame. Overwork, colds, hurry and worry tend to weaken the kidneys. Backache is often the first warning. Headache and dizziness may come, too, and annoying kidney irregularities. Help the kidneys with *Doan's Kidney Pills*—the remedy recommended by thousands. *Ask your neighbor!*

An Iowa Case

S. B. Imel, 1321 Brookdale Ave., Charlton, Iowa, says: "My back troubled me and the misery was so intense I couldn't rest. My kidneys acted irregularly, at times too frequently. I heard about Doan's Kidney Pills and got a couple boxes. After taking them the troubles were over and I have not been bothered since."

Handy tin boxes of 12 tablets cost but a few cents—Larger packages.

Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid

"NEFS" NO LONGER IN USE

Once Popular Piece of Plate Has Altogether Disappeared From the Tables of Royalty.

So rare is the nef that to most people the very name is unknown; not more than six specimens exist anywhere in the world. The other day a silver nef, not more than 22 inches high, was sold by private treaty in London, Eng., for the huge sum of $23,500. At Christie's last year a slightly smaller one fetched $16,500 at public auction. The reason for these very high prices is that the nef is the rarest piece of antique plate in existence. Shaped like a ship, and beautifully modeled, nefs were nearly always made by the Seventeenth century silversmiths, who specialized in them, to the order of crowned heads. Their ostensible use was to hold wine or other beverages in the hull of the vessel, the liquid being delivered through a spout in the bows. Kings made presents of them to other kings. Most nefs were so constructed that the wine, being once inclosed, could not be tampered with; no slight advantage in the days when poison was a recognized agent for the removal of obnoxious monarchs by their disaffected subjects.

At the Literary Meeting.

Literary Lady—"Are you fond of Lamb, sir?" Literary Gentleman—"Essays or stew, ma'am?"

KNEW WHAT WOULD HAPPEN

John, for Once, Thought of an Effective "Comeback" during a Little Matrimonial Tiff.

Judge Gary of the United States Steel corporation was discussing marriage.

"Many a marriage which began as a pure love match," he said, "develops into an eternal wrangle. Haven't you seen marriages wherein the contracting parties do nothing but argue and fight and contradict each other over trifles from daylight until dark?

"I remember dining once with such a menage. When the soup came on they started an argument about the price of parlor carpet or some such ridiculous matter, and the serving of the fruit saw this argument at its height.

"Then the wife interrupted herself to say to her husband plaintively:

"'I don't know what would happen, John, if you ever agreed with me on any topic.'

"'I'd be wrong,' said John. 'I'd be wrong.'"

Widespread Use of Electric Power.

If all electrical energy in the United States was suddenly withdrawn, the loss to industry would run into the billions. Practically all of the 275,791 manufacturing plants of the nation, representing $22,790,980,000 in invested capital, use electric power in one way or another.

If your Coffee-Pot has boiled too often

If too many cups of coffee have set your stomach and nerves on edge, put the pot on to boil again-

But this time use

POSTUM CEREAL

in place of coffee

Boil it a full fifteen minutes after boiling starts and you will bring out its rich, satisfying flavor.

The benefit to health will soon be apparent.

CONDENSED CLASSICS

BEN HUR: A TALE OF THE CHRIST

By LEW WALLACE

Condensation by Prof. William Fenwick Harris

Lewis Wallace, generally known by the shorter name Lew, was born in 1827 at Brookville, Indiana, and perhaps was, quite unconsciously, potent in spreading the idea, to some, that in that state is located the literary center of this country. He died in 1905.

Like the students of today in the great struggle, he left his books for the Mexican war. He served again in the Civil War and rose to be major-general in the volunteer army. As after the Mexican episode, he returned again to the law; he was Governor of Utah from 1878 to 1881, and minister to Turkey from 1881 to 1885, when as a good diplomat he won the esteem of the late unlamented Abdul-Hamid and could really put through business with that scientifically dilatory tyrant.

He is known by his three books, "The Fair God" (1873), "Ben-Hur" (1880), and "The Prince of India" (1883). The first is a very clever reconstruction of the story of the conquest of Mexico by the Spaniards. The reader feels a great sympathy with the highly developed natives who fell helpless before the superior arms of the invaders. The story, however, is by no means to be put in the same class with "Ben-Hur." The skill, the knowledge, the reverence with which the story of Christ is told (largely through the lives of others) have made "Ben-Hur" one of the books to take a secure hold on the public, both as book and on the stage, where the famous chariot race has won a classic place.

"THE workmen put their hands to the cross and carried it, burden and all, to the place of planting. At a word, they dropped the tree into the hole; and the body of the Nazarene also dropped heavily, and hung by the bleeding hands. Still no cry of pain—only the exclamation divinest of all recorded exclamations:

"'Father, forgive them, for they know not what they do.'

"The cross, reared now above all other objects, and standing singly out against the sky, was greeted with a burst of delight; and all who could see and read the writing upon the board over the Nazarene's head made haste to decipher it. Soon as read, the legend was adopted by them and communicated, and presently the whole mighty concourse was ringing the salutation from side to side, and repeating it with laughter and groans:

"'King of the Jews! Hail king of the Jews!'

"The sun was rising rapidly to noon; the hills bared their brown breasts lovingly to it; the more distant mountains rejoiced in the purple with which it so regally dressed them. In the city the temples, palaces, towers, pinnacles, and all points of beauty and prominence seemed to lift themselves into the unrivaled brilliance, as if they knew the pride they were giving the many who from time to time turned to look at them. Suddenly a dimness began to fill the sky and cover the earth—at first no more than a scarce perceptible fading of the day, a twilight out of time; an evening gliding in upon the splendors of noon. But it deepened, and directly drew attention; whereat the noise of the shouting and laughter fell off, and men, doubting their senses, gazed at each other curiously; then they looked to the sun again; then at the mountains, getting farther away; at the sky and the near landscape, sinking in shadow; at the hill upon which the tragedy was enacting; and from all these they gazed at each other again, and turned pale and held their peace.

"'It is only a mist or passing cloud,' Simonides said soothingly to Esther, who was alarmed. 'It will brighten presently.'

"Ben-Hur did not think so.

"'It is not a mist or a cloud,' he said. 'The spirits who live in the air—the prophets and saints—are at work in mercy to themselves and nature. I say to you, oh, Simonides, truly as God lives, he who hangs yonder is the Son of God.'

"And leaving Simonides lost in wonder at such a speech from him he went where Balthazar was kneeling nearby, and laid his hand upon the good man's shoulder.

"'Oh, wise Egyptian, hearken! Thou alone wert right—the Nazarene is indeed the Son of God.'

"Balthazar drew him down to him and replied, feebly, 'I saw him a child in the manger where he was first laid; it is not strange that I knew him sooner than thou; but oh that I should live to see this day! Would that I had died with my brethren! Happy Melchior! Happy Gaspar!'

"'Comfort thee!' said Ben-Hur. 'Doubtless they too are here.'

Within the frame of the story of Christ is told the tale of Ben-Hur, beginning with the appearance of the three wise men, Balthazar, Melchior and Gaspar, and ending with the sublime tragedy on Golgotha. From the days of the scenes at the manger until the culmination of the great story, the figure of Christ appears but once, and then for a moment, but over all that happens in the intervening years hovers the gentle spirit; thrilling as the episodes are in themselves, strongly as the characters are portrayed, they are but a preparation for what is to follow, a mere worldy setting for him who was too great for all save a few to understand at that time.

Some twenty-one years after the scenes at the manger, a young Jew, Ben-Hur, a prince of Jerusalem, rich, happy, ambitious, was standing by a parapet of his palace, watching the progress of Valerius Gratus, imperial governor of Judea. As the Roman passed beneath the wall amid the jeers and insults of the Jews the young prince leaned far out to see the new governor; a tile was displaced and, as bitter fate would have it, fell full upon the governor. The accident was not fatal; but it was an opportunity for exemplary justice, especially as the estates of the Jew were very desirable to the governor and his friend Messala, hitherto almost brother to Ben-Hur though the latter had been. The unhappy Jew was sent as a rower to the galleys, where the limit of life was at most but a year. His mother and sister were immured in a secret cell in the Tower of Antonia, where they were doomed to the fate of the lepers. The only act of kindness Ben-Hur could remember during the years that followed was on the day he was dragged to the galleys. "The hand laid kindly upon his shoulder awoke the unfortunate man, and looking up, he saw a face he never forgot—the face of a boy about his own age, shaded by locks of yellowish bright chestnut hair; a face lighted by dark blue eyes, at the time so soft, so appealing, so full of love and holy purpose, that they had all the power of command and will." That was in Nazareth.

How Ben-Hur in time became a rower on the flagship of Airrus, duumvir and admiral, how the flagship was destroyed in a great sea fight, how Ben-Hur rescued the admiral, became his adopted son and heir, learned at Rome the manner of Roman war and Roman sports, returned to the East a Roman officer in the train of a consul setting forth on a great campaign against the Parthians; how he discovered that his father's old steward Simonides had succeeded in saving from confiscation the vast intangible wealth of the Hurs and had multiplied it many times, till the young Roman-Jew was the richest private citizen in the world; the discovery that Messala was entered for the highest stake in the great sporting event of the orient; how Ben-Hur won the affection of Ilderim, the Arab sheik, who had entered his steeds of the desert for the great event—all this leads up to the dramatic encounter of the famous chariot race. The author drew his description of the race from one written over twenty-three hundred years ago by the tragic poet Sophocles. It is one of the curiosities of literature that the great scene, through the pages of Lew Wallace's novel, has become as famous on our stage as it was so long ago on that of Greece.

By his victory in the arena Ben-Hur exacted ancient Jewish justice on his hated adversary, who was crushed in body and impoverished in fortune, he had wagered on his success all the wealth he had stolen from his former friend. The victor almost fell prey, however, to the vampire daughter of Egypt who was rival for his love with the gentle Jewish Esther. But henceforth his thoughts were concentrated on him who was attracting all eyes. Was he Messiah or king? Ben-Hur, in his hatred of Rome, in his pride of race, dreamed only of a king of this world, who should right ancient wrongs and exalt his chosen people. And so he threw himself with all his force, with all his wealth, with all the knowledge gained at Rome, into making secure and strong the way of the king whom he would follow. But it was for one supreme in things spiritual rather than material that the way was being made ready. And Ben-Hur's mother, rescued with her daughter from her long imprisonment by a chance change of jailers, but hopeless lepers both, saw the truth sooner than her son.

"'Oh Master, Master!' she cried as he passed upon the road, 'Thou seest our need; thou canst make us clean. Have mercy upon us—mercy!'

"'Believest thou I am able to do this?' he asked.

"'Thou art he of whom the prophets spake—thou art the Messiah!' she replied. His eyes grew radiant, his manner confident.

"'Woman,' he said, 'great is thy faith; be it unto thee even as thou wilt.'"

And so, in the end, Ben-Hur recognized what Balthazar had known from the beginning. "Oh wise Egyptian, hearken! Thou alone were right—the Nazarene is indeed the son of God!"

Ford

THE UNIVERSAL CAR

No Further Reduction Or Change Of Model...

Several inquiries have recently come to us concerning the likelihood of another reductiou in the price of Ford Cars. We want to state again with greater emphasis that Ford Cars are already being sold at a figure actually below cost, and for an indefinate period another reduction or change in design is entirely out of the question and not at all contemplated.

We beleive the public will be fair enough to fully appreciate the frankness of the above statement, when they consider the extent of the recent cut in price, which was in fact the equivelent of several reductions in one.

Prospective purchasers can therefore asure themselves that there will be no furthur reductions in price. Everyone is familiar with thc heavy demand for Ford cars in the spring and this year will be no exception, as we already have several orders on hand. Let us have your order now for spring delivery.

Liberty Township News

Newsy Items By Our Reporter

We have secured a good writer in Liberty Township to supply news for the Time from that vicinity. Now what we would like is to have other localities represented in the Times. We would like to get a news gatherer in each farming community. Send in yuor news to the Times and sign your name and we will supply you with the necessary material sucha s stationery, envelopes and stamps.

SURPRISE PARTY

A surprise party was given on Lloyd Ulrich last week Tuesday evening, it being his twenty-first birthday anniversary. Young people from all parts of the community met for a good time, which all enjoyed.

John Borchers spent a couple of days last week visiting at the home of his brother-in-law, Frank Bredlow

Mrs. Sam Hammond spent a few days the past week visiting with her parents, Mr. and Mrs. August Neuhring.

Herman Paul returned home last Saturday after a two weeks visit at his old home at St. Louis. He was called there by the illness of his father, who died while he was there.

The Womans Foreign Missionary Society of the Liberty Township church met at the home of Mrs. Chas. Schmidt Tuesday afternoon.

Schoo No. 9 has been without a teacher again.

Clarence Bredlow returned to his home at Vinita, Oklahoma, the fore part of the week, after an extended visit with relatives and friends.

Orvel Bridges has been shelling corn for Lassahan's on the section last week.

Last Sunday evening a revival campaign was started in the Liberty Township Church.

The Tanner children are on the sick list at present.

The thaw has spoiled the sleighing and brought out the Tin Lizzies.

FOR SALE—My house in Klemme, at a bargain if taken at once. Inquire of E. S. Uben, 1205 2nd Street, Webster City, Iowa. 6tfp.

FOR SALE—House and four good lots, well located. Inquire at the Times Office. J-6tfc.

NOTICE OF APPOINTMENT OF EXECUTOR

NOTICE IS HEREBY GIVEN, That the undersigned has been duly appointed and qualified as Executor of the Estate of Edward Charles Collins, late of Hancock County, State of Iowa, deceased. All persons indebted to the estate are requested to make immediate payment; and those having claims against the same will present them, duly authenticated, to the undersigned, for allowance.

Dated December 20th, A. D. 1920.

Asa Gibbs,

Dec. 29 Jan. 6-13 Executor.

Klemme and Vicinity

Mrs. Frank Snyder, of Belmond, was a Klemme vistior Monday.

Mr. John Pulfrey, of Garner, was a Klemme visitor last Thursday.

Mrs. George Vance, of Goodell, was a Klemme caller last Thursday.

Mr. and Mrs. Geo. Ulrich enjoyed company from Galt, Iowa, last Friday

Mr. S. S. Matson, of Goodell, was a Klemme business caller last Friday.

Carl Daniels, of Belmond, was a business caller in Klemme last Thursday.

Arthur Wellemeyer and daughter Clarice, were Garner callers last Thursday between trains.

C. C. Mayne, of Goodell, was a Klemme visitor and business caller last Thursday.

Mr. OrinH anson, of Belmond, was a Klemme busines caller last Thursday.

Mrs. Missman and son Byrnes, were visiting at Belmond last week from Wednesday until Saturday.

Mrs. Mille Smith went to Belmond Saturday for an over Sunday visit with her mother.

The Misses Doores Koerner and Neota Ridder were Garner callers between trains last Thursday.

Mrs. Wiley and her grand daughter, Avis Hocum, were Garner visit s last Friday between trains.

C. H Tompkins of Garner, was a Klemme business visitor last Thursday.

Mr. E. S. D. Kahrs returned last Friday from several days business trip at Nevada, Iowa, and Des Moines.

Mr. Ray Nelson, of Garner, was a Klemme visitor between trains Tuesday.

Mrs. August Wichman, of Red Oak, Ill., is visiting at the home of her daughter, Mrs. Leonard Sampson.

Mrs. A. H. Meyer enjoyed a visit from her brother, Geo. Meyer and wife, the fore part of the week.

Miss Octave Church came down from Garner Friday evening for a visit with her Klemme friends.

Mr. and Mrs. R. A. Jorgenson and son spent New Year's Day with Garner relatives.

Mr. E. J. Arnold was a Garner busnes caller between trains last Saturday.

Mr. Chas. Velau was at Garner last week Wednesday having some dental work done.

Miss Mabel Waterman returned to her school duties at Iowa City Monday. This is her Freshman year at the State University.

Miss Mildred Johnson returned from Garner Saturday evening where she had been for a visit with Miss Adna Church and other friends.

Ed. G. Ell drove to Garner Saturday afternoon to meet the afternoon train from the east to bring his father and mother to Klemme for a few days visit.

Big Clean-up of Howard & Foster Dress Shoes

We have 96 pairs of glazed kangaroo, black kid and russet stock in the above named line that we are going to sell at a sacrifice never heard of in Garner before. Here they are all going at the exceptionally low price of

$6.48

Not a pgir of these shoes sold until Saturday A. M. We want all to have an equal chance

Some of these shoes sold for more than twice the price. We have a very good run of sizes. Get in early. They won't last long.

OPEN SHRINE TO DEAD EMPEROR

Strange Ceremony in Japan, Including Vaudeville, Marks Two Days of Worship.

BUILDING COST $10,000,000

Impressive Manifestations of Loyalty Featured the Solemn Shinto Ceremonies—Voices Silent During Worship.

Tokyo.—After six years' labor and an expenditure estimated at $10,000,000, the national shrine to the late Emperor Mutsuhito was opened recently with solemn Shinto ceremonies, and amid impressive manifestations of loyalty. For three days the populace of Tokyo celebrated the occasion. Every street was decorated with bunting, and from the humblest door lanterns were displayed at night.

The municipality gave a flower show and open-air performances and theatrical performances in Hibiya park, but for the most part the festivities were co-operatively organized by the citizens in different wards. At hundreds of central points stages had been erected, where vandeville shows were given and there were fireworks both night and day.

Thousands From Country.

Over 250,000 persons from the country districts visited the city during the festival.

The shrine is a typical Shinto building of plain wood, and of the simplest possible construction. The opening ceremony was attended by over 2,000 persons and officials, and lasted about three hours The central feature was the delivery to Prince Ichijo, warder of the shrine, of the name tablets of the late emperor, and their installation in the inner sanctuary.

Prince Kujo, a relative of the emperor, delivered a commemorative oration to which Prince Ichijo replied. The shrine was thereafter opened to the public and at least 500,000 people worshiped before it during the remainder of the day.

The scene where these multitudes of people were paying their respects to the memory of the dead emperor was impressive. The main entrance to the shrine is by means of a new and very broad road about two miles in length. Along this road all the day and evening two great strings of people poured, one going to the shrine, the other returning.

The whole of this roadway was brilliantly lighted and decorated with flags and ornamental lanterns. But once the torli at the entrance to the shrine had been passed a great change came over the scene. The modern world was left behind, the gold and red ornamentation ceased and the rest of the way was made under the shade of gigantic pine trees, which might have been part of the virgin forests of old Japan.

Pilgrims were admitted in groups of about 200. Their journey ended in a small paved courtyard inclosed with a low wall. The shrine, a low, severely plain building, was opposite the gateway, and by the dim light of two large paper lanterns about a dozen white-robed priests were seen moving slowly back and forth within the doorway. They were sweeping up the coins that rained continually on the steps of the shrine.

Voices Are Silent.

Not a sound could be heard except the light hand-clapping of the worshipers calling on the enshrined spirit of the emperor. No human voice was heard. There was not even an audible prayer; in complete silence the multitude paid their respects to the spirit of Meiji and passed on.

On the two following days the shrine was again visited by hundreds of thousands, and the proceedings were enlightened by wrestling and other public entertainments near the shrine. The crown prince, on behalf of the emperor, worshiped at the shrine on the second day.

It is intended to associate the young men of Japan especially with the Meiji shrine. A huge stadium will be built in the grounds of the shrine, and it is expected that the principal athletic events of Japan will be contested there in the future.

Squirrel Found in Stomach of Trout

Columbia, La.—Can fish climb a tree or do squirrels take a bath occasionally? This is the question being asked by G. T. McSween. While he and his daughter, Mrs. Annie Wear, were fishing in Horseshoe lake they caught five unusually large trout, two of which appeared to be somewhat overfed. On opening them, a squirrel was found in one, and a two-pound gar fish in the other.

How that trout got that squirrel is the puzzling proposition.

"The Yellow Ostrich Feather."

Booneville, Ky.—Nancy and Cynthia Hale, aged fourteen and fifteen, respectively, who cook and wash and sew for six little motherless brothers and sisters, have made a quilt which they have christened "The Yellow Ostrich Feather." Neighbors thought so much of it that it was sent to Louisville to be sold for the benefit of women of the mountains.

A Boom Soon Punctured.

Washington Courthouse, O.—This city and farmers in the neighborhood of Point creek had the "thrill of oil" when it was reported all over the surface of the creek. It was learned later that it was part of 8,000 gallons which had escaped from a wrecked railroad car.

VOODOOISM IS FAITH OF HAITI

Admiral Knapp, Investigating Conditions, Tells Shocking Tales of Practices.

KILL HUMANS, DRINK BLOOD

Native Is Strongly Superstitious, Fears Evil Eye and Stands in Great Awe of Voodoo Priests and Priestesses.

Washington, D. C.—That 95 per cent of the natives of Haiti believe in the African jungle faith of voodooism which requires the sacrifice of human beings and the drinking of human blood is declared by Rear Admiral H. S. Knapp in his report to the secretary of the navy on investigation of Haitian conditions.

Admiral Knapp cites a shocking case of the trial of a voodoo priest, who is reported to have killed 13 children, whose blood was drunk and flesh eaten by persons present at the rites.

"Voodooism is prevalent," says the admiral's report, "and the further one goes from the coast into the interior the more openly is voodooism practiced. Voodooism is essentially snake worship, and in its extreme rites it requires the sacrifice of human beings and the drinking of their blood and the eating of their flesh.

Orgies at Sacrifices.

"The human sacrifice is called the 'hornless goat;' minor sacrifices of goats are made. These religious celebrations, if the word 'religious' can be applied to such affairs, end in disgraceful orgies of debauchery. It is very difficult, of course, to determine just how extensively the beliefs are held, but some Haitians themselves have asserted that probably 95 per cent of the total population believes in voodooism to a greater or less extent.

"Of course, the contrary is strongly held by apologists for the Haitian character. It seems certain, however, that whether it be the effect of voodooism or not, the average Haitian is strongly superstitious—superstitious with the superstitions of the jungle. He is afraid of the evil eye, or, as it is called here, the 'ouanga,' and stands in great awe of the voodoo priests and priestesses. It is also believed the educated classes are not free from much of this superstition, even where they deny belief in or the existence of voodooism.

Voodoo Followers Feared.

"Haitian officials high in place will not take action against persons accused of voodooism, whether because of their own belief in it or because of fear born of their own knowledge of the extent to which voodooism is prevalent among the population or of incurring enmities. A voodoo priest has been lately tried and sentenced, and the proceedings of the military commission are now in Washington awaiting action.

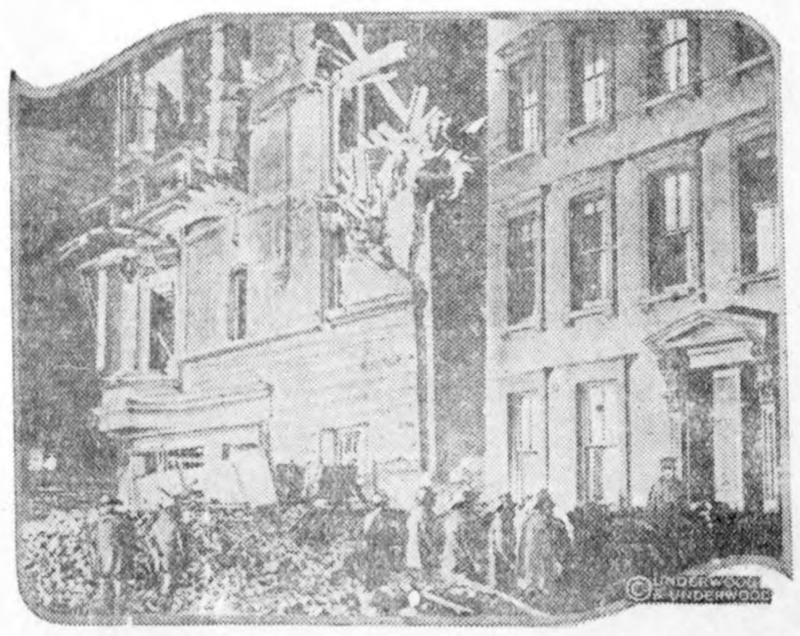
"This man is said to have killed, at one time or another, 13 children, whose blood was drunk and whose flesh was eaten by persons present at the rites. The practice of similar voodoo rites is confidently believed by those most familiar with the situation in Haiti to be not unusual in the remote places, although it is very difficult to obtain any positive evidence in corroboration."

"Floating Crematory" for Japs.

Tokyo.—Tokyo will soon have a "floating crematory," the first of its kind in Japan.

Two specially constructed vessels of 150 tons each, with facilities for cremating 30 bodies at a time, will be used. The vessels will be anchored at a wharf at Shibura, and, after funeral services have been held on board, they will leave for a point about seven miles off the bay for the cremation.

Building Collapses in New York



The collapse of this building on a Broadway corner in New York, resulted in several deaths and the injury of many persons. It was being reconstructed.

HAS LIVELY EVENING

Alleged Thief Leaps 40 Feet and Lands on Auto.

Then He Tries to Take 30-Foot Plunge to Railroad Tracks, but Policeman Gets Him.

New York.—This is how Alex Urbanuff, twenty-six, an unemployed tailor, accused of having robbed a woman of her pocketbook containing $10, spent an evening.

First returned the purse containing the money at the Bridge Plaza elevated station in Long Island city, where he is accused of purloining it, when his alleged victim confronted him.

Ran when his accuser, Mrs. Mary Howell of 322 Crescent street screamed for the police.

Leaped from the end of the station platform to the tracks.

Made record speed for four blocks when pursued by a special policeman and a crowd of men.

At a point over the Diagonal street viaduct he almost ran into an approaching train.

To save himself he leaped 40 feet for the street.

He landed on top of a swift passing automobile and was bounced off to the roadway.

He saw Mounted Patrolman Kavanaugh coming toward him, ran to the railing of the viaduct and was about to leap to the tracks of the Long Island railroad, a distance of 40 feet, when he was intercepted.

Taken to Hunter's Point police station he was finger-printed.

Suffering from shock and other injuries, he was removed to St. John's hospital.

Here he was found to have sustained a bad injury to his left leg and shoulder and possibly internal injuries.

BONES OF PILGRIMS MOVED

Taken From Canopy Over Plymouth Rock, Which Is Being Reset to Shore Level.

Plymouth, Mass.—The bones of some of the Pilgrim fathers were exposed for a time when the box in which they have been kept was taken from the canopy over Plymouth rock, where it had rested since 1880.

The records do not identify the bodies, but the two relatively well-preserved skulls and other bones found in the casket are reputed to be those of members of the colony who died during the ordeal of the first winter.

The canopy is to be removed and the rock reset under conditions that will bring it again to shore level.

Heart in the Right Place.

Anderson, Ind.—Firemen hoisted a 40-foot ladder to rescue a pigeon suspended over a high ledge of St. Mary's church. The pigeon was entangled in twine.

HONOR FOR CANADA

Wins Championships at International Live Stock Show.

Splendid Exhibits, Both of Animals and Grain, Won Admiration of Judges and Spectators.

One of the most interesting sights at the International Live Stock show at Chicago was the evening parades of horses and cattle. As the Canadian section of these parades came into view, and as it passed around the ring, there was continued applause. There were two or three reasons for this, the principal one being that in this section there were the wonderful Clydesdales, the Belgians and the Percherons that had carried off championships and first prizes. The province of Saskatchewan had a splendid display of Clydesdales and showed in a number of classes, and in every class they got in the money. A remarkable and noted winning was that of the University of Saskatchewan, showing "Lady Bruce," female Clydesdale, in a class of 24 and taking second. In competition there were entries from such famous studs as Conyngham Bros. of Wilkesbarre, P. L. James of Easton, Mass., and George Chiett of the same state. She was beaten by an imported mare, but was later made champion American-bred mare and reserve grand champion, an honor never before conferred upon anything but an imported animal.

The following are some of the good things that Canada won at the International, in a fair fight and no favors. Grand championship for Clydesdale stallions; championship for American-bred Clydesdale mares; reserve senior and reserve grand championships for Clydesdale mares; grand championship for Southdown sheep; sweepstakes grand championship for wheat for the continent of America; championship for Durum wheat for America.

Another of the reasons for the applause given the Canadian sections of the parade was the heartiness with which the American spirit was imbued that impelled it to greet with the fullest appreciation the efforts of the winner, and the hundreds of Canadians in the immense audience of the amphitheater appreciated it.

The purpose that Canada had in making exhibits from their farms, whether it was of live stock—and they had it there in all branches—grains, grasses or roots, was to demonstrate that the war had not created devastation, that the country was alive with interest in the matter of production and that it had ability to produce in a manner that would bring it championships, and what better place than the International, where it would be placed before thousands, many of whom, with the enlightenment thus gained and with a desire to better their condition, would be made to realize that in the neighboring country to the north there was an opportunity that it might be of advantage to them to embrace.—Advertisement.

The Soviet's Transformation.

"We have been organized into something that looks like hard-boiled discipline," remarked the Bolshevist.

"We have," answered the Red.

"We can't transact any business until we hear from the big boss just where we get onto a subject and where we get off."

"Quite so."

"Well, let's kill time somehow. I move that the meeting take up for discussion the question, 'When is a Soviet Not a Soviet?'"

Chronic Constipation is as dangerous as disagreeable. Garfield Tea cures it.—Adv.

Nature Lesson.

"Do nuts grow on trees, father?"

"They do, my son."

"Then what tree does a doughnut grow on?"

"The pantry, my son."—Harper's Magazine.

Modern Deluge.

The biggest yearly rainfall is in Assam. In 1861 the world's record was broken there by a fall of 805 inches, or more than 67 feet of rain.

Freed From Torture

Eatonic Cleared His Up-Set Stomach

"The people who have seen me suffer tortures from neuralgia brought on by an up-set stomach now see me perfectly sound and well—absolutely due to Eatonic," writes R. Long.

Profit by Mr. Long's experience, keep your stomach in healthy condition, fresh and cool, and avoid the ailments that come from an acid condition. Eatonic brings relief by taking up and carrying out the excess acidity and gases—does it quickly. Take an Eatonic after eating and see how wonderfully it helps you. Big box costs only a trifle with your druggist's guarantee.

PISO'S

POULTRY

MITES CAUSE OF SCALY LEG

Application of Crude Petroleum to Legs With Brush or Dipping Is Best Treatment.

Two species of itch mites attack fowls, one of which is the cause of scaly leg. While this mite commonly remains on the feet, burrowing through the scales and causing their enlargement, it also attacks the comb and the neck. A crust of loose tissue is formed above the burrows, and intense itching results from this mining habit. When scaly leg is left untreated the feet of the birds often become badly distorted, and in some cases the fowl can scarcely walk or get to the perch. Sometimes terminal joints of the toes are lost.

As the mites are transferred from one bird to another, scaly-leg fowls should be treated promptly and should not be introduced among clean birds. Investigations made under the supervision of the United States Department of Agriculture show that carbolineum or crude petroleum used on the roosts doubtless will aid in preventing the spread of the scaly-leg mite from one fowl to another. Applying crude petroleum to the legs with a brush or dipping the legs into this oil is very effective. One application usually is sufficient, but if the scales are not largely shed off after a lapse of 30 days the treatment should be repeated. Kerosene oil is applied by some farmers in the same way, but is less effective than crude oil. In using either, care should be taken not to get the oil on the upper part of the leg or on the feathers. A less severe but more laborious treatment consists of soaking the feet in warm soapsuds until the scales are loosened and then greasing the feet and legs with sulphur and lard, or lard containing 6 per cent crude carbolic acid.

The other itch mite, commonly called the depluming mite, is a very small creature which burrows into the skin near the base of the feathers. The intense itching sometimes causes the fowls to pull their feathers until they are almost naked. Dipping of all fowls of an infested flock in a tub of water containing about two ounces of flowers of sulphur and one-half ounce of laundry soap to each gallon

Continuous Selection for Health and Vigor Will Insure Flock That Will Produce Fertile Eggs and Strong Chicks Capable of Making Quick Growth.

of water will give complete control. The fowls should be completely submerged and the feathers ruffled so all parts of the body will be reached by the liquid. Care should be taken to keep the dip stirred during treatment so as to keep the sulphur in suspension. In case a flock has lice as well as the depluming mite, three-fourths ounce or one heaping tablespoonful of sodium fluorid should be added to each gallon of water in the foregoing mixture.

GIVE CHICKENS EARLY FEED

Excellent Plan to Have Some Grain Scattered in Litter Ready for Their Breakfast.

If there is a reasonable amount of litter on the floor and the house is ratproof, it is a practical plan to feed so that there will be some grain left in the litter overnight. This will be an inducement to the hens to get to work as soon as it is daylight. That's one practical and inexpensive method of prolonging the day. As a rule, hens like to go to the perches rather early in the evening on cold days, but they will be down at dawn if they know that they will find something to eat. See to it that some grain is there in the litter ready for them. This is an easier and pleasanter method than getting around to do the feeding before daylight. If the hens loaf on the perches until broad daylight one of two things is wrong: Either the house is too dark or the hens are overfed. Either condition is readily corrected and it will be dollars in your pocket to do so.

SORT OF PULLET TO RETAIN

Fowl That Is Well Matured, Has Strong Constitution and Lays Early Is Valuable.

No matter what the breed, if the pullet is well matured, has a strong constitution, begins to lay early and is of good size and shape, she is valuable as a future inhabitant of the poultry yard. Cull out the poor birds.

AN OPEN LETTER TO WOMEN

Mrs. Little Tells How She Suffered and How Finally Cured

Philadelphia, Pa.—"I was not able to do my housework and had to lie down most of the time and felt bad in my left side. My monthly periods were irregular, sometimes five or seven months apart and when they did appear would last for two weeks and were very painful. I was sick for about a year and a half and doctored but without any improvement. A neighbor recommended Lydia E. Pinkham's Vegetable Compound to me, and the second day after I started taking it I began to feel better and I kept on taking it for seven months. Now I keep house and perform all my household duties. You can use these facts as you please and I will recommend Vegetable Compound to everyone who suffers as I did."—Mrs. J. S. LITTLE, 3455 Livingston St., Philadelphia, Pa.

How much harder the daily tasks of a woman become when she suffers from such distressing symptoms and weakness as did Mrs. Little. No woman should allow herself to get into such a condition because such troubles may be speedily overcome by Lydia E. Pinkham's Vegetable Compound, which for more than forty years has been restoring American women to health.

PEGGY coughed for an hour after bedtime until Mother thought of Kemp's Balsam. A half teaspoonful quickly relieved the irritation, after which she soon went to sleep.

KEMP'S BALSAM

Will Stop That Cough

A Texas Iconoclast.

Our guess is that when the bride promises to love, honor and obey she is just as earnest as when she kisses the bridegroom's folks.—Dallas News.

Covering the Situation.

Growing Children Thrive on Baker's Cocoa

Healthy children do everything strenuously; they play hard, and study hard, and they need nourishment and a lot of it, and not one of the popular beverages meets their requirements so well as good and well made cocoa.

SOME FACTS ABOUT THE PHILIPPINES

The University of Santo Tomas is 25 years older than Harvard.

The Filipino people number 10,350,640, of which 9,495,272 are Christians and only 9 per cent non-Christians.

They have been Christians for 300 years and have a culture and refinement that will compare very favorably with that of other nations.

There are only 6,684 Japanese in the Philippines. There are about 100,000 Japanese in California alone, or 15 times as many as in the entire Philippine archipelago.

English is taught exclusively in the Philippine public schools. Two million natives now speak English fluently, and there are 700,000 English speaking children in the public schools. It is destined to be the national language.

Seventy per cent of the inhabitants of the Philippines over ten years of age, according to a census just completed, are literate. This is a higher percentage of literacy than that of any South American country, higher than that of Spain and higher than that of any of the new republics of Europe whose independence is being guaranteed by the Allies.

The Filipino people are unanimous in their desire for independence. Whenever they are called upon to deposit their ballots they have always ratified this aspiration. At every session before adjournment their representatives in the Legislature reiterate their faith in the principles of liberty and the independence of the Filipino people.

The Filipinos declare they have no grudge or grievance against the American people. Their appeal is accompanied by a message of friendship and gratitude for all that America has done for them. They point out that Uncle Sam gave independence to Cuba, and they hope that they, too, will receive that boon without which, they declare, no civilized and patriotic people can enjoy the maximum of happiness and self-respect.

A special delegation of Filipinos, officially representing the Filipino people, attended the Republican and Democratic National conventions, seeking an indorsement of the Filipino desire for independence in the two platforms. Their arguments, briefly stated, were as follows:

First.—That the American Declaration of Independence declares that governments derive their just powers from the consent of the governed;

Second.—That the American Congress, in the Jones law, solemnly promised the Filipinos independence upon the establishment of a stable government, and that their claim that the said stable government is now in existence in the islands has been officially confirmed by America's own representatives there; and

Third.—That America went before the world in the recent war as the avowed champion of "self determination," American soldiers having been told it was one of the things they were fighting and dying for.

If you know some news tell it to the Times. Phone 12.

Mr. Heuer and children who have been visiting at the Rev. Meyer home for about a week, left Saturday night for their home at Dows.

Quite a few car loads of live stock were shipped from the Klemme yards Saturday night. This is the first large shipment for several weeks.

Mrs. May Trees of Sleepy Eye, Minn., and Miss Adna Church, of Garner, were Klemme visitors between trains last Thursday.

Mrs. Fred Ortmeyer and son of Forest City, came last Thursday for a short visit with Klemme relatives and friends.

Mrs. Davis, mother of Mrs. M. O. Barr ,left Monday for Elkader, Iowa, where she will spend some time with her relatives.

The Misses Minnie and Gretchen Blank went to Belmond Saturday for an over Sunday visit. Marie returned with them to Klemme, she had been there several days visiting her sister.

The Misses Ruth Lenz and Mable Beier returned to Cedar Falls, Iowa, Tuesday ot resume their school work. The girls were home to spend their vacation with Klemme folks.

Ed. Jacobs, Bert Mathews and Herman Miller went to Garner Sunday. From Garner Herman took the train for other points on a business mission.

Mr. and Mrs. Henry Ludwig and son G. H Ludwig left last week for their home at Nevada, Iowa, after spending the holidays with Mr. and Mrs. E. S. D. Kahrs.

Miss Edith Katter of Garner came last Friday evening to attend the New Year's Eve Dance here and also to visit her college friend, Miss Mabel Waterman. Both girls are attending Iowa University this year.

G. P. McCullough the barber was listed with the sick the past week. Last Friday he went to Garner where he was confined to his bed for several days. A severe cold seems to be the ailment.

Chas. Ross, of Garner, has been visting with Klemme relatives and friends for the past week or so. We understand that he intends to leave for California this week to spend the remainder of the winter.

Mrs. Earl Kahler and two children of Big Lake, Minn., left Monday for their home after spending about two weeks visiting at the home of her parents here, Mr. and Mrs. Chas. Velau, and other relatives and friends

ANNUAL MEETING OF HANCOCK COUNTY FARM BUREAU

The annual meeting of the Hancock County Farm Bureau was held at the Coliseum at Britt, Monday, January 3rd. The meeting was attended by approximately three hundred farmers. Some very interesting discussions were taken up. An excellent address was given by John Hammill of Britt, and after that the general business of the annual meeting was taken up.

The report of the Treasurer was read and approved. It showed that the funds had been carefully handled and all accounted for, and that the year's business had closed with a small balance on hand.

The report of the County Agent was given, covering the work of the county organization.

The matter of a Beet Growers organization was taken up and discussed, and it was decided to hold a meeting of the beet growers on Monday, January 10th, at Britt, to organize an association.

In regard to ordering the Farm Bureau name plates, it was decided to order these for every Farm Bureau member.

The election of officers gave the following results: S. A. Barber, Kanawha, President; Fred Katter Forest City, Vice-President; Ben Smith, Britt, Treasurer; Antony Baker, Britt, Secretary. The following directors were elected to represent their township on the county board: E. Valley, Woden, Dingham twp; Wilbur Sparks, Crystal Lake, Crystal twp; S. B. Durant, Forest City, Madison twp; V. P. Casperson, Miller, Ellington twp; H. H. Ollenberg, Garner, Concord twp; T. R. Riehm, Garner, Garfield twp; E. A. Fisher, Britt, Britt twp; Chas. Steiner, Britt, Orthel twp; Will Nall, Britt, Boone twp; Martin Kelly, Britt, Erin twp; Chas. Ax, Garner, Liberty twp; W. H. Greimann, Garner, Ell twp; C. A. Arnold, Klemme, Avery twp; C. C. Mayne, Kanawha, Twin Lake twp; W. A. Gray, Kanawha, Amsterdam twp; Fred Oxley, Corwith, Magor twp.

Chas. Grau, Garner was re-elected state representative.

A resolution committee submitted the following resolutions:

"We, the members of the Hancock County Farm Bureau, submit the following resolations:

1. We endorse the State and National Farm Bureau officers, and commend them on the work they have done, truly believing that they are working for the interests of the farmers at all times.

2. We endorse the Food Commodidy Future Sales Act. which was introduced by our Congressman L. J. Dickinson, believing that this bill is for the interest of the farmer.

3. We demand that the Primary Law be retained as it now exists.

4. We endorse the Inheritance Tax Bill, drafted by Hon. J. E. Wichman. We are pleased to see that Mr. Wichman has taken this stand for the tax-payers.

5. Whereas: The railroads of the county have been granted a large, and as we beleive, an unwarranted increase in freight and passenger rates,

Be it resolved that a demand be made on the management of the railroad for a greater efficiency of operation, an elimination of waste and of criminal carelessness, together with the suppression of petty thieving on the part of the employees. We further resolve that these matters be brought to the attention af the officials of the State and National Federation, and that they set into operation the things that effect these demands.

6. Be it further resolved that we urge immediate action of Congress upon a tariff on farm produce sufficient to give the farmers at least the cost of production and a reasonable profit on products of the farm.

7. Be it further resolved that a copy of these resolutions be sent to the officers of the State and National Federation, and also to Hon. J. E. Wichman and Hon. L. J. Dickinson.

A short meeting of the officers and directors was called immediately after the annual meeting. At this meeting the County Agent was authorized to buy the Farm Bureau name plates.

The matter of re-hiring the office force was taken up and it was decided to retain the same force.

Dope From the K. H. S.

ADVICE TO A SOPHMORE
("Respectively" submited by a Junior.)

Blessings on thee, little one—
Sophmore, just have your fun.
Laugh and giggle all through class,
As you used to do—alas!
If a zero you receive,
A mournful sigh you never heave.
In fact, the next day, you come back,
And earn another zero black.
Examination time is here,
And you have ample cause to fear.
But if you study like I did,
When as a Soph my face I hid
Within my textbooks late at night,
You will shout with all your might
When you view the grades you errned
And think of all the things you learned
I know these things from days of yore
For I was once a Sophmore!

The Rev. Dr. Buriff delivered a short but interesting address before the High School students last Thursday morniug. His grave remarks, coupled by his witty sayings, pleased the students very much, and everyone felt greatly benefited. He presented a very fine book on Morningside college to the High School, which the student body is very grateful for. We hope Dr. Buriff will appear before us again in the near future. We will certainly welcome him with one accord.

After having company with the chick enpox, Bernice Tanner again joined us in our Freshman class last Monday.

BIG SHIPMENT OF LIVE STOCK SATURDAY NIGHT FROM KLEMME YARDS

The largest shipment of live stock from the Klemme yards was Saturday when fourteen cars of cattle and hogs were shipped to the Chicago market. The shipment was divided as follows:

Farmers Shipping Association, 6 cars.
a
Art Schoenwetter, 1 car.
Sugar & Post, 3 cars.
August Lau, 2 cars.
Joe Johnson, 2 cars.

The following men also accompanied the shipment to Chicago and returned to Klemme yesterday: Chas. Schoenwetter, Albert and Fritz Schmidt, Fritz and Louie Klinge, and Mr. Howard and son.

This record beats all records for several months. A week ago ten cars were shipped from here. It is expected that shipping will be heavy for a few weeks now.

MRS. A. KIRKWOOD'S MOTHER DEAD

Mrs. A. Kirkwood of this city received the sad news that her mother, Mrs. Wm. Dickinson, of New York, passed away on Thursday, January 6th, 1921. Mrs. Dickinson had reached the grand old age of eighty years at the time of her death. She leaves to mourn her loss two daughters, a married daughter in New York state with whom she lived, and Mrs. A. Kirkwood of this city. She also has a son, Geo. Dickinson, of Crystal Lake Iowa. Mrs. Kirkwood and Mr. Dickinson were unable to go to New York to attend the funeral services.

THE LAST NUMBER OF LYCEUM COURSE

The last number on the Klemme Wntier Entertainment course will be a lecture by Dr Edwin A Schell. Dr. Schell is one of the best and most noted lecturers in the United States and we can well feel fortunate in having him on the course this winter. As a bit of history we will give a few words in regard to Schell. During his course at Northwestern University he took all the prizes for essay writing and oratory. Later, at the age of 32 he was elected head of the Epworth League and held this secretaryship for eight years, traveling in every state and territory in the Union, Alaska included. In 1913 he was appointed Government Lecturer of the Philippines. His writings have been accepted by leading publications, the Saturday Evening Post and the Outlook included. He is a wide traveler, served four months in France and later led a group of Red Cross workers in Serbia. You will find that Dr. Schell is an interesting lecturer and this number will be the best of the course. Don't forget that the last number of the winter entertainments will be Wednesday, January 19th.

Harry Gibbs and Albert Lange are both owners of new Ford touring cars purchased at the Ell Garage of this city.

BELMOND BOY DIES AFTER FALL FROM HORSE; STEPPED ON

BELMOND—John Kiplinger, 18-year-old son of Mr. and Mrs. Kipiinger of this city, met his death Saturday when he was knocked off a horse he was riding and stepped on by his mount. His skull was fractured and he lived only five minutes after the mishap.

With three other boys he was riding to the sugar factory in quest of employment, it is said. In some manner the hrose of one of the companions became frightened and bumped into the one irdden by him, knocking him to the ground.

Announcing a new method for the modern treatment of chronic diseases in general and especially for the benefit and cure of high blood pressure, auto-intoxication, kidney trouble, (Bright's disease,) diabetes and constipation. A painless guaranteed cure for piles (hemorrhoids) in any form. Diseases of the rectum and lower bowel a specialty. Dr. R. W.. Schultz, Masonic Bldg., Garner, Ia. J13tf

ATTENDS GRAND OPERA AT DES MOINES

Mrs. Missman left Tuesday for Des Moines to hear the great opera singer, Galli Curci at the Coliseum Theatre, at Des Moines. Galli Curci is one of the world's greatest singers and it is a rare treat for lovers of the better music to have the opportunity to hear her sing.

INSTALLS NEW MACHINE

Ed. G. Ell has installed a new machine in his garage. His latest addition to his mechanica equipment is a combination burning-in machine for Ford Cars and Fordson Tractors. Just what the machine will do we have not yet seen but we intend to see the thing run when he gets it set up.

ANOTHER XMAS BABY

Xmas babies are quite a novelty but there are two such fine babies in Klemme. Last week we reportd one but now we have learned that Mr. and Mrs. Herman Schuldt are also the proud and happy parents of a fine baby boy who arrived at their home on Christmas Day.

GREAT PROBLEMS

Some questions are as old as the race. The mysteries of life and death; the questions concerning God's dealings with men; faith, fear and fancy in relation to the hereafter, these are some of the things that men have forever speculated upon, the problems that they have tried to solve

Believing that the thinking people of this community share in this general interest, a series of four Sunday evening sermons will be given in the Methodist Episcopal church, beginning next Sunday evening, January 16th, when the subject will be The Problem of Evil. If God is really good and powerful why does He permit sin and evil everywhere in the earth?

The succeeding subjects are

January 23, The Problem of Suffering

January 30, The Problem of God's Sovereignty

February 6, The Problem of Destiny

If interested in the big realities of life, it is believed that you will find this series helpful. Attendance cordially invited.

A. E. Buriff, Minister

KLEMME BAND HOLDS BUSINESS MEETING

The members of the Klemme band met at the Band Rooms Monday evening for their annual meeting and the election of officers. Pres. R. A. Jorgenson and Sec.-Treas. C. G. Waterman stepped out of office and the new officers, President Fred Arnold and Sec.-Treas. Earl Josten, were installed to head the band for the coming year. Matters of business were talked over and a constitution and by laws were read and to be adopted by the band at the next meeting, thereby completing the organization and putting the band on a firmer footing. A leader will be located and band rehearsals will begin in a week or two so that a good summer program can be lined up. The band had a hard struggle last year as they were all beginners but they are gradually being whipped into good shape and this summer the band will be able to give some high class entertainment.

STORMS BALK ASCENT OF PEAK

Mountaineers Make Daring Attempt to Climb Giant of the Himalayas.

WILL RENEW ATTACK LATER

British Explorers Get 21,000 Feet Up Mount Kinchinjunga and Are Compelled to Stop by Bad Weather—Encounter Difficulties.

Manchester, England.—A Manchester Guardian correspondent at Calcutta remarks that great interest has been aroused by an attempt to climb Mount Kinchinjunga, one of the giants of the Himalayas.

Harold Raeburn, editor of Mountaineering Art, and C. G. Crawford of the Assam civil sevice, both members of the Alpine club, were known to be conducting preliminary explorations in the hope of finding an easy access to the summit.

More than one skirmish in the vicinity of Kinchinjunga was made, though the rains at the time were heavy and the ever-shifting ice fields in the mountains were likely to come down in terrific avalanches, making all climbing impossible without serious risk to life.

Their explorations led the climbers along the course of the Talung river, which takes its rise in the Talung glacier. Here they crossed streams, the bridges of which had been washed away, and passed impenetrable forests, through which they had to hew their way for several days. Undaunted by the rainy weather, they traveled almost straight north to Pamionghi, across the Giuchu Pass, 16,430 feet, to the Talung glacier, which is almost immediately to the south of Kinchinjunga, and there obtained a glorious view of the mountains.

Encounter Great Difficulties.

The party returned to Darjeeling and made their final preparations, engaging coolies and large quantities of stores. The rains, however, were so severe that it was not until September 2 that the two explorers were able to get away. Traveling out by the Singalila ridge, they attacked Kinchinjunga on the southwest side and explored the glaciers. Access to the summit by that direction was found difficult, but the party persevered and eventually camped out at a level of 20,000 feet.

Here more difficulties were met and bad weather was experienced. Snow began to fall and the expedition became increasingly hazardous. A further thousand feet was overcome, but at this point the attempt had to be abandoned.

The return was made by a new snow pass about 18,000 feet high. The weather was at first exceedingly bad, but conditions became better later. There was no rain on lower level, although occasional snow showers were met higher up. Considerable difficulty was experienced when returning, owing to the depth of new snows on the Sikkhim side, which were probably due to the bad weather experienced in the latter part of September. Finally the party reached Darjeeling in the middle of October, having been away over a month. Both the explorers were greatly impressed by the peaks, but confident that, given good weather, the summit could be attained.

Attempt Made in 1899.

It is interesting to recall that a similar attempt was made by Douglas W. Freshfield in 1899. Mr. Freshfield was led to undertake the exploration by the fact that owing, as he says, partly to cost and the difficulty of travel in Sikkhim and partly to the obstacle presented by the Nepalese frontier, no European had up to the end of the nineteenth century gone around the mountain. Even Sir Joseph Hooker did not approach near enough to explore the glaciers of the giant. As for official surveys, these, according to Mr. Freshfield, have alternately ignored and caricatured the glaciers.

Mr. Freshfield did not think much of his tour from a climbing point of view.

"It is, of course, impossible," he writes, "to go up and down 75,000 feet without some climbing in the popular sense of the word, but in the technically Alpine sense we had far too little mountaineering for my taste. Rope and ice-ax played but a very subordinate part in our journey."

Danzig's New Flag and Superintendent

First photograph of the new flag of the free state of Danzig, flying from a window of the landehaus; also a portrait of Herr Reinhard, chairman of the state's constitutional assembly and general superintendent of Danzig.

Gambling Orgy Sweeps Nation

"7 Come 11" Is Now United States Anthem to the Tune of Two Billion Dollars.

FRENZY SEIZES THE COUNTRY

Treasury Officials Deeply Concerned Over Situation—May Make General Appeal to Public to Check Gambling.

Washington, D. C.—Approximately $2,000,000,000 changed hands last year as a result of the gambling mania, it was estimated here on the basis of information reaching government heads through official and unofficial channels.

Treasury officials are deeply concerned over the situation, which indicates, they say, that the United States is still clinging to wasteful and extravagant habits that grew up since the armistice.

The situation has been brought to the attention of Secretary of Treasury Houston. Director William Mather Lewis of the savings division now is considering whether a general appeal to the public through ministers and civic societies would be effective in checking gambling.

Frenzy Seizes Nation.

Lewis has just returned to Washington from a trip through the country in which he gave some attention to a study of the situation.

"Gambling at cards and betting on racing has reached a frenzy never before equaled," he said. "Thousands appear to be engaged in it in one form or another, either as betting commissioners or bettors.

"It is true that money changing ownership through games of chance does not represent economic waste. But seldom are winnings put to any useful economic purpose.

"The federal government, of course, is powerless to act to check the mania except through a moral appeal."

No Loss, But No Gain.

Nearly $1,000,000,000 was won at poker and other card games alone this year, it was estimated. Tax receipts on sales of playing cards now average more than $3,000,000 a year. This indicates the sale of 40,000,000 packs, which alone cost more than $15,000,000.

At every race meeting that lasts a week several million dollars change hands at the tracks, it is estimated. This includes no estimate of the vast aggregate of sums wagered at places distant from the tracks through betting commissioners.

Human Fly Helps Anchor Shabby Walls

New York.—Aided by a "human fly," workmen assumed the hazardous task of anchoring tottering walls of the nine-story Strathmore apartment and store building at Broadway and Fifty-second street, half of which collapsed Wednesday, burying, it is believed, seven workmen in debris.

While the steeple jack in the glare of powerful searchlights scaled the walls and at each tier made fast cables anchored in the center of the structure, a corps of firemen dug in tons of brick and plaster below searching for bodies of victims.

GREENLAND IS MOVING WEST

Danish Scientists Figure It Has Traveled 875 Miles in 100,000 Years.

Copenhagen.—Greenland is slowly moving in a westerly direction. According to observations made in 1907 by J. P. Koch of the Danish Mylius-Erichson scientific expedition, Greenland was three minutes further west than in 1870, when a German expedition made astronomical observations. In both instances the same northern latitude was found. Therefore, Greenland moved west 1,333 yards in 37 years.

The first observation of the longitude of Greenland was made in 1823. Comparing the findings in 1823 and 1870 one arrives at the conclusion that Greenland "wandered" ten yards westerly every year. That tends to show that Greenland and Norway, now about 875 miles apart, once were connected, the separation taking place 50,000 or 100,000 years ago.

Father and Son Join Army.

Louisville, Ky.—After passing the army medical examination, Jacob Barnett, aged thirty-five, and his son Hurdley, eighteen, have gone to their home to get their affairs in shape. They will become members of the same unit, and are now under orders to report to San Diego, Cal., for coast defense service.

MAKES CLOCK IN 25 YEARS

Workman of Delaware, O., Evolves Elaborate Hand-Carved Affair From Walnut.

Delaware, O.—After 25 years of tedious labor, C. C. Cregmile has completed his construction of a grandfather's clock here.

The clock, on display in a local store window, is hand carved. It was made out of solid black walnut which formerly constituted part of a pulpit in the old William Street Methodist church here.

All polishing, carving and fitting was done at odd moments by Mr. Cregmile.

Standing eight feet six inches high, the clock is beautifully carved on its sides and face panels. All cutting is original. No design was followed.

Mr. Cregmile, although offered good money for the unique masterpiece, has offered to sell it for a relatively small sum to the William street church. The clock is built so that it will house cathedral tubular chimes.

INDIANS NOW 336,337

Estimate of Population Is Given Out by Commissioner.

Increase of 31,387 for Last Ten Years Is Shown—Total Area of Indian Lands 589,111 Acres.

Green Bay, Wis.—The Indian population of the United States, according to Cato Selis, commissioner of Indian affairs, is 336,337, as against 304,950 ten years ago, showing an increase of 31,387.

The Oneida Indian reservation, near here, has a population of 2,657, Commissioner Sells' annual report states. Although no figures for last year are available, he believes this year's total is a substantial increase over that of 1919.

Population of other Indian reservations in this vicinity show: Keshena school, 5,023, including a large number of students from the Oneida reservation school, which was closed last year; Laona agency 364; Winnebago, 1,251; Menominee, 1,760.

Wisconsin has a total Indian population of 10,319, Commissioner Sells reports.

Marriages last year between Indians and whites total nine in the state, while those between Indians totaled seventy-eight. Of the total number of Indians in Wisconsin, 3,461 are Protestants and 1,955 Catholics.

The total area of Indian lands in the state is shown as 549,111 acres. Keshena reservation is the largest, having 231,680 acres.

Tuberculosis is still the "white plague" among the Indians, but the commissioner details the progress made in fighting it, a series of lessons in sanitation and correct living.

Paper flywheels are coming into quite general use. The tensile strength of paper is enormous, hence its advantage over iron for this purpose.

HOME TOWN HELPS

DISTINCTIVE SIGN FOR TOWN

Idea That Is Attaining Popularity in England Is Worth Consideration in Our Own Land.

They are endeavoring in England to make a fashion in village signs—what a good notion to borrow! It has been urged that for the unlovely notice at the entrance to a town, reading, "Fairfield. No 'cut-outs,'" there be substituted a sign such as villages and the visitors to them enjoyed in the old days; a design, boldly executed and colored, which should call to mind some historical or industrial association with the place, or some suggestion inherent in the name itself and which would come in time to be known as the symbol of the town. The London Daily Mail thought the idea so good that it opened a competition to designers of village signs. The first prize was $5,000 and has gone to a man who made a sign for the village of St. Peter's-in-Thanet—the English have literally picturesque names on their map, but some of our own Indian words would offer the artist as rich an opportunity, and think, too, what he could do for Concord and Lexington, for Deerfield and Tarrytown. Several of the English villages have already responded with the offer to buy the designs submitted in this particular competition and have them executed and set up. In addition automobilists have declared their desire to contribute toward the expenses in some cases, for they say that though they live in the city, they would have much pleasure from these signs. At this point, however, the village will be wisest to refuse. The town may go where it will for the artist, but the sign must be its own, no gift to it from an outsider—better take five years to get it and have it real, than obtain it quickly and artificially. The village sign is no fashion to sweep the countryside wholesale, but what an admirable one to set going and let grow steadily!—The Villager.

MERE NUMBERS NO CRITERION

Town Must Be Judged by Conditions of Living That Prevail Within Its Borders.

The gathering of important information by the census bureau has been a gradual growth. The first census in 1790 was taken for the sole purpose of determining the representation, which by the Constitution had been put on a numerical basis. Each succeeding decennial enumeration has had this as its first object, but gradually other, and actually more important information has been included, until now the volumes issued by the census bureau on other subjects far outnumber those which contain the figures of population. It is a regrettable fact that we pay too little attention to these other figures. They contain a wealth of information and suggestion for the improvement of industrial, social, religious and domestic relations of the people.

Rivalry between American cities based upon those conditions would be on a higher plane than the present rivalry in mere numbers. That city which could boast of being the best in which to live, best for all classes of society, would have far more benefit in its boasting than the one which could speak only of its numbers. Urban life in the United States is becoming too congested, too large a proportion of the entire population, in spite of improved facilities for suburban living and transit. Cities would far better concern themselves with the conditions of living of their people than with the number of people themselves, as compared with other cities. That would be placing the emphasis where it belongs.

Town's Real Opportunities.

Nearly all places go down in history because of the kind of people they give to the world or encourage to remain, because of their interest in education, religious training and in true Americanism. The real greatness of any city depends on the future it is building for its people, not on the wealth and prestige which the people are winning for it today.

No town need be pessimistic because its numbers are small. There are opportunities aplenty for it to win lasting fame if it helps those within it to be intelligent, honest and anxious to help the nation and the world to be better places in which to live.—Walter I. Robinson in Indianapolis Star.

Ceylon Land of Cinnamon.

Although cinnamon is produced in various parts of the tropics, the best quality is produced in Ceylon, according to an article in the World Salesman. Owing to its peculiar climatic conditions, Ceylon is particularly adapted to the growing of the cinnamon tree, which requires an annual rainfall of 85 to 100 inches and an average temperature of 85 degrees. The tree has a very long life and has often been known to obtain the height of 40 feet.

Just Go Ahead and Do It.

The present is always a good time to put into effect that contemplated plan of improving the home grounds.

WISEACRES WERE ALL WRONG

Wife Could Afford to Smile in Later Years at Those Who Opposed Her Marriage.

October 26, 1764, there were united in marriage a pretty girl of twenty, Abigail Smith, daughter of a minister, to John Adams, a young lawyer without a practice, himself the son of a rather poor farmer. The lady's friends were not enthusiastic over the match, as the girl's forefathers were all of literary or professional caste, while the young lawyer could boast of no connection but with the soil. The parishioners were outspoken in their disapproval of the match, it being based largely on their suspicion of lawyers in general.

The fiery old minister-father of Abigail promptly took exception to the remarks, and the very next Sunday announced his text as "For John came neither eating bread nor drinking wine, and ye say he hath a devil." The minister's faith in his son-in-law proved well given, for the unknown and clientless lawyer became the second President of the United States.

"YOU CARE FOR ME."

Synopsis.—Tom Shelby, a rancher, rides into the frontier town of Ponca, looking for a good time after a long spell of hard work and loneliness on the ranch. Instead, he runs into a funeral—that of Dad Calkins, a retired army man of whom little is known. A girl, still in her teens, survives Calkins. McCarthy, a saloon keeper and Ponca's leading citizen, decides that the girl, now alone in the world, should marry. She agrees to pick out a husband from the score of men lined up in her home. To his consternation, she selects Shelby, who had gone along merely as a spectator. The weding takes place and the couple set out for Shelby's ranch. With them is "Kid" Macklin, whom Shelby has hired as a helper. On the way the girl tells her husband her name is Olga Carlyn, and also tells him something of the peculiar circumstances of her life. Upon their arrival at the ranch Shelby is struck down from behind and left for dead. He recovers consciousness to find that Macklin and his wife have gone. He starts in pursuit. He learns his wife is an heiress, that her abduction has been carefully planned and that she has been taken to Wolves' Hole, a stronghold of the bandits and bad Indians. Reaching Wolves' Hole, he is discovered by "Indian Joe" and forced to accompany him into the hole. There he claims to be one of the conspirators and is locked up pending developments. He confides in a Mexican girl, Pancha, in love with Macklin, who intends to marry Olga. Pancha, planning to get rid of her rival, releases Shelby and guides him to a hidden cave.

CHAPTER X.—Continued.

—10—

Descending was far easier than the toilsome climb through the darkness of the night before. There was nothing in sight so far as the mouth of the ravine where it opened into the main valley. Beyond that he could perceive moving figures, and occasionally hear the sound of a distant voice. It was clearly evident to his mind that something unusual must have occurred—some news of disaster or approaching danger—to arouse such excitement among the citizens of the Hole; and he also felt convinced that this more important thing had for the time being, at least, rendered his own escape a matter of small consideration. If any attempt had been made to trail him, this effort had certainly already been abandoned. As he leaned forth from his hiding place he saw, scarcely a hundred yards away, the log walls of that hut, concealed among the trees which he had dimly noted from the crag above. This was probably where Olga had been confined. His heart beat rapidly as he studied the outlines. Could she be there still? Was Macklin with her? or had she been left there under guard of some of his Indian allies?

If she was there, and not too securely guarded, it might be possible for him alone to effect her rescue. The inspiration to make the attempt appealed to him strongly. If he only could get her away unobserved as far as that cave, he believed it possible to follow the trail to the summit. The project appeared simple enough, as he turned it thus over in his mind; at least it surely could do no harm for him to determine definitely if the lady still remained imprisoned there. He would venture far enough to assure himself that this must be the fact.

Shelby was sufficiently conscious of danger to use every precaution; the training of years came to his aid. The rocky banks of the stream were sufficiently high to conceal his advance, and the creek curved about so as to approach the hut within a few yards. Assured that the water would thus conceal his trail, he crept across the narrow open space, and lowered himself over the bank, crouching knee deep in the cold stream, safely under cover. Thus protected he waded slowly downward. He saw no evidence of any guard, and became convinced the cabin also was deserted; that if this was actually the place where Olga had been confined on arrival, she had since been removed elsewhere.

As he drew nearer the place appeared old, rather dilapidated and long deserted, a shack scarcely fit for human habitation any longer. The one window was boarded up, and the patched roof of the lean-to sagged dismally. This was certainly not the place; no one apparently had lived there for many a year. Still, now he had ventured so much, it might be well to take a look inside. Assuredly no harm could be done by his searching the rooms, and this would require only a moment or two.

He drew himself up into the weeds, and wiggled his way forward until he obtained a full view of the door. It was tightly closed, but unguarded without. Indeed his search revealed no sign that the hut had been visited for months, until he came within a yard or two of the long step before the entrance; then he suddenly encountered footprints in the softer ground, and was able to distinguish where some one—more than one, he thought—had pushed a passage through the surrounding tangle of weeds. He studied these signs intently, yet discerned nothing resembling a woman's shoe. The moccasin-shod feet, however, had passed over the ground again and again, and he even believed, one, and perhaps more, of the wearers had sat on the doorstep impatiently stamping their feet. To his judgment the place had indeed been under guard, and that recently—the marks were comparatively fresh and cleancut, as though made within a few hours.

Then, in all probability, this had been the prison where his wife was held. He had stumbled upon it. Here, undoubtedly, was the very spot where she had been confined under guard during the past night, yet she certainly was not there now. The deserted appearance of the place was proof positive that she had been taken elsewhere. Voices sounded off toward the broader expanse of valley, but too far away to present danger; even as he stood cautiously up, and looked out over the tops of the weeds he could see nothing to create alarm. He was alone, unseen, unsuspected, and yielded to the desire to learn what was within the hut. She might have left some message, some sign of her presence, which would prove a clue.

The outer door was secured merely by a wooden latch, and opened easily to his touch. Afraid lest some unknown eye might mark his movements, Shelby glided quickly in through the narrow opening, and instantly pressed the door shut behind him. He was in almost total darkness, the only light finding entrance between the ill-fitting boards at the single window. He felt his way blindly across the room, guided by this dim ray, and, discovering one of the boards somewhat loosened, managed to wrench it free, thus permitting the gray daylight to gain entrance. This gave him a dim view of the interior, a nearly square room, inexpressibly dirty, and without furniture, except a rough bench thrust back against one wall.

Straight across from where he stood some black object lay upon the floor, so indistinct in its outlines he could not, in that faint light, determine what it might be—a pile of rags, perhaps, or a shapeless heap of rubbish. He stepped forward, curious to learn its nature, yet stopped suddenly, staring down in speechless horror. He was beside the bodies of two men, both dead, gripped together, stiffened in the very attitude with which death had overtaken them. They had died fighting like wild dogs, and their strange posture told the whole story. Shelby, crushing back the dread he felt, tried to part them, but the stiffened limbs would not yield. One was a white man, the other an Indian, the latter shot through the chest, the former apparently choked to death, the rigid red fingers of his antagonist still clutching his throat. Beyond on the floor lay a revolver and a knife.

Shelby stared at the gruesome scene, unable to remove his gaze. In the dim light the features of the two men were almost unrecognizable. What had caused this tragedy? this fierce

Both Dead, Gripped Together.

death grapple? He could only conjecture from what little he knew of the circumstances. Beyond doubt one of these antagonists would be the guard whom Macklin had left to watch over his captive while he departed. But the other? Some one who sought entrance probably; some one endeavoring to reach the woman, either inspired by good or evil intent. Yet which was the guard? which the invader? Those who had accompanied the Kid at the ranch were all Indians, and it was therefore most likely that a savage had been left to watch over the girl. Then it was the white man who thus sought to reach her. For what purpose?

Shelby bent down and peered inquiringly into the agonized face of the dead white man. The features were discolored, distorted from the agony in which he had died, the lips drawn back, disclosing a grinning row of teeth. The face scarcely appeared human, and yet was vaguely familiar. He had seen it once before, revealed in the glare of a match, and the recollection came back haunting him—the fellow was Slagin, Hanley's partner. Then he had come there for no good! Had come there in the night like a slinking cur, knowing of Macklin's absence, to carry out some foul object of his own.

The ranchman drew in a long breath, and stood up. The silence and gloom oppressed him, as his eyes once more swept about the dismal apartment. It was surely a fit abode for murder, but the sight of those two dead bodies interlocked on the floor was more than he could bear. Obeying the first impulse he dragged them, still gripping each other, across the floor, and thrust them under the bench, flinging over them the folds of a tattered blanket.

But what of her—Olga? Surely no one could have been here since these two men fought? Otherwise their bodies would have been found, and cared for. It must be that Macklin had not yet returned, and that Hanley knew nothing of Slagin's desperate venture. Then the girl must still be confined in the house, helpless to escape and guarded by these dead men. The thought sent the blood surging into Shelby's throat, and his eager eyes sought the only door opening through the side wall. It was tightly closed and secured by a strong bar of wood. He picked up the revolver from the floor, and went swiftly forward, prepared to face whatever might be revealed beyond. The bar fitted snugly, yet he forced it free of the clasps, and pushed the door open with his knee, watchfully peering into the darkness behind. He saw nothing, no flutter of movement, no evidence that the place was occupied. In spite of daylight without, the room, with its shuttered windows, remained black. His heart almost ceased to beat, yet he advanced into the room, flinging the door wide open behind him. This admitted sufficient light to enable him to dimly make out his surroundings—a couch, covered with a bearskin, a rudely made chair, a bucket of water in one corner, and a faintly revealed figure against the further wall.

"Olga!" he exclaimed, "Olga!"

She moved, leaning forward eagerly.

"Who are you? Who calls me?"

"It is you, then?" he sprang forward. "Don't be afraid; I am Shelby!"

"Shelby—you! Tom Shelby! O God! this is not a dream?"

"No, no! I am just as real as you are. See; touch me. You thought I was dead?"

Her hands were in his own; her eyes, still incredulous, searching his face in the dim light.

"Dead—yes! They told me so; an Indian said he had crushed in your skull. He boasted of it; and when I asked that Macklin, he only laughed, when he said it was so."

"Laughed, how?"

Her eyes fell.

"He—he didn't seem to think it could make much difference to me; that I would care."

"But do you know who he is? Did he tell you? Did the fellow explain his purpose in this outrage?"

"I do not know; he had no time, no opportunity; we were never alone. What do you mean? Was this all done for some deliberate purpose?"

"Yes, it was, Olga. His name is not Macklin at all; it is probably Churchill—have you ever heard that name before?"

"No; I am sure not."

"It was your mother's name. She came from Virginia, and was heiress to considerable property. It was left to her in trust, and her uncle was the trustee."

"My mother?"

"Yes; she never knew this while she lived, but your father learned some of the facts after her death, and endeavored to verify them. His search was what started trouble; for your uncle, the trustee—his name is Cornelius Churchill—had made no effort to locate the heir to the property left in his care. Instead he had used the money, believing himself perfectly safe. When he learned of your father's suspicions, he became frightened."

"Can this be true?"

"It evidently is true, strange as it seems. Then your father was killed, perhaps through some row engineered by Churchill to put him out of the way, and they made every effort to find you. You alone stood between them and this ill-gotten wealth. Fortunately you could not immediately be located; you had been hidden away in a Catholic school, and, before Churchill succeeded in discovering what school you were at, Calkins took you away, and destroyed every trail."

"Calkins! Who and what was he?"

"A sergeant in your father's troop; a faithful fellow to whom your father had confided his story before he died. His one object was to keep you safely out of Churchill's hands until you should become of age. That was why he dragged you from town to town and kept you in poverty."

"But why did he never tell me all this?"

"I cannot answer that; no doubt he thought it best; believed the time had not come. I understand he acted under legal advice. Then, you know, his death was very sudden."

"Did he kill himself?"

"I do not think so now. That was the story in Ponca, but it is my belief he was murdered. You had finally been traced; the man who had succeeded in finding your trail was in Ponca. Calkins had to be put out of the way."

"You—mean Macklin?"

"Yes; only, as I say, that is probably not the fellow's name—he is Cornelius Churchill's son."

"Where—where did you learn all this?"

"Macklin told the story, when he was drunk, to another rascal. I crept up to a camp-fire one night and heard the latter relate the tale."

"Where was this?"

"On Dragoon creek."

"Yes—but when?"

"Night before last; while I was seeking to trail you."

She had never released her grasp of his hand; now it tightened.

"Night before last; you—you never knew it before?"

"Certainly not."

"You didn't marry me be—because I had all this money?"

Shelby laughed lightly.

"Lord, no; I never suspected you had five cents."

"And—and," she went on earnestly, "you—you followed after me, hurt as you was, never knowing about all this—just—because it was me?"

"That's sure right; leastwise until I struck this outfit over on Dragoon creek, and I can't say that I cared a d—n about the money at all; only it gave me a notion of what was up. I'd come just the same; you can bet your life on that."

"Oh, I am glad you said so! And you—you actually don't care for the money?"

"Care for it! Little girl, I ain't given it a thought. I'm here for—you!"

"Me? You care for me?"

"Well, I reckon I must. Long as you're my wife, I'm your husband, ain't I?"

"Yes," she said, rather wearily, "I understand."

Her glance was toward the open door into the other room, and she seemed anxious to change the topic.

"What—what happened out there last night? Do you know? There was fighting, and a shot fired. I am sure I heard a cry, as though some one was hurt, and then after that everything was silent."

"There was a fight," he answered, "and it cost the lives of two men—one white, the other Indian. I found them gripped in each other's arms there on the floor, both dead!"

"Both dead! Two of them out there. How horrible! Who are they?"

"One must have been your guard."

"Yes, the Indian; but the other?"

"A ruffian named Slagin; he was one of the fellows I overheard talking about your case. He must have known that Macklin left you here alone last night, and came to see you for some purpose. He must have encountered the Indian unexpectedly, and the two went into the death grapple."

"And—both were killed?

"Yes; the red was shot, and the white choked to death. It was a game fight all right. I couldn't pry the fellows apart."

"And they are there now?"

"Not in sight—no; I rolled the bodies back under a bench out of sight, and threw an old blanket over them. Now see here, Olga," he went on earnestly, "we've got to get out of here before anyone comes. I know a place where we can hide, and a trail that leads up from this Hole; but the first thing to do is to get safely away before Macklin gets back. You will go with me?"

"Of course; but do you dare make the attempt by daylight?"

"I don't dare anything else. Every minute we waste here adds to our danger. You have nothing to take with you?"

She shook her head; then suddenly she lifted her eyes again, and looked him directly in the face.

"Tom Shelby," she asked impetuously, "is what you said actually true—that you are just doing this because you have got to, being my husband?"

He stared at her, surprised, and confused by so direct a question.

"Sure; that's what I ought to do, ain't it? But maybe you don't exactly sabe what I mean. I—I reckon I've got to thinkin' a lot about you lately; since that galoot took you away I mean; and—and well, I'm d—d glad you are my wife," he broke forth desperately. "That's honest how I feel about it."

The clear eyes watching him smiled, and she stretched out her hand.

"You are sure then it is not just a duty. You really want me to go with you?"

"I ain't much good telling these things, but that's what I want. I reckon there ain't no world big enough to keep me from huntin' you up—God! did you hear that?"

It was the harsh voice of a man singing, the voice of Joe Macklin.

CHAPTER XI.

A Shot in the Dark.

She stood clutching him tightly, both staring in startled fear out through the open door into the dim light of the front room. The whole situation flashed through Shelby's mind—if Macklin was alone he could handle him; yet there was danger that the man might shoot, and the report be overheard by others. Then, again, he might not be alone. It was better to make sure first, and then act. But how? A possibility occurred to him—it was dark within that second room; he could slip back into the corner, and remain concealed; perhaps the fellow would talk, would reveal his plans; at least, once at his ease, he could be made the victim of surprise. But would Olga play the part necessary?

"Can you act?" he whispered hastily. "We must fool that fellow."

"How do you mean? What am I to do?"

"Make him talk. Let him think you are all right; above all keep him from suspicioning that I am either here, or even alive."

"But how can I?" breathlessly, "with the door unbarred, and those dead men? He will know something has gone wrong."

"Tell him they fought and killed each other, but that first they unbarred the door. You found them there, and dragged the bodies under the bench. You dared not go away; you were afraid—make up some story. Here he is now!"

He left her frightened and dismayed by this sudden emergency, and sprang back into the darkest corner, crouching against the log wall. If she would only induce Macklin to reveal his plans, gain his confidence. He could

"God! Did You Hear That?"

see her there in the dim light bending forward and listening, a slender girlish figure. Then the outer door crashed open, letting in a flood of light from without, and a step sounded heavily on the floor. The young woman straightened up, the clear profile of her face revealed. Somehow Shelby knew she had braced herself for the contest. Macklin must have stopped just within the door, staring about him in uncertainty.

"What the h—l is up here?" he burst forth angrily, confused by the gloom. "Sam, where are you anyway?"

"Who is Sam?" she asked quietly, and taking a step forward. "Is that the name of the Indian you left on guard?"

He gazed at her open-mouthed, for the moment too astonished to even find speech.

"What!" he stammered finally, "why, what are you doing out here? Who opened that door? Where is the d—d red snake, anyway?"

"I do not know very much more than you do," she replied quietly. "There was a fight out here some time during the night, and the bar across the door was knocked down."

"A fight! who were they?"

"A white man, and the guard. They were both killed."

"Both—both killed?" he seemed unable to grasp the fact. "Who was the white man?"

"I do not know."

"And you did not even run away? Did not try to escape?"

"Where could I go?" she asked. "What was there for me to do but wait for you to return?"

"Well, if this don't beat h—l!" he exclaimed. "Why I thought you was afraid of me. You ain't, hey?"

"No; I—I don't think I am. You were not rough with me, and—and you said you would have something interesting to tell me when you got back."

Macklin laughed, evidently relieved. She had spoken as a child might whose curiosity had been aroused.

"Oh, I see, my girl; you've been thinking this over, have you, and decided I might not be quite so bad after all. I thought maybe you'd get over that tantrum after awhile, fer shucks! I knew that feller Shelby was nothin' to you. You just married him ter git away from Ponca—didn't you?"

"A single shot rang out sharply. He saw Macklin fling up his arms and reel backward."

(TO BE CONTINUED.)

Mr. Simpkins in Hard Luck.

Mr. Simpkins was complaining to his bosom friend, Jenkins, about the numerous ills his wife had brought upon him in the course of their association. "When first I met her," he said, "I was struck dumb with admiration. When I married her I was blind with love, and now," he added, "I'm deaf from her everlasting talking."

And He Didn't See the Joke.

The subway train was s aying from side to side and the passenger who hadn't got a strap to hang onto was suffering as a consequence.

Three times he landed on the lap of a stout matron, who finally lost her temper and inquired:

"Here, what are you doing? What do you call yourself?"

"Well," came the smiling reply, "I think I must now describe myself as a lap-lander."

The joke appealed to the matron, who not only forgave him, but decided to retain his humor. She tried it first on her husband. "Yes, dear," she said, "three times he landed on my lap, and when I asked hir what he was he said he was an Eskimo."

White Fleas.

Robert Lee Phillips, six years old, living in East Washington street, is much impressed with all he learns at school, says the Indianapolis News. The other evening he was busy cutting out "paper animals" and as he played he kept repeating to himself, "Fleas is white, fleas is white." His older brother grew tired of hearing it and said: "Where do you get that?" Very emphatically he answered: "At school. 'Mary had a little lamb; its fleas is white as snow.'"

A woman's fondest hope is to stay young. She often resorts to paints, powders and cosmetics to hide her years. Some women pay large sums to so-called "Beauty Doctors" in the belief that money will buy youth. Others wear girlish dresses, thinking they can fool the world about their age. But no one is deceived. The more you try to hide your age, the more it shows.

There is but one thing that holds old age back, and that is health. Sickness and weakness bring old age early in life. Dr. Pierce's Favorite Prescription is a building-up medicine for women. It makes them healthy and strong when they suffer from women's troubles. It keeps them looking young by keeping them well. It is a woman's tonic for the frail, the delicate and those who are nervous, dizzy and who have backache and dragging pains. Favorite Prescription is altogether vegetable and without a particle of alcohol. It is safe to take. Try it now. In tablet or liquid form at all druggists, or send 10c for trial package of the tablets to Dr. Pierce's Invalids' Hotel in Buffalo, N. Y.

COUNCIL PROCEEDINGS
(Delayed)

August 9, 1920

Upon motion the following bills were allowed:

Hawkeye Oil Co., Gasoline and oil	$ 22.50
L. A. Ridder, Pumping and labor on engine	23.00

Moved and carried that the treasurer's salary be fixed at $20.00 per year after this year.

August 23rd.

Upon motion dues in the League of Iowa Municipalities be allowed.

September 13th.

The following bills were approved:

Iowa Falls Electric Co., street lights June, July, Aug.	$144.00
Mrs. Koerner, Collecting water rent	3.00
L. A. Ridder, Pumping water, August	13.00

September 27th.

Moved and carried to allow the following bills:

C. G. Waterman, (Treas.,) freight and tax on water mains and hydrants	$ 9.32
C. M. Bredbenner, Mowing weeds	18.00
C. M. Bredbenner, unloading water mains	52.80
C. M. Bredbenner, Park filling	18.80
C. M. Bredbenner, hauling gravel west of Ry.	8.50

J. P. Jennings of Emmetsburg was hired to lay the water mains at 50 cts. per foot. The Mayor was instructed to buy 50 12-foot lengths x 4" water mains.

October 6th

Special meeting called to consider the question of Water Bonds. No action taken. The clerk was instructed to issue $6,000.00 worth of orders as follows: Four $1,000.00 orders to Hawkeye Supply Co., and two $1,000 orders to J. P. Jennings.

October 12th

Council accepted the contract of Ry. Co., regarding crossing the track.

The following bills were allowed:

W. F. Stille, Mowing park, 1920	$ 72.00
W. F. Pavey, Labor and supplies to water works	4.75
Wm. Baack, New engine cylinder and express	122.47

Council adjourned to meet October 18th, 1920.

N. L. Palmer, Clerk

ORDINANCE NO. 37

An Ordinance granting permission to the Standard Oil Company, a corporation organized and doing business under and by virtue of the laws of the State of Indiana, to erect and maintain on the property described below, warehouse, tanks and other buildings necessary for the conduct of its business, and to store therein illuminating oils, naptha, gasoline or any other mineral oils or fluids, the products of petroleum in quantities sufficient to meet the requirements of its business.

Be it ordained by the Town Council of the Incorporated Town of Klemme in the County of Hancock, State of Iowa,

Section One—That permission and authority is hereby given and granted to the Standard Oil Company, a corporation organized and doing business under, and by virtue of the laws of the State of Indiana, to construct and maintain for a term of fifty years on the following described property within the limits of the Incorporated Town of Klemme, County of Hancock and State of Iowa, to-wit:

Beginning at a point six hundred ten (610) feet distant northerly from the north end of C. R. I. & P. Depot in the Town of Klemme, Hancock County, Iowa, measured along center line said RR. Co's. elevator track and eight and five tenths (8.5) feet distant easterly at right angles to said center line of elevator track, thence northerly parallel to said center line fifty (50) feet; thence easterly at right angles one hundred (100) feet; thence southerly at right angles fifty (50) feet; thence westerly at right angles one hundred (100) feet to said point of beginning.

Warehouse, tanks and other buildings necessary for its busines, and to store therein illuminating oils, coal oils, naptha, gasoline, or any other mineral oils or fluids, the products of petroleum, in quantities sufficient to meet the requirements of said Company's business.

Section Two—All ordinances and parts of ordinances in conflict herewith are hereby repealed.

Section Three—This ordinance shall be in force and effect on and after its passage and acceptance in writing by the said Standard Oil Company.

Passed and approved this 27th day of December, A. D. 1920.

ATTEST—F. GRUETZMACHER,
Mayor
N. L. PALMER,
Clerk

LAVENDER WOOL

By MILDRED WHITE.

(Copyright, 1920, Western Newspaper Union.)

Tears coursed down Mrs. Spaulding's cheeks. Keith was going to be married; after that fact there could be nothing. Her son was her world and he would leave her. Mrs. Spaulding could think of no happiness apart from his presence, while the thought of another ruling where she had ruled, sharing where she had shared, was bitter. For Mrs. Spaulding's love, in its absorption, was wholly selfish. Keith had dreaded to make his announcement, yet even before his mother's grief-stricken face it had been difficult to conceal the joy of his own. Babs was such a dear girl; he had known from the moment her clear eyes looked into his that all his mother's remonstrance could make no difference in the determination of his choice. Babs, all unaware of opposition, knew only one code—to be happy and make others happy. This to her was the most beautiful thing in the world. So the coldness of Mrs. Spaulding's manner when Keith took her to call was due, Babs decided, to the slight indisposition which the son had explained prevented his mother from making the visit of acquaintance herself. The girl admired the pillared porch where Mrs. Spaulding frigidly received her, she admired the flower beds in the garden, but her lover's mother was indifferently unresponsive. The only sign of friendliness which, so Babs thought, Mrs. Spaulding exhibited, was when, as the girl was about to take her departure, she complimented her upon her soft wool sweater.

Keith, glancing anxiously into his sweetheart's face, was surprised to find there, not the disappointment he feared, but a certain light of pleasure.

"You must be very happy in your lovely home, Keith," Babs had said.

His mother's words were different in tone.

"So that simple little maid is your final choice, Keith?" she asked falteringly, unbelievingly. And though he turned away in disapproval, as time passed and his mother saw Babs more and more, her caustic thrusts against the girl became his constant pain.

Babs wondered at little at the frown between her lover's dark eyes and of late her own brows wrinkled in perplexity over his new and strange requests.

"Would she mind not wearing any more that big black hat? It seemed just a shade conspicuous to him."

Babs laid the becoming hat aside.

Notwithstanding all this subservience to her wish, Mrs. Spaulding's attitude, as her son returned one evening from his visit to Barbara, was most forbidding.

"Did you find your sweetheart at home?" she asked mockingly.

"Certainly Barbara was at home," Keith replied.

His mother shrugged her shoulders.

"She is so much with that DeVoe person," she said.

For a moment the frown was very evident between the young man's astonished eyes.

"Why, Barbara has never mentioned her name to me," he said.

"Probably not," Mrs. Spaulding smiled. "She may have the sense to know that the 'mention' would not be agreeable. I did not feel exactly honored last evening when Barbara brought her bizarre friend to our door as she dutifully stopped to inquire for my health."

"It was—queer." Keith's eyes were bent somberly on the ground as he strode along.

His gentle Barbara and Lucille De Voe, with her noisy companions, could meet on no common footing. He hated to be always questioning—disapproving; yet—"

"Barbara!" he burst out desperately, as she greeted him with her frank smile, "why do you go to see Lucille DeVoe? What do you find to like in that woman?"

Babs shook her head ruefully.

"You never will wait to let me tell you things," she said. "You search out all my surprises. Do you remember the night that your mother admired my sweater? She liked the way it was made, but not the color. And so I thought—she's been having such a cold, Keith, and it's chilly on the porch evenings—I worried a little about her—you see, I love her, Keith, for your sake."

"Yes?" asked the young man, bewildered.

"So I decided to make her a wonderful lavender sweater. Lavender is 'conservative,' isn't it? Miss DeVoe offered to show me how to make it. I had bought my geranium one in her store. Miss DeVoe has the kindest heart. She walked with me the other evening over to your house so that she might be sure of your mother's size. And now the work is done."

Keith drew a long breath.

"I knew you'd be pleased," the girl said, happily. "Shall we take it over now to your mother?"

And as Barbara made her offering, Keith looked straight into his mother's eyes.

"She went to Miss DeVoe for her lessons in knitting," he said. "Barbara wanted to please you with just the style of sweater you admired. Barbara, it seems, loves you, mother."

"The shade is—conservative—isn't it?" Babs asked anxiously.

And all at once tears filled the mother's eyes and she bent and kissed the girl.

"It's lovely, lovely lavender wool," she said.

Your Self Respect

While we are all warned not to think more highly of ourselves then we ought to think, yet a certain amount of self respect is vital to success.

Few things contribute so much to one's self respect as a checking account. It puts your spending on an orderly basis and provides a legal receipe' in the form of an indorsed check for every bill paid. Open your account here.

Ford

THE UNIVERSAL CAR

No Further Reduction Or Change Of Model...

Several inquiries have recently come to us concerning the likelihood of another reduction in the price of Ford Cars. We want to state again with greater emphasis that Ford Cars are already being sold at a figure actually below cost, and for an indefinite period another reduction or change in design is entirely out of the question and not at all contemplated.

We belive the public will be fair enough to fully appreciate the frankness of the above statement, when ther consider the extent of the recent cut in price, which was in fact the equivilent of several reductions in one.

Prospective purchasers can therefore asure themselves that there will be no furthur reductions in price. Everyone is familiar with the heavy demand for Ford Cars in the spring and this year will be no exception, as we already have several orders on hand. Let us have your order now for spring delivery.

Ell Township News

A Surprise Party was given at the home of Mr. and Mrs. Marten Jensen, Tuesday evening January 4th. Everybody present enjoyed a good time. About forty people were there.

Fred Bell was a visitor at the home of D. D. Ross, of Garner, from Tuesday until Thursday.

A party was held at the home of Mr. and Mrs. Bert Dutton, Saturday night. It being in honor of their Wedding Anniversity. Every one present enjoyed a good time. About thirty people were present.

Myrtle Bell left Monday for Titonka where she will Visit with friends until Wednesday.

Henry Helps and Son, are shelling corn for George Albers this week.

Jeff Bell is assisting H. R. Gibbs this week with his work.

Adolph Miner and his friend from Belmond visited at the home of Elko Buss over Saturday.

Gale Buss has been sewing at the home of Albert Johnson the past week.

Liberty Township News

A meeting of the American Alliance was held in the Liberty Center school house last week Wednesday evening. A large number of farmers were present. Mr. Quist and Mr. Reasoner were there and each gave a talk. It was agreed upon at this meeting to have a meeting of this sort on the evening of the first Wednesday after the first Tuesday of each month. Women as well as men are nvited to these meetings.

Miss Woods from a distant point was here last week visiting her brother, John Woods.

Lou Suckow and Emery Schaefer made a flying trip to Clear Lake one day last week in the former's Tin Lizzie. They went after Emery's junk wagon (in other words Metz) which was leftt here in a snow storm a couple of weeks previous. The Metz being well along in age and crippled up with rheumatism considerably, it could not stand the trip home. It was necessary to attach a rope from it to the Tin Lizzie in order to cover the last few miles to reach Garner where it was left for a few days rest.

Miss Doris Price from east of Garner has been visiting at the home of Herm Bridges.

Mr. Wes Lenz and a couple of the children have been on the sick list the past few days.

Elmer Beier spent Sunday at Bridges as usual. There seems to be quite an attraction there for El.

The roads are pretty good again for a car.

NOTICE OF APPOINTMENT OF EXECUTOR

Don't Be Discouraged.

"No one has yet been successful in filming an actual murder," states a picture goers' journal. It certainly does seem a pity that our murderers are so terribly self-conscious in the presence of a camera man.—London Punch.

Clean both ways.

You want a Sheller to remove all the corn from the cob and keep all the trash out of the shelled corn. The Appleton Sheller does both *right.* It

shells every ear right

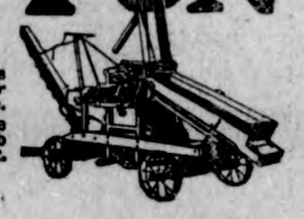
big or little, wet or dry because it has the most efficient shelling principle. Coil springs, instead of the ordinary flat springs, control the fingers that hold the ears against the shelling mechanism. This gives the rag irons greater flexibility, so that the smallest nubbin can't get through without being shelled clean, and the largest ears are shelled without crushing or choking. The coiled springs won't break in cold weather, like ordinary flat springs. The feeder is so made that ears cannot get crosswise and choke. The Appleton

Cleans the corn right,

because it has the most efficient cleaning mechanism. U-shaped raised lip screen agitates both upward and forward—allows *all* shelled corn to fall through to cleaning pan below, where all trash and dirt is blown out.

APPLETON

CORN SHELLER



Because of simple construction—fewer chains, sprockets and gears—the Appleton *does more work with less power*—is much more durable, requires much less repair expense. Appleton Shellers are made in three power sizes and three styles, mounted and unmounted, with or without cob stacker, sacker wagon elevator and extension feeder.

We also have a full line of hand corn shellers in all sizes.

International Fee Grinders

are found very useful on any farm for grinding all kinds of feed. We can supply any size.

Kewanee Hog Waterers

should be ou every farm. Keep your hog water from freezing and watch your hogs gain in weight during cold weather.

Feeds of All Kinds

You will find our prices are always right on Oil Meal, Tankage, Bran, Middlings and Hog Mesl.

WOMAN AVOIDS AN OPERATION

Hope Nearly Gone, but Lydia E. Pinkham's Vegetable Compound Saved Her

Star, N. C.—"My monthly spells gave me so much trouble, sometimes they would last two weeks. I was treated by two doctors without relief and they both said I would have to have an operation. I had my trouble four years and was unfit to do anything, and had given up all hope of ever getting any better. I read about your medicine in the 'Primitive Baptist' paper and decided to try it. I have used Lydia E. Pinkham's Vegetable Compound and Lydia E. Pinkham's Liver Pills for about seven months and now I am able to do my work. I shall never forget your medicine and you may publish this if you want to as it is true."—Mrs. J. F. HURSEY, Star, N. C.

Here is another woman who adds her testimony to the many whose letters we have already published, proving that Lydia E. Pinkham's Vegetable Compound often restores health to suffering women even after they have gone so far that an operation is deemed advisable. Therefore it will surely pay any woman who suffers from ailments peculiar to her sex to give this good old fashioned remedy a fair trial.

The Family Laundress.

George Luks, an artist, said at a reception in New York:

"Servants are paid such high wages nowadays that only labor unionists and captains of industry can afford to keep them. As for painters—"

Mr. Luks made a helpless gesture and went on:

"A promising young painter said to me the other day in a complacent voice:

"'My work is now hung on the line.'

"Then a bitter thought struck him, and he added:

"'So's my wife's.'"

A Feeling of Security

You naturally feel secure when you know that the medicine you are about to take is absolutely pure and contains no harmful or habit producing drugs.

Such a medicine is Dr. Kilmer's Swamp-Root, kidney, liver and bladder remedy.

The same standard of purity, strength and excellence is maintained in every bottle of Swamp-Root.

It is scientifically compounded from vegetable herbs.

It is not a stimulant and is taken in teaspoonful doses.

It is not recommended for everything.

It is nature's great helper in relieving and overcoming kidney, liver and bladder troubles.

A sworn statement of purity is with every bottle of Dr. Kilmer's Swamp-Root.

If you need a medicine, you should have the best. On sale at all drug stores in bottles of two sizes, medium and large.

However, if you wish first to try this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Adv.

Cindy's Ups and Downs.

The subject being Cinderella, one little girl, an incipient Carolyn Wells, wrote: "We learn that if her life did begin in a low, menial way, it ended in a hymeneal affair."

GUARANTEED

No More Misery After Eating

Just Takes An Eatonic

"The first dose of Eatonic did me wonders. I take it at meals and am no longer bothered with indigestion," writes Mrs. Ellen Harris.

Thousands of people, like this dear lady, gratefully testify about Eatonic, which does its wonders by taking up and carrying out the excess acidity and gases which bring on indigestion, heartburn, bloating, belching and food repeating. Acid stomach also causes about seventy other non-organic ailments. Protect yourself. A big box of Eatonic costs but a trifle with your druggist's guarantee.

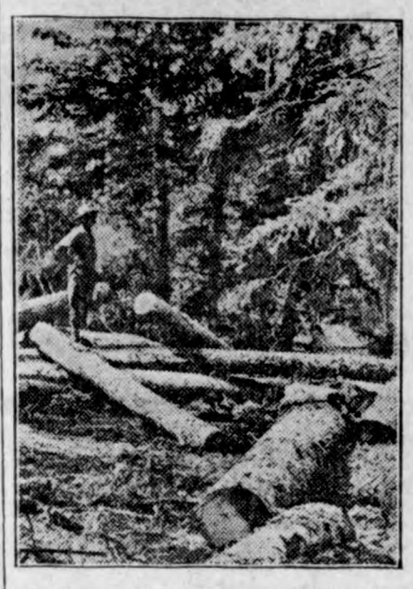
WOODLOT WORTHY OF PROPER CARE

Like Other Farm Crops Trees Must Be Well Taken Care Of.

HARVEST SEASON IN WINTER

Two Types That Require Different Methods of Handling—Cutting Assists Greatly in Thinning and Cultivation.

Wheat, corn and potatoes require planting, care and cultivation. The crop of wood that grows on the farm woodlot requires much less care than these others, and in the majority of cases it is already growing on the farm when the farmer takes the land. Doubtless this fact makes it difficult for the farmer to see this crop in the same light in which he regards the others. Any other farm crop must be cared for or it will fail, and the stand of wood on the woodlot is no exception, though the progress of deterioration is not so rapid and may extend over a long period of years.



Cutting a Crop From the Woodlot.

A properly cared-for woodlot will furnish the farmer a cash crop at regular intervals and will always afford a supply of timber and fuel for home use. The harvest season for the woodlot comes in the fall and in the winter, and the gathering of the harvest assists also in the thinning and cultivation of the crop.

Require Different Methods.

In general, there are two types of woodlots, says the United States Department of Agriculture, and each of them requires a different method of handling. The first type is characterized by the presence of old trees which dominate the stand. The second type is made up of a nearly even-aged stand of second growth.

In the first type the old trees may almost exclude the younger growth, or they may exist as a few scattered individuals throughout the stand. Such material is very likely to be losing value. The way to check the loss is to cut the old trees which have attained a mature growth and make room for a new stand of seedlings. A mature tree should be cut for the same reason that one cuts a crop of wheat when it is thoroughly ripened. No dead or diseased timber should be allowed to stand.

A woodlot composed entirely of mature trees should not be cleared at one cutting. The work should be carried on in stages with sufficient interval between the cuttings to allow a new crop to come up. If this method is followed carefully, the farmer will always have a crop of wood ready for harvest on his woodlot. When the mature timber is removed in two or three cuttings, the first cutting should be so managed as to open up the crown cover somewhat, so that the leaves on the forest floor may decompose more rapidly and the germination of the seed be made more certain. The remaining trees become more windfirm, and, as a result of their crowns receiving more sunlight, they produce more seed. When the forest floor is in good condition the second cutting in a mature woodlot can be made during the winter following a heavy seed year. Neither the first nor the second cutting should be so severe as to allow an abundance of sunshine to reach the forest floor, since sunshine stimulates the growth of weeds and other trash.

Thinning the Stand.

In the second type of woodlot, where the farmer has an even-aged stand of second-growth timber, he may begin to harvest his crop by selecting first the undesirable species. Often in such stands, such trees as ironwood threaten to overtop, crowd out, or damage the more valuable species like white ash or tulip poplar. Sprouts sometimes arise too thickly from the stump of trees recently cut, or the reproduction of a good species is too dense. In any of these cases some of the trees should be removed. This process is nothing more than the weeding out of the poorer individuals where they interfere with the better ones. In somewhat the same manner, a thinning cutting is used when, in from 15 to 20 years, the young stands reach a dense condition. The principle is exactly the same as that applied by the truck gardener who thins out his plants to secure the best development of a portion, rather than a poor development of the whole.

MUCH FARM PRODUCE IS MARKETED DIRECT

Many Farmers Are Making Good Use of Motortrucks.

Producers Living Near Cities Often Can Sell Advantageously to Consumers—Middleman's Profit Is Eliminated.

A large amount of farm produce is marketed by the use of motortrucks. While a relatively small amount of this marketing is done direct to consumers, many persons have made use of motortrucks in their direct marketing. Producers who live near to cities often can market advantageously direct to consumers if they obtain orders for sufficient produce at one time to warrant the use of a truck. This can be done especially in seasons when consumers desire sufficient apples, potatoes and similar articles for a winter's supply.

A man who lives near Providence, R. I., for several months every autumn obtains orders for sufficient produce to require two or three trips a week with a motortruck. His orders are obtained from old customers and by advertising. Double or return postal cards are sent to old customers. The first half of the card gives information and prices, while the return card bears the address of the producer on one side and an order blank on the other. All that is necessary for the consumer to do is to fill out the blanks with proper quantities, prices and total amount, sign his name and address, and mail the card.

New customers are obtained by the recommendations of old customers and by advertising. Small but attractive advertisements are placed in newspapers. Consumers are requested to order by postal card or telephone. Payment for produce is collected upon delivery.

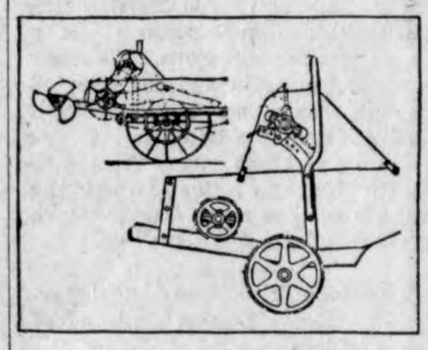
The loads of produce average about one ton in weight. Apples, potatoes and cider are the principal articles sold. About 15 or 20 stops on routes about 25 miles in length are made in disposing of a load of produce.

This method of marketing requires more time than to market wholesale, but many persons who are located favorably, can market in this way at a slight additional expense and deliver to the consumer produce which is loaded at the farm and not handled until it is delivered in the consumer's cellar. In this way less waste occurs than in many other methods of marketing.

HANDLING MANURE SPREADER

Implement Shown in Illustration Is Lowered or Raised According to Nature of Load.

The new feature of the spreader shown in the illustration is that the upper beater can be raised or lowered according to the nature of the manure.



Manure Spreader.

It is lowered when the spreader is loaded shallow with heavy manure, and it is raised when the spreader is loaded high with light manure.

RATION FOR EGG PRODUCTION

Combination of Corn, Bran, Middlings and Tankage Is Recommended for Hen Flock.

A practical ration for good egg production is mash and scratch grains as follows: Make up a grain ration of 18 pounds of corn and 7 pounds of mash. Mix up 5 pounds of bran, 5 pounds of middlings and 3 pounds of tankage. The birds should eat the 13 pounds of mash while consuming the 25 pounds of scratch grain. If meatscrap is used in place of tankage, use 3½ pounds, since it contains 10 per cent less protein. Feed only one-third of the daily grain ration in the morning in deep litter. This encourages the hens to eat the mash. With scratch feed, fill up their craws just before they go to roost and this should last them about twelve hours.

INCREASE OF DRAFT HORSES

Larger Number on Farms Shows How Agricultural and Transportation Needs Are Growing.

The United States census for 1910 revealed 19,833,000 horses and 4,210,000 mules on farms. The Department of Agriculture estimate for January 1, 1920, shows 21,169,000 horses and 4,995,000 mules on farms, or an increase of 1,276,000 horses and 785,000 mules in the last decade. Besides this we exported, during the nine years ending June 30, 1919, 1,149,763 horses and 376,836 mules. The rise in prices for good draft horses and mules, in spite of the existence of more than 21,000,000 horses and almost 5,000,000 mules on farms, indicates how agricultural and transportation needs are growing.

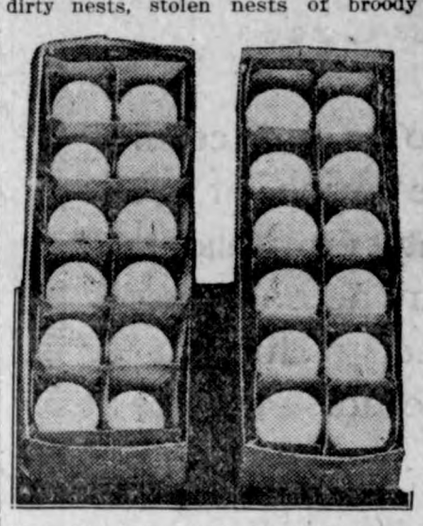
FARM POULTRY

PROPER MARKETING OF EGGS

Much of Animal Loss Can Be Prevented By Use of Purebred Stock and Better Care.

It is estimated that the annual production of poultry and eggs in the United States is in excess of $600,000,000—the value of the hay or the wheat crop—and it is also estimated that there is a total loss of nearly 8 per cent of the eggs marketed.

This great loss is due largely to improper handling between the farm and the market. Many farmers look upon eggs as a by-product, and the returns as so much clear gain. The hens forage for a living, and the eggs are gathered when convenient and kept almost anywhere. Such carelessness and a combination of mongrel stock, dirty nests, stolen nests of broody



Eggs Properly Packed for Shipping to the City.

hens, unconfined males, late-maturing pullets, and other undesirable conditions explain why the product includes a high percentage of small, cracked, dirty, stale, heated, and even rotten eggs.

Occasionally the accumulations of all these kinds of eggs are taken to the country merchants and exchanged for merchandise. The merchant usually buys these eggs "case count," paying the same price for all kinds and sizes, provided they are eggs with an unbroken shell. Small production results in small or infrequent shipments.

Many of these losses, the United States Department of Agriculture says, can be prevented by selecting pure breeds that lay more or larger eggs, such as the Leghorns, Wyandottes, Plymouth Rocks, Rhode Island Reds, Orpingtons, etc.; giving better care, food, and shelter, with dry, clean, vermin-proof nests; confining males except in breeding season; collecting eggs frequently, especially in hot or muggy weather; storing eggs in a dry, clean, cool place; using small and dirty eggs at home; marketing frequently, with protection at all times from heat; selling for cash on a basis of size and quality, "loss off" instead of "case count"; using an attractive package; and combining shipments as a matter of economy.

MIXTURES TO KILL INSECTS

Combination of Gasoline, Crude Carbolic Acid and Plaster Paris Is Effective.

A satisfactory home-made mixture to kill lice on poultry consists of three parts of gasoline and one part of crude carbolic acid with as much plaster of paris as the liquids will moisten.

The material is allowed to dry a few hours and then placed in air-tight containers. The mixture has been tried out at the Ohio experiment station.

The powder should not be mixed or placed near a flame. It is necessary to hold the fowl while dusting in order to work the dust into the feathers thoroughly. Ten pounds of the mixture will treat 250 mature birds.

Mercurial ointment or "blue butter" has been found valuable for killing head lice frequently found on little chicks. Mercurial ointment is a stiff substance, and should be mixed with one or two parts vaseline to apply it easily.

A bit of the mixture the size of a pea applied with the tip of the finger and rubbed into the feathers about the head will destroy the lice. It should not be used too freely.

BEST ARRANGEMENT OF HENS

Erroneous to Mate Male With Too Many Females for Fertile Eggs and Strong Chicks.

Avoid the error of mating a male with too many females. One male to six or eight females of the American breeds, or 10 or 12 of the Mediterraneans, will give a higher percentage of fertile eggs and more vigorous chickens than if half as many males are used.

PUT TURKEYS IN CONDITION

Fowls Should Not Be Confined Except for Short Period Just Before Marketing.

Turkeys ought not to be confined for any length of time just for a short time prior to marketing. If fed liberally while they have a free run, they can be kept in condition for marketing within ten days.

say BAYER

Aspirin

Then it is Genuine

Warning! Unless you see the name "Bayer" on tablets, you are not getting genuine Aspirin prescribed by physicians for 21 years and proved safe by millions.

Accept only an "unbroken package" of "Bayer Tablets of Aspirin," which contains proper directions for Colds, Headache, Pain, Toothache, Neuralgia, Rheumatism, Neuritis, Lumbago.

Handy tin boxes of 12 tablets cost but a few cents—Larger packages.

Bayer is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid

What, Indeed.

Alabam—They tell me that up no'th the Yankees put signs on their cemeteries, "No autos allowed."

Mississippi—Huh! Then tell me what they do when their engine dies on them?—Exchange.

It's time to cross your fingers when you hear a man boasting of his good deeds.

As a rule, a man doesn't know he's temperamental until he is told that he is.

You Must Replace the Wear and Tear on the Human System

Did you ever stop to consider what a tremendous task is placed upon your human system every day?

Your heart is constantly pumping life and vitality to every part of your body. This is being rapidly consumed after being turned into energy and strength that keeps your system performing its various functions.

Every day there is a certain amount of wear and tear that must be replaced, if you are to enjoy good health.

Many people have found S. S. S. a great aid in keeping their system in good condition. Being such a fine blood tonic and system-builder S. S. S. strengthens and enriches the blood supply, and gives new vigor and vitality to the whole body.

S. S. S. is sold by all druggists. Write for free literature and full information to Chief Medical Adviser, 162 Swift Laboratory, Atlanta, Ga.

WHY THE CELT WAS PUZZLED

Visitor's Inquiry Did Seem Unreasonable in View of Statement He Had Previously Made.

A well known physician of New York tells why he does not know whence his ancestors came.

Now, he had always understood that his ancestors were Scotch-Irish, and on the strength of that belief had prided himself on their royal blood.

Once it occurred to him to go and have a look at the old place whence they were supposed to have come. When he arrived at what he believed was the right district he appealed to an old Irishman to tell him the exact spot.

The Celt regarded him much as one does a crazy man, and then said:

"Ye say that your ancestors emigrated from here 200 years ago? Then why the deuce, sir, are ye lookin' for them here now?"

Poor Pup!

Such incidents perhaps bring us nearer the Commune. Also they give tired pedestrians a laugh. It was raining. A limousine stopped on Fifth avenue and a matronly woman and a girl held a leash which was fastened to a Pom. The dog stepped about awkwardly enough to attract the attention of the crowds to its feet. It wore pink rubber boots and a rainproof blanket. It seemed quite miserable.—New York Times.

BEASTS MAKE GOOD ON FILM

Eastern Journal Makes Unkind Comparison Between Four-Footed and Human Actors.

It was said at a recent meeting of the London Zoological society that the plan of making, and keeping on record films of rare animals had been entered upon with considerable success, the natural movements of the beasts having been reproduced on the screen in a most interesting and instructive manner. It is indeed reasonable to suppose that the four-legged film actors may even be more successful, from an artistic standpoint, than their human colleagues; first, because the motions are naturally intelligible without the accompaniment of spoken language; and second, because they cannot be trained, as "movie" performers apparently are, to chop up their movements into a limited number of stereotyped gestures, in more or less regular sequence, which audiences presumably know by heart and may anticipate well in advance.—Christian Science Monitor.

How Fabrics May Be Tested.

The thumb test will help to determine strength and weaving quality of goods. The fabric is held between the forefingers and thumbs, while the knuckles should be forced together, causing a heavy strain on the fabric. Its strength will be shown by the ease or difficulty with which it tears.

SUN REDUCES CHOLERA BILL

Unwise and Uneconomical to Depend Entirely on Serum to Protect Swine From Disease.

A few days' work in the pig pens and yards scraping, disinfecting and cleaning is pretty good hog-cholera insurance, says the United States Department of Agriculture. Strict sanitation is the best aid the farmer can

Hog Cholera Thrives in Such Surroundings as These.

give to the work of the hog-cholera serum. It is unwise and uneconomical to depend entirely upon the serum to protect the swine from this costly disease. In 1918 the farmers paid a serum bill of over $5,000,000 and they still lost $6,000,000 worth of pigs. There can be no doubt as to the effectiveness of the serum treatment, but the sensible farmer will do what he can with shovel, hoe and disinfectant to remove the cause of the trouble. The threat of cholera is always present so long as there are undrained cesspools and wallows. Straw stacks should never be left from one year to the next if they are where the hogs can reach them. Shelters and pens should be so constructed that they may be easily cleaned and exposed to the sunlight. A few days devoted to work of this sort in the fall when the hogs have been taken from the pens will do much to protect the herds of another year.

PROSPECTS FOR CATTLE MEN

Nebraska College of Agriculture Encouraging Farmers to Increase Their Operations.

The Nebraska College of Agriculture is encouraging farmers to expand their live stock operations. The scarcity of all kinds of stock, especially cattle, points to continued good prices. With feed prices going lower better days seem to be near for both the live stock raiser and the live stock feeder. While it is true that many feeders lost money in the last two years, feed prices may be 50 per cent lower than last year. Likewise cheaper feed and labor should stimulate live stock raising. The number of cattle in the United States has been decreasing at an alarming rate. The number in the United States has decreased from 89 head for every 100 persons in 1900 to 42 head in 1919. During the same period the rate of slaughter increased 3,000,000 head annually. Some people go so far as to predict that in a few years only millionaires can have beefsteak on their tables, unless live stock production is stimulated.

FORAGE FOR BREEDING EWES

Supply Is Necessary to Produce Strong, Vigorous Lambs—Helps to Balance Ration.

Breeding ewes must have some good forage in order to produce strong young, and the growing and developing lambs must have it in order to make good healthy ewes for breeding, and the fattening sheep should have some good forage to help balance their ration. Grain alone fed to sheep that are intended for the block will not produce the best results. They must have a combination of feeds, with some good forage forming the principal proportion of the ration.

FAT HORSES ARE PREFERRED

Farmer Makes Mistake in Disposing of Animals When They Are Somewhat Run Down.

It is better for the farmer who has horses to sell not to dispose of them when they are somewhat run down, following a hard summer's work, but to fatten them up. A fat horse always brings a much better price even though he be an inferior horse.

BROOD SOWS DURING WINTER

Should Be Maintained as Cheaply as Possible and Yet Farrow Healthy Litters.

During the winter the brood sows should be maintained as cheaply as possible, but at the same time they must be properly fed in order to farrow a large number of healthy, well-grown pigs in the spring.

DAIRY HINTS

COW TESTING PAYS FARMERS

Most Excellent Results Reported by Association in Coos County, New Hampshire.

Coos county, N. H., has a very successful cow-testing association. A report from that district regarding the dollars-and-cents value of the association says: "Many times the tester's salary is saved each month."

One farmer in the Coos County association reports a yearly saving of $525 in the feed bills alone. Another with eight cows claims a net gain of $250 a year from the work of the association, and a local cattle dealer says that the tests add $40 per head to the value of good cows.

A farmer near Lancaster offered to sell one of his cows for $75 before testing her. After the test, however,

Before the Introduction of Modern Methods Cows Were Bought and Sold on Outward Appearances.

she was not for sale, because during the ten months she made $19 more net profit than his twelve lowest-producing cows combined. These and other figures from the Coos County association show that cow testing may be made to pay big returns. Its educational value is also great.

Cow-testing work is growing rapidly, but it still has room for growth. Less than one per cent of all the dairy cows in the United States has been tested for production. Progressive dairymen say that there should now be at least many times that many cows on test.

ADVANTAGE OF FALL CALVES

Dairy Products Bring About One-Third More Money in Winter Than in Spring Season.

Several reasons why farmers find it more profitable to raise fall calves are given as follows by Prof. C. Larsen of South Dakota State college:

A cow that freshens in the fall will produce about 20 per cent more milk during the year than one that calves in the spring.

Dairy products bring the farmer about a third more money in winter than in spring.

Winter dairying allows of more and cheaper labor after the field work is done.

Winter dairying avoids flies that cut down the milk flow and bother the milk-fed calves.

Calves dropped in the fall will do well under good winter care and when spring arrives they are ready for pasture with the other young cattle. Avoid mating too early in the fall.

BREED UP PROFITABLE HERD

Judicious Selection of Sire and Dam Is Vitally Important—Follow Some System.

In breeding up a dairy herd a judicious selection of both sire and dam is vitally important, and then must be pursued a system of feeding and management suited to the purpose for which the animals are being raised. Many dairymen follow these principles only in part. For instance, there are farms where a comparatively high-priced purebred sire has been purchased, but the owner has paid little or no attention to the possibilities of his cows and the result has naturally been that some of the stock is good and some poor.

DEVELOPMENT OF BULLS

In these times when the attention of dairy farmers is turned toward building up their herds, and when breeders' associations, the agricultural colleges and breeders are co-operating to encourage the use of better sires, it is only natural that the care and development of young bulls should be given more consideration.

Successful breeders place great stress upon the early care and management of their sires.

SUPPLY MILK-MAKING FEEDS

Clover and Ensilage With Little Bran and Ground Oats and Corn Are Essential.

The cow that rustles what she can get from the pasture in the summer and from the straw pile in the winter is like a stream that is fed by heavy rains followed by drought—a flood of milk followed by a long dry spell. If you want to keep the cow in full flow, keep the milk-making foods coming steadily all the season. For that purpose clover and ensilage, with a little bran and ground oats and corn, varied according to the animal and the milk flow, give profitable results.

Back Giving Out?

Is backache making you miserable? Do you feel all worn out—as if you just can't keep going? Likely your kidneys are to blame. A cold, strain or overwork has probably weakened the kidneys and caused that dull backache and annoying kidney irregularities. Don't ignore these warnings. Use *Doan's Kidney Pills. Doan's* have helped thousands. They should help you. *Ask your neighbor!*

An Iowa Case

Mrs. O. Hoffman, 1028 E. Main St., Ottumwa, Iowa, says: "A cold settled on my kidneys. When I would bend over or twist I would have sharp pains through my kidneys. I had dizzy spells, too. A friend advised me to use Doan's Kidney Pills and one box rid me of the trouble. I haven't had a sign of it since."

Mr. A. Wellemeyer was transacting business at the county seat town on Monday.

Jim Busick, of Goodell, was a Klemme visitor Friday.

Wilmer Burk of Goodell was a Klemme visitor Friday last.

Miss Alma Schmidt, of Garner, was calling on Klemme friends last Friday

John Bock went to Farner Thursdayl between trains.

Harold Gruetzmacher returned to his school duties at Ames Thursday.

C. A. Arnold was a Garner business caller last Thursday morning.

Wm. Bachman went to Belmond Monday evening on business.

Mr. and Mrs. Bert Grieman, and baby of Belmond, were klemme visitors Tuesday.

Adrian Bielefeld and Burt Hood f Goodell were visiting Klemme friends Monday.

W. H. Ramsay, the Garner attorey, was a Klemme buisness visitor ast week Wednesday and Thursday.

Mr. A. D. White, of Goodell, was business visitor in Klemme between ains Monday.

Miss Marian Luick, of Belmond, was visiting with Klemme friends beween trains Friday.

Mrs. Ben Neiman and little girls ent to Eldora last week for a visit vith Mrs. Neiman's mother.

Miss Charlotte Miller was visiting with Mason City friends a couple of days last week.

Mr. and Mrs. G. H. Atherton, of Belmond, were shopping in Klemme Saturday between trains.

FOR SALE—Six head of High Grade Holstein Heifers, past two years old. Chas. Ax, Klemme, Ia. 1wc

Mr. John Kentrall of Belmond, was transacting business n Klemme Monday.

W. F. Pavey and a few other men drove to Belmond in his car Sunday to go thru the sugar beet plant.

Mrs. A. C. Anderson and son of Spencer, Iowa, came Monday for a few days' visit with her folks here, Mr. and Mrs. Sailing.

Miss Mary Griffen came from Minneapolis to be present at the funeral of Mrs. Griffen held here Monday afternoon.

Mrs. M. O. Barr and her mother, Mrs. Davis, returned from a few days visit at Elkader, Iowa, Tuesday afternoon.

Miss Annetta Schuldt returned from her vacation spent with her relatives at Gladbrook, Iowa. She has taken up her school duties near Klemme.

The oldest son and daughter of J. C. Larsen (we did not learn their names) returned Tuesday from a week's visit with relatives and friends at Ceylon, Minnesota.

Chas. Ax was at Britt Monday to attend a special meeting of the directors of the Hancock County Farm Bureau. Chas. is the chairman of the Bureau for Liberty Township.

Chas. Schoenwetter, of Garner, was a business caller in Klemme Saturday. Chas. went to Chicago from here as he accompanied a shipment of stock to that market.

The City Dads had their regular council meeting Monday night at the Gruetzmacher store. In this issue you will find a new ordinance and also council proceedings and schedules.

Ed. G. Ell, John Etchen, Orville Davis and John Henschen accompanied Mr. Ell to Des Moines in his car Monday. The object of the trip to that city was to bring back some Ford Cars for the Ell Garage.

Tell your news to the Times.

Clint Dutton helped out at the G. P. McCullough, barber shop last week and part of this week due to the illness of "Zip". McCullough is back on the job again removing whiskers for twenty cents a slash.

Mrs. J. Jorgenson of Garner was a Klemme visitor at the Editor's home Monday between trains. She came down to see how "the young editor" was getting along. She found him O. K.

Ted Dutheridge and family returned Saturday from a two weeks' visit with relatives and old friends at Chicago, Morris and other points in Illinois. Ted said the weather there was just like spring. Well the weather here has been ideal also.

A great event occured at the Times office Saturday. "Abe" our office "devil" decided that the floor needed a good scrubbing and so he sailed in and made things hum all day. It was necessary for the Editor and our printer "Pickles" to vacate the sacred shop as "Abe" viciously attacked the place with hot water and scrub brush. When the scene of the battle was again open to view the place really looked like the first breath of a fine spring.

THE KLEMME TIMES

Twenty-fifth Year Number 20 | Klemme, Iowa, Thursday, January, 20 1921 | $2.00 In Advance. $2.50 Outside of County

Obituary Mrs. Griffen

Caroline Marie Griffen was born in ...sen, Hanover, Germany, the 3rd of ...rch, 1856, and died at her home in ...emme, Hancock county, Iowa, Jan...ry 8th, 1921, the cause of her death ...ng diabetes with which she had ...en afflicted for a number of years. Mrs. Griffen came to this country ...e 24th of May, 1889, and located in ...ayton county, Iowa. After a year's ...sidence there, she came to Hancock ...unty, Iowa, where she has lived ...ever since. She was united in mar...iage to Carl Griffen, October 14th, 1889 and they lveid on a farm in Liberty township until a year after her husband's death, who died the 19th of October, 1911. Mrs. Griffen then moved to Klemme where she has been living until the Angel of Death ...me and took her home. Mrs. Griffen ...as a member of the Methodist Episcopal Church and tried in uprightness of heart to serve her God and work out her own soul salvation.

She leaves to mourn her death one daughter, Alvina; one son, Henry; two stepdaughters; two stepsons, besides many other relatives and friends

Funeral services were conducted ...m the First Methodist Episcopal Church and interment was made in Liberty township cemetery.

CARD OF THANKS

We wish to thank our many friends and neghbors for their kind assistance and words of sympathy in our recent bereavement when our mother passed away from this life.

Henry Griffen nd family,
Alvine Griffen.

IOWA FALLS ELECTRIC COMPANY RAISE RATES

Klemme Consumers Raise "Old Ned"

How they did "holler" when they received their monthly statement from the Iowa Falls Co. for "juice" the first of the month and they had reason to "holler" for the said company had raised from 15c per kilowatt to 18c. There are a great many Klemme consumers who have refused to pay the raise and only paid the old rate for they argue that the Iowa Falls Company cannot raise the rate without the consent of the city council. Of course everybody raised an awful kick and the bills looked big but when they were closely examined they were not so big after all because the statement was for electricity for nearly a month and a half, where formerly it was for one month only. That extra two weeks on the bill made it look much bigger How the thing will come out we do not know, "holler and pay" seems to be the only solution to the matter A raise at this time does not look jusified at all when everything else is coming down to normal prices. Coal for power is much cheaper, so we think the company have a lot of nerve for asking for a raise, a twenty per cent raise at that. at this time. If they wanted a raise why in he name of The Great Horn Spoon didn't they raise a year ago, then on one would have kicked at all for the raise then would seem somewhat more reasonable.

HANCOCK COUNTY PIONEER PASSES AWAY

Klemme friends of C. J. Schneider of Garner, were saddened when they heard of his sudden death last week Wednesday. Mr. Schneider had not been confined to the house but had been suffering for a few days with a pain in his side. Wednesday morning while he was about his work at the store he died suddenly of heart failure, dropping over behind a counter. Charles Schneider was one of the pioneers of Hancock County and had lived at Garner for a long number of years. He has been in the grocery and hardware business for a long time and was perhaps longer in business in Garner than any other merchant. Funeral services were held at Garner Friday. Old friends from all over the county were in attendance at the services.

Wm. Smith celebrated his birthday Saturday. Now we do not know in just what manner our friend "Bill" celebrated but from all observations he acted quite normally while waiting on trade at the Day store. We presume "Bill" is old enough to vote anyway, but just how many birthdays he has celebrated since we will not say for "Bill" is somewhat modest regarding the age of his youthful appearance.

Will Stage Home Talent

KLEMME FIRE BOYS TO STAGE HOME TALENT PLAY SOON

The Klemme Fire Company met at the City Hall last Friday evening at their regular monthly meeting and after the general business has been gone over Chief Bredbenner proposed a proposition to the Company. Every town needs, besides the water fire fighting outfit, and it was proposed to but on a home talent play and perhaps some other entertainment in Klemme to raise funds for the purchase of a fire fighting chemical tank mounted on wheels. With such an outfit a fire is easily and quickly reached and the flames extinguished without damaging property. Ninety per cent of the fires can be put out with chemicals that could not be put out with a water system for the reason that much time is lost in getting a hose cart out of the building, taken to the scene of the fire and then connected. The city officials have promised their aid to the local fire company in furnishing part of the funds for a suitable chemical outfit which can thus be purchased wthoiut a great deal of expense to the town. Two men can easily handled the chemical outfit and can rush it to the scene of the fire while the balance of the company are bringing up the water fighting system should it be needed in case the fire got too much headway. Watch for further particulars of the Firemen's Entertainment.

Beet Growers Meeting

A meeting of the Beet Growers of Hancock County was held at the Coliseum at Britt, Monday afternoon, January 10th. The idea of this meeting was to perfect the Beet Growers Organization and to get things lined up in the beet growing industry from the growers standpoint.

It is not the aim of this organization to make any unjust demands or to do anything in any way that will injure the beet industry. We do hope to do some things that will make conditions better and imbrove the beet growing business and make it larger. Heretofore the growers have had no thing whatever to say in regard to his business in the way of contracts and labor. It is not possible at this time to state just what demands the organization will make. However, it can be said that that they are not going to lose their heads and ask anything unreasonable. They simply want what is coming to them and expect to get it.

It is not the aim of the organization at this time to attempt to set a price on beets as they feel that the beet companies will do the best they can along that line.

Officers and directors were elected, one director being elected from each dump. The following men were elected E. A. Fisher, President; John Sheets, Vice President; L. T. Nutty, Secretary-Treasurer; Woden dump, Wm. Orthel; Hayfield proper, Guy Geddes East Hayfield, E. J. Terwillinger; West Hayfield, Frank Shiman; Crystal Lake, A. A. Heite; Hawley, M. E. Lackore and Geo. Ritter; Dickson, Will Jakoubek and G. A. Dickson; Garner, B. H. Dankbar; Duncan, Eddie Urich; Fisher, E. A. Fisher; East Britt, J. V. McMillin; Britt on Milwaukee, Jack Hughes; Britt on M. and St. L., A. L. Barker; West Britt, Robt. Holm; Hutchins, John Sheets; Corwith, Algona branch, Chas. Magne; Corwith M. and St. L., Ed. Gourley; Kanawha, Elmer Engstrom; Stilson, J. C. Long; Fenten, Ren Smith; Hawkeye, Severt Thompson; Goodell Klemme,

A meeting of the officers and directors will be held soon. Also a meeting of the best growers of the United States is to be held in Chicago, January 17th at which a representative will be sent. A district meeting will be held at Mason City with committees of the different couuties an January 25th, and on January 27th another public meeing will be held in this county.

More definate information will be given later and in the meantime every beet grower should talk the matter over with his director and get into the organization and help boost the beet industry. It is important in this county and we want to make it better and bigger.

Generous.

"Why, Willie, I'm ashamed of you. You should have shared your apple with your little cousin." "Well, I let him chew my chewing gum while I was eating the apple."

YOU Are Keeping Them Warm!

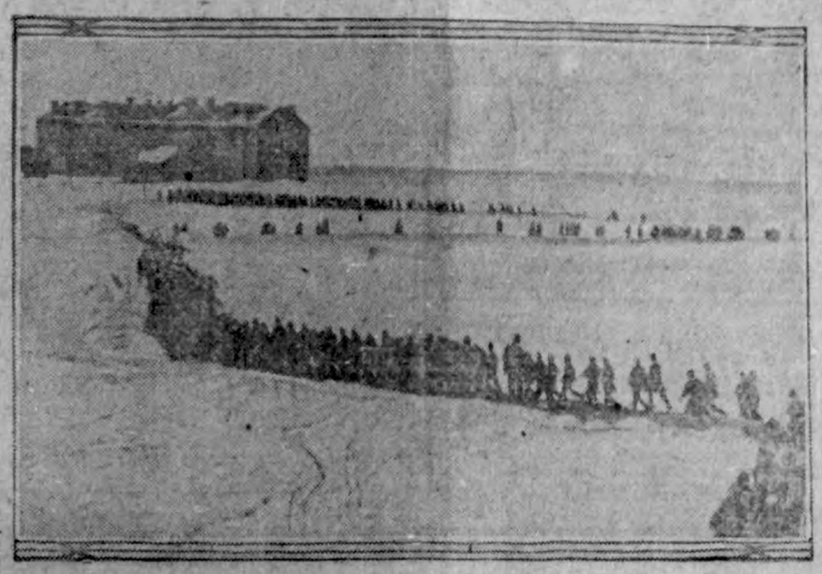

Photo International.

In the mile square of former Russian barracks in Alexandropol, Republic of Armenia, are housed 5,347 little Armenian orphans under care of the Near East Relief. Every bite they eat, every stitch they wear, is the gift of the people of the United States, through the Near East Relief. In addition, the Near East Relief hospital has a daily average of 1,211 children patients, while 1,049 others are given medical treatment which does not require confinement to hospital beds. Over 54,600 little Armenian children are housed, clothed and fed by the Near East Relief in Armenia and Syria.

In all over 110,000 little children are being kept alive by American aid.

YOU are doing it! KEEP IT UP!

CHILD SAVING WORK IN ARMENIA TOLD BY AN AMERICAN

Charles V. Vickrey Gives Facts of Near East Relief Program for Orphans.

Charles V. Vickrey, general secretary of the Near East Relief, has returned from a trip of inspection throughout Central Europe and the Near East, and made a report to the trustees of the Near East Relief in which he covers in detail the actual work of child saving now being conducted by the great American relief organization in the Near East. Mr. Vickrey believes that "a few millions of dollars wisely expended at this time in the education of the children of the Near East, in character building and in moulding these young lives, will be worth vastly more to the world

CHARLES V. VICKREY.

than billions of dollars spent later in suppressing international warfare and strife."

Mr. Vickrey considers the need in the Near East and especially in Armenia greater than anywhere else in the world, because, as he says, "In the countries of Central Europe there are going governments which have merely been temporarily impoverished by war. In the Near East, on the otner hand, there is no such thing as stable government. The whole fabric of the state has to be created from the beginning, and the innocent and helpless children have to be trained to the responsibilities of future citizenship. Peace in the Near East and, in great measure, throughout the world, will depend very largely on the character of the citizenship of the peoples of the Near East."

Irresistible Appeal of Orphans.

Describing the orphanage work of the Near East Relief in the Armenian Republic, Mr. Vickrey said:

"We have at Alexandropol in the Caucasus, one orphanage where there are approximately 10,000 homeless children, fatherless or motherless, many of them having no known living relative. Some of them do not even know their own names, or the place of their birth. They have shown wonderful recuperative powers, and to see them play their kindergarten or other games under the direction of our American relief workers, one could never believe that they had passed through the years of suffering that most of them have experienced since they, or their parents, were driven from their homes in Central Turkey five years ago.

"For the accommodation of these orphans there are sixty splendid stone buildings, erected as barracks for the Russian army. These buildings are now given to us by the Armenian government for a period of ten years and lend themselves admirably to relief purposes.

"This orphanage at Alexandropol is but one of the 229 orphanages that the Near East Relief is now operating in various parts of the Caucasus, Anatolia, Cilicia, Syria and the Constantinople-Straits area.

"Thirty miles from Alexandropol, at Kars, there is another group of Russian army barracks, which were given us by the Armenian government for relief purposes. I was going through the dormitories of this orphanage at Kars when the young American college girl in charge turned to me and said: 'Mr. Vickrey, it sometimes makes me feel just a little older than Methuselah to be called "Mother" by 6,000 of those Armenian children.' And that is exactly what she was—the only mother that these 6,000 Armenian children have, except as she avails herself of the organized assistance of native Armenian women, in caring for this large family.

"In the hospital at Kars I found 1,150 beds, which, the day I was there, were occupied by 1,268 patients, it frequently being necessary to put two or more children in a single bed. At Alexandropol we have in one hospital, or group of hospital buildings, 1,560 trachoma patients. At Karaklis, forty miles east of Alexandropol we have an orphanage devoted exclusively to the care and training of the blind children. At Delijan we have another orphanage, located on a mountain side, for the care of tubercular children, this segregation being as much for the welfare of the healthy children in the orphanages as for the care of the unfortunate consumptives. At Erivan we formerly had twenty-six distinct orphanages, though they have now been reduced and consolidated to seven in number. There are something more than 6,000 orphans in the region of Harpout."

A Treat in Store.

"Now, Tommy," said the wife of Bailiff Biffkins, "be a good boy while I'm gone and I'll reward you."

"What'll you gimme, ma?" asked the precocious child.

"I'll let you go down to the courthouse and hear your father bawl: 'Order in court!'"—Birmingham Age-Herald.

Untipped.

Waiter—Beg pardon, sir, your check does not include the waiter!

Patron—I don't suppose it does. I didn't eat one.—Baltimore News.

Solid Guilt.

"Guess I'll buy a few shares of that mining stock. Looks like a gilt-edged proposition to me."

"You've only seen the edges!"

Her Retort.

"You wear no stockings when you swim?"

"No. And I don't wear overshoes when I dance."

Giving Him Every Opportunity.

"We're going to move to Ohio."

"What's the idea?"

"Want to give my young son a chance to become president some day."

"Life Sentence"

G. P. McCULLOUGH AND MISS CHARLOTTE MILLER MARRIED MONDAY

Miss Charlotte Miller and Mr. Gearold McCullough, both of this place, were married at Garner Monday morning, Rev. Fr. Baumholdt performing the ceremony which made them man and wife.

Both of these young people are popular here and have a great many friends who have long waited for the happy event to occur. The groom is one of the enterprising young business men of Klemme and has been runnng a barber shop here for a couple of years. He is a fine fellow and has made good in his business. The now Mrs. G. P. McCullough is the daughter of Mr. and Mrs. John Miller of Liberty township. She is a very accomplished young lady and is especially well skilled in the art of knowing how to keep house, a quality which many young ladies are lacking. In fact both of these young people are so well known that a lengthy explanation of their good qualities will not be required. We have not been able to capture the groom to get a full detail of the event but suppose they were "tied up in good shape" and that all we will have to do now s walk down to the barber shop and collect a good smoke and also joining with their many Klemme friends in wishing them the best of good luck and that our friend "Zip" will live up to his promise to "obey" his better half, who we hope will enforce that rule with a good rolling pin which we will gladly furnish. They will go to housekeeping in the rooms over the State Savings Bank which "Zip" has been fixing up "on the sly" for several months.

FIRST METHODIST EPISCOPAL CHURCH

Sunday School will open at the First Methodist Church next Sunday at 10 o'clock instead of 11 o'clock on account of communion services which will be conducted by the district superintendent, L. J. Brenner, of Sioux City. All scholars are requested to be present at 10 o'clock. The district superintendent will also preach at the evening service at 7:30 p. m. There will be no services in the Liberty township church next Sunday. All are requested to come and worship with us in the town church.

Our mid-week prayer service each Thursday night at 7:30 o'clock.

The church that extends a glad hand to all.

A. H. Meyer, Pastor

THE PROBLEM OF SUFFERING

Why is there so much suffering in the world? Physical pain, torture of mind, sorrow of soul, grief, bereavement,—if God is good, why does He permit these things? To say that suffering is the common lot of all does not help to its understanding; indeed, that is a chief specification of the indictment that may be made against God's benevolence in permitting it. Can we find ony better spirit than stoicism in which to endure "the slings and taunts of an outrageous fortune"?

The Problem of Suffering is the second of the series of four Sunday evening sermons on Great Problems and will be discussed next Sunday evening at the Methodist Episcopal church. Your attendance is invited and you will be very welcome.

A. E. Buriff, Minister

Feeding the Sea.

The rivers of the earth carry 6,500 cubic miles of water into the sea each year. This means a column ten miles square and sixty-five miles high.

Public Sales

SALE DATES CLAIMED

C. V. Marshall, farm sale, Feb. 1. Watch for ad next week.

George Schaper, farm sale, Feb. 16th.

Emil Lau, hog sale, Feb. 17th.

Art Schoenwetter, farm sale, Feb. 23rd.

Others who contemplate having a sale leave your dates at the Times office.

Klemme Leads Others

LIVE STOCK SHIPMENTS STILL HOLD OUT BIG HERE

Ten more car loads of live stock were shipped out from the Klemme yard Saturday night. Live stock is moving fast at this point compared to other towns along the line. Klemme has always been a good market for stock and the prices are always above the other nearby towns. Goodell only shipped 2 cars Saturday and the week before they shipped one car load compared to fourteen that were shipped from here. Klemme draws live stock for shipping from Meservey, Goodell, close to Garner and Kanawha which shows the markets here are the best at all times.

LLOYD LAU HAS EXPERIENCE WITH A BRONK

Lloyd Lau tried to be nice to a wild bronco the other day but the bronk had a mind of his own. Lloyd had a rope tied to the horses leg. On the end of the rope was a wire snap. Lloyd attempted to trip the bronco with a jerk of the rope but here is where Mr. Bronk acted up. He cut a few fox trots, a couple of waltzes and then he pulled off a bunch of jazz steps to beat the band. The rope jerked through Lloyd's hands, the snap hooked onto his little finger and when the rumpus was all over the bronco was loose and kicking his heels in the air but Lloyd got the worst of the deal. A few stitches on Doc's sewing machine closed up the gap in Lloyd's left hand and now he has it all bundled up and holds it out in front of him and he doesn't shake hands with it either.

The Handy Airplane.

Just as we have reached the era of national prohibition, a way has been found for reaching Europe in a great hurry. Under the newest development of inventive genius, a thirsty man can hop to the other side, discuss matters of importance with a friend till his words begin to run together and his hat settles permanently over one ear and then he can get back in ample time to have the headache right in his own home. This is indeed a remarkable age.—Thrift Magazine.

Chickens and Chickens.

"Do your neighbor's chickens bother you any?" asked an East Side gentleman of his neighbor, who lived in a large family.

"No," replied the other, the fact that reference was made to the neighbor's three comely daughters. "They go down town every day, so we never see much of them.—Columbus Dispatch.

Bullets Expelled by Heart.

An interesting fact related by Charles Baliance in the Lancet, London, is that bullets that penetrate the heart were often expelled through the aorta with the blood and were found at remote parts of the body where they had stuck in an artery.

A Good Thing.

It's a good thing the United States isn't a bank."

"Why?"

"Think how many vice-presidents it would need."

Empty vessels make the most sound. —French, German, Dutch and Danish Proverb.

Every man you "hear something" about has probably "heard something" about you.

Often the persistent man accomplishes a lot of things that are not worth while.

As the grace of man is in the mind, so the beauty of the mind is eloquence.—Cicero.

Shared Fame With Friend.

It is said that virtually all the plays to which the names of Beaumont and Fletcher are attached were written by Fletcher alone. Beaumont was a friend of Fletcher's and lived with him, they had a kind of David and Jonathan affection for each other, and Beaumont's name is said to have gone on the plays more for sentimental reasons than for any other.

Retaliation.

"Agnes is fifty if she's a day, but she gives her age as only thirty." "Well, you can't blame her in a way. Time has told on her and she's getting even by wiping off an old score."—Boston Transcript.

OFFICER TELLS OF BALLOON TRIP

Naval Officers Lost to the World for Twenty-Nine Days.

ARE FOUND BY AN INDIAN

Wandered Four Days in the Dense Woods and Were on Verge of Death When Rescued—Thrilling Story of Trip Told by an Officer.

Mattice, Ont.—The three American naval officers, Lieuts. Hinton, Farrell and Kloor, who abandoned their wrecked balloon near Moose Factory on the shore of James bay on Dec. 14, arrived safely here. The following story of the balloon trip of the airmen was told by Lieut. Stephen Farrell:

Lieut. Farrell's story of the flight and wanderings of the trio begins with the morning hours in Rockaway naval air station on December 13 and goes on through the flight, the landing, and up to the meeting with the Indian at Moose Factory who saved their lives.

"It was just an ordinary balloon hop," Farrell began. "It was for training. Hinton told me after we left that the gas in the balloon was ten days old, stale and impure.

"Hinton called me up at about twenty minutes to 12 (December 13) and told me I could come on flight if I wanted to. No special orders are needed. We just got permission from Commander Cummings of the post and Executive Officer Douglas.

"I am senior officer of the three, but Kloor was in command of the flight, as he is a balloon officer and I am a gunnery officer. I have been in aviation for three years and have flown in every kind of aircraft. We left at 1 p. m.

Left With Four Pigeons.

"We had four pigeons; we let the first one go with a message for the Brooklyn navy yard.

"Hinton and Kloor had heavy underwear and uniforms under their flying suits. I had only the underwear and the flying suit. I had a grip with my uniform and some other things in it. We had eight sandwiches and two thermos bottles of hot coffee. None of the underwear was electrically heated.

"We expected to land next morning in upper New York state. We had no maps or charts except a railroad map of the Canadian Quebec Central line, which I bought. We had three chances to land before we did. We did stop once at Wells, N. Y.

"We made fast to a tree near a light. It was in a window of a farmhouse. A man came along and we asked him where we were. He told us, but he could not say what big town we were near.

Kloor Game to Go On.

"We cast loose and went up again. It rained and blew during the night. We could have landed at Ottawa at 11 p. m. We saw the lights of a big city. But Kloor is just a kid and he was enthusiastic about a long flight. We all agreed that we ought to do a decent flight. There had been rain from Wells on.

"The wind was north by west. That night it blew hard and rained. There was no sign of civilization. But we thought it would be all right in the morning. At daylight we saw only forests. The rain had calmed down. There were low clouds and fog.

"The rain stopped at 8 a. m. (December 14). We ate all our food during the night. We had two packages of cigarettes and one box of matches, but you cannot smoke in a hydrogen balloon. We realized we were in bad that morning."

At 11 a. m. the sun came out and heated up the gas in the balloon; that makes the gas expand and sends the balloon up.

"We were fighting to keep in the air. All we saw was trees, lakes, and snow. It was about 1:30 p. m. that we saw a shack in the woods. At least we thought it was a shack. We were in doubt about this until we heard a dog bark.

"I took bearings with the compass on the shack and the place where the dog barked. We decided to land. We were in low clouds about 1,000 feet high. The wind was north by west, the sun had been heating up our bag and we began to go up. We reached 6,500 feet. It takes a long time to go from that height.

Make a Bad Landing.

"The clouds were below us and above us. We got down about two o'clock. It was a bad landing and we were pretty badly shaken up. We were not hurt or thrown out, but the basket was smashed against the ground.

"The balloon caught between the trees. We had taken the pigeons into the basket to protect them from the landing. Usually they ride in a cage tied outside of the basket. The weather was clear and nearly freezing.

"All three of us stepped out of the basket in our flying clothes. I took the grip. We were soaking wet. Kloor took the pigeon cage. We started off at a terrific pace to get where the dog barked. We did not stop to inspect the balloon. From the bearings I took in the balloon we figured the dog to be south by east from us.

Start on Long Trek.

"We started through the forest on that line. I carried my grip for one day. We went on until dark and made a fire. I smoked two cigarettes while we rested; so did Kloor. Hinton did not smoke.

"We did not eat that day; we carried the pigeons until the next day. There was some snow on the ground, so we got a lot of pine brush to lie on and I picked a lot of rotten wood with my penknife. We had no firearms—only the knife and the box of matches.

"Hinton went on a little to find a stream. While he was gone he laid off his flying suit to make better headway and he could not find it on his way back.

"That night I slept next to Hinton. He was next to the fire. I was on the outside. Kloor lay off to one side and slept. We got on fine together in the forest. Hinton and I didn't sleep. We got up at daylight.

They Eat First Pigeon.

"We ate a pigeon that morning, December 15. We cleaned a pigeon and cooked it. We divided it in three parts, a couple of mouthfuls apiece. We drank water out of moose tracks and holes in the ground. That is what probably made me sick the next day. We started off, I carrying my grip.

"We came to a creek that day (the Indians call this stream the Nesoohaga). Hinton was leading and kept moving too far to the west.

"I proposed to him to go southeast. In 30 minutes we got to the creek, which was not frozen over, so we had to follow the bank. We camped again in good shape. I, for one, was not very hungry, but we were cold when we stopped walking.

"We had made a fire and rested at noon, but we did not eat in order to conserve food. We argued about where we were. I figured it somewhere in the woods in Canada, but wasn't sure.

How They Were Garbed.

"At that time I was still in my flying suit, Hinton in uniform and Kloor in uniform and flying suit. We all wore flying boots. My grip kept getting foul of trees, so I threw it away at ten o'clock, but took care to put it in a tree. Before that I got my good English shoes out of the grip and put them on and threw away my flying boots, which were pretty near gone.

"I did not make more than four miles the first day nor more than seven or eight the second day. Our night camp was on the creek. We did not eat. During the day we all nibbled a bit of a kind of moss we found growing around.

"We were not cheerful. We began to dread that this dog barking proposition was a kind of phoney. There were so many noises. I figure now it was a wolf barking. We saw a lot of wolf tracks.

Youngest Flyer Prays.

"Kloor told us he had been praying—not out loud, but just to himself. I'm not much on religion; I didn't pray. No more than I made a proposition they should dine off me.

"Hinton and I discussed our course while Kloor was praying. We had to admit we were in a pretty serious jam and felt pretty blue. But when we quit we had a hunch that the third day was going to be lucky.

"We ate the second pigeon and killed the other one the morning of the third day—December 16. Kloor put the dead pigeon in his pocket. We did this to do away with the cage.

"During the night Hinton and Kloor got their feet in the fire. Now their flying shoes were burned and they had to throw them away and walk in uniform boots. My shoes were in the best shape.

Hikers Growing Weak.

"We were all growing weak and fell a lot in holes and over trees. Hinton was very weak. I felt like vomiting. Hinton was nauseated, his stomach was very bad, but our heads were as clear as they are right now.

"If we had had a definite object we could have gone fifty or a hundred miles without so much distress. We saw so much of the same sort of woods that it appeared we were not going anywhere. But we were not going in circles because we were steered by the compass zigzagging through the wood. That counted against us.

"I began to lag behind pretty much and Hinton suggested that I take off my flying suit. I did, and walked in my underclothing the rest of the trip.

"Hinton wrapped my suit around him as a sort of blanket. Just before noon I had a nasty fall over a tree trunk into a hole three feet deep. I was bruised and scratched but I got up alone.

Hunch Fails to Help Out.

"We didn't eat at noon and made fire and warmed up and started off again all together. We were pretty blue when we camped the third night. Our hunch about the third being the lucky day flivvered.

"Hinton said, 'Let's write some letters and put them in our pockets,' but I said, 'No, we'll have plenty of time to do that.'

"Hinton could hardly hold his head up. It was very cold and it sure was our worst night. We slept again with Hinton near the fire and me on the outside. I had the flying suit on, but it was too cold to lie still, and I would get up often.

"When I did Hinton did too, and we would both sit near the fire for a while. Kloor slept fine, almost in the fire. He kept getting his feet in the fire and we would have to pull them out.

"Next morning we kidded the kid—that's what we called Kloor—and told him he had been hogging the fire. Hinton had the matches, because he knows how to light a fire. We were careful with the matches. We would go stiff when it took Hinton two matches to get the fire going.

Trio in Bad Shape.

"Kloor had lots of pep after his night's sleep and Hinton was in bad shape. I was a bit better off than Hinton, but not much. We started off without food along the bank of the creek. I had a hunch that night might have frozen up the creek and I left them to go down and try it out."

The distance covered that afternoon was not more than three miles. Next day (Thursday) almost the same story was repeated at nightfall, their distance from the "hypothetical" village being still as undetermined as when they made their landing.

Friday proved to be the lucky day. In the morning Tom Marks, a Cree Indian trapper, who was inspecting his traps on the outskirts of the settlement of Moose Factory, an island in the bottom of James bay, noticed tracks which he judged to have been made by three white men. His curiosity getting the better of the native Indian timidity in the presence of the unusual, Marks followed up the tracks until early in the afternoon he came upon the three balloonists.

Kloor's Story of Trip.

"The first days out were the worst," said Lieutenant Kloor, describing their experiences. "We had practiced walking with snowshoes at Moose Factory while we were there and thought we were experts with them, but after going a day on the trail changed our minds. It was quite stormy, too, and the first week we were out we encountered three severe blizzards.

"On Sunday a week ago it became so bad we were compelled to retrace our steps for more than a mile. We also found that the dogs we had with us were inadequate for the load we were carrying and had to send back for more. The weather, however, was not very cold. We had lots of moose meat to eat and I think we are all feeling fine."

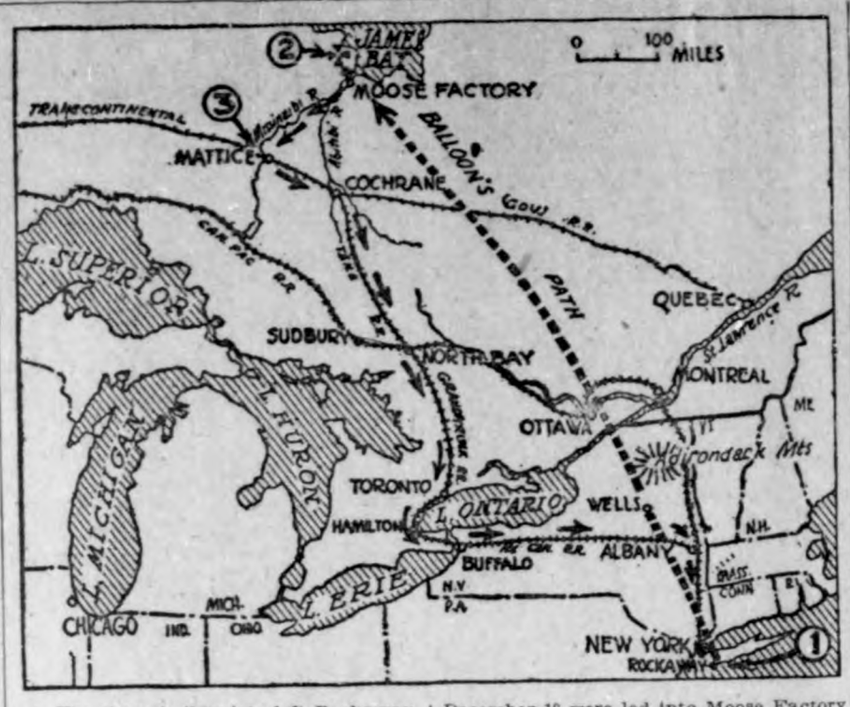
"What scientific values to be derived from your trip?" was asked.

"The main scientific fact demonstrated," replied Kloor, "is that a balloon of 35,000 cubic feet capacity can remain in the air for more than twelve hours. We were in the air for twenty-five hours and could have remained there longer. Further than that I think nothing ought to be said until we report to our superiors."

Dogs Hail the Arrival.

Kloor, a blue-eyed, ruddy young fellow who looked to be in the pink of condition, was the first to arrive. He came whirling around the bend of the Missanaibi into the town, riding on the dog sled, with Sam Sainsbury, Toronto explorer, who had gone to meet him.

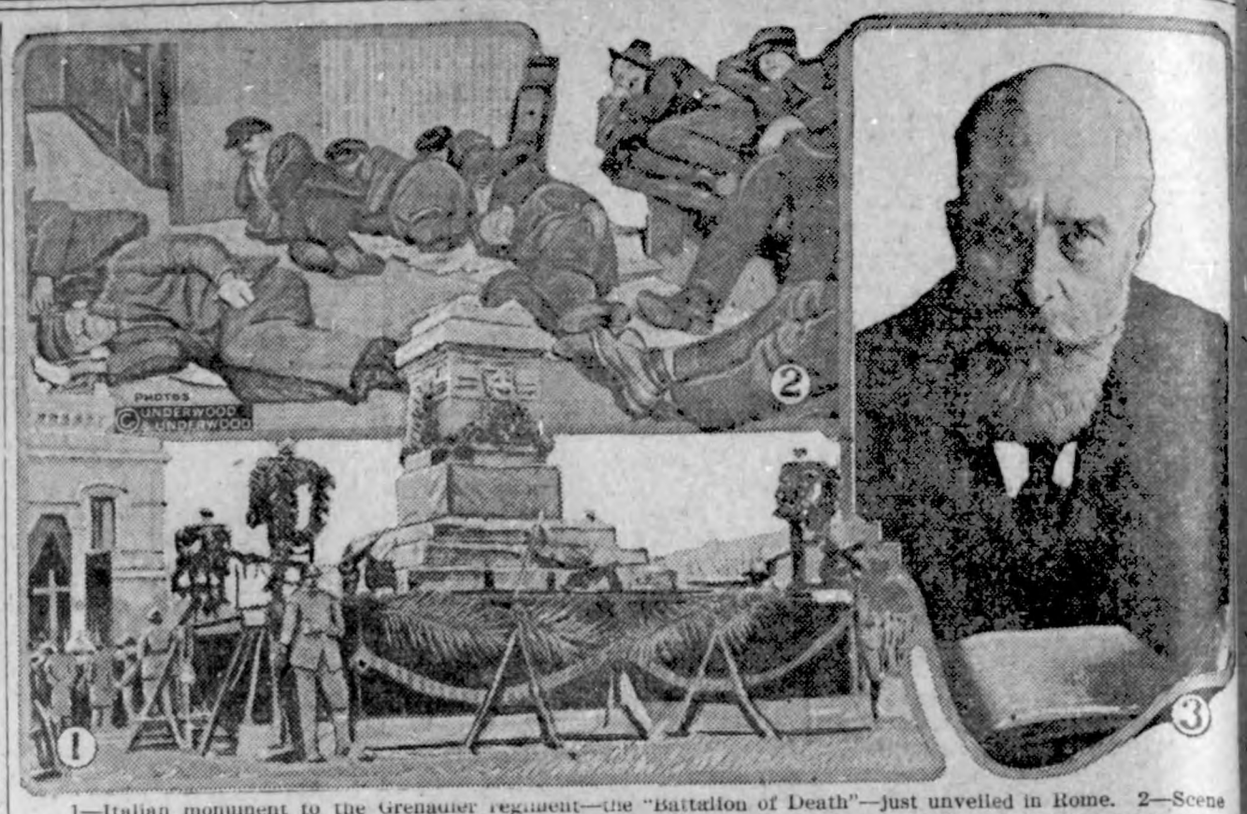
"I feel fine. We're all all right. All I ask is that I get to a fire," he said.



1—The three balloonists left Rockaway, N. Y., about noon on December 13. A storm caught them, night came down, and they were driven far to the north.

2—After drifting all night and the next morning, the three descended on the shores of James bay, in the wilds of Canada. They had made the 800 mile trip in a little over twenty-four hours, and during this time they had seen but little, except the storm clouds below them. They wandered four days in the woods, and on December 18 were led into Moose Factory by an Indian, when they were on the verge of death. They left there December 28 for the 200-mile trip to the railroad at Mattice.

3—On January 11 the three, with their guides, reached Mattice, on the transcontinental railroad. They had come 200 miles through woods and snow. This trip ordinarily takes eleven days or more. They were lost to the world for 29 days in all.



1—Italian monument to the Grenadier regiment—the "Battalion of Death"—just unveiled in Rome. 2—Scene in one of the "flop houses" in Chicago, crowded again because of unemployment. 3—Dr. Michael Hainisch, president of Austria, who may turn the management of that country over to the League of Nations.

NEWS REVIEW OF CURRENT EVENTS

Organized Fight of Capital on the Closed Shop Becomes More Imminent.

ACTION BY MANUFACTURERS

Machinists Accuse the Railroad Companies—Plan to Stop Immigration Probably Killed—Harding Inauguration to Be Simple—Affairs in Europe.

By EDWARD W. PICKARD.

American industries and American business generally are beginning to "speed up" and the more optimistic, like Elbert H. Gary, chairman of the board of the United States Steel corporation, declares there is nothing unfavorable to prosperity on the horizon. Prices of many commodities, including some lines of building materials, are coming down steadily, and in many plants wages are being reduced, in some instances the reduction being made by the employers and accepted by the men and in others being suggested by the workers themselves in order that the plants may be enabled to continue in operation.

All this is quite satisfactory to the ordinary citizen, but there is one dark cloud, despite the assertions of the optimists. This is the coming fight between organized labor and capital over the open shop. There are many signs that the issue will be joined soon. Last Wednesday the representatives of twenty-two state manufacturers' associations, in conference in Chicago, adopted resolutions pledging support for the open shop movement. In the discussion many speakers declared they would not employ union labor in their factories and mills, but when the vote was taken it was made clear that the resolution did not propose any discrimination against the holder of a union card. In substance the resolution was:

"It is recognized as fundamental in this country that all law-abiding citizens or residents have the right to work when they please, for whom they please, and on whatever terms are mutually agreed upon between employee and employer and without interference or discrimination upon the part of others.

"We hereby express our purpose to support these fundamental principles of American plan of employment by the maintenance of the open shop.

"We urge upon our members to secure by discussion and education the active support of workers, merchants, bankers and professional men and all other elements of their prospective communities in favor of American ideals and the open shop."

Only a few days previously an attorney for the International Association of Machinists presented to the interstate commerce commission a petition charging that the larger railroad companies have united in an open shop movement designed to disrupt unionism, and that they are this year "milking the United States treasury to the tune of $750,000,000 through their car repair manipulation." The companies, it is asserted, are closing their repair shops and giving the work to outside concerns which charge exorbitant rates, and in this way more than 30,000 workers have been thrown out of employment. According to the machinists, this drive on railroad shop workers is only one phase of a capitalistic "open shop" movement developing throughout the country, which has for "its real object" disruption of "all legitimate labor organizations and trade union agreements."

Closely connected with the question of labor is that of immigration and its restriction. The forces of organized labor have been in favor of the Johnson bill, which would stop all immigration for one year, and so have many other elements of the population, but late dispatches from Washington indicate that the bill is to be sidetracked by the senate committee and nothing done until the senators can formulate a permanent policy on immigration. In this they are yielding to the opinion of representatives of certain classes of employers, including the railroad, steel and coal people, who told the committee that the threatened "flood if immigrants from Europe" is a myth, and that there is no emergency warranting the passage of the Johnson measure.

Secretary Frank Morrison of the American Federation of Labor told the committee that the federation's demand was for straight-out protection from alien labor for a period of two years. He said that reports just received from labor officials in 141 cities showed the total number of unemployed in these places to be 1,819,372, and said he would not "dare estimate what the total of all cities would show."

Figures were submitted by Mr. Morrison showing the unemployed in Greater New York to be 300,000; Detroit, 150,000; Philadelphia, 235,000; Chicago, 200,000; Cleveland, 118,000; St. Louis, 40,000; Boston, 50,000; Milwaukee, 40,000; San Francisco, 15,000; Seattle, 9,000, and Pittsburgh, 20,000. In contrast to this, he showed, the net immigration, at present rates, would be 784,000 a year.

Avowedly in order to set an example of economy and democratic simplicity, Mr. Harding last week caused to be canceled all the arrangements for an elaborate ceremony on the occasion of his inauguration March 4. At his request the citizens' committee called off the celebration it had planned and also the ball, and the joint congressional committee agreed that there shall be nothing doing except the administration of the oath to the President-elect and the delivery of his address, probably from the east porch of the capitol. This course naturally has peeved the business men and hotel keepers of Washington, but everyone else in the country heartily commends it.

Mr. Harding's conferences with prominent men are about over. Very soon he will leave Marion for Florida, where he will write his inaugural and presumably finish making up his mind as to his cabinet. Concerning the latter, it was interesting if not pleasant to read last week that the hyphenated German-Americans, newly organized into a league, were virtually to ask Mr. Harding to give a place in the cabinet to a German-American. A committee was selected to carry to Marion a list of men from which the President-elect might make a choice. The avowed desire of the new league to create an era of good feeling at home and abroad would meet with greater sympathy if it did not insist on the "German," and if it were not for the fact that one of its leaders is George Sylvester Viereck, editor of a magazine that was formerly the Fatherland and notorious for his pro-German activities during the war.

General Crowder is helping Cuba to get out of her political and financial tangle and the prospect is now that he will succeed. First he has taken up the matter of the recent presidential elections, recommending that the thousands of charges of fraud be cleared up speedily by grouping them and deciding representative cases. Then he will undertake to arrange the island's money troubles. The Cuban senate already has passed a measure for the extension of the moratorium for four months on a modified basis, a plan approved by President Menocal and probably by General Crowder. The Cubans are strongly opposed to the plan of the American bankers for taking over their financial institutions, which were collapsing. They said the bankers asked too high a rate of interest and too long a period for the loan offered. It is said the situation is unpleasantly complicated by the activity of our acting secretary of state, Norman H. Davis, who is reputed to have made a fortune in Havana under the regime of Gomez, one of the claimants to the presidency.

Discord between the British and French over the question of German reparations is further revealed by the downfall of the Leygues ministry in Paris. A large majority of the chamber of deputies fell in with the popular belief that Premier Leygues and his colleagues were too much under the influence of the British cabinet which wishes that a reparations total be named far below what the French people have been led to expect. Because Leygues refused to outline his foreign policy before the meeting with Lloyd George, which was set for this week, the chamber declined to give him a vote of confidence and he and his fellows resigned. It was said in Paris the adverse vote was due partly to the action of the American government in withdrawing from the council of ambassadors, many deputies regarding this as showing America's lack of confidence in the French government.

Tchitcherin, foreign minister of soviet Russia, has defied the League of Nations to send an international army to the plebiscite region of Lithuania, and in a note to the Polish government has warned the allies that the soviet armies will attack any such force. He asserts the Vilna affair is not of concern to Poland and Lithuania alone, but that Russia also is vitally interested.

The Germans are tremendously excited concerning another proposed plebiscite, that in the coal region of Silesia, for they have convinced themselves that Poland is planning to seize that territory before the vote is held. It is said in Berlin that an army of 175,000 Poles has been concentrated near the Silesian border and at Posen for this purpose. The Poles certainly are getting ready for action, and are reorganizing their armies along French lines, but ostensibly they are preparing to meet the expected offensive of the Reds.

Mustapha Kemal Pasha has administered a severe blow to the Greeks in Asia Minor. Concentrating heavy forces secretly, he made a surprise attack on the Smyrna front, breaking through the Greek lines in three places and so threatening an encirclement that the Greeks were forced to retire toward the coast. The Turks captured several towns as well as many prisoners, and it looks as if they might bottle the Greeks up in Smyrna.

King Constantine thinks the French are carrying on a campaign to force the revision of the treaty of Sevres and to compel the Greeks to get out of the Smyrna region—and it is likely he is correct in his belief. He announced last week that he would not abdicate even if the allied nations should refuse to recognize him as the ruler of Greece.

Austria's distressful condition is growing worse daily, if that is possible. A few days ago it was reported that the government had notified the allied nations that it was ready to quit and turn over the country to the League of Nations to manage. The economic and political situation there seems hopeless. Nearly everyone has quit work, and a general strike has been ordered to begin Thursday of this week. Workmen declare they will remain idle until profiteering ceases, and demand that the deduction of the income tax from their pay envelopes stop until the capital levy law is put in force. The government has made drastic regulations against profiteering, but these often are disregarded and extortionate prices are asked for all commodities not under government control. The communists, of course, are ready to take advantage of the situation and start more trouble.

The treaty of Chicago, the pact which brings peace to the warring factions in baseball, was adopted and signed last week, and Judge Landis is now the supreme ruler of the national game. The magnates of the various leagues agreed to give him full power when they incorporated in the document a clause reading thus:

"In case conduct detrimental to baseball is charged, alleged or suspected, the commissioner (Landis) shall have jurisdiction to investigate and determine the facts; upon such determination he may take such preventive, remedial or punitive action as he deems appropriate, against any party hereto, any minor league club connected with the National association, or any individual, as the case may be."

ABLE TO DO HER WORK

After Long Suffering Mrs. Siefert Was Restored to Health by Lydia E. Pinkham's Vegetable Compound

Pottsville, Pa.—"I suffered with female trouble for four or five years and was very irregular. I was not fit to do my work at times and took medicine from a doctor and got no benefit. I saw Lydia E. Pinkham's Vegetable Compound advertised in the newspapers and took it and got all right. I gained twenty pounds or more and am now able to do my work. I recommend the Vegetable Compound to my friends and you may use these facts as a testimonial."—Mrs. SALLIE SIEFERT, 313 W. Fourth Street, Pottsville, Pa.

The everyday life of many housewives is a continual struggle with weakness and pain. There is nothing more wearing than the ceaseless round of household duties and they become doubly hard when some female trouble makes every bone and muscle ache, and nerves all on edge.

If you are one of these women do not suffer for four or five years as Mrs. Siefert did, but profit by her experience and be restored to health by Lydia E. Pinkham's Vegetable Compound.

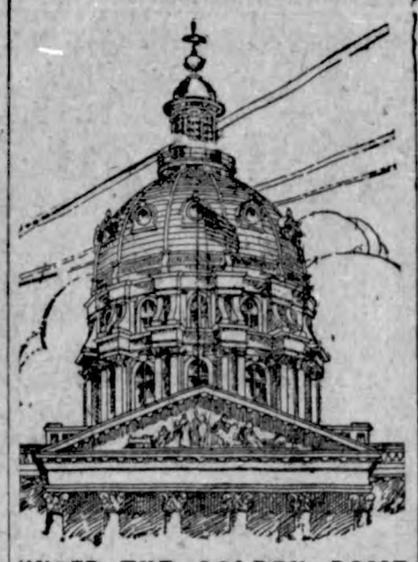
PISO'S



UNDER THE GOLDEN DOME

Des Moines, Ia., Jan.—Governor N. E. Kendall's inaugural address gave the Thirty-ninth general assembly its keynote which in all probability will be maintained until the close of the session.

Governor Kendall urged upon the legislature the maintainance of the strictest possible economy, but without the sacrifice of efficiency or progress.

If any assurance of the passage of soldier bonus legislation were needed, the reception given to Governor Kendall's endorsement of a suitable reward to the veterans afforded it in ample measure.

Several bills in regard to the soldier bonus are in progress of preparation, practically all of which provide for a state bond issue to be submitted to the voters, and a compensation of $15 per month to those eligible for the award. These bills will probably come in for a thorough rehashing in committee, and the final bill will be something of a composium of all presented.

Would Unite Departments

Consolidation of departments giving to each branch the activities which naturally fall under its jurisdiction was recommended. Governor Kendall would give to the state board of control the duties of the parole board as well, abolishing the latter body. He would transfer to the board of health most of the individual offices relating the public health, social work, and public welfare. The state agricultural department would be greatly expanded to include not only the administration of the state fair, but all work relating to the agricultural and live stock activities of the state.

While state officials and the members of the legislature are united in their demand for economy, this does not necessarily mean that the expenditures of the state will be decreased, and it is almost a certainty that the tax levy will be increased, both directly and through a state income tax in addition to the one already collected by the federal government.

Harding For Income Tax

Governor Harding, in his farewell address, recommended a direct inheritance tax on large inheritances, and a direct income tax upon incomes of more than $4,000 per year. His recommendations have been rather charily regarded by those who are still in office, and the fear of political consequences of this brand of legislation is rather pronounced when the matter is confidentially discussed. However, some means of increasing state revenue must surely be found.

The great difficulty facing the solons in this matter is to get more money without bringing burdens of additional taxation upon any special classes. The farming element will fight bitterly against any pronounced increase in the valuation of land for taxation purposes. Bankers will fight increased taxation of investments, and the professional classes are united against the idea of a duplicate in one tax.

However, with the soldier bonus law along sure to increase the annual budget for the next generation by at least half a million dollars annually, the increasing needs of expanding state institutions, and the growth of population from year to year, more money is required.

All Want Money

It does not promise to be a healthy season for new appropriations. Another million dollars will be asked for the temple of justice building, already planned, and for which a million dollars is already available.

An appropriation of $200,000 is wanted for state parks, and this appropriation will have strong support. State educational institutions, especially the state university and the college at Ames, wish to extend their facilities to meet the needs of the student body, nearly doubled in the past decade.

As Senator Foskett, again chairman of the senate appropriations committee, and probably as well versed in state financial matters as any member of the legislature, expresses it, the public wants economy, but demands progress. "Economy should and will be observed" he says. "Progress we can make both through the elimination of waste, where it can be found, and through the expenditure of legitimate amounts for development of new things."

Money Stays At Home

Senator Holdoegel's bill permitting county banks to retain on deposit the county share of the automobile license funds went through with a whoop at the start of the session, and with the exception of the five per cent of the license fees used to defray the expenses of the state highway commission and the automobile department the receipts will remain where they are collected until they are required for local or federal aid road work, to which the license fees are devoted.

Very little road legislation is anticipated at this session. The old fights have died out, and the tendency is to permit the present law an adequate trial before much tinkering is done.

Johnston Is Back

The road fights of the thirty-sixth and thirty-seventh general assembly are recalled by the election to the senate of James Johnston of Lucas county, leader in the house of the fight against the state highway commission, and sponsor of the well remembered Johnston bill of these sessions. His companion in these contests, M. B. Pitt of Harrison county, is serving his second session in the senate.

The industrial court bill, which is sure to be opposed to the last ditch by organized labor, was introduced in the house the first day set for the regular introduction of legislation by Representative J. W. Kime of Fort Dodge. It provides for the creation of a court of three judges to pass upon disputes arising between capital and labor, and seeks to substitute for the strike an orderly settlement of labor disputes. Abrogation of the right to strike will not be tolerated by Iowa labor, declared Fred Canfield of Cedar Rapids, president of the Iowa Federation of labor during the past year, who states, however, that labor as well as capital will welcome any possible solution of wage difficulties or other labor troubles which will both preserve the rights of the workers and afford an improvement of present conditions.

After The Bankers

Bankers of the state will be under fire in several bills to be presented. The first of these, by O'Donnell of Dubuque, provides for the repeal of the statute whereby banks are alleged to be exempted from the taxation of liberty bonds held in their possession under certain conditions.

A considerable flurry was created right at the close of the Harding incumbency through his sending to the senate for confirmation the men appointments of M. Y. Henderson of Hawkeye. to conclude the term of George Messenger as state banking superintendent, and of N. S. Ketcham to fill out the unexpired term of H. M. Eicher as a member of the state board of education. In some quarters the appointments were considered as evidence of a difference between Governor-elect Nate Kendall and the retiring governor, and an unseemly interference with Kendall's plans by Harding. Both Harding and Kendall denied that there was any controversy, and Kendall remained discreetly silent as to the situation.

The senate confirmed Henderson, who will serve until July 1, 1921, when the term expires, but rejected the confirmation of Ketcham.

Kendall Wants Areny

It is understood that Governor Kendall has tendered the appointment of state superintendent of banking to Wallace Areny of Marshalltown, former member of the legislature, and well known in state banking circles, but that Areny was not willing to announce his decision at this time, and the Henderson holdover was entirely satisfactory to all concerned.

Ketcham is a democrat, and it is rumored that a democratic women will be named for this position. The term of W. D. Sheean of Anamosa, another democrat, now on the board of control, also is expiring, and Governor Kendall must name another democrat to succeed him unless he decides upon a re-appointment.

Blue sky legislation will be presented in several bills, and was urged in his message by Governor Kendall. Increasing strictness in the licensing of corporations and the requirement of the bonding of stock salesmen, as well as the limitation of promotion expense, is suggested in practically all of the bills. Secretary of State Ramsay, under whose department the blue sky law is administered, will have some ideas of his own on the subject, which will undoubtedly be incorporated in any measure which is adopted.

Code Revision

The special committee of legislators which has been working upon code revision reported during the early days of the session recommending that the "dead line" for introduction of new bills be set for February 27, clearing the way for an immediate beginning upon the work of code revision, and recommending the immediate reference to the standing committees of all of the 253 bills recommended by the code revision commission.

The report was at once adopted by the house, but met with opposition in the senate, where action was deferred until after the four day recess which followed the inauguration of Governor Kendall.

Kendall's recommendation that the work of code revision be completed at the regular session if possible did not meet with entire approval. Some of the members feel that it would be an imposition to maintain the present session into the summer for purposes of code revision for the reason that members of the legislature receive a flat salary of $1,000 for the session and would receive no additional compensation if the same session is called for code revision, additional per diem compensation would be allowed.

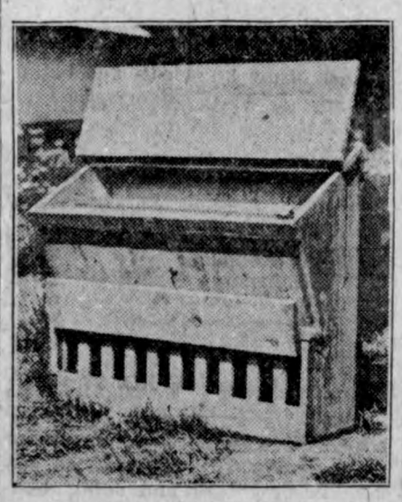
POULTRY

FEEDS FOR BACKYARD FLOCK

Dry Mash Is Recommended in Addition to Assortment of Grains and Table Scraps.

In addition to the grain and the table scraps given a backyard flock it is well to feed a dry mash. This dry mash is composed of various ground grains and is placed in a mash hopper or box from which the hens can help themselves. The advantage of feeding such a mash is that the hens always have access to feed, and this tends to make up for any faulty, inexperienced, or insufficient feeding. The hens do not like the dry mash so well that they are likely to overeat, but it will supply a source of feed in case they are not getting enough grain feed. The dry mash also provides a suitable medium for feeding beef scrap, a certain amount of which may or may not be necessary, depending upon the amount of meat scraps available in the table waste. If the hens show a tendency to become overfat it may be desirable to close the mash hopper during a part of the day and allow them access to it only during a certain period, preferably the afternoon.

A good dry mash, recommended by poultry specialists of the United States Department of Agriculture, is composed of equal parts by weight of corn meal, wheat bran, wheat middlings, and beef scrap. Another mash is composed of three parts by weight of corn meal and one part beef scrap. Still a third mash, which has given excellent results, is composed of one pound of wheat bran, one pound of wheat middlings, 6.5 pounds of beef scrap, and 16.5 pounds of corn meal. The beef scrap used in the dry mash is usually the most expensive ingredient, but it is an essential part of the mash and very efficient for egg production. It should not be eliminated or reduced unless the quantity of meat in the table scraps is considerable or unless some other product can be substituted for it. Fish scrap, when available, may replace the beef scrap, or cottonseed meal can be used to replace one-half the beef scrap in the mash. No attempt should be made to replace more than half the beef scrap with cottonseed meal, as



Hopper From Which Hens Can Help Themselves.

the results in egg production and in the quality of the eggs will be unsatisfactory.

Green-cut bone can often be purchased from the butcher. This material when procured fresh makes an excellent substitute for beef scrap. It should be purchased in small quantities, as it cannot be kept fresh for any length of time and when spoiled may cause severe bowel trouble. It is best fed in a trough not oftener than every other day, allowing about one-half ounce per bird. Should severe or continued looseness of the bowels follow the feeding of green-cut bone it should be discontinued or the quantity reduced.

VICE OF FEATHER PLUCKING

Some Authorities Attribute Habit to Lack of Scratching Facilities While Confined.

Among the annoying vices that fowls in confinement will contract is that of feather plucking. The reason for it is not clearly established; some attribute it to the birds being kept in close quarters devoid of scratching facilities, while others are of the opinion that it is a lack of meat in the ration or a want of green stuff. But whatever it is it is a nasty vice. Changing conditions will sometimes bring relief; others advocate a change of ration, giving stuffs of a cooling nature to which has been added a pinch of salt. If only one or two hens are guilty in a flock they had better be killed before others take up the habit. Paring down the beak so that it will not close tight to nip or pull out the feathers will be found effective. The busy hen with room to turn around in and green, wholesome food scarcely ever contracts this vice.

HENS BETTER THAN PULLETS

Older Fowls Are Preferred for Breeding Purposes—Cockerels Most Satisfactory.

Usually hens make better breeders than pullets. Cockerels, if well grown and matured, often give better fertility than older birds. However, cock birds that have proved good breeders should be used.

DAIRY

WORK OF BULL ASSOCIATION

Missouri Organization Doubled in Membership in Two Years Because of Its Usefulness.

Two years ago the United States Department of Agriculture and cooperating agencies organized a bull association in Webster county, Mo., with 31 members. Now there are twice that many members, due to the success and usefulness of the association.

Before the association was formed there were 18 bulls owned by the men who afterwards joined it. Upon the formation of the organization the number of bulls was reduced by two-thirds, because after the members had been arranged into blocks, it was found that six bulls were enough. These were much finer animals, however. Judging them by their money value, the new ones were three or four times as good as the ones they replaced, since the average investment per bull was $75 before organization, and $276 after.

Yet, owing to the smaller number of bulls needed under the co-operative arrangement, the cost per farmer was but little more. The members had on the average $43.71 invested in their inferior bulls, while the superior bulls owned by the association cost each member only $53.45. This $10 increase of cost per member meant a $200 increase of value in the individual bulls from which they now

Jersey Bull—A Sire Is "More Than Half the Herd."

have service—one thing which accounts for the doubling of the membership of the association after running two years. The value of the calf crop will probably show a very much greater increase.

FARMERS MIXING OWN FEEDS

Dairymen Dissatisfied With Commercial Materials Are Turning to Co-operative Buying.

"Farmers are almost universally dissatisfied with mixed commercial feeds and are depending more on mixing their own rations," says Henry McGough, chairman of the dairy committee of the Illinois Agricultural association. He adds: "They are all interested in the co-operative buying of mill feeds such as bran, cottonseed meal and gluten and at times when there is a shortage in roughages in the purchase of alfalfa hay."

Commercial mixed feeds ought to give more satisfactory results because the manufacturers with their improved machinery for mixing, large capital and ability to purchase feeds and grains in large quantities should be able to supply a satisfactory feed at a reasonable price. Oat hulls, weed seeds, chaff and cheap molasses do not make a nourishing or satisfactory feed and their extensive use by some mixers has brought these disparaging remarks from Mr. McGough.

SUCCESS IN DAIRY FARMING

Carelessness in Breeding and Calf-Raising Is Sure to Result Disastrously to Herd.

Success in dairy farming depends to a great extent upon the careful rearing of the calves. Carelessness in breeding and calf raising is bound to result disastrously to a herd, or at least keep it at a standstill, as far as improvement is concerned. Without raising calves from which to replace discarded animals it is almost impossible to raise the average production of the herd. Purchasing cows for this purpose is a very unsatisfactory method. Cows placed on the market are almost certain to be of very ordinary grade, since a good cow whose value as a milk producer is known is not offered for sale at market price. Therefore, the dairy farmer should take every precaution in handling the young calves which are to be placed in the herd.

PRODUCTION OF DAIRY COW

Animal May Be Considered Profitable if She Yields 6,000 Pounds of Milk Each Year.

A cow may be considered profitable if she produces 6,000 pounds of milk or 200 pounds of butterfat per year. A good dairy cow should produce 8,000 pounds or more of milk or 400 pounds or more of butterfat.

BEST TYPE OF DAIRY COW

Must Be Capable of Producing Large Quantity of Milk and Butterfat Economically.

A dairy cow is one of distinct dairy type and dairy breed capable of producing a large quantity of milk and butterfat economically or at a profit, and to produce calves regularly as good or better than herself.

"A cup of Cocoa"

Good at any hour of the day

Baker's Cocoa

is especially good in the evening a short time before retiring. Its flavor is delicious, its aroma most attractive, and it is conducive to restful sleep without being in any sense of the word, a narcotic. Absolutely pure and wholesome.

For Constipation, Biliousness, Liver and Kidney troubles, take Garfield Tea.—Adv.

Wings to Help Out.

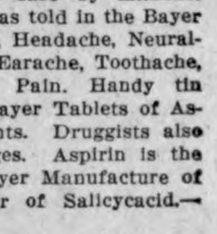
"Pegasus was the winged horse."

"He should have been good over hurdles."

Feel All Worn Out?

Has a cold, grip, or other infectious disease sapped your strength? Do you suffer backache, lack ambition, feel dull and depressed? Look to your kidneys! Physicians agree that kidney trouble often results from infectious disease. Too often the kidneys are neglected because the sufferer doesn't realize they have broken down under the strain of filtering disease-created poisons from the blood. If your back is bad, your kidneys act irregularly, and you feel all run down, use *Doan's Kidney Pills. Doan's* have helped thousands. *Ask your neighbor!*

An Iowa Case



J. L. Ernst, S. 2nd St., Bellevue, Iowa, says: "I suffered from backache and other symptoms of kidney trouble. There was a dull aching in the small of my back. My kidneys acted too often and the secretions were highly colored. I had dizzy spells when everything seemed in a whirl. I read about Doan's Kidney Pills and used one box with good results."

ORDINANCE NO. 37

An Ordinance granting permission to the Standard Oil Company, a corporation organized and doing business under and by virtue of the laws of the State of Indiana, to erect and maintain on the property described below, warehouse, tanks and other buildings necessary for the conduct of its business, and to store therein illuminating oils, naptha, gasoline or any other mineral oils or fluids, the products of petroleum in quantities sufficient to meet the requirements of its business.

Be it ordained by the Town Council of the Incorporated Town of Klemme in the County of Hancock, State of Iowa,

Section One—That permission and authority is hereby given and granted to the Standard Oil Company, a corporation organized and doing business under, and by virtue of the laws of the State of Indiana, to construct and maintain for a term of fifty years on the following described property within the limits of the Incorporated Town of Klemme, County of Hancock and State of Iowa, to-wit:

Beginning at a point six hundred ten (610) feet distant northerly from the north end of C. R. I. & P. Depot in the Town of Klemme, Hancock County, Iowa, measured along center line said RR. Co's. elevator track and eight and five tenths (8.5) feet distant easterly at right angles to said center line of elevator track, thence northerly parallel to said center line fifty (50) feet; thence easterly at right angles one hundred (100) feet; thence southerly at right angles fifty (50) feet; thence westerly at right angles one hundred (100) feet to said point of beginning.

Warehouse, tanks and other buildings necessary for its busines, and to store therein illuminating oils, coal oils, naptha, gasoline, or any other mineral oils or fluids, the products of petroleum, in quantities sufficient to meet the requirements of said Company's business.

Section Two—All ordinances and parts of ordinances in conflict herewith are hereby repealed.

Section Three—This ordinance shall be in force and effect on and after its passage and acceptance in writing by the said Standard Oil Company.

Passed and approved this 27th day of December, A. D. 1920.

ATTEST—F. GRUETZMACHER,
Mayor
N. L. PALMER,
Clerk

Mr. and Mrs. Louis Sampson returned Friday morning from their two months' visit with their daughter in Wisconsin. That clears up the mystery. We haven't seen Louie on the streets for a long time and wondered where he was keeping himself hid all this time. He must have brought the cold weather back with him, doggone it Louie, why didn't you stay there so we could still be enjoying that California weather?

Did anybody notice that LuVerne Smith spent Sunday in Klemme? Well it may look suspicious but such was the case. The only reason Verne could not get to see his girl this week was on account of the cold weather here Sunday. A week ago he walked to Belmond and it only took two hours and a half. Vern says he goes there to look at the big sugar beet plant but we have gotten to the point where that story don't soak into our dome any more. You'll have to hatch up a new yarn, Verne.

Indian Cradle Boards.

There are nine different kinds of cradle boards used by the various tribes of North American Indians. The Eskimos did not use such a board. The baby was wrapped in the hood of the mother's fur coat. In the most southern tribes the baby was merely bound to the mother's back by a strip of cloth long enough to hold it.

Liberty Township News

Mr. and Mrs. Lawrence Schaefer and son were callers at the Herman Paul home Sunday.

Th edust and snow storm which prevailed all day Sunday cut off most of the usual holiday activities.

A basket social was held at the Katter school house last Friday evening. It is reported that there was a good attendance in spite of the storm.

Herman Paul has been shelling corn the past week. Many of the neighboring farmers have been helping haul the shelled product to town.

A party was held at the O. E. Carlson home last Monday evening. Many of the young people of the community met for a good time.

Carl Carlson returned home from Dexter, Minn., last Thursday where he has been visiting the Gus Kahler family. Ray Kahler came back with him for a visit with friends in this vicinity.

The revival meetings which were going on for the past two weeks at the Liberty Township church, came to a close last Thursday evening. They were cut short one day on account of the snow storm.

"Jimmie" Wade and "Bub" Haefner have been very busy the last few weeks hauling gravel from the township pit onto the road between their places and town. We presume their aim is to get the roads in the best possible shape for next summer, so that they can make the trip to town in less time, as they are both owners of Tin Lizzies. "Bub" just purchased a new one a short time ago.

M. O. Hocum
The Grain, Coal and Live Stock Man

Will buy Grain and Hogs six days in the week, I pay highest market price.

Avery Township News

Clint Dutton is working at Zip's barber shop again this week.

Mrs. H. Helps who has been sick is improving.

Robert Roths was a Garner visitor Monday morning between trains.

The children of Albert Fuller are on the sick list this week.

Fred Bachman's little girl is on the sick list this week.

Mrs. G. A. Goll has been confined to her bed since Monday of last week.

D. D. Ross and Wm. Bell shelled corn Monday of this week. Bell & Sons did the shelling.

Mrs. Sylvan Johnson visited at the home of her parents, Mr. and Mrs. E. Buss, Monday.

Sylvan Johnson had a runaway on Monday morning. No damage done, only Sylvan received a bruised knee.

D. D. Ross of Garner, was a visitor at the Wm. Bell home the first of this week.

There has been no school in the Prairie Queen school since Christmas as they have no teacher.

Harvey Nelson was absent from school Friday, it being the first day since school began. Kenneth Bell now has the record of the school, going from September without missing a day, or being tardy.

Klemme High School

Dr. A. E. Buriff gave an excellent address to the Klemme High School Monday morntng and it was certainly enjoyed by all. Short talks like this are a good thing and there should be more of them.

We know have a male duartet in the Klemme High. Are we up and comming? We should say so!

Things are getting all lined up for a Declamatory Contest. No, don't all rnsh up to the school building right away. We will tell you in time. The real contest will probably be in the opera house toward the close of the winter term.

The high school students are living in peace and quietude, for the first semester examinations are over. There have been no demonstrations caused by "flunking" so we presume that everyone "passed".

Opening exercises are alright. Each class has to lead for three mornings a week. It is alright to see the other fellow perform and get flustered. And when you come to school some morning and Wow! you're next, and you're not prepared---'S fierce!

The various classes in the High School organized recently. The officers are as follows:

Juniors—President-Mildred Johnson
Vice Pres.-Earl Josten
Sec. Treas.-Arthur Johnson

Sophmore—President-Howard Wiles
Vice Pres.-Pearl Johnson
Sec.-Treas.-Dolores Koerner

Class colors—Pink and lavender
Flowers—Sweet Pea

Freshman—President-Marie Blank
Vice Pres.-Blanche Medus
Sec.-Treas.-Maybelle Johnson

But It Pays "Anyhow."

"De man dat 'tends strictly to his own business," said Uncle Eben, "sometimes don't git no credit 'cep' fob bein' unsociable."

SMILE WITH US

Agreement.

He—That girl's eyes are like gems.
She—They are cat's eyes.

"Any house carried away by a cyclone."—Houston Post.

Marital Frankness.

Hubby—"I can't help it. I'm doing my best to get ahead." Wifey—"Well, heaven knows you need one."

Opposite Argument.

"I tell you, a new camera is a positive necessity."
"And yet it is a negative proposition."

The Kind.

"I understand the candidate you speak of is a climber in politics."
"Yes; a front porch climber."

The Reason.

"What a rasping voice Smith has."
"No wonder; he went yesterday to his dentist and had his teeth filed."

Naturally.

"How does the poker scene go in your new western play?"
"We always get a hand on it."

Nearly Every House Has One.

"There's a bug in this house."
"What kind?"
"A golf bug."

What They Miss.

"Good little boys never fight."
"They don't? Then they miss a lot o' fun, ma."

Most Amazing.

"Algy is losing his memory. It's been going on now for two months."
"But, how could it?"

Small Interest.

"What interest is the dog taking in that cat chase?"
"I think it is one purr cent."

Advice.

"What is the best way to get a big job?"
"Outgrow the little jobs first."

Chief Task.

"What is your boy doing now at college, old man?"
"Me."

Quite So.

He—Darn those cheap stockings.
She—Yes, that might mend matters.
—Baltimore American.

Next Step.

Jonah emerged.
"Now to brag how I enjoyed my vacation," he cried.

The Kind.

"What kind of steed was most in demand in the days of chivalry?"
"A knight-mare, of course."

Setting the Pace.

"How is your hired girl about plates and dishes?"
"Oh, she breaks the record."

On the Move.

We can say this for the somnambulist—he is no idle dreamer.—Boston Transcript.

Poor Foothold.

"Do you know anything about their standing in society?"
"Yes, it's on the ragged edge."

Even Those.

Into Mr. Toddles' room marched the detective. "You sent for me, I understand," said he gravely, "to investigate a burglary that was committed here last night?"

"Of course I did." Of course—of course!" fussed Mr. Toddles.

"What is missing?"

"Several odds and ends, and three complete sets of harness—brand new, too!"

"Ah!" murmured the detective. "Did the thief or thieves leave any clews—any traces behind them?"

"Traces!" said Mr. Toddles. "No, they took those, too."

Announcing Our New Car---

Willys-Knight

The Motor

The reputation of the Willys-Knight car rests solidly on the performance of the Willys-Knight motor. In this motor, metal cylinder sleeves, one within the other, slide up and down on a film of oil, noiselessly, without friction or wear, enduringly quiet. Their action is timed positively. Gases enter and exhaust through ports in these sleeves There are no spring controlled valves----no clashing metal parts.

The motor is so simple, so free from wear, that it almost never needs adjustment. The small amount of carbon forming on the sleeves actually improves compression and serves only to increase the velvet flow of quiet power.

The Willys-Knight motor improves with use.

The shape of its combustion chamber permits the delivery of the greatest possible power ior each explosion, resulting in gasoline economy. Its flexibility is remarkable.

Refined Car

In refinement of coach work, beauty of line, and completeness of convenience, the Willys-Knight car is in keeping with the efficiency of the motor whose smooth and quiet power sends it skimming over the highway,

Touring Model

The Willys-Knight Touring is of rich dark blve framed by ebony black trimmings. The interior of the car is a restful harmony of hand buffed black leather.

The seat backs are tilted in European fashion; so that you sit, not bolt upright, but restfully in a natural, easy posture. You sit in the seat not merely on top of it. And the weight of body is cradled by the yielding yet ever-buoyant cushion springs beneath.

Other Models

In the Roadster and Coupe one seat can be moved foreward, enableing the occnpants of the car to ride side by side when they choose; but the cars are roomy however the seats are plachd. Moreover, sliding the seat forward gives extra baggage space.

CHAPTER XI—Continued.

—11—

"Yes," she admitted, "that was about all."

"So, now he's dead ; he don't cut no ice anymore."

"But are you sure he's dead?"

"Sure?" sneeringly. "I don't know how I could be no surer. I turned the cuss over an' he was cold then. You don't need worry none about that. Wait a minute till I see who the guy was what tried to break in here."

Shelby could hear Macklin cross the room, and jerk the blanket from off the bodies. The fellow gave utterance to an oath of astonishment at the sight revealed.

"My God! Did you ever see anything like that? Locked together like two stags. H—l! Sam was shot, but he got the white guy even after he was dead. D—n me, if it ain't Hank Slagin! Now, what does that mean? I reckon Hanley sent the galoot in here. That comes from spillin' things when yer drunk. Say, you an' I have got to get out of here. I'll tell you about it as quick as I can. It's plain enough Hanley's got his eyes on you, an' will double-cross me if he once gits a chance."

"What is it you mean? I do not understand."

"Naturally yer don't, seein' I ain't told yer noth'n'. But now that I know yer ain't pinin' away over that feller Shelby, I reckon the sensible thing fer me to do is ter talk straight. There's goin' ter be h—l to pay in this valley before long, and the sooner we get out o' here the better. I run across a soldier 'bout half way ter Gerlasche, an' he give me a pointer that made me wheel about, an' ride back."

"The Indian outbreak?"

"Sure; the troops got in, an' rounded most of the Sioux up. They had a fight at Wounded Knee, over yonder, an' licked h—l out of the reds. Some of 'em got away though, an' come trailin' west—mostly young ones, I reckon—an' now they're sendin' cavalry out ter ride 'em down. That's what he was after, a bunch to come scoutin' in through here."

"Here? Wolves' hole?"

"Mor'n likely; he didn't say nothin' 'bout that. But they're mighty liable ter call. I'm fer gittin' out, while the goin's good. That's what I come back for—to get you, and skip."

"To—to get me?"

"Of course. I'll tell yer about it now, an' you'll go all right. I reckon you never thought I run off with you 'cause I loved you?"

"No—you—you loved me?"

"That's the way of it. I saw you long before that funeral down to Ponca; but this guy Shelby horned in 'fore I was ready to act. You didn't care nothin' for him. So I says to myself, then, I'll have her; I'll take her whether she wants me or not. Long as she don't love him, I'll make her love me—see? Course I didn't aim to do no killing; that was just an accident like, an' I didn't do it nohow. It was Sam here who got gay, and beaned Shelby."

"But what would you do with me, if—if he had been alive?"

"There ain't no use discussin' that, fer he ain't alive. It's what I want ter do now that counts. Maybe I had a plan then, an' maybe I didn't. But now I got it all planned up proper. I'm a goin' ter marry you. An that goes whether yer're willin' or not. I ain't even askin' you."

The expression of her face must have brought the fellow a realization that perhaps he was going altogether too fast, for he broke in with an explanation.

"See here now, don't get huffy. I ain't no Western rough-neck for you to be ashamed of. I belong down East in ol' Virginia, an' we got money to burn. That's straight goods. My real name ain't Macklin at all; it's Churchill. I mean business an' just as soon as Indian Joe gets down here with some horses, we're a goin' ter start."

"For where?" her voice trembling in spite of every effort at self-control.

"To Gerlasche first; there's a preacher there, an' then on to God's country just as fast as the train will take us. That's my program, an' let me tell you, I'll be d—n glad ter git away from Injuns, Mexs, an' the rest o' this rotten outfit. No, you wait; that will be Indian Joe comin' now."

The door between the two rooms had closed partially, yielding doubtless to some faint draught of air, so that Shelby ventured to survey the scene through the narrow crack near the hinges. Matters were becoming so complicated he was at his wits end. He had delayed too long, and, perhaps, it had been a mistake to advise the girl to thus appear friendly to this brute. Now, instead of being confronted by the Kid alone, he must also face Laud, if he would prevent her being carried away the second time. The situation had become desperate.

He could see the girl standing pressed close to the wall, the light from the broken window on her face, her eyes anxiously watchful of the movements of Macklin, who had turned and was fronting the outer door, one hand resting in readiness on the butt of his "45." Then that opening was shadowed, and the bulky figure of the squaw-man suddenly appeared. His first utterance was full of ill-humor.

"Well, I got your message, and am here," he said roughly. "What the h—l is up, Macklin?"

"Everything is, from all I hear," was the short reply. "Your Indians are licked already, ain't they?"

"Yes; I expected that; I told them how it would be."

"To be sure you did, but you never thought every runaway buck would make for this Hole. But they have; and you know what that means, I reckon. They will be smoked out sooner or later. Do you want to stay, and be smoked out with 'em? I'm for getting out of here now—tonight, Joe. I don't intend being caught in this net; an' you are a d—d fool if you don't feel in the same way. There is a chance now to make it, but tomorrow may be too late. How about your cattle?"

"I sent them into the Bad Lands."

Macklin laughed.

"That proves what you think about it. All right then; we'll ride out together. Got three horses out there?"

"Yes, and a pack; that's what the Indian told me to bring. The woman going along?"

"Sure she is. H—l, we've fixed things all up. We're goin' to get married over at Gerlasche. I'm aimin' ter take you along for best man."

Laud evidenced his surprise and incredulity with a grunt, and a swift glance at the silent girl, shrinking back against the wall.

"What about Pancha?" he asked dryly.

"That little Devil! Pooh! when she hears about it, I'll be east of the Missouri. She's all right for a Mex, but this time I mean business, Joe. Don't you forget it, I'm playin' for big stakes, an' there don't no Pancha stand in my way. What's the matter with you?"

"Well, I ain't so sure you're goin' ter git off so scot free," returned Laud slowly. "There's a fellow been in here huntin' you; an' I reckon he must be here yet—leastways I don't know how the cuss could have got out."

"A man huntin' me? You're dreamin'."

"No I ain't. The fellow joined my outfit up on the mesa yesterday—sorter big fellow with light hair, an' a smooth face. He put up quite a spiel, and claimed his name was Churchill. I didn't mor'n half believe him, but not knowin' what was up, I let the cuss drift in along with us. I aimed to see you as soon as we got in; but

"What the H—l Is Up, Macklin?"

h—l, you had skipped, while Hanley, who might have knowed something, was up at the cove. I sent Juan after him, for by that time I was sure the guy was some d—n spy. The hoss he was ridin' had the same brand of them cattle I drove in."

"The same brand? What brand?"

"The Three Stars; they come from Shelby's ranch up on the Cottonwood."

"H—l! A big fellow, you said with light hair, and smooth face?"

"That's him; grayish eyes, an' rides like a cavalryman. I never saw the galoot before, but I wan't goin' to take no chances, so I got his gun, and locked him up."

"Where?"

"In that cell room in Villemonte's cabin."

"And he's there yet?"

"No, he ain't; that's the trouble. Somehow he got hold of a knife; must have it hid on him, I reckon. Enyhow he cut them bars at the window, an' wiggled through."

"And he hasn't been caught?"

"Ain't seen hide ner hair o' him. Some guy helped him outside—there was prints of two kinds of boots plain enough under the window; but after that they might just as well have gone up in the air."

"Two o' 'em. The other couldn't have been Hanley, or Slagin, could it?"

"How the h—l do I know? I never caught sight o' nothin' but the print of that boot. I scouted up the creek; then that first bunch o' Indians come trailin' in, an' I had no time to think about anything since, only gettin' my cattle out o' here."

"But you'll go with us now?"

"For a ways, anyhow; I reckon there ain't nothin' else to do; them soldiers is bound to get here."

"And the sooner we're off the better. You ready?"

He wheeled and confronted the shrinking, frightened girl, who made no reply.

"Well, by God! you better be. Get the horses, Joe; I'll fetch her along, all right."

Shelby straightened up. In spite of the odds, he must act now, or never. Yet, before he could take a step forward, a single shot rang out sharply. He saw Macklin fling up his arms, and reel backward, his body striking the half-open door, before it crashed to the floor, and lay motionless.

The impact of Macklin's body had flung the door wide open, leaving Shelby fully exposed to view. For an instant, however, the startled and bewildered Laud failed to note his revealment against the darkness of that interior. He had leaped back instantly to the protection of the wall, and, gun in hand, crouched there with eyes fixed on the broken window opposite. Shelby was swift to take advantage of his surprise. Wherever the shot had come from, whoever had fired it, his concealment was no longer possible. There must be no hesitancy, no delay. He stepped across the motionless body, with weapon flung grimly forward.

"Hands up, Joe! Put them up first before you turn around. Stop that! Don't try any tricks on me. Now stand there—Olga."

"Yes."

"Take that gun out of his hand; there is another in his belt; get that also. That's right; now come over here; you understand firearms."

"Yes, of course" wonderingly, "I know how to shoot."

"I imagined so; Calkins would have taught you. Keep this fellow covered, and let him have it if he makes any effort to break away. Watch him closely, while I rip up that blanket, and tie him up."

He left her with the gun steadily pointed at Laud's head, the fellow cursing, with hands up, his angry eyes following every movement. He was desperate, maddened by sudden helplessness, with the sneaking ferocity of a wolf, yet was temporarily held motionless by the deadly peril. Shelby stripped the ragged blanket from off the dead bodies under the bench, and began hastily to rip it apart. The black, bloated face of Slagin stared upward, and Indian Joe saw it for the first time, a sudden spasm of terror causing him to burst forth:

"My God! That's Hank Slagin!"

"Sure it is; he got his, an' you'll get yours if you drop those hands, you cur. Turn around now, and stop."

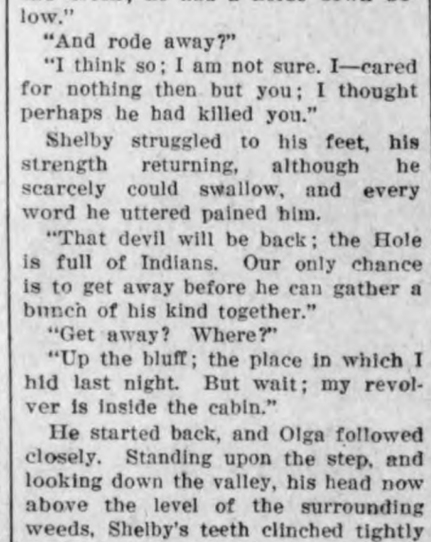
Laud obeyed, his face ugly and threatening, and Shelby took a step closer, the strip of blanket in his hands, his revolver thrust back into his belt. What Indian Joe saw will never be known; perhaps a slight wavering in the eyes of the girl, perhaps an instant lowering of her gun. But it was enough. All his hate and treachery drove him to a desperate chance. With the maddened leap of a wild beast, he sprang upon Shelby, gripped him fiercely by the throat, and the two went headlong to the floor. Olga fired, but without aim, missing them both, and dare not pull the trigger again, so tightly were the men grappled, as they rolled back and forth in frenzied effort to obtain mastery. Shelby, taken completely by surprise, was at a disadvantage, his throat crushed by sinewy hands, his loosened revolver flung half across the room. He could only struggle to break the hold of his antagonist, rolling over and over, and forcing the fellow's head back with every ounce of strength he could bring into play. They were not unevenly matched, the two—Shelby the younger, and perhaps the stronger; but Laud a skilled fighter, hard as nails, and ready to resort to any trick. Moreover, he knew what he had set out to accomplish, and bent every effort to prevent the frightened girl from getting a shot at him. He hung on, his straining hands, like a vise, twisting tighter and tighter Shelby's shirt band, careless of any injury to himself so that he kept the body of the latter in protection between him and Olga's revolver. Yet, with every move, every straining whirl of their bodies, he gained an inch nearer the open door. He fought like an animal, sinking his teeth into Shelby's flesh, and driving his knees into his body. It was silent, bitter fighting, every muscle strained to the utmost, and the squaw man won. They knocked over the bench, and crashed out through the partially open door, rolling down the single step into the weeds. Laud landed on top, his fingers still clutched on Shelby's throat, the latter half unconscious. Crazed, maddened as he was, the one desire to escape overcame his eagerness to kill, and Indian Joe, cursing, struck once at the upturned face, leaped to his feet and plunged into the shelter of the weeds. Shelby, gasping painfully for breath, scarcely yet fully realizing what had occurred, lay motionless but for the quivering of his limbs.

Indeed, he had scarcely forced open his eyes when Olga was beside him.

"You—you are alive? He did not kill you?"

He endeavored to smile, lifting himself upon one elbow.

"No, no; I am all right," he gasped. "The fellow got my throat, and I couldn't break his hold. The treacherous hound got me that time. I was



His Finger Still Clutched on Shelby's Throat.

a fool, and off my guard; it is no fault of yours; I should have taken no chances with the dog. Where did he go?"

"Down there, through the weeds to the creek; he had a horse down below."

"And rode away?"

"I think so; I am not sure. I—cared for nothing then but you; I thought perhaps he had killed you."

Shelby struggled to his feet, his strength returning, although he scarcely could swallow, and every word he uttered pained him.

"That devil will be back; the Hole is full of Indians. Our only chance is to get away before he can gather a bunch of his kind together."

"Get away? Where?"

"Up the bluff; the place in which I hid last night. But wait; my revolver is inside the cabin."

He started back, and Olga followed closely. Standing upon the step, and looking down the valley, his head now above the level of the surrounding weeds, Shelby's teeth clinched tightly to keep back an oath, and his eyes darkened.

"There's no time left," he said grimly, pointing, "Laud has got his gang already; we're sure up against it now."

Even as she stood beside him, straining her neck to see, the cadence of a wild whoop came echoing to them from the distance; Laud and the Indians were coming across the flat, riding straight for the cabin, and lashing their ponies as they came.

"Are—are they after us?" she sobbed, grasping his arm, "are—are you sure?"

"No doubt of it; that's Laud a leadin' 'em. Them Injuns will do whatever he says. Come in quick; we got to fight it out here, I reckon there ain't much chance, but I'm likely to get some o' that outfit. Hurry, Olga; there ain't no time to lose."

He crashed the door shut, and flung the bar into place; then dragged forward the heavy bench and braced it as best he could. He had to feel along the floor to recover his lost weapon, and before he could straighten up again, the wild chorus of yells rang out close at hand, mingled with the sound of horses crashing recklessly through the maze of weeds, almost to the very door. He was the fighting man now, cool and eager. He looked straight into her eyes.

"You are not frightened, little girl?"

"Oh, yes I am; but—but I am not going to break down—you—you don't need to be afraid for me."

"I'm not; I know the real thing when I see it. You'll stay till h—l freezes over. Only see here first—do you know who these devils are out there?"

"Sioux Indians, ain't they?"

"Ay, and the worst of the tribe; outcasts, hell hounds, and the white man with 'em is no better. There ain't goin' to be no mercy in this fight. Whatever happens, don't you let 'em take you. Maybe they'll get me first, but if they do, you keep a shot in your gun. You know what I mean?"

The lines about her mouth hardened; there was a semblance of the old sullen look in her eyes.

"I know, Tom Shelby," she said steadily. "Dad Calkins used to tell me that before I ever met you. I ain't goin' to be made prisoner."

He gulped in his throat, his lips grim and hard-set.

"Maybe you'd shake hands?" he asked doubtfully. "Seems to me I'd rather like it if you did."

"Of course I will," and she thrust out both hands to him in sudden eagerness. "Why shouldn't I, Tom Shelby? I like you."

In the darkness she could scarcely see his face, but she felt the grip of his fingers and caught the eager tremor in his voice.

"I sure am glad you said that," he admitted, as helpless to express himself as a child. "I sorter wanted you to for—for a long while. H—l! That's Laud out there now."

He stepped over beside the door, whipping both revolvers from his belt and holding one in each hand. A small, round hole had been dug through the adobe plaster between the logs and he bent down with his eye to the opening. A tall, rangy white man, with a dirty skin and scraggling red beard was nearest at hand; and beyond him crouched an Indian naked to the waist, his face blackened and chest disfigured with gaudy paint. There were others behind these scattered out in fan shape, but he could only make them out indefinitely. Laud stood so close to the door his face could not be seen, but he held a rifle in his hands, pounding with the stock on the wood, as he angrily demanded admittance.

"Come on out of there, yer big fool," he roared, maddened by the silence. "We saw yer go back inside an' we've got yer this time. Come on, now; I won't ask you again!"

"On what terms?"

Shelby asked this more to prolong delay than anything else. The fellows knew they were there, and it was useless to pretend otherwise.

"Terms—h—l!" and Indian Joe burst out into a loud laugh. "Hear the cock crow, Hanley. We'll make terms when we get hands on yer, yer darn sneaking spy. Only I'll say this: yer'll get it harder if yer hang on after we do get yer—an', by God! we'll get yer, sooner or later."

"We'll take chances, Laud, and the fun is not going to be all on one side."

"It won't, hey! So yer goin' ter fight? All right; but there's more o' this outfit comin', an' yer a blamed idiot; if we can get yer no other way I reckon we can burn yer out. Come on, now; save time and and open up!"

He struck hard and angrily with his gunstock, but the stout wood held. Shelby made no answer, again bending low and peering out through the narrow opening. The obstinate silence must have maddened the fellow, for he suddenly reversed his weapon and fired. The ball crashed through the wood, leaving a jagged hole, and imbedded itself in the solid log of a back wall. Before the smoke blew away Shelby replied, sighting out through the small aperture, determined to make every shot count. The nearest white man flung up his arm which dripped blood, grabbed it and ran; the crouching Indian behind, crumpled up as though crushed by some sudden weight and never moved. Laud sprang backward, startled by the swift response from within, the smoke swirling up between his fingers, and Shelby let drive. Whether the speeding bullet struck or missed he never knew, but the squaw-man gave one startled leap into the concealment of the weeds, fell headlong, and then went scrambling down to the bank of the stream, It was all so swiftly accomplished as to seem like a flashlight picture. When the smoke cloud rolled away not a figure was to be seen. Shelby stood up, grimly smiling, and replaced the cartridges in his weapon. The end was not yet, but he had taught them a lesson in caution.

For a moment, blinded by gazing out into the sunlight, he could see nothing clearly about him, not even the figure of Olga. "Where are you?" he asked.

"Here, by the other door. What has happened?"

He laughed, put at ease by the quick response of her voice.

"Oh, I took pot shot out through a hole in the wall. I thought we might as well start the ball; Joe was getting so gay. Touched up two of them; now they'll go back and talk it over."

"Sure; the Indians will be for waiting till night, an' that ain't far off. What are you doing down there?"

There was a note of startled surprise in her voice.

"Why, this is strange! I—I hadn't noticed before; I was too frightened, perhaps—but, come quick; Macklin's body is not here! It—it is gone!"

(TO BE CONTINUED.)

She Had a Remedy.

The young mother was worried over her youngster. "Sometimes I think there is something the matter with his ears," she said, "for he does not answer me when I speak to him; and often he doesn't seem to understand that I've given him any directions. I wonder if I should take him to an ear specialist."

The mother of four grinned. "I've found just such deafness among my children," she said, "but I didn't let it worry me any."

"What did you do for it?" inquired the young mother, anxiously.

"Why, I just spanked 'em all around," was the reply, "and they heard beautifully for several months after that."—Springfield Union.

"French Leave."

The familiar expression "to take French leave" arose in the early part of the Eighteenth century, through certain guests in the salons of France, not aware of the higher acts of courtesy, leaving without saying good-by to the host or hostess. The practice spread to society in other countries. Therefore, if a man left without saying good-by to his host it was said he took "French leave."

The first problem that confronts a baby is how to make crying pay.

SLEUTHS' INTUITION AT FAULT

Investigation of Suitcase Convinced Them That They Had Stumbled On a Misleading Clue.

Two federal prohibition field agents were seated in a train bound from North Vernon to Indianapolis.

"Ah, ha!" exclaimed one, as he nudged his companion in the ribs. "Look!"

The two thereupon watched an elderly colored couple. The man had a suitcase which seemed heavy, and he handled it gingerly as he placed it under the seat. The agents studied the situation and then decided to act.

"Excuse me," said one of the agents addressing the colored man. "We will have to bother you to let us see what you have in that suitcase."

"Yes, sir; yes, sir," came the reply. "Help yourself."

Expectantly the agents opened the suitcase and peered within. It contained six cans of home-preserved fruit.—Indianapolis News.

Acute Suffering.

"I wish you'd ask somebody else to collect this bill from Mr. Wadleigh," said the new collector.

"What's the matter?"

"I've had some experience in calling on Mr. Wadleigh for another firm. He pays, but his groans are so heart rending I'm unfit for work the rest of the day."—Birmingham Age-Herald.

Conversation.

Then there is conversation—rightly, the means of communication between spirit and sipirt, but often, in fact, the repeating of what everbody says and nobody means; often, too, a combination of the present against the absent.—A. Clutton-Brock in the Atlantic Monthly.

Those who surprise you with one extraordinary epigram and no more, probably borrowed it.

A postal card to Garfield Tea Co., Brooklyn, N. Y., asking for sample will repay you.—Adv.

SHE PUT UP A GOOD FRONT

But Privately Woman Admitted She Had No Desire to Undergo the Supreme Feminine Ordeal.

A screech emanated from the rear room of one of those fancy tea houses with which Columbus is so profusely blessed. Patrons who were clustered around the tables looked up in astonishment.

"Oh, it was a mouse. He walked right under that table over there," said a young lady, her face flushed from excitement.

"Don't be afraid of a little creature like that," said the woman who had the place in charge, and who at that time was in the front of the establishment tying up a box of candy for two young men.

"Yes," she said in an undertone to the young men, unheard by the frightened girl in the rear, who marveled at her bravery, "but I wouldn't like to be back there myself."—Columbus Dispatch.

In Trouble.

Little Donald is interested in nursery rhymes, as his mother always reads them to him when he is tired and sleepy.

One morning when he did not play as usual, she asked:

"Donald, don't you feel well this morning?"

"No," he replied. "I got sheep's in the meadows and cows in the garden."

FARM INVENTORY HELPS BUSINESS

Enables Farmer to Determine Whether He Is Going or Coming Financially.

ANSWER TO MANY QUESTIONS

Complete List of Assets and Liabilities Each Year Tells Land Owner Just How Much Increase or Decrease Has Been.

What is the net worth of your farm business? Is it more or less than one would imagine from a casual inspection of your farm? Do you know for sure whether you are going or coming in financial standing?

Question Not Easily Answered.

These are important questions to the farmer and questions that are not so easily answered as would at first appear. Farming is an intricate business and one in which returns from investment are sometimes long delayed, so that progress cannot be accurately measured by the amount of money taken in in a given time. Sometimes cash income may be almost

Farm Inventory Is Index to Financial Progress.

wholly attributable to reduction in other assets, so that in reality the result is like taking money from one pocket and putting it in another.

The farm inventory, or property list, offers the only practicable way of answering these questions. Once the farmer has made a complete list of all his assets and liabilities and has balanced them he knows just what his net worth is, and when he has made such a list annually he knows each year whether he has gone forward or back and just how much has been the increase or decrease in the net worth of his business.

Detailed Instructions.

The United States Department of Agriculture has just issued Farmers' Bulletin 1128, entitled "Farm Inventories," in which are given detailed instructions for making an inventory of farm property and revising such a list from year to year. By using the single system described in this bulletin any farmer can determine exactly his financial status and lay the foundation for a permanent system of accounting. Without the farm inventory as a basis no system of accounting that might be chosen would be of any great use to the farmer.

FANNING MILL VERY USEFUL

Present High Price of Grain Should Bring Machine Into More Use on Stormy Days.

In many parts of the country there has been a tendency to let the fanning mill rest and rust and gather dust and to pay the mill or elevator for cleaning the grain, paying the bill by accepting a low price for the uncleaned wheat or oats or barley. Besides, the chickens lose the screenings. The present high price of grain should bring many a neglected fanning mill into profitable use. Incidentally, farmers will have profitable work for stormy days, and much cheap feed for chickens, pigs and other animals.

EASY TO WINTER FALL PIGS

Where Farmer Is Properly Equipped He Can Raise Young Animals Without Difficulty.

More fall pigs are being raised nowadays than was the case a few years ago. This is due largely to the fact that grain is relatively high-priced. When a man is properly equipped for taking care of fall pigs through the winter season he can raise them about as cheaply as he can spring pigs and he gets more out of his sow by breeding her twice a year than only once. It is not difficult to winter fall pigs if one gives the matter proper attention.

TO AID CO-OPERATION

Farmers' Bulletin No. 1144, on Co-Operative Marketing, has just been issued by the United States Department of Agriculture, Washington, D. C. Every person interested in developing the co-operative movement among farmers should have a copy, which can be obtained free on application.

CONDITIONING BIRDS FOR POULTRY SHOWS

Stand Better Chances for Winning if Well Trained.

Poultry Specialists of United States Department of Agriculture Give Suggestions for Preparation of Fowls.

Although the larger poultry shows are usually held in the fall, smaller exhibitions are staged throughout the winter months. The following advice in training and conditioning birds previous to a show, given by poultry specialists of the United States Department of Agriculture, is good the whole year round. The bird that has been properly trained and prepared will stand a better chance every time of winning a prize than another bird equally good, but wild or easily frightened, or whose plumage is soiled or dirty.

After the birds are selected, remove them from the rest of the flock and place each bird in an exhibition coop for at least a part of each day. Fowls so confined will become accustomed to the coop. Handling them—that is, removing them from the coop each day—will have the effect of making them tame. In handling the birds and removing and returning them to and from the coops, move quietly and handle the birds gently so as not to frighten them.

Examine the plumage so that the fowl will become accustomed to such movements when being handled by the judge. Likewise, attempt to compose the bird by smoothing and stroking the wattles gently; this seems to have a soothing effect on the fowls, and when done frequently and properly they come to look for it when one approaches the coop.

Birds to be exhibited should not be confined to the exhibition coops for too great a period, as long, continuous cooping may cause them to get out of condition and therefore unfit for show. A satisfactory plan is to confine the birds for a part of each day or every other day alternately up to a few days before sending them to the show, when they should be confined until ready to ship.

EXERCISE FOR SOWS NEEDED

Feed for Animals Should Be Scattered Around Floor to Compel Them to Hustle.

Sows due to farrow in April or May ought to have some bulky feed. Prof. J. H. Sheperd of the North Dakota Agricultural college reports that the herdsman at the agricultural college feeds a pound to a pound and a quarter of grain per 100 pounds weight of sow and a little alfalfa hay to give plenty of bulk. He also advises mak-

Prize-Winning Poland China Sow.

ing the sows take exercise, scattering their feed around on the floor so they will have two hours or more of work in picking it up. Another good thing about alfalfa hay is that it keeps them on their feet quite a little while. Pigs from sows which have had plenty of exercise and bulky feed are usually much stronger than those from fat, lazy sows.

ROTTEN EGG IS UNDESIRABLE

Many Farmers Do Not Seem to Care or Bother About Clean Nests for the Layers.

No one likes a rotten egg, consequently no one is going to buy one—not even the commission dealer. Many farmers do not care whether their hens steal their nests or not and do not bother to hunt for the eggs until market day comes around. Once a week is sometimes as often as eggs are looked for. Any eggs that have come from an old nest or that in any way look suspicious should be candled at home before sending them to market.

TRACTORS ARE TIME SAVERS

To Get Full Benefit of Machine Farmer Should Get All Information About Mechanism.

Farm tractors are time savers for the average farmer. After a farmer gets a tractor his first impulse should be to get all the information possible about it and then so manage it as to get the full benefit from that information.

BIG FARM ECONOMIC CHANGE

Transportation of Products in Motortrucks Becoming More Popular in Middle West.

Great progress will be made in the transportation of farm products by trucks in the Middle West in the next few years. This is one of the big economic changes which is coming in agriculture.

WHY DRUGGISTS RECOMMEND SWAMP-ROOT

For many years druggists have watched with much interest the remarkable record maintained by Dr. Kilmer's Swamp-Root, the great kidney, liver and bladder medicine.

It is a physician's prescription.

Swamp-Root is a strengthening medicine. It helps the kidneys, liver and bladder do the work nature intended they should do.

Swamp-Root has stood the test of years. It is sold by all druggists on its merit and it should help you. No other kidney medicine has so many friends.

Be sure to get Swamp-Root and start treatment at once.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Adv.

It is easy not to lose your temper upon someone with whom you don't dare to.

Look Out for Rheumatism As Winter Approaches

So many cases of Rheumatism come from a tiny disease germ that infests the blood, that physicians are beginning to realize that this source of the disease is becoming quite prevalent. Of course a disease that has its source in the blood cannot be reached by local remedies applied to the surface.

One remedy that has given splendid results in the treatment of Rheumatism is S.S.S., the fine old blood remedy that has been sold by druggists for more than fifty years. S.S.S. acts by driving out of the blood the disease germ that causes Rheumatism, thus affording real relief.

Begin taking S.S.S. today and if you will write a complete history of your case, our medical director will give you expert advice, without charge. Address Chief Medical Adviser, 151 Swift Laboratory, Atlanta, Ga.

Blushing has gone out of fashion. It ought to; it exhibits self-consciousness too easily.

All the world loves to laugh at a lover.

Yes, Herman, insanity is said to be akin to love—but a man in love doesn't care if he is crazy.

Very little is quite enough to make a frog hopping mad.

The Teasdale Company

625 Walnut Street, CINCINNATI, OHIO

Clean both ways.

You want a Sheller to remove all the corn from the cob and keep all the trash out of the shelled corn. The Appleton Sheller does both *right.* It

shells every ear right

big or little, wet or dry because it has the most efficient shelling principle. Coil springs, instead of the ordinary flat springs, control the fingers that hold the ears against the shelling mechanism. This gives the rag irons greater flexibility, so that the smallest nubbin can't get through without being shelled clean, and the largest ears are shelled without crushing or choking. The coiled springs won't break in cold weather, like ordinary flat springs. The feeder is so made that ears cannot get crosswise and choke. The Appleton

Cleans the corn right,

because it has the most efficient cleaning mechanism. U-shaped raised lip screen agitates both upward and forward—allows *all* shelled corn to fall through to cleaning pan below, where all trash and dirt is blown out.

APPLETON

CORN SHELLER

Because of simple construction—fewer chains, sprockets and gears—the Appleton *does more work with less power* —is much more durable, requires much less repair expense.

Appleton Shellers are made in three power sizes and three styles, mounted and unmounted, with or without cob stacker, sacker wagon elevator and extension feeder.

We also have a full line of hand corn shellers in all sizes.

International Feed Grinders

are found very usefull on any farm for grinding all kinds of feed. We can supply any size.

Kewanee Hog Waterers

should be on every farm. Keep your hog water from freezing and watch your hogs gain in weight during cold weather.

Feeds of all kinds

You will find our prices always right on Oil Meal, Tankage, Bran, Middlings and Hog Meal.

Klemme and Vicinity

Tell your news to the Times.

Mrs. Fred Ridder was a Mason City caller last Friday.

Mrs. Knoke came from Garner Saturday evening for an over Sunday visit with Miss Vina Griffen.

Andrew Anderson came up from Goodell Friday for a visit with Klemme friends and to transact business.

Howard Wolle was up from Belmond Thursday visiting with LuVerne Smith.

Mr. U. G. Smid left lost week on Thursday evening for Danforth, Illinois. He was called there by the death of his brother, John Smid.

Mrs. J. W. Brooks came from Belmond last Thursday for a visit at the Henry Brooks home in the country for a few days.

Mrs. Wilson and little son came up from Cedar Rapids, Iowa, last Friday to join her husband, Supt. Wilson, of the Klemme school. The family will for the present, board and room at the Henry Wille home. We welcome the family to Klemme.

Mrs. A. C. Anderson and son returned to their home at Spencer, Iowa, after a few days visit with her mother, Msr. Salling, and other Klemme relatives.

Our fine California weather has taken a turn for the worse the fore part of the week, but not so bad at that. At the most the winter will only last another eight weeks.

Mr. and Mrs. George Gruetzmacher were at Garner last Friday to attend the funeral of C. J. Schneider. Mrs. Gruetzmacher and Mrs. Schneider are related.

Mr. and Mrs. Will Montgomery came from Dows Saturday for a visit at the home of Mr. and Mrs. Owen Nuehring. They are the parents of Mrs. Nuehring.

Dr. R. N. Reuber returned Friday frm a week's stay at St. Paul, Minn., where he went to take in the big clinic meetings which are an annual event there. He says he enjoyed it very much.

"Grandpop" Jorgenson came over from Garner Monday between trains to see how the youngest "editor of the Times" was getting along. He also found a little time to talk with the old Editor.

Mrs. August Wichman returned to her home at Red Oak, Illinois, Saturday evening after an extended visit with her daughter, Mrs. L. Sampson and other Klemme relatives and friends.

Carl Beier, of the Beier Auto Company of this city, went to Fort Dodge last week Wednesday and returned with a new Overland car. Carl is one of the new business men of Klemme and is a hustler.

Klemme friends will be interested to learn that a fine baby girl was born to Mr. and Mrs. Charles Gibbs, at Big Lake, Minn., on January 13th. Everybody is reported fine and Charlie is a tickled man.

Miss Gretchen Blank, accompanied by her mother, went to Belmond Monday evening where she entered the Steele hospital to submit to an operation. Her Klemme friends hope for her speedy recovery.

News Reported By The K. H. School

Earl E. Josten
Editor

As it was announced in this column last week, each class has charge of the chapel exercises for three mornings a week—that it, the eleventh grade had charge the past week, and the honor falls to the Freshmen this week. We are expecting some great things from the "Freshies," and we know they will not disappoint us.

The newly organized quartet rendered several selections last Friday morning which met with the hearty approval of all, judging by the applause that was given the singers. The members of the quartet were: Marie Blank, Soprano; Mildred Johnson, Alto; Fred Arnold, Bass and Earl Josten, Tenor. Glenna Gruetzmacher acted as pianist, and performed her part very creditably.

We have heard a great deal of joyous demonstrations issuing from the Intermediate room, as a result of an organ which was presented to this room by Arthur Wellemeyer. They are certainly grateful for it, and "Art" is constantly praised for his generosity. He has also agreed to repair two other organs. The Bible has it, "God loveth the cheerful giver." So does the school.

With the coming of the new semester the work of the various grades has been changed somewhat. The ninth grade is now studying Algebra, English, General Science and Ancient History. In connection with their regular English work, they have taken up the study of Shakespeare's "Merchant of Venice." The tenth graders are now taking Agriculture in place of Commercial Geography, and are studying Scott's "Lady of the Lake" in place of their regular English course—much to the discomfiture of the Seniors. Physiology, Economics and Business Arithmetic now cause the sufferings of the eleventh grade, these subjects having displaced U. S. History, Advanced Civics and Advanced Algebra. "A Midsummer-Night's Dream," one of Shakespeare's earlier plays, is being studied by this class in connection with English literature.

We were compelled to forego the pleasure of enjoying Fred Arnold's presence last Friday afternoon. We missed him much, as he is our star heavy-weight and basso—which is SOME combination, when correctly intermingled.

The members of each class have chosen a girl and a boy to represent their respective classes in the Declamatory Contest which is to be staged some time early next Spring. The list of lucky ones follows:

Freshman—Blanche Medaus and Clarence Elder.

Sophomore—Dolores Koerner and Howard Wiles.

Junior—Mildred Johnson and Fred Arnold.

This makes a good looking sextet, and we feel sure they will be worthy of the confidence their classes have placed in them.

A small Victrola has been purchased for the members of the Primary Room with their share of the money realized at the last school entertainment. The little folks are tickled, to say the least. This item concerns the High School only indirectly, but we feel that it is of sufficient importance to deserve being mentioned. Hereafter, we will try to secure the news from the whole school for your benefit.

Later—At the invitation of the chairman, Rev. A. H. Meyer gave an interesting and instructive address Wednesday morning. His topic was: "The Science of Success." He emphasized three things as being essential to the student who desires to be successful in life. They were, namely: a strong Christian character, promptness and cheerfulness. He also emphasized the necessity of a complete education and pointed out the advisability of taking a college course. In closing, he wished us all success in life. We thank him for his advice and good wishes and hope we may soon have the pleasure of hearing him again.

MARRIAGES

PETER CHRISTIANS AND VERNIE JOHNSON MARRIED YESTERDAY AFTERNOON

Wednesday afternoon at four o'clock, January 26th, Miss Vernie Johnson and Mr. Peter Christians, both of this place were united in the holy bonds of matrimony by the Rev. A. E. Buriff, minister of the Methodist Episcopal Church of Klemme.

The affair was a wedding at the home of the bride's parents, Mr. and Mrs. Albert Johnson at their farm home near Klemme. A large number of relatives and friends of the contracting parties were present to witness the ceremony. The beautiful ring service was used. Mr. Edward Christians, brother of the groom acted as best man whle Miss Nina Johnson the bride's sister accompanied her as bridesmaid. After the ceremony a bounteous six o'clock dinner was served in courses to the large gathering. Thus another beauiful story of a long and happy courtship came to a happy climax when those two young people were made as one.

Both of the young people are well known and highly respected in Klemme. The groom has resided near Klemme for a number of years and is the son of Mr. and Mrs. John Christians. He has been actively engaged in farming and has prospered well. "Pete" is a very fine young man and is worthy of the young lady whom he has chosen to become his help mate through life. The bride is a daughter of Mr. and Mrs. Albert Johnson who live on a farm adjoining Klemme. Although they have lived here only a short time they are well known in Klemme for they formerly lived a few miles west of Ventura and were neighbors to the Christians. She is a very accomplished young lady and posses all those good qualities which go to make an ideal home maker. After a week's wedding trip to Peoria, San Jose, Illinois and Albia, Iowa, where the couple will spend their honey moon trip visiting with relatives and friends, they will go to housekeeping on the groom's father's farm north east of Klemme. The Times joins with the many friends of the couple in wishing them a long, happy and prosperous wedded life.

JOHN PANHOFF AND MISS ANNA HEGINGER MARRIED

On January sixth, at the Ell Town Reform Church, occurred the marriage of Miss Anna Heginger to Mr. John Panhoff. The bride is a daughter of Mr. and Mrs. John Heginger, who reside west of Klemme. The groom is one of the young farmers of this vicinity. They have rented a farm east of Klemme and will go to house keeping on it in the near future. Both of the parties are excellent young people who have many friends in and about Klemme who extend congratulations, wishing them a happy prosperous wedded life.

DID YOU GET ONE?

We have mailed out statements to all whose subscription to the Klemme Times has expired—did you get one? A large number have remitted either by mailing check or personally calling at our office. There are still a large number who have not paid for the paper for the coming year, all those we ask to kindly mail check or call at our office so that we can get our list straightened up before the first of the month. We will mail out statements each month to all those subscription has expired and in this way we can keep our list up to date. We thank those who were so prompt in settling up.

Don't overlook C. V. Marshall's half page sale ad in this issue of the Times. Mr. Marshall has a fine line on his bill nd it will be well worth your time to loog over the items offered on this sale. It is one of the bggesit sales held near Klemme this year.

FOR SALE—House and four good lots, well located. Inquire at the Times Office. J-6tfc.

It's an Uphill Pull for Polish Boys

Bare feet and tattered clothes, little to eat and less to wear, such is the fate of thousands of children in central and eastern Europe. These boys in Poland are only a sample of the 3,500,000 destitute youngsters that the European Relief Council plans to help through the cold days of the coming winter. To that end eight great organizations in America have merged to form the Council, the chairman of which is Herbert Hoover. Under his leadership the American Relief Administration, the American Red Cross, the American Friends' Service Committee (Quakers), the Federal Council of the Churches of Christ in America, the Jewish Joint Distribution Committee, the Knights of Columbus, the Y. M. C. A. and the Y. W. C. A. have decided to co-operate jointly to raise $33,000,000 to help the European children over the hill.

LIGHT OF EUROPE'S CHILDREN STAGGERS

3,500,000 Facing Starvation Can Only Be Saved by America's Response to Joint Appeal.

It is utterly impossible for one who has not actually seen the misery of the early Autumn in Europe to visualize what the children of the Eastern and Central portions of the continent face this winter. To say that 3,500,000 children have no alternative to starvation or death from disease except American aid, is startling, but independent observers by the score and careful scientific surveys of the economic and crop conditions overseas brand the figure as conservative.

In Poland, for instance, where 1,308,000 youngsters last year subsisted almost entirely on the one free American meal a day that they received, conditions as winter closes down, are worse than ever before. The Bolshevik invasion stripped large portions of the country of all grain. Professor E. D. Durand, Food Advisor to the Polish government, after an exhaustive survey, has reported that only forty per cent is available of the food necessary to carry the population through the winter.

In the city of Vienna tests conducted in the American Relief Administration food kitchens showed that 52 per cent of the children between the ages of 6 and 14 were "seriously under-nourished." Thirty-three per cent were markedly under-nourished, 11 per cent were slightly subnormal and only 4 per cent approached the state of a normal American child. The American Relief Administration is feeding 300,000 Austrian children every day now, and there is no chance of dimunition of need before nex harvest.

The spectacle of the medical needs of Europe's children is equally appalling. Estimates reaching the American Red Cross as to needs for medical service in the destitute areas this winter include: Old Austria-Hungary, 750,000; new Poland, 1,500,000; Czecho-Slovakia, 200,000; Serbia, 150,000, and Roumania, 100,000. In the fiscal year of 1919-20 the Red Cross has reached with the veritable gift of life 1,500,000 children in the affected areas. Tuberculosis is prevalent to a terriffic degree. Five children out of seven in the city of Warsaw, for instance, have been found to be tubercular. Typhus is widespread; rickets, the right hand of under-nourishment is almost universal, and cholera lifts its grim head constantly in one place and another

The European Relief Council, comprising the American Relief Administration, the American Red Cross, the American Friends' Service Committee (Quakers), the Jewish Joint Distribution Committee, the Federal Council of the Churches of Christ in America, the Knights of Columbus the Y. M. C. A and the Y. W. C. A., seeks $33,000,000 with which to meet the situation. It has estimated that at least $23,000,000 must be had for food and $10,000,000 for medical service to avert absolute disaster among the threatened children. Checks may be sent to your local committee or to Franklin K. Lane, treasurer European Relief Council, 42 Broadway, New York, or to the Child Feeding Fund, Literary Digest, New York City.

3,500,000 CHILDREN FACING STARVATION

Vast Relief Effort Launched by Eight Leading American Organizations to Avert Tragedy.

The most spontaneous as well as the largest consolidation of effort in the history of American relief and charitable organizations has grown out of the disaster which threatens 3,500,000 European children this winter. To the headquarters of every agency that dispenses American mercy overseas has come one steady cry for months past: the children, most helpless and blameless sufferers in the track of war, will perish by the thousands before next harvest unless America saves them!

When Dr. Livingston Farrand, chairman of the Central Committee of the American Red Cross, returned from a recent trip abroad, his report throbbed with the need of the children. From the feeding-stations of the American Relief Administration throughout eastern and central Europe came letters, cables, pleas of every sort. The Protestant churches sent investigators into after-war conditions and every report breathed the impending tragedy of starving and diseased children. Protestant, Catholic and Jewish, the child life of Europe is threatened with heartrending misery.

The European Relief Council, with Herbert Hoover as chairman and the whole power of American charitable thought and effort behind it, has been formed. It consists of Edgar Rickard, representing the American Relief Administration; Dr Livingston Farrand, representing the American Red Cross; Felix Warburg, representing the Jewish Joint Distribution Committee; Wilbur K. Thomas, representing the American Friends' Service Committee; James A. Flaherty, representing the Knights of Columbus; Dr. C. V. Hibbard, representing the Young Men's Christian Association; Miss Sarah S. Lyon, representing the Young Women's Christian Association; Dr. Arthur Brown, representing the Federal Council of Churches.

It is the purpose of the Council to raise $33,000,000, in an appeal centering at the Christmas holidays, to the end that the situation regarding child life may be met. In every town and community of the nation, it is hoped, local committees, representing all the co-operating agencies will be formed to secure the vitally necessary funds. Of the amount sought, $23,000,000 will be used for basic food. For every one of these American dollars the local governments and communities aided will furnish two dollars, in the form of transportation, labor, guards, clerical help, cash contributions and such food supplies as are locally obtainable. No children receive the free food except after medical tests showing them to be seriously under-nourished. The remaining $10,000,000 of the fund is just as urgently needed for medical service to the children.

The European Relief Council will do much more than effect economies in the raising of the childsaving fund. It will, with the inspecting forces of eight great agencies keep a constant eye on the administration of America's merciful gift, in order that there shall be no wastage and no tendency toward pauperization.

Bids Let For County Paving

BIDS LET FOR LONG STRETCH OF PAVING IN HANCOCK COUNTY

The paving letting for the contemplated hard surfaced road from east to west across Hancock county was attended by some 300 men and most of them from out of town.

Bids ranged from $3.73 up to $4.43 and were offered by W. H. Horst Co., Rock Island, $4.43; Chas. Weitz Sons, Des Moines, $4.06; Rahlstrom Co., Waterloo, $4; Bemis & Schlick, Spencer, $3.97; Empire Construction Co., Des Moines, $3.73; J. J. Dunnigan Co., $3.75; Picke's Construction Co., Omaha, $3.75; Hinkle Construction Co. of Mason City, $3.74½.

The contract for the road between Ventura and Garner was awarded to the Mason City man and the one between Britt and Wesley was awarded t hePickes Construction Co. These twocontracts will be paid in cash while the other three sections of the division will be paid in bonds.

The board did not come to a decision until Friday and then only awarded contracts for two of the five sections into which the road across Hancock county has been divided. Another letting for the other three sections will be held in two or three weeks.

Andrew Andrewson of Garner was the lowest bidder on the tiling and was given a contract for the entire job. He is known to be qualified for the job. To distinguish him from several others of the same name he is spoken of as the man who drives the Buick roadter, accompanied by his little white dog.

The Mason City firm's stretch of paving will be about six miles in length, while the Sioux City firm's contract calls for about four and three-quarter miles, making almost eleven miles atogether. The road from the county line to the edge of Garner is included in the Mason City Company contract, which calls for $1.05 a cubic yard for excavation. One dollar and eight cents a cubic yard is the amount the Pickes company will receive for the road excavation. Their stretch commences at Britt and extends through Hutchins.

The difference in the bids of these two companies it is said, just about represents the difference between the cost of hauling the material from Mason City.

Announcing a new method for the modern treatment of chronic diseases in general and especially for the benefit and cure of high blood pressure, auto-intoxication, kidney trouble, (Bright's disease,) diabetes and constipation. A painless guaranteed cure for piles (hemorrhoids) in any form. Diseases of the rectum and lower bowel a specialty. Dr. R. W.. Schultz, Masonic Bldg., Garner, Ia. J13tf

W. A. Schmidt and family left for their home at Sac City, Iowa, the other day after a visit with Klemme and Garner relatives and friends since the holidays. They spent most of their time visiting with his brother C. G. Schmidt near Klemme and with his mother and sisters at Garner.

Do you believe in fate?
That "What is to be will be?" Hear Dr Buriff's sermon Sunday evening at M. E. church.

SALE DATES CLAIMED

George Schaper, farm sale, Feb. 16th.

Emil Lau, hog sale, Feb. 17th.

Art Schoenwetter, farm sale, Feb. 23rd.

Others who contemplate having a sale leave your dates at the Times office.

NEW BUSINESS FIRM

ANOTHER FIRM CHANGES HANDS

What was formerly the Western States Lumber Company is now the Farmers Lumber Company of Klemme. The change was made one day last week and the new company is now hndling the business.

When the Western States Lumber Company was organized in Klemme a couple of years ago, quite a number of prominent farmers and some business men took stock in the concern, so the new company is not an all together new business changing hands as the former stock holders are the ones who bought out the company rights here. At a meeting the other day W. C. Schmidt was elected President; W. F. Greeman, Jr., Vice President and C. W. Wiles, Secretary-Treasurer. Olaf Brynteson was retained as manager for the new concern. Under the new orgnization it is the general opinion that the Farmers Lumber Co. will do a good business. Some are of the opinion that this company is connected with the Farmers Co-Operative Grain Company, who bought the Hocum elevator, but this is not correct, the Farmers Lumber Company is entirely independent of the Farmers Elevator or Creamery although some of the stock holders in the lumber company perhaps also hold stock in the other mentioned business enterprises.

GOOD TIME AT MID-WINTER PICNIC

Methodists Enjoy Annual Event

Last Thursday evening the members and friends of the Methodist church of Klemme met at the Idle Hour Theatre for their annual mid-winter picnic and get-together meeting. We would judge that there were about one hundred and fifty or more people present at the doings. The church orchestra consisting of eight pieces gave some very good music. The numbers by the male quartet were also greatly enjoyed. For the balance of the entertainment no regular program was laid out but the evening ws devoted to visiting, games and stunts of all kinds. The "Army game" was introduced to some of the men who were not acquainted with it and Ye Editor was "the goat." We will say that we understand how the game is played. The picnic lunch was quite an attraction as that Methodist bunch are all there when it comes to eating. The ladies had plenty of good eats and coffee for everyone. It was a great evening and all throughly enjoyed the picnic.

SOCIAL ANNOUNCEMENT

Coming! Social at District No. 8, Ell township, 2 miles east of Klemme, February 4, 1921. Ladies are requested to bring baskets. Invite every one. F. Annetta Schuldt, teacher. 1wc

MORE COUNTRY NEWS WANTED

The Editor of the Times would like to have a few more correspondents in the country around Klemme. We have one in Avery and one in Liberty townships. Now lets hear from someone in Twin Lakes and Ell townships. Send in your news items and place your name at the bottom so we will know who sent them in so that we can supply you with stamps and stationery. We want lots of news from the farm community near Klemme.

The Teasdale Company
625 Walnut Street, CINCINNATI, OHIO

Clean both ways.

You want a Sheller to remove all the corn from the cob and keep all the trash out of the shelled corn. The Appleton Sheller does both *right*. It

shells every ear right

big or little, wet or dry because it has the most efficient shelling principle. Coil springs, instead of the ordinary flat springs, control the fingers that hold the ears against the shelling mechanism. This gives the rag irons greater flexibility so that the smallest nubbin can't get through without being shelled clean, and the largest ears are shelled without crushing or choking. The coiled springs won't break in cold weather, like ordinary flat springs. The feeder is so made that ears cannot get crosswise and choke. The Appleton

Cleans the corn right,

because it has the most efficient cleaning mechanism. U-shaped raised lip screen agitates both upward and forward—allows *all* shelled corn to fall through to cleaning pan below, where all trash and dirt is blown out.

APPLETON

CORN SHELLER

Because of simple construction—fewer chains, sprockets and gears—the Appleton *does more work with less power* —is much more durable, requires much less repair expense. Appleton Shellers are made in three power sizes and three styles, mounted and unmounted, with or without cob stacker, sacker wagon elevator and extension feeder.

We also have a full line of hand corn shellers in all sizes.

International Feed Grinders

are found very usefull on any farm for grinding all kinds of feed. We can supply any size.

Kewanee Hog Waterers

should be on every farm. Keep your hog water from freezing and watch your hogs gain in weight during cold weather.

Feeds of all kinds

You will find our prices always right on Oil Meal, Tankage, Bran, Middlings and Hog Meal.

Klemme and Vicinity

Tell your news to the Times.

Mrs. Fred Ridder was a Mason City caller last Friday.

Mrs. Knoke came from Garner Saturday evening for an over Sunday visit with Miss Vina Griffen.

Andrew Anderson came up from Goodell Friday for a visit with Klemme friends and to transact business.

Howard Wolle was up from Belmond Thursday visiting with LuVerne Smith.

Mr. U. G. Smid left lost week on Thursday evening for Danforth, Illinois. He was called there by the death f his brother, John Smid.

Mrs. J. W. Brooks came from Belmond last Thursday for a visit at the Henry Brooks home in the country or a few days.

Mrs. Wilson and little son came up from Cedar Rapids, Iowa, last Friday o join her husband, Supt. Wilson, of he Klemme school. The family will for the present, board and room at he Henry Wille home. We welcome he family to Klemme.

Mrs. A. C. Anderson and son returned to their home at Spencer, Iowa, after a few days visit with her nother, Msr. Salling, and other Klemme relatives.

Our fine California weather has taken a turn for the worse the fore part of the week, but not so bad at hat. At the most the winter will only last another eight weeks.

Mr. and Mrs. George Gruetzmacher were at Garner last Friday to attend he funeral of C. J. Schneider. Mrs. Gruetzmacher and Mrs. Schneider are related.

Mr. and Mrs. Will Montgomery came from Dows Saturday for a visit at the home of Mr. and Mrs. Owen Nuehring. They are the parents of Mrs. Nuehring.

Dr. R. N. Reuber returned Friday frm a week's stay at St. Paul, Minn., where he went to take in the big clinic meetings which are an annual event here. He says he enjoyed it very much.

"Grandpop" Jorgenson came over from Garner Monday between trains to see how the youngest "editor of the Times" was getting along. He also found a little time to talk with the old Editor.

Mrs. August Wichman returned to her home at Red Oak, Illinois, Saturday evening after an extended visit with her daughter, Mrs. L. Sampson and other Klemme relatives and friends.

Carl Beier, of the Beier Auto Company of this city, went to Fort Dodge last week Wednesday and returned with a new Overland car. Carl is one of the new business men of Klemme and is a hustler.

Klemme friends will be interested to learn that a fine baby girl was born to Mr. and Mrs. Charles Gibbs, at Big Lake, Minn., on January 13th. Everybody is reported fine and Charlie is a tickled man.

Miss Gretchen Blank, accompanied by her mother, went to Belmond Monday evening where she entered the Steele hospital to submit to an operation. Her Klemme friends hope for her speedy recovery.

Announcing a new method for the modern treatment of chronic diseases in general and especially for the benefit and cure of high blood pressure, auto-intoxication, kidney trouble, (Bright's disease,) diabetes and constipation. A painless guaranteed cure for piles (hemorrhoids) in any form. Diseases of the rectum and lower bowel a specialty. Dr. R. W.. Schultz, Masonic Bldg., Garner, Ia. J13tf

Tell your news to the Times.

Wert Loger an Melvin Nuenerger went to Dumont, Iowa, Friday evening for a visit with relatives and friends.

Mrs. Tony Ahrenkiel and baby of Goodell were Klemme visitors Monday

John Etchen and Billie Velau made a trip to Mason City Sunday. We presume the boys went over to take in a picture show.

Mrs. Chas. Fritzel returned from Wellsburg, Iowa, Monday where she went for a visit with relatives and friends. Her brother, Mr. Bausman, returned to Klemme with her for a visit.

A. D. Gimer returned from the Butter Makers' Short Course at Ames the fore part of last week where he took in the doings for about a week. Art reports a big meeting and that it was both interesting and instructive. Guess we'll hang around the creamery the next few days and help Art sample the butter as we predict that he will use some of hte extra knowledge he gained by producing some prize winning butter.

Gulf Stream.

The gulf stream is more rapid than the Amazon, more impetuous than the Mississippi, and its volume more than 1,000 times greater. The waters are blue and the line of junction can be easily marked by the eye.

News Reported By The K. H. School

Earl E. Josten
Editor

As it was announced in this column last week, each class has charge of the chapel exercises for three mornings a week—that it, the eleventh grade had charge the past week, and the honor falls to the Freshmen this week. We are expecting some great things from the "Freshies," and we know they will not disappoint us.

The newly organized quartet rendered several selections last Friday morning which met with the hearty approval of all, judging by the applause that was given the singers. The members of the quartet were: Marie Blank, Soprano; Mildred Johnson, Alto; Fred Arnold, Bass and Earl Josten, Tenor. Glenna Gruetzmacher acted as pianist, and performed her part very creditably.

We have heard a great deal of joyous demonstrations issuing from the intermediate room, as a result of an organ which was presented to this room by Arthur Wellemeyer. They are certainly grateful for it, and "Art" is constantly praised for his generosity. He has also agreed to repair two other organs. The Bible has it, "God loveth the cheerful giver." So does the school.

With the coming of the new semester the work of the various grades has been changed somewhat. The ninth grade is now studying Algebra, English, General Science and Ancient History. In connection with their regular English work, they have taken up the study of Shakespeare's "Merchant of Venice." The tenth graders are now taking Agriculture in place of Commercial Geography, and are studying Scott's "Lady of the Lake" in place of their regular English course—much to the discomfiture of the Seniors. Physiology, Economics and Business Arithmetic now cause the sufferings of the eleventh grade, these subjects having displaced U. S. History, Advanced Civics and Advanced Algebra. "A Midsummer-Night's Dream," one of Shakespeare's earlier plays, is being studied by this class in connection with English literature.

We were compelled to forego the pleasure of enjoying Fred Arnold's presence last Friday afternoon. We missed him much, as he is our star heavy-weight and basso—which is SOME combination, when correctly intermingled.

The members of each class have chosen a girl and a boy to represent their respective classes in the Declamatory Contest which is to be staged some time early next Spring. The list of lucky ones follows:

Freshman—Blanche Medaus and Clarence Elder.

Sophomore—Dolores Koerner and Howard Wiles.

Junior—Mildred Johnson and Fred Arnold.

This makes a good looking sextet, and we feel sure they will be worthy of the confidence their classes have placed in them.

A small Victrola has been purchased for the members of the Primary Room with their share of the money realized at the last school entertainment. The little folks are pleased, to say the least. This item concerns the High School only indirectly, but we feel that it is of sufficient importance to deserve being mentioned. Hereafter, we will try to secure the news from the whole school for your benefit.

Later—At the invitation of the chairman, Rev. A. H. Meyer gave an interesting and instructive address Tuesday morning. His topic was: "The Science of Success." He emphasized three things as being essential to the student who desires to be successful in life. They were, namely: a strong Christian character, promptness and cheerfulness. He also emphasized the necessity of a complete education and pointed out the advisability of taking a college course. In closing, he wished us all success in life. We thank him for his advice and good wishes and hope we may soon have the pleasure of hearing him again.

MARRIAGES

PETER CHRISTIANS AND VERNIE JOHNSON MARRIED YESTERDAY AFTERNOON

Wednesday afternoon at four o'clock, January 26th, Miss Vernie Johnson and Mr. Peter Christians, both of this place were united in the holy bonds of matrimony by the Rev. A. E. Buriff, minister of the Methodist Episcopal Church of Klemme.

The affair was a wedding at the home of the bride's parents, Mr. and Mrs. Albert Johnson at their farm home near Klemme. A large number of relatives and friends of the contracting parties were present to witness the ceremony. The beautiful ring service was used. Mr. Edward Christians, brother of the groom acted as best man whle Miss Nina Johnson the bride's sister accompanied her as bridesmaid. After the ceremony a bounteous six o'clock dinner was served in courses to the large gathering. Thus another beautiful story of a long and happy courtship came to a happy climax when those two young people were made as one.

Both of the young people are well known and highly respected in Klemme. The groom has resided near Klemme for a number of years and is the son of Mr. and Mrs. John Christians. He has been actively engaged in farming and has prospered well. "Pete" is a very fine young man and is worthy of the young lady whom he has chosen to become his help mate through life. The bride is a daughter of Mr. and Mrs. Albert Johnson who live on a farm adjoining Klemme. Although they have lived here only a short time they are well known in Klemme for they formerly lived a few miles west of Ventura and were neighbors to the Christians. She is a very accomplished young lady and posses all those good qualities which go to make an ideal home maker. After a week's wedding trip to Peoria, San Jose, Illinois and Albia, Iowa, where the couple will spend their honey moon trip visiting with relatives and friends, they will go to housekeeping on the groom's father's farm north east of Klemme. The Times joins with the many friends of the couple in wishing them a long, happy and prosperous wedded life.

JOHN PANHOFF AND MISS ANNA HEGINGER MARRIED

On January sixth, at the Ell Town Reform Church, occurred the marriage of Miss Anna Heginger to Mr. John Panhoff. The bride is a daughter of Mr. and Mrs. John Heginger, who reside west of Klemme. The groom is one of the young farmers of this vicinity. They have rented a farm east of Klemme and will go to house keeping on it in the near future. Both of the parties are excellent young people who have many friends in and about Klemme who extend congratulations, wishing them a happy prosperous wedded life.

DID YOU GET ONE?

We have mailed out statements to all whose subscription to the Klemme Times has expired—did you get one? A large number have remitted either by mailing check or personally calling at our office. There are still a large number who have not paid for the paper for the coming year, all those we ask to kindly mail check or call at our office so that we can get our list straightened up before the first of the month. We will mail out statements each month to all those subscription has expired and in this way we can keep our list up to date. We thank those who were so prompt in settling up.

Don't overlook C. V. Marshall's half page sale ad in this issue of the Times. Mr. Marshall has a fine line on his bill nd it will be well worth your time to loog over the items offered on this sale. It is one of the bggesit sales held near Klemme this year.

FOR SALE—House and four good lots, well located. Inquire at the Times Office. J-6tfc.

It's an Uphill Pull for Polish Boys

Bare feet and tattered clothes, little to eat and less to wear, such is the fate of thousands of children in central and eastern Europe. These boys in Poland are only a sample of the 3,500,000 destitute youngsters that the European Relief Council plans to help through the cold days of the coming winter. To that end eight great organizations in America have merged to form the Council, the chairman of which is Herbert Hoover. Under his leadership the American Relief Administration, the American Red Cross, the American Friends' Service Committee (Quakers), the Federal Council of the Churches of Christ in America, the Jewish Joint Distribution Committee, the Knights of Columbus, the Y. M. C. A. and the Y. W. C. A. have decided to co-operate jointly to raise $33,000,000 to help the European children over the hill.

LIGHT OF EUROPE'S CHILDREN STAGGERS

3,500,000 Facing Starvation Can Only Be Saved by America's Response to Joint Appeal.

It is utterly impossible for one who has not actually seen the misery of the early Autumn in Europe to visualize what the children of the Eastern and Central portions of the continent face this winter. To say that 3,500,000 children have no alternative to starvation or death from disease except American aid, is startling, but independent observers by the score and careful scientific surveys of the economic and crop conditions overseas brand the figure as conservative.

In Poland, for instance, where 1,308,000 youngsters last year subsisted almost entirely on the one free American meal a day that they received, conditions as winter closes down, are worse than ever before. The Bolshevik invasion stripped large portions of the country of all grain. Professor E. D. Durand, Food Advisor to the Polish government, after an exhaustive survey, has reported that only forty per cent is available of the food necessary to carry the population through the winter.

In the city of Vienna tests conducted in the American Relief Administration food kitchens showed that 52 per cent of the children between the ages of 6 and 14 were "seriously under-nourished." Thirty-three per cent were markedly under-nourished, 11 per cent were slightly subnormal and only 4 per cent approached the state of a normal American child. The American Relief Administration is feeding 300,000 Austrian children every day now, and there is no chance of dimunition of need before nex harvest.

The spectacle of the medical needs of Europe's children is equally appalling. Estimates reaching the American Red Cross as to needs for medical service in the destitute areas this winter include: Old Austria-Hungary, 750,000; new Poland, 1,500,000; Czecho-Slovakia, 200,000; Serbia, 150,000, and Roumania, 100,000. In the fiscal year of 1919-20 the Red Cross has reached with the veritable gift of life 1,500,000 children in the affected areas. Tuberculosis is prevalent to a terrific degree. Five children out of seven in the city of Warsaw, for instance, have been found to be tubercular. Typhus is widespread; rickets, the right hand of under-nourishment is almost universal, and cholera lifts its grim head constantly in one place and another

The European Relief Council, comprising the American Relief Administration, the American Red Cross, the American Friends' Service Committee (Quakers), the Jewish Joint Distribution Committee, the Federal Council of the Churches of Christ in America, the Knights of Columbus the Y. M. C. A and the Y. W. C. A., seeks $33,000,000 with which to meet the situation. It has estimated that at least $23,000,000 must be had for food and $10,000,000 for medical service to avert absolute disaster among the threatened children Checks may be sent to your local committee or to Franklin K. Lane, treasurer European Relief Council, 42 Broadway, New York, or to the Child Feeding Fund, Literary Digest, New York City.

3,500,000 CHILDREN FACING STARVATION

Vast Relief Effort Launched by Eight Leading American Organizations to Avert Tragedy.

The most spontaneous as well as the largest consolidation of effort in the history of American relief and charitable organizations has grown out of the disaster which threatens 3,500,000 European children this winter. To the headquarters of every agency that dispenses American mercy overseas has come one steady cry for months past: the children, most helpless and blameless sufferers in the track of war, will perish by the thousands before next harvest unless America saves them!

When Dr. Livingston Farrand, chairman of the Central Committee of the American Red Cross, returned from a recent trip abroad, his report throbbed with the need of the children. From the feeding-stations of the American Relief Administration throughout eastern and central Europe came letters, cables, pleas of every sort. The Protestant churches sent investigators into after-war conditions and every report breathed the impending tragedy of starving and diseased children. Protestant, Catholic and Jewish, the child life of Europe is threatened with heartrending misery.

The European Relief Council, with Herbert Hoover as chairman and the whole power of American charitable thought and effort behind it, has been formed. It consists of Edgar Rickard, representing the American Relief Administration; Dr Livingston Farrand, representing the American Red Cross; Felix Warburg, representing the Jewish Joint Distribution Committee; Wilbur K. Thomas, representing the American Friends' Service Committee; James A. Flaherty, representing the Knights of Columbus; Dr. C. V. Hibbard, representing the Young Men's Christian Association; Miss Sarah S. Lyon, representing the Young Women's Christian Association; Dr. Arthur Brown, representing the Federal Council of Churches.

It is the purpose of the Council to raise $33,000,000, in an appeal centering at the Christmas holidays, to the end that the situation regarding child life may be met. In every town and community of the nation, it is hoped, local committees, representing all the co-operating agencies will be formed to secure the vitally necessary funds. Of the amount sought, $23,000,000 will be used for basic food. For every one of these American dollars the local governments and communities aided will furnish two dollars, in the form of transportation, labor, guards, clerical help, cash contributions and such food supplies as are locally obtainable. No children receive the free food except after medical tests showing them to be seriously under-nourished. The remaining $10,000,000 of the fund is just as urgently needed for medical service to the children.

The European Relief Council will do much more than effect economies in the raising of the childsaving fund. It will, with the inspecting forces of eight great agencies keep a constant eye on the administration of America's merciful gift, in order that there shall be no wastage and no tendency toward pauperization.

Bids Let For County Paving

BIDS LET FOR LONG STRETCH OF PAVING IN HANCOCK COUNTY

The paving letting for the contemplated hard surfaced road from east to west across Hancock county was attended by some 300 men and most of them from out of town.

Bids ranged from $3.73 up to $4.43 and were offered by W. H. Horst Co., Rock Island, $4.43; Chas. Weitz Sons, Des Moines, $4.06; Rahlstrom Co., Waterloo, $4; Bemis & Schlick, Spencer, $3.97; Empire Construction Co., Des Moines, $3.73; J. J. Dunnigan Co., $3.75; Picke's Construction Co., Omaha, $3.75; Hinkle Construction Co. of Mason City, $3.74½.

The contract for the road between Ventura and Garner was awarded to the Mason City man and the one between Britt and Wesley was awarded t hePickes Construction Co. These twocontracts will be paid in cash while the other three sections of the division will be paid in bonds.

The board did not come to a decision until Friday and then only awarded contracts for two of the five sections into which the road across Hancock county has been divided. Another letting for the other three sections will be held in two or three weeks.

Andrew Andrewson of Garner was the lowest bidder on the tiling and was given a contract for the entire job. He is known to be qualified for the job. To distinguish him from several others of the same name he is spoken of as the man who drives the Buick roadter, accompanied by his little white dog.

The Mason City firm's stretch of paving will be about six miles in length, while the Sioux City firm's contract calls for about four and three-quarter miles, making almost eleven miles atogether. The road from the county line to the edge of Garner is included in the Mason City Company contract, which calls for $1.05 a cubic yard for excavation. One dollar and eight cents a cubic yard is the amount the Pickes company will receive for the road excavation. Their stretch commences at Britt and extends through Hutchins.

The difference in the bids of these two companies it is said, just about represents the difference between the cost of hauling the material from Mason City.

Announcing a new method for the modern treatment of chronic diseases in general and especially for the benefit and cure of high blood pressure, auto-intoxication, kidney trouble, (Bright's disease,) diabetes and constipation. A painless guaranteed cure for piles (hemorrhoids) in any form. Diseases of the rectum and lower bowel a specialty. Dr. R. W.. Schultz, Masonic Bldg., Garner, Ia. J13tf

W. A. Schmidt and family left for their home at Sac City, Iowa, the other day after a visit with Klemme and Garner relatives and friends since the holidays. They spent most of their time visiting with his brother C. G. Schmidt near Klemme and with his mother and sisters at Garner.

Do you believe in fate? That "What is to be will be?" Hear Dr Buriff's sermon Sunday evening at M. E. church.

Public Sales

SALE DATES CLAIMED

George Schaper, farm sale, Feb. 16th.

Emil Lau, hog sale, Feb. 17th.

Art Schoenwetter, farm sale, Feb. 23rd.

Others who contemplate having a sale leave your dates at the Times office.

NEW BUSINESS FIRM

ANOTHER FIRM CHANGES HANDS

What was formerly the Western States Lumber Company is now the Farmers Lumber Company of Klemme. The change was made one day last week and the new company is now hndling the business.

When the Western States Lumber Company was organized in Klemme a couple of years ago, quite a number of prominent farmers and some business men took stock in the concern, so the new company is not an all together new business changing hands as the former stock holders are the ones who bought out the company rights here. At a meeting the other day W. C. Schmidt was elected President; W. F. Greeman, Jr., Vice President and C. W. Wiles, Secretary-Treasurer. Olaf Brynteson was retained as manager for the new concern. Under the new orgnization it is the general opinion that the Farmers Lumber Co. will do a good business. Some are of the opinion that this company is connected with the Farmers Co-Operative Grain Company, who bought the Hocum elevator, but this is not correct, the Farmers Lumber Company is entirely independent of the Farmers Elevator or Creamery although some of the stock holders in the lumber company perhaps also hold stock in the other mentioned business enterprises.

GOOD TIME AT MID-WINTER PICNIC

Methodists Enjoy Annual Event

Last Thursday evening the members and friends of the Methodist church of Klemme met at the Idle Hour Theatre for their annual mid-winter picnic and get-together meeting. We would judge that there were about one hundred and fifty or more people present at the doings. The church orchestra consisting of eight pieces gave some very good music. The numbers by the male quartet were also greatly enjoyed. For the balance of the entertainment no regular program was laid out but the evening ws devoted to visiting, games and stunts of all kinds. The "Army game" was introduced to some of the men who were not acquainted with it and Ye Editor was "the goat." We will say that we understand how the game is played. The picnic supper was quite an attraction as that Methodist bunch are all there when it comes to eating. The ladies had plenty of good eats and coffee for everyone. It was a great evening and all throughly enjoyed the picnic.

SOCIAL ANNOUNCEMENT

Coming! Social at District No. 8, Ell township, 2 miles east of Klemme, February 4, 1921. Ladies are requested to bring baskets. Invite every one. F. Annetta Schuldt, teacher. 1wc

MORE COUNTRY NEWS WANTED

The Editor of the Times would like to have a few more correspondents in the country around Klemme. We have one in Avery and one in Liberty townships. Now lets hear from someone in Twin Lakes and Ell townships. Send in your news items and place your name at the bottom so we will know who sent them in so that we can supply you with stamps and stationery. We want lots of news from the farm community near Klemme.

Midweek prayer service each Thursday evening at 7:30 o'clock.

The Church, Sunday School, Epworth League and all friends of the congregation are invited to meet at the Idle Hour on Friday evening at 8 o'clock for a social evening.

A. H. Meyer, Pastor

UNDER THE GOLDEN DOME

Des Moines, Iowa.—Business of getting started continues to occupy most of the attention of the Iowa legislature, although most of the preliminary steps have been completed. After a week-end adjournment following the inauguration of Governor Kendall, the assembly got down to the real grind, and a heavy grist of proposed new legislation is already in the hands of the committee.

Code Revision

Immediate action toward commencing the work of code revision was taken when both house and senate adopted a joint resolution determining to make as much progress during the regular session as possible upon the revision, and directing that the 253 bills prepared by the code commission be introduced and referred to the proper committees.

The code revision committee has assembled what is known as the code of 1919, containing a compilation of all previous codes and session laws, and which is presumed to include all statutes now in force. Only matter repealed by later laws has been eliminated in the compilation of this code.

The commission has also prepared 253 new bills, which to all practical purposes write the old code. Effort has been made to greatly reduce the number of words required, but already many protests are developing that in the boiling down process essential points have been eliminated. The job before the legislature is a big one, and none of the members really expects to complete it without an extra session.

Selection of committees was announced following the post inaugural recess, and the appointments of Speaker Arch McFarlane of Blackhawk county in the house, and of Lieutenant Governor Hammill in the senate developed few surprises.

Committee Appointments

Heads of the three big committees in the house are: Appropriations, Stone of Sioux; ways and means, Weaver of Polk; judiciary, Clark of Linn. In the senate, appropriations, Foskett of Page; ways and means, Whitmore of Wapello; judiciary, Parker of Polk.

These are the three big committees of the house and senate, the chairmanship of which is regarded as more or less of a plum.

Representative Joe Anderson of Winnebago county, an experienced and very highly regarded veteran, heads the agricultural committee in the house, and Senator Brookhardt of Washington county has this committee in the senate.

The announcement of committees was generally popular, and brought no such jealousies and discords as have frequently resulted from committee appointments in the past. Every indication points toward a most harmonious session.

The departmental affairs committee of the senate was reorganized, with Senator Walter Anderson of Greene county as chairman. This is a comparatively new committee, which under the leadership of Senator Holdoegel of Calhoun county brought about numerous changes and reforms in the state house last year. This committee will in all probability be referred any extensive legislation dealing with the consolidation of departments and bureaus favored by Governor Kendall in his message.

Very little legislation of an unexpected or unanticipated nature has yet developed. A bill is soon to be presented having the sponsorship of State Veterinarian Malcolm asking for an annual appropriation of $300,000 for the extension of the fight against tuberculosis and swine in the state, and to afford compensation for animals condemned by state inspectors. Other legislation toward the same end will also be presented, including a proposal to assess a head tax upon cattle and swine for the purpose of defraying the expense. The general aim is the same to eradicate tuberculosis from Iowa herds and swine.

Soldier Bonus

The American Legion soldier bonus bill is ready for presentation and will probably be enacted in very much the form it has been drawn, and with very little opposition. It provides, as already forecasted, for a state bond issue of $22,000,000 for the purpose of paying the bonus, and the bonds are to be voted upon at the general election of 1922, as provided by the constitution. This therefore means that no bonuses will be paid before late in 1922 or in 1923. Provision is made for the payment of a bonus at the rate of 50 cents per day for all time in service during the war to every soldier, sailor, marine, or other military member of the forces of the United States who served more than sixty days, excluding officers of higher rank than captain in the army or lieutenant, junior grade in the navy.

The bonuses are to be collected through either county or state officers, in cash, the bonds of course to be sold to realize the necessary amount. The bonds are to bear not more than 5 per cent interest.

Organized labor is already massing itself for an attack upon the Kime industrial court bill, providing for compulsory arbitration of strikes affecting public utilities, and Fred Canfield of Cedar Rapids, the recognized leader of the labor forces about the legislature, declares that the bill will be defeated. Kime, however, is optimistic, and has assurances of strong support.

An emergency bill introduced by Senator Holdoegel will permit the payment of interest as high as 6 per cent upon school bonds. It is said that school bonds at present cannot be floated because of the fact that 5 per cent is the maximum interest allowed.

A special committee appointed to investigate the possibility of establishing a state printing plant reported that the proposition was impractical unless the state decided to print its own text books for use in the public schools, as is done in Kansas. No action has yet been taken in this matter. The committee also favored the consolidation of the reports of various state departments into one annual publication.

Raising Revenue, Problem

The problem of raising revenue still continues the bugaboo of the assembly, and so far no solon has appeared who seems able to devise a way of raising a million dollars or so of extra revenue without anybody feeling the pinch when the taxes are collected. Governor Kendall, in his message, strongly opposed any increase in the annual state levy, and the legislature is trying to avoid this. Inheritance tax, income tax, increased license fees and in fact almost every possible plan is being suggested.

The first prospect of a road law fight develops from the introduction of a bill providing for the participation of cities in the automobile license fee funds for the purpose of improving unpaved roads within the limits of incorporated towns. At present the citizens do not share in the automobile license fee proceeds, all of which save the 5 per cent used by the state highway commission and for the expense of the auto license department being used for improvement of rural roads. The agricultural counties and rural districts are expected to oppose this change in the law.

The senate is in most respects a veteran body of lawmakers, but of the 108 members of the house, only 37 are former members. As a result it is believed that the senate will be able to work somewnat faster than the lower chamber, always an unwieldy body.

Revision of Primary Law

Revision of the state primary law is proposed in bills introduced by Representative L. H. Mayme of Palo Alto county and Senator George Banta of Deleware county. Banta would compel all primary candidates to subscribe to a party platform to be decided upon at state convention forty days before the general June primary, and would nominate three candidates for each state office, to be selected by elimination from those presenting themselves as candidates. This procedure would also govern the choice of a United States senator.

Redistricting of State

A new task which promises to result in a husky lot of throat cutting and lobbying is the probability that the congressional districts of the state will have to be revised and reduced in number to 10. The national congress, in retaining the membership of the house at its present figure, will cut Iowa's representation at Washington in the lower house of eleven to ten, and will thus necessitate a redistricting in Iowa, which will in the future have ten districts instead of eleven. Incidentally it will be necessary to include two of the present congressmen in some one of the new districts, and just who the victim will be is yet to be determined. The big districts of northern Iowa are for the most part safe, having a population up to the national requirement, and trouble is likely to be centralized in southern Iowa, where population decreases have been quite frequent in recent years.

Representative Bradly has presented a bill providing for a double shift of election clerks, one to count while the other receives the ballots, thus obviating the all night counts which were general in November. The increased voting population due to universal suffrage is brought forward as an argument for legislation of this kind, which has been tried out in Kansas with good effect.

Appropriation

The first of the big appropriations bill to appear is that drawn by the state board of control, asking $1,818,200 for the use of institutions under the state board of control for maintenance, new construction, and expansion. Extensive improvements at the state tuberculosis sanitorium at Oakdale, at present entirely inadequate for the demands made upon it, are among the provisions of the bill.

Opposition to the fishing license is certain from most of the rural counties. Similar bills in the past have met with speedy death.

NEWS REVIEW OF CURRENT EVENTS

Congress Decides an Army of 175,000 Is Enough, Despite "Yellow Peril."

HOUSE DECLINES TO GROW

Apportionment Measure Leaves Membership at 435 — Harding Goes to Florida Without Announcing Cabinet — Briand Becomes Premier of France and Reparations Conference Opens.

By EDWARD W. PICKARD.

Congress took action on two important and interesting matters last week. One of these related to the national defense. The senate, which had voted for reduction of the strength of the army to 150,000 men, reconsidered its vote and repassed the New resolution directing the secretary of war to suspend enlistments until a reduction to 175,000 men was accomplished. The house promptly passed a similar resolution almost unanimously, and the measure went to the President. It was expected, in view of the opposition of the war department, that Mr. Wilson would veto it, and that congress would pass it over the veto.

This is supposed to be a measure of economy which will save about forty million dollars a year to the government. The senate was restrained from being even more economical only by representations from Secretary of War Baker that the 150,000 limit would upset the department's plans for army organization, and from General Pershing that 200,000 men was the bottom limit of safety. Of course the senators in this connection debated the "yellow peril." Phelan of California asserted the necessity for large garrisons in Pacific possessions was greater now than during the war, while Reed and Williams ridiculed the danger and said Japan never would dare to attack the United States without the assistance of Great Britain.

It is likely that the latter view is that generally held in America, except by the people of the Pacific coast, to whom the Japanese peril looms large. It accords, also, with the expert opinion of the German Admiral Scheer, who says it would be almost impossible for Japan to land an army on American soil. Some people have grown excited over the murder of an American navy lieutenant by a Japanese sentry in Vladivostok. There is no doubt that this affair will be settled diplomatically, though the sharp note from Washington, virtually questioning Japan's right in the Siberian city, may result in an acrid exchange. The arbitrary actions of the Japanese authorities in Vladivostok, which they hold under military rule, have caused a good deal of irritation—but the government in Tokyo is too smooth to permit them to lead to hostilities with the United States.

The other interesting congressional action was taken by the house on Wednesday, when it decided by a vote of 267 to 76, that during the next ten years it shall be composed of the same number of representatives as now—435. The plan of apportionment adopted provides that eight states shall gain in representation and eleven lose. California gets three more members, Ohio and Michigan two more each, and New Jersey, Connecticut, North Carolina, Texas and Washington one each. The losers are Missouri, two; and Iowa, Indiana, Kentucky, Kansas, Maine, Mississippi, Nebraska, Rhode Island and Vermont, one each.

Because the population has been drifting from the farm to the city, the agricultural constituencies of the West and South are the ones that suffer most in loss of representation. The congressmen from those regions were the chief opponents of the measure, and their main argument was that the census, being taken during the war period when the young men of the country had been drafted or attracted to the cities by high wages, was unfair. They contended that a new census, taken after readjustment was complete, would show that the farming states had recovered their lost population.

Always, when reapportionment is in order, the South fears that it will suffer through application of the constitutional provision which authorizes the house to reduce representation from any state that denies or abridges the right to citizens of the United States to vote. This time Tinkham of Massachusetts sought to have the provision written into the bill, asserting that several southern states denied their negro citizens the right of suffrage. But nothing came of it and the South breathed easier.

Mr. Harding has departed for Florida without making public his cabinet selections, but before leaving Marion he said he might be able to announce the personnel of his official family after settling down in St. Augustine next month. He declined to discuss the attempt of certain senators and others to induce him to substitute Elihu Root for Charles E. Hughes as secretary of state, and indeed he never has said that he had chosen Mr. Hughes for that place, though it is taken for granted by some of the correspondents. One rumor Mr. Harding did dispose of—that there would be a Democrat in his cabinet. He said the members would all be Republicans, but would not be selected solely because of party obligations. Fred Upham, treasurer of the Republican national committee, is responsible for the statement that one and possibly two members of the cabinet will be from the South.

The Republican majority in the senate has decided that no more of President Wilson's army and navy appointments shall be confirmed, with the exception of some 5,000 minor officers commissioned under the army reorganization act. The appointments of eleven major generals and of hundreds of high army and navy officials in bureaus and departments will not be acted on. They will be left for the Harding administration to handle.

Congressional committees are after A. Mitchell Palmer, with the purpose of at least giving him an unpleasant quarter of an hour. Last week the attorney general was called before the senate judiciary subcommittee to reply to charges of illegal and unauthorized practices by the Department of Justice in its activities against the Reds. Ostensibly, Mr. Palmer was summoned merely to express his opinion of Senator France's resolution for a general amnesty for political prisoners. He opposed the resolution because, he said, the government was already doing all it could in this line; he favored the repeal of the espionage act, but said there should be permanent legislation to protect the government from violent radicals. The France resolution strongly condemns the practices of the department of justice, and in reply Mr. Palmer made sweeping denials of the charges and produced reports of his agents to prove them unfounded.

Samuel Untermyer recently accused the attorney general of malfeasance. In an interview Mr. Palmer said he did not know "how far Mr. Untermyer is actuated in his present attack by the recent conviction of his friend and former associate, a member of the New York bar, for conspiracy to violate the trading with the enemy act, in a case in which Mr. Untermyer very earnestly pressed me to withhold action at the beginning."

Mr. Palmer says that Untermyer was opposed to taking over enemy property and once threatened him when, as alien property custodian, he declined to yield to the lawyer's requests.

Aristide Briand has been made premier of France, has named a strong cabinet and has been assured of the support of all parties except the Radicals, giving him a majority of about 400 in the chamber. He has himself taken the portfolio of foreign affairs, and on Thursday he read to parliament the cabinet's declaration of policy.

This paved the way for the conference of the allied premiers, in session this week in Paris. The subjects under discussion are reparations and disarmament of Germany, Austria and Turkey, and the affairs of Greece. The matter of reparations is the most serious, and it was expected Lloyd George and Briand would find difficulty in reaching an accord on it. A story from Berlin that the British and French had arrived at a new basis for negotiating the reparations question, was denied by British officials, who said the "lump sum" policy remained in force, though a plan for five-year annual payments is being discussed. There is no likelihood that any of the pleas of Germany will be granted.

The official German report on the carrying out of the terms of the Versailles treaty has been completed, and asserts that the total value of the property so far turned over to the entente is $5,000,000,000. By far the largest single item is the merchant fleet of more than 4,500,000 tons, valued at $2,000,000,000.

Though the story has not yet been confirmed from any source, mention must be made of the report from Berlin by way of Paris that the Dutch government has asked the members of the former kaiser's family to leave Holland. The government is said to have come into possession of documents proving that the Hohenzollerns were preparing for a coup d'etat for their restoration. The former crown prince, it was discovered, was to pass into Germany and enter Berlin at the head of troops that have remained faithful to the Hohenzollern dynasty. The Berlin correspondent of the London Times says a Prussian royalist party has been formed and plans to bring the "Orgesch" into line with similar movements in other German states. These stories are in accord with others that have appeared recently giving in great detail the plans for the restoration of the empire under Wilhelm or one of his sons. Ludendorff is said to be the actual head of the general movement.

There is no rift in the black clouds that overhang Austria. The Austrian section of the reparations committee, which expects to report to the allied premiers this week, are said to argue that the situation must be remedied by stringent measures to bring about the free interchange of products between Czecho-Slovakia, Roumania, Austria and Hungary, or Austria is doomed to starve, unless the world is willing to continue to feed it through charity.

The workers of Austria, who demand the stopping of profiteering, also demand a plebiscite on the question of fusion with Germany—which the peace treaty forbids. Finance Minister Grim in a speech last week declared that union with Germany would be brought about of necessity, perhaps by means of a revolution, unless foreign credits to Austria were soon forthcoming.

Bishop Cohalan of Cork takes a pessimistic view of the Irish situation, saying he sees no prospect of peace. Nor is there any so long as the Irish persist in their demand for independence and so long as the present British government lives. The British authorities are making this plain in every way possible. Not a day passes without raids in Ireland in which militant republicans are captured and arms seized, and on Thursday a number of Sinn Fein centers in London were raided. Ambushing and slaying of officers by the Irish also continues, and now the government is making official the reprisals hitherto only condoned. In Cork two houses where members of the constabulary were attacked were destroyed by the military forces. The British military authorities in Dublin have issued a proclamation declaring that if bomb and firearm attacks on crown forces in motorcars do not cease, "known rebels will be carried as hostages for the safe conduct of the occupants of all motor vehicles which are the property of the armed forces of the crown."

Lord Mayor O'Callaghan of Cork, who came to America as a stowaway, and whose deportation was decided on by the State department, despite the opposition of the Labor department, intends to carry the case to the Supreme court if possible. Meanwhile he has told his story to the unofficial committee on Irish affairs. Another witness heard last week calls himself the "consul general of the Irish republic," and the self-constituted committee of meddlers carefully so addressed him by that title.

SYMPTOMS WOMEN DREA

Mrs. Wilson's Letter Shou Be Read by All Women

Clearfield, Pa.—"After my last ch was born last September I was unab to do all of my ow work. I had seve pains in my left s every month and h fever and sick dis spells and such pa during my perio which lasted t weeks. I heard Lydia E. Pinkham Vegetable Co pound doing oth so much good a thought I would g it a trial. I have been very glad tha did, for now I feel much stronger and all of my work. I tell my friends wh they ask me what helped me, and th think it must be a grand medicine. A it is. You can use this letter for a te timonial if you wish."—Mrs. HARRY WILSON, R. F. D. 5, Clearfield, Pa.

The experience and testimony of m women as Mrs. Wilson prove beyon doubt that Lydia E. Pinkham's Veg table Compound will correct such tro bles by removing the cause and resto ing the system to a healthy normal co dition. When such symptoms develo as backaches, bearing-down pains, d placements, nervousness and "b blues" a woman cannot act too promp in trying Lydia E. Pinkham's Vegeta Compound if she values her future co fort and happiness.

FIREWOOD MAKES GOOD CASH CROP

Farmer Can Make His Farm Pay Substantial Profits by Producing Fuel.

USEFULNESS OF MACHINERY

Modern Apparatus Not Only Cuts Wood and Standing Trees, but Is Used for Various Other Purposes About the Farm.

(Prepared by the United States Department of Agriculture.)

The farmer's problems appear, all of a sudden, to have become the leading national problem. Congress is talking of little else than legislation aimed to help the agricultural interests. The bankers are busy explaining why they can't lend the farmer the cash he needs. The plight of the farmer is the chief topic of discussion in railroad circles and among business men at all the big markets. Farmers themselves are organizing everywhere to force the prices of their products up to a point where selling will not mean a loss to them.

Meanwhile what the individual farmer needs is not talk, but cash. Certain things he must buy right along for himself and his family. He can't wait for the national debate to run down.

In this situation farmers who are hard pressed for cash may be overlooking the fact that all around them "money is growing on the trees," and the crop is just waiting to be picked. This is almost literally true. In other words the farmer can harvest another crop—his timber. All over the country thousands of farmers are turning to this immediate source of

Modern Machinery Reduces Hand Labor in Filling the Woodshed.

cash. In money value, firewood ranks as America's sixth crop. Government statistics show rank of crops in this order: Wheat, corn, cotton, hay, oats, firewood.

Money in Producing Fuel.

With one of the practical, low-priced power log saws now on the market, the farmer can make his farm pay substantial profits by producing fuel—a commodity that has held up well in price and for which there is an almost unlimited demand. Then, too, there is always a steady market for ties, fence posts and timbers that can easily and quickly be cut with these lightweight, portable machines. In this way the farmer, with little work or expenses, can realize good profits and still hang on to his grain and live stock if he wants to, until prices get better.

On nearly every farm in most sections of the country there is timber in more than sufficient quantities for home use. There are live trees that need to be taken out to give room for younger ones to grow, or to clear the land for cultivation; there are dead trees that are allowed to decay; and on thousands of farms, the banks of rivers and creeks are lined with great logs and other drift wood.

For many years the farmer has been interested in, and has readily accepted, machinery that would save him time, labor and money. Now he is seizing upon a machine that actually makes money for him—as well as saving him time and labor. Those who have used the 1921 improved model log saws say these machines come near to being perfect sawing outfits. They do the work of ten to fifteen able-bodied men—cut down trees and saw up logs and branches of any size at an average cost of about 1½ cents a cord. Cutting 35 cords of wood is an easy day's work, and it is possible to cut as much as 50 cords in that time.

Machine Cuts Standing Trees.

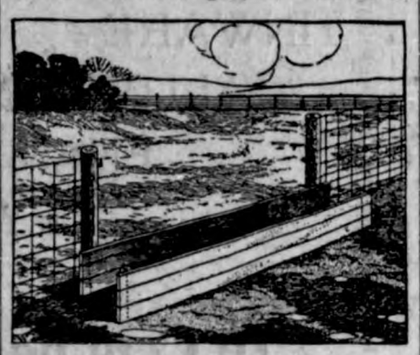
One of the most popular log saws makes over 300 strokes a minute, and its engine pulls over four horsepower. This particular machine cuts down standing trees, too. By attaching this clever device, trees can be cut down with the level of the ground, so there will be no stump, or higher up, as desired. By attaching a circular saw the outfit is quickly turned into a buzz saw, which rapidly zips up limbs and branches, those parts of the tree which usually go to waste, yet which produce fully one-third of the wood.

HOG-PROOF GATE IS HANDY ARRANGEMENT

Cattle and Horses Permitted to Pass at Will.

Two Low Fences, About 18 Inches High, Serve to Keep Swine in Their Own Pasture—Other Animals Can Step Over.

A farmer uses this arrangement to keep the hogs in one lot, while allowing his cattle and horses to pass unrestrained into another pasture. The gate was removed from the hinges, and the space from post to post was boarded up solidly to a height of 18 inches from the ground. About 18



Two Low Fences Across the Gateway Will Stop the Hogs, but Allow Horses and Cattle to Pass.

inches from each gatepost, inside the lot where the hogs were confined, a short post was driven. Long boards nailed from one to the other of these posts made another panel of board fence, 18 inches high and parallel with the boarded-up gate, with an 18-inch space between the two low walls. When a hog comes to this detached panel, it will go to the end and pass round into the narrow passage between the two board walls, continuing on through and out at the other end till it tires of the performance. One that is short enough to turn in the 18-inch passage is too small to jump or climb over the boards before it, and one that cannot turn is unable to face the wall and make the attempt to climb.

All other stock, except small calves or colts, will step over the low walls. No wide cracks, offering footholds, should be left between the boards.—H. F. Grinstead, Columbia, Mo., in Popular Mechanics Magazine.

FARM SELECTION PERPLEXING

Study of Several Intricate Points Called For—Knowledge of Basic Principles Needed.

(Prepared by the United States Department of Agriculture.)

In choosing a farm one has the options of buying with the intention of operating the place as his entire business, buying a small farm and renting enough additional land to meet his needs, or renting a farm either on the share or cash basis. One's choice in the matter is usually determined by the funds available.

If one has only a small amount of capital and wishes to undertake farming as a business from which to derive his entire income, he should, in nearly all cases, begin as a renter. However, if he wishes to buy a farm on which to live, deriving a part of his income from other sources, then, possibly, purchasing is desirable, even if capital is limited.

Whatever course is followed, it is highly desirable that one thoroughly understand the basic principles governing the farm business before deciding some of the finer points. A disregard of these basic principles is responsible for a large proportion of farm failures.

A man may unconsciously work all his life against some economic barrier when success would have been comparatively easy if he had selected a farm where the economic principle would aid him instead of working against him.

AGRICULTURE A NATIONAL PROBLEM

A sober national thought with regard to the importance, the absolute necessity, of a sustained agriculture in this country is imperative. There is, perhaps, no single solution for the situation which the farmers are now facing, but there are many steps which can be and should be taken to place our agriculture on a more satisfactory basis and to stabilize the business of farming, not in the interest of the farmers alone but in the interest of the nation as a whole. The matter is of such tremendous importance to our entire population that it should be recognized everywhere as a national problem and dealt with as such.—Annual Report of the Secretary of Agriculture.

DRY PLACE FOR SEED BEANS

Molds Will Quickly Attack Crop if Moisture Gets to Them, Killing Germinating Qualities.

Beans for seed should be kept in a dry place or molds will readily attack them. Beans will heat if the least bit of moisture gets to them and destroys their germinating qualities. Shoveling them over will help keep them dry.

POULTRY CACKLES

GRAINS FOR POULTRY FLOCK

Corn and Wheat Are Best and About Equal in Feeding Value—Scratch Mixture Is Good.

Corn, wheat, oats, and barley are the principal grains fed to poultry; kafir corn and buckwheat are used also, but are not so generally available and usually cost more. Corn and wheat are the two best grains and are about equal in value as poultry feeds, although wheat can be fed alone better than corn, which is inclined to be fattening. Oats and barley, on account of their hulls and higher fiber content, are not so good as corn or wheat. Rye is not well relished by fowls and is seldom fed. Wheat screenings or slightly damaged grains sometimes

A Well-Developed Flock Scratching in Litter for Feed.

may be bought to advantage, their value depending entirely upon their quality and condition, but as a rule only sound grains in good condition should be fed to poultry, and moldy grains should never be used. The locally grown grains, which poultry will eat freely, may generally be used to the best advantage, say poultry specialists of the United States Department of Agriculture. A scratch mixture, consisting of whole or cracked grains, made of a combination of any two or more of those mentioned, can be fed to advantage. It is not advisable to feed continuously any single grain, especially corn.

A mash made of ground grains, mill products, and meat scrap should be fed usually in addition to the scratch mixture. Cornmeal, wheat bran, wheat middlings, and meat scrap form the basis of a good mash, while corn chop, corn-and-cob meal, ground oats, and low-grade flour may be added or substituted to advantage. Just as good results can be obtained from a simple mash, containing three or four ground grains and meat scrap, as from a highly complicated mash, containing ten or twelve products.

A large number of commercial mixtures, both of scratch grains and of ground grains, are prepared for poultry feeds, but the value of mixed commercial feed depends upon the composition and the quality of the grains used in its preparation. If a poultry raiser does not produce any grain and keeps a comparatively small number of fowls, it is often better for him to buy commercial mixed feeds. The average farmer, however, should feed home-grown grains, supplemented with mill feeds and meat scrap, and the large poultryman usually can mix his own feeds to best advantage. When two or three kinds of grain are raised, and ground or mill feeds are not readily available, good results can be obtained by feeding only the grains, provided they are supplemented with meat scrap or milk.

GRAIN RATION FOR PIGEONS

Good Mixture May Be Made by Using Corn, Wheat, Peas and Vetch—Peanuts Are Good.

Many varieties of grains are used in feeding pigeons. A good mixture may be made of equal parts by weight of small whole corn, hard, dry wheat, peas and vetch, with a small quantity (about five per cent each) of hemp and millet seeds added during the molting period.

Other grains which may be substituted for or added to these are peanuts, dried garden peas, cowpeas, clipped oats or hulled oats, buckwheat, Egyptian corn, and milo maize, while a small quantity of stale bread, rice, rape, millet, canary or sunflower seed may be fed for variety.

Peas are expensive, but seem to be essential to the best results, especially during the breeding season. Peanuts, cowpeas and dried garden peas give quite good results and sometimes are used in place of field peas when the latter are high in price. Soy beans do not seem to be so well liked by pigeons.

Tender green feed, such as freshly cut clover, alfalfa and chard, lettuce, plantain leaves and chickweed may be fed, but is not essential.

OPPORTUNITY FOR FEW HENS

Whether They Prove Profitable or Not in Back Yard Depends on Care Given by Owner.

The smallest back yard affords an opportunity to keep a few hens. Whether the occupant of the premises can keep those few hens to advantage depends upon whether he or she can and will give them the necessary care.

LIVE STOCK

COLLEGE EDUCATION FOR BOY

Kentucky Lad Saves Enough From Sale of Litter of Fine Pigs to Pay for Schooling.

Here is the story of how a litter of pigs produced an agricultural college education, a system of farm waterworks and general improvement on a backwoods farm that had only primitive advantages.

The education went to Jeff Anderson, a Kentucky boy of Pulaski county.

Pigs Almost Ready to Root for Themselves.

Jeff belonged to a boys' club which had been organized by the county agent. He was encouraged to raise a litter of fine pigs under the club system by which the boys applied approved methods and kept account of the results. The pigs sold for a fancy price. Jeff, who had made sure progress, saved some money from his labor and in 1918 entered the Kentucky State College of Agriculture for its short course.

He had been used to seeing his mother and other women carry water 150 yards up a hill for washing and cooking. At the agricultural college he realized the convenience and benefit to be gained by running water conducted to a tap in the kitchen. When he returned home he persuaded his father to let him put in a water system. A stand pipe 60 feet high was built with a 500-gallon tank on top, which gave sufficient pressure to force water to the dwelling 400 feet away. He rigged up a gasoline engine and pump at the spring under the hill. He had learned a little about plumbing, so he did all the pipe fitting in the house. One month's work at odd times, coupled with a little of the knowlege he had gained at the State College of Agriculture put the water right into the kitchen. Jeff has gone back to complete his college education; and they're still raising better pigs at the Anderson farm.

RANGE STOCK IS IMPROVED

All Kinds of Sires, Bulls Especially, Are Receiving Close Scrutiny by Breeders.

In the Western range states all kinds of sires—bulls especially—are receiving scrutiny by live stock owners. There is increasing evidence that good purebred males have wide influence on the quality of young stock and on the returns from stock-raising operations.

One day recently the United States Department of Agriculture enrolled in the "Better Sires—Better Stock" movement several ranchmen, each of whom had more than 1,000 head of live stock. One flock of sheep contained 250 purebred ewes and 3,450 crossbred ewes, the sires being all purebred. A cattle raiser who enlisted in the campaign the same day notified the department: "I have disposed of two grade Hereford bulls recently, having decided to run nothing but purebred sires." This remark is typical of the progress of the movement in Montana.

TO RESTORE MORGAN STRAIN

Efforts of Department of Agriculture Shown in Recent 300-Mile Test for Horses.

Efforts of the United States Department of Agriculture to restore the Morgan strain of horses, which had become nearly extinct, showed their effect in the recent 300-mile test for army horses. Out of 27 entries, only ten finished, and of these the sixth and seventh were Morgan horses, one of them raised on the department's stock farm in Massachusetts. The horses were required to travel 60 miles a day for five days, carrying the regulation cavalry load of 245 pounds.

PROFITABLE TO RAISE MULES

Plan Suggested to Farmers Who Experience Difficulty in Selling Young Horses.

Men with good-sized mares, who are having a hard time disposing of young horses will find it more profitable to raise mules than to raise colts. Medium-priced jacks can now be purchased with a reasonable certainty of breeding.

Stock Raising in WESTERN CANADA

is as profitable as grain growing. Successes as wonderful as those from growing wheat, oats, barley, and flax have been made in **raising Horses, Cattle, Sheep and Hogs.** Bright, sunny climate, nutritious grasses, good water, enormous fodder crops—these spell success to the farmer and stock raiser. And remember, you can **buy on easy terms**

Farm Land at $15 to $30 An Acre

—land equal to that which through many years has yielded from **20 to 45 bushels of wheat to the acre**—grazing land convenient to good grain farms at proportionately low prices. These lands have every rural convenience; good schools, churches, roads, telephones, etc., close to live towns and good markets.

If you want to get back to the farm, or to farm on a larger scale than is possible under your present conditions, **investigate what Western Canada has to offer you.**

For illustrated literature with maps and particulars regarding reduced railway rates, location of land, etc., apply to Department of Immigration, Ottawa, Canada, or

"Some men might be disposed of that way, but I'm not one of them," said Mr. Bibbles. "If I were missing for any length of time that would be the first place Mrs. Bibbles would look for me."—Birmingham Age-Herald.

To Have a Clear Sweet Skin

Touch pimples, redness, roughness or itching, if any, with Cuticura Ointment, then bathe with Cuticura Soap and hot water. Rinse, dry gently and dust on a little Cuticura Talcum to leave a fascinating fragrance on skin. Everywhere 25c each.—Adv.

FOLLOWED EXAMPLE OF HOST

Tactful Visitor Had No Desire to Be "Called," So He Duly "Sarsed" His Coffee.

The oil magnate, Mike Murphy, who passed away not long ago, was fortunate in the fact that his sons inherited their father's consummate ability, says the Philadelphia Ledger. One of them, John, tells this story of a recent visit to a certain section of the country, where he was careful to do as the people did, and to conform with social usages as he found them.

At the table the venerable host poured coffee into a saucer. But the host's son drank it from a cup. That made the host angry. "Why don't you sarse your coffee?" he bellowed at the son.

"It's all right this way, father," answered the young man, mildly.

"Son, if your eddication is goin' to make you reflect on your father I want to know it. I tells you, sarse your coffee!"

Whereupon the dutiful son emptied the cup in the saucer, and, says Mr. Murphy, "I sarsed mine, too!"

Foolish Question No. 8,427.

No, Roger, we should not call it a case of heredity when a hard-headed business man has a bonehead son.—Boston Transcript.

Housewarming.

"What's the proper gift to take to a housewarming?" "Better take along a few lumps of coal."

Stomach on Strike 20 Years Eatonic Settled It!

"Eatonic is wonderful," says C. W. Burton. "I had been a sufferer from stomach trouble for 20 years and now I am well."

Eatonic gets right after the cause of stomach troubles by taking up and carrying out the acidity and gases and of course, when the cause is removed, the sufferer gets well. If you have sourness, belching, indigestion, food repeating or any other stomach trouble, take Eatonic tablets after each meal and find relief. Big box costs only a trifle with your druggist's guarantee.

Serious.

"Zounds! How can I wait two months for delivery?" "Automobile?" "Coal."—Louisville Courier-Journal.

Take care of your health, and wealth will take care of you. Garfield Tea promotes health.—Adv.

A Flying Furnace.

The average meteor when first seen is about 80 miles above the surface of the earth, and disappears from view at 30 miles. Thus, it travels 50 miles before the atmospheric friction burns it up. This friction, it is reckoned, raises it to a temperature of something like 3,000,000 degrees.

Children Cry for Fletcher's Castoria

GOOD AND LOGICAL REASON

Mrs. Jones Knew Exactly What She Was Doing When She Selected Baby's Names.

Mr. and Mrs. Jones had come to that all-important part of naming their new baby.

Mr. Jones, who, by the way, detested work, and liked nothing better than to sit in front of the fire and watch other people do it, wanted the baby named plain "Bill."

Mrs. Jones had different views.

"I shall name the baby William Oliver Robert Kenneth," she asserted.

"But why all those names?" asked her husband.

"Because," replied Mrs. Jones, tartly, "if you look at the initials you will find that they spell 'Work,' so perhaps, when baby grows up, he will take to it better than his father."

Then There Was More of It.

"What are you little boys quarreling about, my son?" asked the father coming in the gate.

"Why, this boy from next door said I was as homely as you, papa," explained the young man.

"Oh! And that's what started the trouble, was it?"

"No, papa; the trouble didn't start until I said that I wasn't as homely as you!"—Yonkers Statesman.

When a man goes at things head first he often gets there with both feet.

Its rich, nut-like flavor attracts and its nourishing qualities are staunch. Unlike most prepared cereals, Grape-Nuts needs no added sweetening

SOLD BY GROCERS EVERYWHERE

THE SQUIRREL

By MADGE WESTON.

(©, right, 1920, Western Newspaper Union.)

Mr. Nathan Bennett was exceedingly annoyed. That had become his chronic condition since buying the Dudley place. He had always wished to be the owner of the picturesque old mansion in its beautiful park setting, from the days when he had passed on his way to school.

Mischievous Nat Bennett loved it better in those days before the imposing gates of the entrance, watching the squirrels scamper across the drive. There was little resemblance between the mischievous Nat, in this dignified and austere Nathan. But ambition had brought its own reward and the Dudley place was his own. He had expected to enjoy himself there with the feeling of the old-time enthusiasm. But he became aware of a disagreeable and interfering neighbor.

Miss Abigail Stevens had not "melted" with age. Nathan Bennett remembered her as a younger woman of exacting nature.

Musing upon the night of his arrival in his new home, across to the white house that was hers, he decided that to ignore her presence there would be all that was necessary to keep the peace. Soon Nathan found his mistake. When Abigail Stevens was not scolding his white chickens away from her side of the fence, she was throwing dangerous sharp stones in the direction of Niger, his calm-natured dog, an animal too accustomed to friendly companionship, to know the meaning of fear. And when Miss Stevens was not engaged in endangering his live stock, she amused herself by penning certain complaints against himself and his household in general.

Mrs. White, the housekeeper, had a new grievance each evening. The busy man riding to and fro from his city office actually dreaded these homecomings. Niger, upon one evening, had exhibited pitifully a bruised paw, while one by one valuable chickens were reported missing. But now the calamity had happened—Fannie was gone.

Nathan Bennett, in purchasing the home of his boyhood dream, had overlooked the misfortune of loneliness. In Nathan's life of endeavor love had found no part, and Fannie was the creature who comforted him with her prankish ways and faithful affection. Fannie was a gray, park squirrel. It was Mrs. White who made the announcement of Fannie's loss when Nathan returned from a business trip. "She's been gone four days," said the woman, "and I saw her last on Miss Stevens' roof. She went in by the attic window—"

The woman knew that no further warning was needed.

Angrily Nathan walked through the garden that evening. Fannie had been wont to come to him with a chirp of welcome, running up his arm to her reward of nuts. Tonight no Fannie came. Fuming inwardly, he went indoors, this time himself to write a note. "If Miss Stevens did not at once produce his squirrel, she might be prepared for all sorts of—impossible—punishments." Miss Stevens at once responded to his letter. It was an unexpected communication. She would at once set the squirrel free. "Would he go down," she wrote, "to the south garden wall to receive her." Miss Stevens was sorry—very sorry to have coaxed his pet away.

"Coaxed!" muttered the astonished Nathan, and in apologetic manner made his way to the south garden wall. A young woman stood upon the opposite side of the wall; on her arm perched a gray squirrel. Fannie's bright eyes regarded him pertly, the girl's brighter eyes twinkled at him.

"I did not know she was a pet squirrel," the girl explained. "I am Gail Stevens, visiting my aunt. I coaxed your Fannie through the window because I was lonely and she was so entertaining."

"I can readily understand," Nathan Bennet said, smiling, "that you would enjoy the relief of cheerful companionship."

And as the girl straightened her arm to transfer the squirrel to his, Nathan Bennett clasped suddenly the outstretched hand. And in that clasp was the promise, strangely sweet, of loneliness no more.

Michigan Leads All.

Michigan has the largest farm bureau county in the United States. It is Sanilac, where incompleted tabulation of the membership campaign results showed 2,900 members, with the final tally estimated at close to 3,400. Iroquois county, Illinois, was the next largest with 2,850 members. Saginaw county is likely to become the second largest county in the country. It now has 2,650 farm bureau members, and expects soon to have more than 3,000. Membership of the Michigan state farm bureau now is 53,051, and it is growing at the rate of about 1,500 weekly. The southern half of the lower peninsula now is canvassed and the campaign is extending into the northwestern part of the state.

Oak Doors Thirty Feet High.

The great oak doors at the entrance of St. Paul's cathedral in London are 30 feet high and are believed to be the largest one-piece doors in the world. They are nearly as old as the cathedral itself, and each leaf bears upon it the name of the carpenter who made it.

How to Lower Your Meat Bills

Hints From the Department of Justice

A MESSAGE FROM THE STATE FAIR PRICE COMMISSION TO THE HOUSEWIVES OF THIS STATE.

The women of this state could materially reduce the cost of their food by purchasing the less expensive cuts of meat. These cuts are cheap only in the sense that the price is lower. They are nutritious and, when properly prepared, are highly palatable. Some of the less expensive meat contains higher nutritive value than the most costly portions. But the cheaper cuts are sadly neglected because of lack of information as to their merit and their preparation. As a consequence, the demand for meats at retail is highly uneven. This makes merchandising more expensive and adds to the cost of living.

The Fair Price Commission purposes to disseminate information about the cheaper cuts which, turned to account by consumers, will help to reduce meat bills.

FAIR PRICE COMMISSION.

BUY FORE-QUARTER BEEF AND SAVE MONEY.

The fair price commission declares that if consumers will buy more fore-quarter beef—whence come less expensive cuts—they will save money. Here is something which the United States department of agriculture recently said on the subject:

"Because of its reputation as the choicest cut, the people ask for porterhouse steak, whereas if they would try a chuck steak, the chances are it would prove to be satisfactory and it would cost much less. The reputation of porterhouse steak with the consequent large demand for it, coupled with the fact that this cut forms only a very small per cent of the carcass, causes it to sell at a higher price than any other cut.

"If people in general could realize the value of meat from the fore-quarter as compared with that from the hind-quarter and would use more of it prices of meat as a whole would be greatly reduced and would be more stable.

"An abnormal demand for any commodity forces up the price and this condition applies to porterhouse steak or other choice cuts. People should use more fore-quarter meats and reduce prices of living. Any of the fore-quarter meat is good for making meat loaves or Liberty steak, while in some markets, steaks are cut from the rib and sell as short cut steaks."

The department of agriculture shows plainly how expensive it is to discriminate against the fore-quarter beef:

"The average consumer seldom realizes the difference in the selling price of beef taken from the hind-quarters and that cut from the fore-quarters, and if he is aware of it he very likely does not understand the reason therefor. The wholesale prices on hind and fore-quarters of beef are based on a differential of so much over carcass price for hind-quarters and so much under carcass price for fore-quarters. It is seldom that fore-quarters ever sell as high or that hind-quarters sell as low as carcass prices. The average differential is usually 2 cents over on hinds and 2 cents under on fores. At present, the differentials are greater, both over and under.

"The differential is changed according to the market.

This is just the time of year for persons with porterhouse habits to get acquainted with beef from the fore-quarter. Such meat is used largely for roasts and stews. On this account it requires more heat for cooking. In cold weather, when it is necessary to heat the house for personal comfort there is a double reason for using fore-quarter beef.

Neck Meat of Beef Loaf.

2 lb neck meat of beef, ground.
½ lb lean pork, ground.
1 egg.
1 green pepper, chopped fine.
2 cupfuls bread crumbs.
Liquid to moisten.
3 slices of bacon.

Mix the beef, pork, egg, pepper, bread crumbs and seasonings with sufficient milk or water to form into loaf. Arrange strips of bacon on top. Bake in loaf or in casserol, in a moderate oven for two hours. Cover if necessary to prevent the top from becoming too hard and dry.

How to Lower Your Meat Bills

Hints From the Department of Justice

HOUSEWIVES BUY LAMB AND MUTTON UNWISELY.

The Eat More Lamb campaign which is being conducted throughout the country at the present time before colleges, domestic science schools, women's clubs, various institutions, public schools, meat markets, etc., has brought before the general public the value of lamb as a food product, but especially has it demonstrated the value and economy of the cheaper cuts of lamb which have been neglected. It has been a contention of the retailer for years that a great part of the fore quarter—the neck, shoulder, shank and breast—must be sold at a loss or eventually reach the scrap or bone box.

Some retail butchers bone out these cheap fore-quarter cuts, put them through the meat grinder, season them and mold them up into lamb patties, putting a strip of bacon around each one, leave them in the cooler over night and sell all of them next day at good prices. Many butchers could sell more than they can supply. The butcher has thus turned into an asset or profitmaker that portion which has heretofore been considered a loss.

Steaks and roasts can be had from the shoulder, lamb rolls from the neck, breast and shoulder, and neck slices are obtained by cutting the neck in sections crosswise, so that the meat has the appearance of chops and is a very inviting dish when used as a stew or potted lamb en casserole. The cheaper cuts of lamb are made from the breast, shoulder, shank and neck which combined are about 18 per cent of the lamb.

Lamb is a healthful food for all people. It is very nutritious, wholesome and palatable and in caloric value it is equal or superior to any other meat.

The boned and rolled shoulder mentioned above is used for roasting purposes; it can also be cut to any desired weight or can be sliced into Saratoga chops.

United States government statistics tell us that each year the average housewife buys for every person in her household only about 5 pounds of lamb as compared with about 71 pounds of pork and 67 pounds of beef. If all American families used lamb one day a week it would mean more than 20 pounds of lamb annually per capita, or four times the present consumption.

More than that, the head of the family, who pays the bills, would no doubt encourage purchasing the cheaper lamb cuts instead of merely a few chops at a time. A shoulder of lamb, being smaller than the average beef joint and less expensive, should appeal especially to small families.

The marketing expeditions should be an education in economy.

It usually pays to shop before you buy.

It usually pays to do your marketing personally rather than telephone your order.

Lamb steaks and lamb chops take but a few moments to cook, but they are the most expensive cuts. As a lamb is not all chops and steaks, other and less expensive parts of the animal must be used and can be made into tasty dishes. Breast of lamb contains more meat than bone, yet it often sells for half the price of pork spareribs, and some retailers on account of a limited demand for the fore-quarter cuts find it necessary to convert these cheaper cuts into sausage in order to sell them at all.

Lamb is a somewhat seasonable meat, by far the greater part of live lambs reaching the market during the latter half of the year. In the spring around Easter time, lamb may be as high or higher than other meats. In the fall and early winter it is nearly always much cheaper.

The following average prices compiled by the National Wool Growers' association from representative retailers throughout the country show comparative levels of the different meats in the fall season as they occurred in the middle of October, 1919. These figures are not applicable now, except that they emphasize a typical relationship:

Lamb—Leg, 37 cents; loin, 44 cents; shoulder, 27 cents; rib chops, 46½ cents.

Sheep—Leg, 29 cents; loin, 28 cents; shoulder, 16½ cents; chops, 35 cents.

Pork—Loin, 43 cents; fresh ham, 35 cents.

Beef—Sirloin, 45 cents; porterhouse, 48 cents; tenderloin, 50 cents; round steak, 38 cents.

These prices were for the best-quality meats in all cases.

Mutton Stew With Barley.

Cut meat from neck or breast into small pieces. Put in kettle with water to cover. Use about 1½ cupfuls water to a pound of meat. Add onions, carrot, salt and pepper. For each pint liquid add 1-3 cup pearl barley. Simmer gently two or three hours.

THE UNIVERSAL CAR

A simple problem

Can You Figure It Out

?

The Ford Motor Company plans to build 1,250,000 Ford Cars in 1921, or 104,166 in each month.

If all were delivered in the 48 states in the Union equally, allowing nothing for foreign countries, Iowa would receive 2,170 each month and Klemme 7 each month. We now have 75 prospective buyers who say they will buy in the spring. If one-half of the above place their orders April 1st, 1921, *What date will the last order be filled?*

Buy Now!

Buy Your Car Now---Let the Other Man Wait

E D. G. E L L

P. S.—The Ford Factory is closed down now, will probably be closed down for a month—take off 104,166 from the above figures.

Announcing Our New Car---

Willys-Knight

The Motor

The reputation of the Willys-Knight car rests solidly on the performance of the Willys-Knight motor. In this motor, metal cylinder sleeves, one within the other, slide up and down on a film of oil, noiselessly, without friction or wear, enduringly quiet. Their action is timed positively. Gases enter and exhaust through ports in these sleeves' There are no spring controlled valves---no clashing metal parts.

The motor is so simple, so free from wear, that it almost never needs adjustment. The small amount of carbon forming on the sleeves actually improves compression and serves only to increase the velvet flow of quiet power.

The Willys-Knight motor improves with use.

The shape of its combustion chamber permits the delivery of the greatest possible power ior each explosion, resulting in gasoline economy. Its flexibility is remarkable.

Refined Car

In refinement of coach work, beauty of line, and completeness of convenience, the Willys-Knight car is in keeping with the efficiency of the motor whose smooth and quiet power sends it skimming over the highway,

Touring Model

The Willys-Knight Touring is of rich dark blve framed by ebony black trimmings. The interior of the car is a restful harmony of hand buffed black leather.

The seat backs are tilted in European fashion; so that you sit, not bolt upright, but restfully in a natural, easy posture. You sit in the seat not merely on top of it. And the weight of body is cradled by the yielding yet ever-buoyant cushion springs beneath.

Other Models

In the Roadster and Coupe one seat can be moved foreward, enableing the occupants of the car to ride side by side when they choose; but the cars are roomy however the seats are plachd. Moreover, sli ling the seat forward gives extra baggage space.

Liberty Township News

Lawrence Schaefer has been on he sick list the past week.

John Goll left for Fort Dodge last Monday.

Mrs. Will Suckow has been on the sick list the past few days.

Many of the farmers of this locality brought stock to Klemme Saturday to be shipped.

Mrs. H. Paul and children spent a couple of days visiting her parents in town.

Miss Lulu Newberger is the new teacher in school No. 9. She boards at the Roy Schaefer home.

Little Lois Lenz has been quite sick the past week, although she is some better at present. She had been under the care of a trained nurse.

E. G. Beier got stuck with his Ford last Sunday as he was going home, but with the help of three husky men he got it out again.

A man who traveled over the roads any great distance last Monday and did not receive any injuries from the trip has passed a very good physical test. Oh boy! The roads sure were "smooth."

Elmer Beier had his Ford pulled to town by a big car from the Bridges place Monday morning. They got as far as the church when they lost one of the hind wheels. Now we did not get any of the particulars of the case but we presume that when El wanted to go home the night before, the old "Lizzie" refused to go.

Milton Schaper and Emery Schaefer were breakng a colt one day last week. They hitched it to a bob-sled with another horse and started down the road. Everythng went lovely until one of the reins broke, but as the boys were on the alert they guided the team toward a tree that was a short distance ahead, thinking they could stop them in that way rather than have a run-away. But before they reached the tree they got the horses stopped. Perhaps the colt took into consideration the danger in slamming into a tree.

Avery Township News

Will Waddingham's children are on the sick list this week.

Martin Jensen was a Goodell caller last Saturday between trains.

Wayne Bachman was absent from school last Friday.

Mr. and Mrs. Charley Smith were visitors at the home of Walter Reed Sunday.

Mr. and Mrs. Ted Dutheridge and daughter, Jane, were visitors at the E. Amey home Sunday.

Harlow Helps was having dental work done at Garner Wednesday morning.

The Misses Hazel and Carrie Dutton returned from their visit at Dows on Monday.

Quite a number of Avery township people attended the Social given in the hall at Klemme last Thursday night. All report a good time.

Tuesday night a party was held at the home of George Albers. Quite a number from this township were present. About thirty-five people were present at the party.

CONDEM HIGH PRICED STOCK FOOD

Prominent Hog Raiser Says Prices Charged Are Unwarranted—Makes His Own Hog Food, With Better Results.

"That he is all through paying fancy prices for stock foods and hog remedies and that he is raising some of the best hogs ever placed on the market." was the statement made recently by E. H. Beckstead, well-known hog raiser and authority on live stock.

Mr. Beckstead's hogs are the envy of his neighbors, and have "topped the market" for several years in Iowa. He states that for years he bought high-priced hog foods and hog remedies but he is all through paying extravagant prices for what he can make himself. He states that what the hogs need are minerals, and tells the secret of his wonderful success by explaining that he takes about five pounds of ordinary mineraline (which is pure concentrated minerals and cost only a couple of dollars) and mixes same with enough bran or filler to make a hundred pounds. All hogs, and especially brood sows require minerals as they keep them free from worms, and in the pink of condition, and are essential to the hogs growth an a well balanced ration. This inexpensive mixture placed in a sheltered box hogs can get at it as they need it, will produce far better results than any high priced so-called stock foods.

Send two dollars to The Mineraline Chemical Co., 1638 North Wells St., Chicago, Ill., and they will forward you by prepaid parcel post, enough mineraline to make a full hundred pounds. Adv.-J27-F17.

The following Klemme men were passengers to Garner Monday morning: Philip Boek, Bill Bachman, Fred Ridder, P. M. Greisemer, Walter Johnson, Jete Christians and Peter Josten. Now we can't quite figure out what the big attraction was there unless it was because Pete Christians went up to get a marriage license and the rest of the fellows went along to be sure that the Clerk at the Court House would issue him an extra good one. Recently one man went to the Clerk to get a license. The Clerk asked him whether he wanted a marriage license or a dog license, whereupon the man replied, "It don't make much difference which I get, I expect to lead a dog's life anyway."

Ben Greiman was in Klemme the other day setting up the smokes. He came into our office and shoved a twenty-five cent smoke maker into our editorial mug and told us all about her. "She" is a very fine young lady who came to make her home with Ben and wife on January 20th. Dorothy Mabel weighs nine pounds and Ben says she is sure a dandy fine baby

Mrs. J. W. Brooks, Miss Laura Brooks and Bert Trumbell, a grandson of Mrs. Brooks moved to Klemme last week from Belmond and are living in the rooms in the old Schaeffer building formerly occupied by the Dr. Thomas family. Mrs. Brooks is the mother of Mrs. Mille Smith of this city and the other Miss Brooks is her sister. We welcome the family to Klemme.

CONDENSED CLASSICS

THE PILOT

By JAMES FENIMORE COOPER

Condensation by Alfred Clark

Cooper was born in New Jersey in 1789, but when only about a year old removed to his father's almost feudal domain at Cooperstown, New York, where he died in 1851. There he learned to know the wilderness which plays so important a part in his books, and there, too, he probably acquired that headstrong self-assertiveness and disregard of the opinions of others which made him, while one of the few most widely read authors in the world, one of the most cordially detested individuals to be found. He had a positive genius for getting in bad. While Dickens and Kipling deeply wounded one nation by their American Notes, they were pigmies in this respect compared to Cooper. He could exasperate any and everybody and apparently cultivated with pleasure his habitual aptitudes. Lowell wrote of him as "Cooper, who's written six volumes to prove he's as good as a lord." An English magazine described him as a "bilious braggart," a "liar," a "full jackass," an "insect," a "grub," and a "reptile." The "New Yorker" pleasantly wrote of him: "He is as proud of blackguarding as a fishwoman is of billingsgate. It is as natural to him as snarling to a tomcat or growling to a bulldog. He has the scorn and contempt of every well informed American."

ON a late afternoon of a winter's day, during the American Revolution, a rakish schooner and a majestic frigate anchored well inside a little bay on the northeastern coast of England. A whaleboat drove shoreward, a young officer scrambled up the steep cliffs and a few minutes later a mysterious stranger was transferred to the frigate's deck. He answered to the name of "Mr. Gray" and was said to be merely a pilot, but he was greeted with surprising deference.

For no ordinary man would these vessels have ventured so near that coast of sandbars and hidden rocks. The wind was a mere ruffle of air. But the incessant mutter of the long, slow waves foretold that a storm was brewing. Ever more fitfully and faintly blew the land-breeze; the mutter of the waters grew deeper. Only here and there did a few stars twinkle between the fast gathering clouds. It was time to beat out to open sea, if it were not even now too late. Men swarmed aloft and hung up the yards; sails fluttered out; the anchor was pulled in; the frigate gathered headway. Then the faint breeze died. The spread of canvas hung useless; the currents drove the ship shoreward.

With a roar the wind came suddenly from the east. White spray dashed from the bow. Yet the Pilot paced the quarter-deck seemingly oblivious to danger. But open water was far ahead and suddenly from the forecastle came that dreaded cry, "Breakers! breakers, dead ahead!" The Pilot shook off his trance of thought. His orders thundered forth, sailors sprang hither and thither at his bidding, the frigate swung about at his cry of "Hold on everything!" Tortuously she picked her way through the twisting channels, in darkness amid the howlings of the great winds.

She shivered from bow to stern as a hundred men loosed the huge mainsail. The jib was torn free with a crash like a cannon's blast, but the big sail held and the frigate bowed like a reed in the wind. White foam showed dimly upon both sides, but the Pilot kept the ship. as by a miracle, within a narrow ribbon of dark water. He took the wheel himself. Time and again the frigate seemed to have reeled free from peril; time and again she plunged anew toward a welter of white water. But she drove ever on and at last she rode the great waves of the open sea.

Not the storm alone had these ships dared. They were American vessels, lurking about an enemy's coast. This little bay had a peculiar fascination for two young lieutenants aboard, Edward Griffith and Richard Barnstable. Not far inland lived Colonel Howard, a Tory who had fled from America when the colonists revolted. With him dwelt his niece, Cecilia Howard, beloved by Griffith, and his ward, Katherine Plowden, betrothed to Barnstable. In St. Ruth's abbey lingered, too, Christopher Dillon, a poor kinsman anxious to better his condition by wedding the wealthy Cecilia. Redcoats lent a picturesqueness to the venerable abbey, for a small garrison under Captain Borroughcliffe had been summoned by the owner. For aught that men knew, John Paul Jones himself might be aboard these ships hovering nearby.

While reconnoitering the next night, "Mr. Gray" and Griffith were captured, but Borroughcliffe's drunkenness enabled them to escape. Griffith was, however, retaken.

The impetuous Barnstable, fretting offshore with his enormous coxswain, Long Tom Coffin, had been nearly cut off from his schooner by an English cutter, but he scrambled aboard safely and the drum beat to quarters. While broadsides roared and the decks grew slippery with blood, the little fighting ships met and grappled. Before Barnstable could lead his boarders to the enemy's deck, Coffin tumbled into the sea. Shouting "Revenge Long Tom!" the lieutenant rushed with his men upon the foe. It was fighting at close quarters and the issue was in doubt when the drenched and furious coxswain emerged from the sea and with his harpoon pinioned the English captain to his mast. In a few minutes the Americans were masters of the cutter. Cowering in that scene of bloodshed the victors discovered the crafty Dillon, who pleaded to be sent off as a hostage, promising to return in person or to have Griffith delivered in his stead.

His word of honor was trusted and he was sent away with Long Tom. He luckily overheard Dillon's treacherous plot to entrap Barnstable's waiting party. The resourceful old seaman gagged Borroughcliffe and drove Dillon, at the point of his harpoon, back to the waiting schooner. By this time, however, a battery on the cliff brought down the schooner's mainmast. She was driven from her course by heavy seas. The masts were felled and anchors dropped, but she plunged on like a bobbing cork in rapids. Barnstable would have stayed by his ship, but suddenly Long Tom seized him and hurled him over the bulwarks. "God's will be done with me," Coffin cried, above the wind's roar. Dillon's lifeless body was rolled upon the shore, but Long Tom's stayed with the sea to which he had dedicated his life.

Surprise succeeded surprise at the abbey. Barnstable marched his shipwrecked mariners into the building and they took possession, but they were soon made prisoners by the redcoats. Then the mysterious figure of the Pilot appeared at the door and behind him loomed the marines from the frigate. Colonel Howard, an unwilling prisoner, was marched away with Cecilia and Katherine, who could not be downcast at the triumph of their lovers.

Captain Borroughcliffe was freed, as was another inmate of the abbey, Alice Duscombe. She had recognized the Pilot in his disguise when he was first captured. They had been lovers, but she was so staunch in her love for her king and she so hated bloodshed that she had broken her troth to this "Mr. Gray," whom she addressed as John. She reminded him that did she but once call aloud his true name the whole countryside would ring with it. What that name was is never revealed, but there was but one sea rover who could strike stark terror into all English hearts.

On board the frigate repeated conferences were held between the captain, Griffith and "Mr. Gray." Suddenly out of the fog drove a mountainous ship of the line. The drum beat aboard the frigate, sailors leaped nimbly about the deck, clearing for action. The women were led below and gradually order resolved itself out of the chaos of shouting men. A terrific roar filled the air as three tiers of guns blazed a broadside from the English ship. A few sails and ropes were cut, but the frigate's sailing power was hardly affected. One chance ball struck the captain and hurled him to death. Griffith succeeded to the command and he was appalled as he saw the frigate hemmed about. To the east loomed the great ship of war and far in the northeast the sails of another frigate.

"What are we to do?" cried Griffith. "Fight them! fight them!' shouted the Pilot. "Let me proclaim your name to the men," Griffith appealed. But the Pilot refused. "Should we come to a grapple," he said, "I will give forth the name as a war-cry and these English will quail before it."

The ship of war was distanced, but she cut off a retreat and the frigate ahead had been re-enforced by two others. The foremost maneuvered with the American frigate for position. Broadsides crashed and they grappled. The American guns raked her foe and left her helpless, with useless ropes dangling from shattered masts. The deck was cleared and as another enemy appeared, Griffith shouted, "Hoist away of everything!" Fifty men flew aloft upon the spars and white canvas was spread from every mast. The frigate lunged ahead, but it could not outstrip its rival, and the halt to give battle had enabled the ship of the line to draw up.

Then, for a few breathless moments, the Pilot leaped into command. Breakers loomed ahead, but he drove the vessels straight into the shoals, into narrow passages where white foam bubbled perilously close. The enemy dared not follow, and when night fell pursuit was hopeless.

Colonel Howard, fatally wounded in the battle, lived long enough to see Cecilia Howard and Katherine Plowden wedded by the chaplain to their lovers. His last words were spoken to Griffith. "Perhaps I may have mistaken my duty to America—but I was too old to change my politics or my religion; I—I—I loved the king—God bless him—"

The frigate drove on to Holland, where the Pilot landed in a small boat that dwindled into a black speck and disappeared in the setting sun. Twelve years later Cecilia Griffith saw her husband's face cloud as he read in the newspaper of the death of a great man, but not even then did he divulge his name. He had promised to keep it secret. He said only, "Our happiness might have been wrecked in the voyage of life had we not met the unknown Pilot of the German ocean."

PATTON'S

A Bear Can Sleep Eight Months Without Food--

If the human being could do that, the living problems would be greatly simplified.

But people must eat, and they must wear clothes--good clothes.

This is in the interest of economy.

Where can I buy so that my purchsse will be uniformly satisfactory, and thus show the greatest saving in the end?

When a man begins to reason like this, he is on the highway to successful buying; the fact is, when men do consider buying in the above light, the answer to the question is obvious.

They look for a store that has achieved a character of dependability and stability.

A store where they can pay for what they get, and they get what they pay for.

The price of an article is not always the amount of money you exchange for it.

The real answer comes out in the wash. You know--for you have had experience.

Sensible buyers choose their store like they choose their doctors, not primarily for the price charged, but for their ability to serve.

If you wish to make a satisfactory purchase, look up a good store.

We await your coming with pleasure.

"A NATION SAVED BY AMERICA," SAYS CLEVELAND H. DODGE

New York Business Man Describes Vast Armenian Work of Near East Relief.

Cleveland H. Dodge, New York banker and business man, director of the National City Bank, and treasurer of The Russell Sage Foundation and of the Near East Relief, declares that "a nation has been saved by American philanthropy, and the generosity of the American people through the Near East Relief, in its work for the Armenians.

"The lowest official estimate indicates that one million persons are living today who would not be alive had it not been for this relief." Mr. Dodge continued, "I have an autograph letter from Dr. H. Ohandjanian, president of the Armenian Republic, in which he writes: 'America literally saved us from starvation.'

"Wholly aside from adults who have been saved from starvation, we today

CLEVELAND H. DODGE.

have in orphanages and elsewhere under our care 110,000 homeless, fatherless or motherless children who are absolutely dependent upon us. This is exclusive of 63 hospitals with 6,552 beds, 128 clinics, rescue homes for girls and unnumbered thousands of refugees who are being helped through our industrial relief and in other ways.

"The Near East Relief has during the last four or five years commissioned and sent to the Near East more than 1,000 American relief workers, of whom 500 are still in the field, all of them working at great financial sacrifice—the standard of salary being $50 per month and maintenance—and many of them facing great personal danger and hardship in the performance of their life-saving service. A score of them have died from typhus or other diseases more or less related to their faithfulness in the performance of relief service.

"Nor is that all. We have raised and disbursed during war times and in a war-torn area, in large measure under enemy control, more than $41,000,000 in cash, and, including flour, Red Cross and other supplies administered by our agents, a total of cash and supplies in excess of $50,000,000. The official reports show that on June 30, 1920, we had in orphanages 54,000 children, and that we are partially supporting outside of the orphanages 56,039 children, making a total of 110,000 boys and girls now under the care of the Near East Relief."

Mr. Dodge considers the work of the Near East Relief one of the most stupendous undertakings of disinterested philanthropy the world has ever seen.

"In countries whose population totals more than 30,000,000 souls, American idealism exemplified by the work of the Near East Relief constitutes today a torch of enlightenment and an influence for peace throughout the whole Near East," he maintains. "Our American ideal of liberty, industry and helpfulness has brought us as a people happiness, prosperity and fulfillment. Out of the fullness of this heritage we are furnishing a faithful and undaunted Christian people the brotherly aid which will enable them to reach the same fulfillment that God has given us.

"It is an achievement of which every American may well be proud."

Armenian President Asks American Aid

Dr. H. Ohandjanian
Armenian President

Erivan, Armenia: Dr. H. Ohandjanian, President of the Armenian Republic, has sent an urgent cablegram to Charles V. Vickrey, General Secretary of the Near East Relief, 1 Madison Ave., New York City, requesting immediate assistance to prevent the starvation of the Armenian people before the next harvest can be gathered. President Ohandjanian's message reads:

"Owing to hail, rain and field mice, the harvest in Armenia fell below expectations. Standing crops appeared well, but owing to poor seed, returns were not as good as was expected. Maximum returns 140,000 tons, only sufficient for eight months for one and a half million people. Food crisis critical and intensified by new Turkish invasion of Armenia. It is estimated that 100,000 peaceful inhabitants of Sarikamish and Kars region have been forced to renew the life of refugees and flee towards the interior of Armenia. There are also large numbers fleeing from Bolsheviks in Azerbaijan and Southern Russia, and coming to Armenia. Farmers, fearing famine, are unwilling to sell crops, thus leaving the cities foodless. In addition to the Armenian crops, ten thousand tons have been purchased from neighboring countries.

"In order to save Armenia it is necessary to secure flour from America, 50,000 tons, maximum requirement. In the name of the Armenian Government and the Armenian People, I beg that you use your wide influence in order that the Near East Relief may secure and ship the flour needed. I am sure that in this serious crisis the Near East Relief will not fail to continue its aid to Armenia in her struggle for existence.

"H. OHANDJANIAN,
"President of Armenia."

GOB DESCRIBES ARMENIAN HORRORS

"You can't realize what a sight it is to see the refugee camp at Batum," Petty Officer George Porter, of Racine, Wis., writes his family, telling of the work of the Near East Relief in the ports along the Black Sea.

"The people are dying off little by little. There are workers of the relief organization here, but they don't seem to be able to take care of them all. They were the ones that made the camp. The families all live in grass huts, just high enough to sit up in, and

GEORGE PORTER.

they are covered with blankets. There is disease everywhere and the smell is terrible. I'm glad we didn't stay long, as I couldn't stand it, and you know when I can't stand anything there are few that can. I am sorry for these refugees, but we can't help any. They don't want money though they would sell their lives for some clothes and food. They don't stop praising the Americans.

"Trebizonde was another Armenian town, but it was completely wiped out by the Turks, who are now in control of it. The Turks massacred all the Armenians over fifteen years of age and kept all under that age to bring them up as Turks. The city looked as if it was shot to pieces. Samsoun is the same as Trebizonde, so you can see what kind of country we are travelling through. I am sure glad that we are leaving Russia and Armenia because I am sick of what I have seen. I think that these tourists who are trying to see ravished Armenia will be sorry they ever came over. These relief workers are nearly dead from work. They are the people who can tell the U. S. something about this country."

The Near East Relief, 1 Madison Ave., New York, is now appealing for funds to continue the work so graphically described by the young American sailor.

CHAPTER XII.
—12—
The Attack on the Cabin.

There was no sound from without, except occasionally the echo of a distant voice shouting. Shelby, startled by these words and alarmed by her agitation, swiftly crossed the room. The body was gone, actually gone! As he bent over, incredulous, distrusting the evidence of his own eyes, he could perceive the stain of blood in which the man had fallen, but that was all. There was no semblance of a body there.

"Judas Priest!" he said soberly. "This beats anything ever I saw. He couldn't have been killed, but I never saw him twitch a muscle after he dropped. Gone! Darn if I know what to make of it. Why, where could he have gone to? There ain't but one way out from this shack an' he sure didn't go out there."

"No, he couldn't," her voice quavering. "We would have seen him if he had."

"Seen him! Of course, we would. He must have revived and crawled away. You bet, there ain't no mystery about it. Dead men ain't movin' around an' there ain't no angels comin' down to carry that cuss off. What's happened is, he got back strength enough to crawl. Likely he got into that back room out o' sight. Anyhow I'm goin' to find out what's happened. You keep an eye at that hole in the wall yonder, while I scout around a minute. If you see anything movin' in shootin' distance, just blaze away. Don't hesitate a moment."

She went forward as he told her without a word and stared out, yet nervously turning her head about at the slightest sound. Shelby waited a moment, listening, and then stepped confidently forward across the threshold of the inner door. He had no doubt that he would discover Macklin—dead or alive, outstretched on the floor. The fellow must be there; he could have gone nowhere else. The place was as black as night; a step beyond the entrance and he had to grope his way blindly, unable to distinguish a single object. There was something grim and ghastly in feeling about with his feet for an unseen body. Then the fellow might still be alive, even dangerous. He stopped at the disquieting thought and spoke sharply into the gloom.

"Are you there, Macklin? Come, speak up; nobody is going to hurt you."

There was no response, no movement, no sound of a groan, no pulsing of breath. The stillness was intense, horrible. Shelby gripped himself and began to advance slowly, guiding his passage along the wall, expecting every instant to encounter some obstacle. His groping feet touched nothing. Inch by inch he explored the floor of the room, the perspiration beginning to stand in drops on his forehead. There was no body lying there, no form of a man, either living or dead; the place was absolutely unoccupied. He could hardly believe this true; his mind refused to grasp the fact; he came back to the door dazed and unnerved. All nature, all reasoning told him the man must be somewhere within the cabin; any other thought was simply impossible; yet where? He had already explored every inch of surface to no result. So bewildered and dumfounded was he before this mystery that he was even startled at the girl's voice asking an eager question.

"Is he there? Did you find him?"

"No; he's gone as though he had a pair of wings."

"But how could he get out?"

"That's what I say. Everything is solid; no human could vanish through these walls; there isn't a window not boarded up and only that one door. We wasn't outside ten minutes, nor ten feet away from the step. A rat couldn't have passed without bein' seen. Blamed if it don't make me shiver, for, by thunder, however it happened, he ain't here; he ain't nowhere in this cabin. An'," he added, peering at the floor, "there ain't no trail o' blood to show that he crawled away; just that little pool what he laid in."

"Could he have got through the roof, or the floor?"

Shelby laughed despondently.

"Lord, I don't easily see how he could; it's fifteen feet to them rafters an' no opening, while, judging from outside, the floor must rest plum on the ground. Who shot him, anyhow? Did you see?"

"Yes, I did," she explained excitedly. "I was looking that way, toward where the board was ripped off the window. I just had a glimpse of a face behind the muzzle of the gun. It was a woman; I am sure it was a woman, with black eyes. Then the smoke obscured everything and she was gone."

"She must have been Pancha," he admitted, struggling with the idea. "Why, of course, that's all plain enough. She overheard what he said and fired in mad passion."

"What do you mean? What are you talking about? This girl?"

"Sure; I told you about her; she helped me escape last night. She was crazily jealous over Macklin. She is Mexican and is here with her brother; a little outlaw, no doubt, knowing no law but her own passion. She must have been there when he boasted to Laud that he would leave her and marry you. It drove her crazy and she shot."

"I can understand that—yes," Olga burst forth, "and later she was sorry. I believe it was she who came back and took the body away."

"I hardly see how that theory helps much. How could she take him?"

"Perhaps she may know some secret passage. There might be one underneath. I do not know, yet in what other way could the body have been removed?"

Shelby shook his head gloomily, his eyes searching the floor for any evidence and finding none. To all appearances it appeared smooth and solid.

"I don't know," he said. "That idea may be as good as any. You might take this broken knife of mine an' see if you can start anything. What was goin' on out there?"

"Nothing much that I could see. There are men hiding behind the bank of the creek; I think they are Indians, and there may be others off to the right in the weeds."

"Just a guard left there to see that we don't get away. They'll wait until dark and then try to burn us out, I reckon; the bucks don't like my shooting. That was a rifle."

"Yes; the bullet struck the log."

He crossed over and looked out anxiously.

"I thought it might be a signal, but I guess not. Don't seem to be anything moving."

He straightened up again, his eyes surveying the room. "If we only had two more in this outfit we might give those devils a run for their money. The trouble is we can defend only two sides, an' they know it—anyhow, Laud does. I'm goin' to haul this bench over on that side; then you can stand up there, and shoot through that hole in the window while I pepper them from here in front. We'll make it hot while it lasts."

She watched him shift the bench, and then stood upon it to look out. The sun had gone down, and the valley swam in a purple haze. If she would utilize what little light still remained, she must search at once.

"Nothing out there?"

"I can see nothing moving. It is growing dark. Let me take the knife."

He gave it to her, and she got down upon her knees on the floor, anxiously testing the openings between the blocks with the broken blade. Shelby turned his head occasionally, barely able to distinguish her movements, yet felt little confidence in the success of the effort. Any attempt at escape through the door would be suicidal; in all probability, in spite of the silence, and seeming loneliness of the scene without, a dozen rifles were even then trained on the entrance, ready to shoot them down the instant either appeared. And there was no other way out, unless it might be through some secret passage existing underground. Macklin had certainly disappeared somewhere; the vanishing of his body was no miracle, and this theory of how it might have been accomplished alone appeared reasonable. In spite of his doubts, the man held to a measure of hope; nothing else than this remained which he could cling to; their only chance lay in some such discovery. Yet the woman, groping on her knees in the deepening darkness gave no sign of encouragement. Shelby could bear the strain no longer in silence.

"There is nothing to be found?" he asked anxiously, "no appearance of a trap?"

She lifted her head, with face turned toward him.

"Nothing that I seem able to move," she answered. "I have found a block which does not appear to fit as tightly as the others; I can get the knife blade between, and it doesn't seem to touch any earth below, yet the slab is immovable."

"Let me try my strength."

He started back to join her, but at that instant there came a sudden burst of rifle fire without, bullets thudding into the cabin walls, the sound punctuated by savage yells. Shelby whirled about instantly, and dropped to his knees with eyes peering out through the opening between the logs. Olga also deserted her search, and climbed to her post of defense on the bench. The bullets did no damage, generally finding billet in the solid logs, although a few crashed through the planking of the door. To Shelby the meaning was sufficiently plain; the real danger lay, as he expected, at the rear; all this noise was being carried on merely to attract their attention. He called across, unable to see his companion, but well aware where she was.

"Don't waste any shot until you see something within range. Those fellows out there are just plugging away blindly. They'll never rush this side. Keep your eyes wide open, though. I'm going back, and try to knock off a board from that rear window. If I can get a few shots out there we'll block their little game. You hear?"

"Yes; I think one or two are crawling closer through those weeds."

"Likely enough, young bucks who can't hold back; keep your eye on them, an' let them have it, as soon as you are sure. Call out if you need me."

He groped his way as far as the inner door, helped by the almost continuous flash of the rifles outside; he had even crossed the threshold, his heart choking him as he perceived a glare of red flame, already visible here and there through narrow chinks between the logs. Perhaps he was already too late—those devils had fired the cabin, the licking flames even then beginning to eat into the dry bark. He had no time in which to act, or even think. Before he might venture another step forward, Olga fired twice rapidly, the flare of her revolver lighting up the entire interior. What followed he scarcely knew; there was a sharp cry,

"Was She Dead, or Alive?"

the crash of the overturned bench, and the sound of a body falling heavily on the floor. A revolver went spinning noisily across the room, and then all was still, and black once more.

Shelby could see nothing; only the blurred memory of that single instant had seared itself on his brain. She had been shot—his wife; this girl he had learned to love! Some stray shot from an Indian rifle, fired blindly in the dark, had found fatal passage through that broken shutter, and struck her down. His first helpless daze changed into a rage of revenge, mingled with a wild yearning that he might yet find her alive.

"Olga!" he cried out, "Olga!"

There was no answer, no movement. All was black, soundless; even the rifle fire without had ceased.

He dropped to his knees, and crept forward, feeling along the floor with outstretched hands, dreading each instant to touch her body. Suddenly his searching fingers encountered an opening in the puncheon floor.

Shelby dared not move, except to feel downward into this mysterious opening. Yet he realized instantly what must have occurred—the miracle which had so swiftly disclosed this secret passage. The girl, in falling, had dislodged the very block in the floor she had been endeavoring so vainly to discover. It had suddenly swung downward to the heavy blow of her body, and she had fallen with it into the unknown darkness below. But was she dead, or alive? Had the fall stunned her? He drew himself to the very edge listening. What was down there? Macklin perhaps; the two bodies might be lying there together in a common grave. But wait, something moved surely!

"Olga! speak to me!"

He couldn't restrain the agony with which he uttered the words. Frightened as she was, dazed by the fall, scarcely conscious even yet, or able to actually comprehend what had occurred, his cry penetrated her mind, brought her back to life.

"Yes, I—I am here, Tom," she managed to say weakly.

"And you are not hurt?" his voice thrilling now with a sudden return to hope.

"Oh, I—I don't know. I cannot even tell what has happened. I stepped back quickly, the bench overturned and I fell. It is all earth around me—where am I?"

"In the passage beneath the cabin," he explained quickly. "It has been a miracle; your fall opened the trap. Perhaps we may escape from these devils yet. Make room for me to come down; the cabin is already on fire. Is the hole deep?"

"Not very, I think, and there is room."

He lowered himself, but it was not necessary to drop; his feet struck the earth floor, and, as he turned his hands came in contact with the slab still dangling, just as it had fallen. Obeying the first impulse, aware of a sudden outburst of red flames somewhere above him, he forced the block upward, back into its place, jamming it there with all his strength, until a sharp click convinced him the puncheon again was securely held. They were alone, isolated, in the black depths, underneath the burning cabin, buried deep in the protecting earth. He reached blindly out through the darkness until he touched her, his fingers closing convulsively on a fold of her dress. In the sudden reaction he felt as weak as a child, unable even to control his speech.

"It was God who helped us," he said humbly, "no one else could. You are sure, Olga, you are unhurt?"

"I must be bruised, I suppose; it was an ugly fall, and—and I really think I lost consciousness at first. Then I seemed to hear you call me a long ways off. Is the cabin afire?"

"Yes; those devils started it at the rear. You can hear the wood crackle even down here, and we must get farther back out of the way. When the roof falls this part of the floor may cave in also."

In spite of the increasing volume of flames above, scarcely a glimmer of red light succeeded in penetrating to where they were hidden. A very slight glow found entrance through a narrow crack above them, yet Shelby was compelled to learn their immediate surroundings more by sense of touch than sight.

They were in a mere hole scooped out from the soft earth, hardly wider than the trap door which led to it, the other puncheons of the cabin floor resting solidly upon the ground. Shelby leading the way, feeling his passage along inch by inch, was suddenly halted by an earth barrier which seemingly blocked all further progress. He could feel that it did not wholly reach the top, leaving a space there through which it might be possible to crawl. Yet what would there be beyond? Why should they venture further at present? Laud was outside with his Indians, the whole scene lit up with the glare of flames. They dare not venture to expose themselves. Here they were beyond reach, protected from both flames and savages. Unless some among those assailants knew the existence of this tunnel, or accidentally stumbled upon its outer entrance, they could scarcely be exposed. Even if one or two found their way in, this barrier of earth would block them, and, if necessary, form the best possible defense. Confident that they had perished, and that their charred bodies were lying in the midst of the still smoking embers of the cabin, there would be no guard watching for an attempt at escape. He reached out and grasped her hand, drawing her down beside him.

"What is it?" she asked in a whisper.

"A fall of earth nearly blocking the passage," he explained. "I have no idea where the tunnel leads to, and, if I did, we would never dare creep out into the open at present."

"You—you think we had better remain here?" doubtfully.

"Until the fire dies down; perhaps even longer. Let them believe we died in the cabin; then there may be some chance for us to get away."

"But they will search the ruins?"

"Not for some time; those logs will be glowing embers for hours. That sounded like the roof falling in then. It was—see! It has crushed its way down through the floor. There is a caldron of fire in that hole we just left, but it can't reach us here—only the smoke."

"Will it not show them where we have gone?"

"I hope not; probably the smoking, blazing timbers will choke up the opening, leaving it so filled with partly burned wood as to conceal it entirely. Anyhow, this is our one chance. We would be shot down mercilessly outside."

The glare from the burning rubbish revealed their faces, and the smoke began to swirl past them in clouds, yet did not choke the tunnel, showing there must be an opening somewhere beyond to the outside. Shelby fastened his neckerchief over the girl's nose and mouth, and protected her, as well as himself, by means of his coat. Scarcely conscious of the action they sat thus, their hands clasped, gazing at the leaping figures of flame, and listening to the variety of noises reaching their ears. The position, while one of brooding horror, did not apparently involve immediate peril. The flames could not reach them, and it was already evident that those dense volumes of smoke, while disagreeable and suffocating, could still be endured. But being cooped up there, in that hole underground, unable to venture forth, choked by the fumes, their faces smarting from the heat, the earth walls holding them in prison, death waiting for them whichever way they turned, brought a strain to Olga she could no longer combat. Impulsively she clutched the man beside her, her head touching his shoulder, her slender form trembling to a sudden outburst.

"Don't lose your nerve," he whispered, startled by her action, "nothing can hurt us here."

"Oh, I know; it is not that," the words almost a sob. "I do not think I am really frightened; only I—I want to feel you near me."

"Me!" he questioned surprised; "why, I haven't been much good so far."

"Oh, but you have; you have been splendid. No woman could ever ask more. I want you to know how grateful I am."

"Well, I don't just like that," he protested. "There ain't no cause for you to be grateful, so far as I can see. A man who wouldn't stick with his wife wouldn't be much."

"Are you here just because of that?"

"Well, maybe not altogether. Of course, I'd be here anyhow. I wouldn't go back on no woman who belonged to me. But you ain't just that exactly. I've somehow got to thinkin' a lot about you lately."

"Truly?"

"Sure; there's a heap o' things happened since we was lined up against the wall of that shack down at Ponca. I've found out more what you are than I knew then; an', I reckon, you got a better line on me."

"I—I chose you even then."

He laughed awkwardly.

"Out o' that bunch! I don't take that as no great compliment. Say, that was the ornariest lot o' cattle I ever rode herd over."

"Oh, I don't know," her mood changing into new interest. "There were some among them not so bad. Anyhow, I chose you."

"Maybe you're sorry since?"

"I am not," firmly. "I never have been. See here, Tom Shelby, I pretty near knew what sort of man you was when I selected you; your face told me that. You thought I just took you so as to get away. Well, maybe I did in a sense, for I would have done almost anything to escape from that life. But I never would have gone with you, if I hadn't honestly liked you just the same. You said in the cabin there that you didn't marry me because you knew I had money—that you had no such knowledge. Was that true?"

"Certainly."

"Then why did you marry me?"

His face, burning from the heat of the nearby flames, grew redder, if possible, with embarrassment. Her eyes were gazing straight at him, insistent of an answer.

"Well, I ain't exactly sure that I know," he admitted reluctantly. "Maybe I sorter sympathized with you a bit, an' then I got almighty mad at the way them fellows acted. I—I kinder got to wantin' you myself."

"I knew you did."

"You knew? But how? I never said anything like that."

"No; yet I felt the change. I would never have said 'yes' otherwise. I am willing to tell you now. Perhaps we shall never get out of this place

"I Love You!" He Whispered Passionately.

alive, and I want to be honest with you for once. Whatever happens, I would rather you knew."

"But you cannot mean—"

"It is exactly what I mean, Tom. I love you! Do you care?"

"Care! Why, Olga, girl, I have done nothing but care. I hardly knew what it all meant at first, the way I thought of you. Love came to me like a strange thing. I have led a man's life, and I have known few good women. Even now I cannot wholly realize what has come to me."

He gathered her suddenly into his arms, the neckerchief slipping down about her throat.

"I love you!" he whispered passionately, "love you, wife of mine."

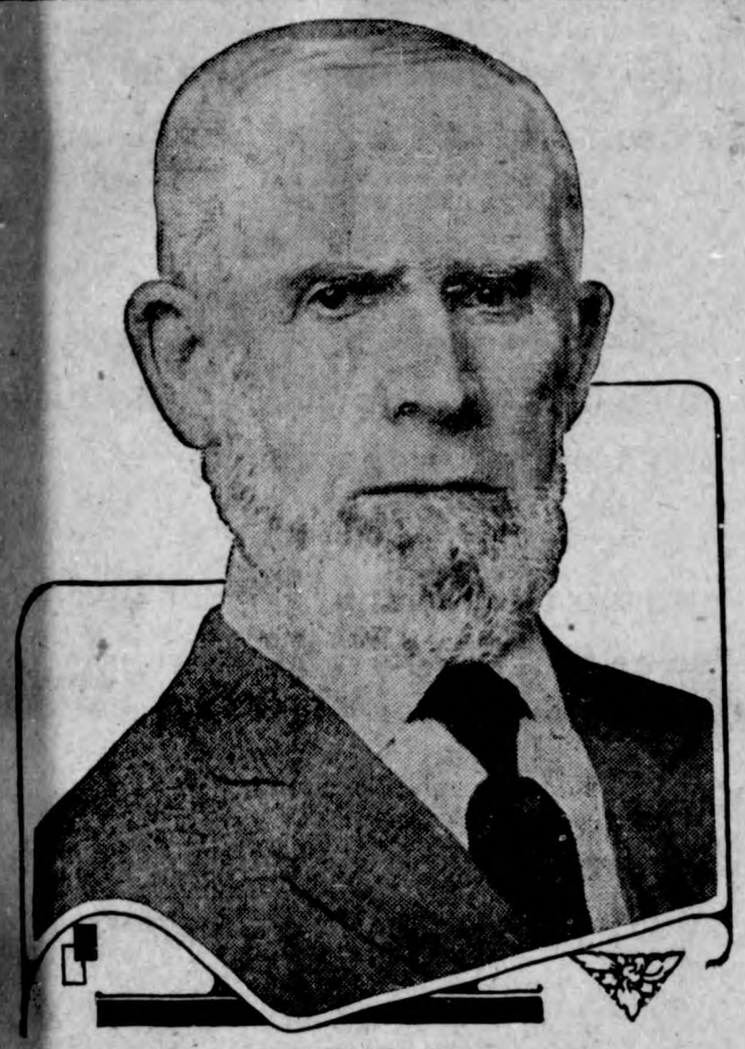
Quaker Minister Is Grateful to Tanlac



Rev. Parker Moon

Nearly everybody in Southwest Missouri either knows or has heard of the Rev. Parker Moon, who for a full half century has devoted his life and talents to Sunday school and organization work for the Society of Friends or Quakers.

"Uncle Parker," as he is more familiarly known, came from fine old rugged Quaker stock, and there is not a better known or more highly respected citizen in that part of the state. In referring to his remarkable restoration to health by Tanlac, he said:

"About five years ago I suffered a general breakdown. My principal trouble was nervous indigestion. My appetite was very poor and my food seldom agreed with me, and I had to live on a very restricted diet. I suffered a great deal from headaches and dizzy spells; I had severe pains across the small of my back and was badly constipated most of the time. In fact, I was so weak and rundown I was not able to attend to my duties.

"This condition made me very nervous and I could not sleep at night. Frequently I would lie awake most all night and was in that condition more or less for five years. My physician said he could not do anything for me and suggested a change of climate. I then moved to Texas and went back and forth three times, but did not get the relief I had hoped for. Finally, I got so bad off I was not able to get around with any degree of comfort. I was also told I had heart trouble.

"I had read about Tanlac and, as it had been very highly recommended to me, I decided to try it. I got a bottle and had taken only a few doses until I could notice a marked improvement in my condition. I noticed especially that I was not troubled any more with sour stomach after eating, which was a great relief.

"I kept on taking Tanlac until I fully regained my health. My appetite is splendid; I enjoy my meals and I do not find it necessary now to take any laxative medicines of any kind. I can sleep much better and am not nearly so nervous.

"I take great pleasure in recommending Tanlac to anyone who needs a good system builder, or who suffers with stomach trouble. I have recommended Tanlac to a great many of my friends and am pleased to reach others by giving this statement for publication."

Tanlac is sold by leading druggists everywhere.

Used in one Family for many Years

Whatcheer, Iowa.—"The doctors said I would have to be operated upon or I would never regain my health, but I decided to give Dr. Pierce's Favorite Prescription and Golden Medical Discovery a trial and they surely have done wonders for me. I am now in the best of health. Dr. Pierce's medicines have, to my knowledge, been used for at least 15 or 16 years by different members of our family and we can't speak too highly of them."—MRS. ELSIE L. ORRICK.

All druggists. Contain no alcohol.

The End.

"I just got fired."

"What for?"

"For good."—Yale Record.

In Italy the tax for an average automobile runs to between $2,000 and $3,000 a year.

Some Identification.

"Aha! there has been a child in this apartment."

"How did you find that out?"

"The intruder has finger-printed himself on the window panes."

PROPER TEST OF PROGRESS

Many Things Good Citizens Will Put Above the Numerical Growth of Their Community.

Greater New York is peeved because it has been credited with some 400,000 fewer people than it believes lives within its boundaries, says the St. Louis Globe-Democrat. It has enough to lead London and thus be classed as the largest metropolis of the world, and if pride in nothing but the number of people who manage to exist within the official limits of the city is the ruling spirit, New York ought to be satisfied with credit for having the largest number. But it is not satisfied and is making a count of its own. The census figures show an actual decline in the borough of Manhattan, which fact ought to envoke expressions of satisfaction instead of the reverse. If some of the crowded masses of lower Manhattan have been able to find homes outside that district, thus reducing the congestion and making living more comfortable for those who are compelled to remain, it should be a matter of general congratulation.

Why is a census taken? Is it so that we may know exactly how many people there are in the United States and that municipal rivalries based entirely upon the number of human beings who live within the official boundaries may be determined? That is all a great many people see in it. Newspaper comment on figures given out is purely numerical. Perhaps that is because we have only numerical data as yet. Far more worth consideration will be the facts as to the conditions of life, the social and religious status, the matter of employment, housing, etc., etc. Any city genuinely interested in its actual growth and conditions will pay more attention to such data than to the mere matter of numbers.

HOLD SECURITIES AT HOME

Manifest Advantages Are to Be Obtained by Wise Investment in Local Industries.

One of the generating plants in California decided to offer its stock to its customers, instead of sending it to New York for needed funds. Its success was immediate, says the Society for Electrical Development. Employees of the company were the first to buy. This expressed their confidence in the safety of their company, based on intimate knowledge of its workings. The public eagerly followed. Today upward of $40,000,000 worth of central station securities are owned by 36,000 individuals, 90 per cent of whom heretofore never owned a utility stock. The growing popularity of customer partnership in public utilities in lieu of the much-discussed municipal ownership and its uncertainties may be the herald of a day when the American people, like their thrifty neighbors of France, will be partners in all their home utilities. Certainly there is value in having one's savings employed where they can be watched and there is patriotism and hard business sense, too, in helping to increase earnings on the investment by one's personal interest in the industrial progress of the home town.

Town Planning.

The familiar rush of the people from the land to the cities, so pronounced a feature of modern times, has encouraged congestion in most communities. Recourse to town planning has been forced by the necessities of efficient transportation and sound land values, as well as good health.

It is fashionable today to deplore the slums. Why provide new ones? Why add congestion to existing congestion, when, simply by looking ahead and taking thought, healthy growth may be assured?

Town planning provides the city with eyes to see where it is spreading and to conform to the demands of business and comfort. A city unplanned is a blind giant, sprawling over the ground. It wastes some of its greatest assets in a building debauch.

Every city that keeps order on its streets must also keep order in its advance to greater size and influence. It must put town planning traffic experts at important corners on its way.—Montreal Star.

Louisville Sets Good Example.

Along the outskirts of Louisville, on the main highroads, "representatives" of the Louisville Automobile club are always on duty, day and night, extending welcome to the incoming traveler, and good wishes to those departing.

The representatives are inanimate, being made of wood and paint, but they have given good service to countless motorists.

On one side of the signs, facing persons coming into Louisville, is the word "welcome," with a summary of the more important city traffic regulations. On the opposite side is "good-by," and the distances to other towns along the road.

According to Eugene Stuart, secretary of the club, the signs are but one of the means taken by Louisville motorists to make the city remembered gratefully by visiting tourists.—Louisville Courier-Journal.

DAIRY POINTS

BULL ASSOCIATIONS GAINING

In Count-Up for Last Fiscal Year an Increase of 57 Per Cent Is Noted —More in South.

In the count-up of bull associations for the last fiscal year made by the dairy division of the United States Department of Agriculture, associations are found all over the country. There are now 123, where there were only 78 the year before. This is an increase of 57 per cent. Thirty of the 48 states in the union are on the list.

Associations are not equally numerous in all states, however, for four—Alabama, Pennsylvania, Mississippi and South Carolina — furnish nearly half of the total. The number of associations found in each of these four states is as follows: Alabama, 7; Pennsylvania, 21; Mississippi, 11; and South Carolina, 17. Three of these leading states are in the cotton belt. Dairying is comparatively new in that part of the country, and the men going into the business are building on the right foundations from the start. One of the important foundations of effective and lucrative dairying is cooperation, and the extension work carried on by the dairy division and by the various state agricultural colleges has been the means of introducing efficient methods at the outset wherever dairying is taken up in the South.

A Bull Should Be Selected to Improve the Dairy Qualities of the Herd He Is to Head.

Pennsylvania is an old-established dairy state, but has taken to the bull-association idea in a remarkable manner, and has in fact the largest number of all.

MOLASSES FOR DAIRY STOCK

Especially Valuable Where Cows Are Not Permitted to Exercise—Replaces Green Feed.

One of the helps of the livestock feeder which is being used more generally every day is the crude, or low grade, molasses from a sugar mill. The value of the feed has been found to be not only in the actual nutrition content, as indicated by the analysis, but because of its quality—not exactly succulency, but akin to that—which makes it an appetizer. Especially is it valuable where the cows are not permitted to run on pasture or where they are not permitted to exercise. The molasses acts both as a digester and tonic and takes the place of green feed which tends to keep the cows healthy and increases all their normal functions, such as the milk producing powers. Then, too, dairy cows which are confined in small areas often lose their appetites, and when they do milk production naturally drops off. By adding a little molasses to the ration they will regain their appetites and besides eat more than they did without the molasses, which of course increases their milk production.

LIBERAL FEEDING URGED

Dairy extensionists and authorities at University farm, St. Paul, Minn., are agreed that a policy of liberal feeding with dairy cattle is profitable and should be pursued wherever circumstances make it possible. The importance of adequate feeding has been shown time and time again. In one instance which may now be cited, feeding costs were increased in a year from $53 per cow to $83, but the income from each cow increased from $129 to $218 in the same interim, so that for an extra expenditure of $30 profits were increased $89 per cow.

WINTER ATTENTION TO MILK

Unusual Care Should Be Exercised in Washing All Tin Utensils Used in Dairy.

The winter care of milk calls for unusual care in washing all tin things used. In summer it is easier to keep clean; we have the sunshine to help—the world's greatest purifier. So much the more reason why we should place extra stress on using hot water and soap, with good pure cold water for rinsing.

HAVE GOOD PUREBREDS ONLY

Pedigrees Don't Amount to Much Unless Daughters Are Better Than Their Dams.

No stock-raiser should be satisfied until he has the services of purebred sires for his farm; not merely a purebred, but a productive purebred. Pedigrees don't amount to anything unless a sire can produce daughters better than their dams.

If You Need a Medicine You Should Have the Best

Have you ever stopped to reason why it is that so many products that are extensively advertised, all at once drop out of sight and are soon forgotten? The reason is plain—the article did not fulfill the promises of the manufacturer. This applies more particularly to a medicine. A medicinal preparation that has real curative value almost sells itself, as like an endless chain system the remedy is recommended by those who have been benefited, to those who are in need of it.

A prominent druggist says "Take for example Dr. Kilmer's Swamp-Root, a preparation I have sold for many years and never hesitate to recommend, for in almost every case it shows excellent results, as many of my customers testify. No other kidney remedy has so large a sale."

According to sworn statements and verified testimony of thousands who have used the preparation, the success of Dr. Kilmer's Swamp-Root is due to the fact, so many people claim, that it fulfills almost every wish in overcoming kidney, liver and bladder ailments; corrects urinary troubles and neutralizes the uric acid which causes rheumatism.

You may receive a sample bottle of Swamp-Root by Parcels Post. Address Dr. Kilmer & Co., Binghamton, N. Y., and enclose ten cents; also mention this paper. Large and medium size bottles for sale at all drug stores.—Adv.

It is estimated that nine-tenths of the coasts of the world are covered with sand.

King Solomon made 10,000 golden perfumery censers for the temple of Jerusalem.

POOL KNOWN AS MOSES' WELL

Is Believed to Be That Mentioned in the Bible in Connection With Great Law Giver.

In the Egyptian desert, about ten miles east of Suez, is situated a picturesque pool known as "Moses' well." This is believed to be the well mentioned in the Bible, where Moses, at the bidding of the Lord, cast a branch into the bitter waters, and they were sweetened. Set in a deep grove of date-palms and pomegranate trees, the well is a dark, calm, mysterious looking pool, faithfully reflecting the palms which fringe its edges. The scene at sunrise, when the first rays strike the still water, is exquisite beyond description.

Attempts to identify various natural beauties and locations with mentions or descriptions as given in the Bible have always been difficult, owing to the fact that the records of the rulers of Egypt at the time of the captivity of the Jews were destroyed by rulers that came into power immediately afterward. The motive was jealousy, and a determination to wipe from the minds of the people any regrets for rulers gone.

A New Gas.

A new gas has been developed from the manufacture of alcohol which can be compressed to 3,500 pounds to the square inch and stored safely in steel tanks.

REALLY NOT SO FLATTERING

Younger Lady's Explanation of Recognition of Old Friend Had a Certain Sting to It.

A cabinet officer said at a dinner, apropos of certain criticism on his department:

"Politics—all politics. Nothing, not even woman, is as cruel as politics, and yet woman can be very cruel."

The secretary then told a story about the cruelty of woman.

"One Easter morning," he said, "two ladies met on the Atlantic City boardwalk with little outcries of surprise and joy.

"'Why, Mame!' said the older lady. 'How flattering this is!'

"'Flattering!' said the younger lady, with a perplexed air. 'How so?'

"'You haven't seen me,' said the older lady, 'for 17 years—and yet you recognize me, so to speak, right off the bat. That means I haven't changed so dreadfully, doesn't it?'

"'Oh!' she said, 'you see, I recognized your bonnet!'"

Maine Sardine Pack Reduced.

The 1920 Maine sardine pack is estimated at 75 per cent of normal. Since the average pack is about 2,200,000 cases, this season's output is not much more than 1,500,000 cases.

A popular photographer is one who can make a woman feel satisfied with her face.

Grocers Used To Wonder

why some of their tea and coffee trade switched to

INSTANT POSTUM

Many of them understand now

They use Postum in their own families and find a big gain in health, and some economy, with no loss in satisfaction

"There's a Reason" for Postum instead of coffee

Made by Postum Cereal Co. Inc., Battle Creek, Mich.

The PRIMROSE
GETS THE CREAM

Every Drop an Asset

As a dairy farmer you can figure out to the penny what your cream is worth. You know that every particle of butter fat has a distinct value to you. You cannot afford to use a separator that misses any cream.

The **Primrose Cream Separator** gets every drop of cream. The principle on which it operates is as simple as mechanism. The frame is open and sanitary--the supply can large and low. Every bearing and quiet gear is well oiled by a splash system.

In **Primrose** separators, good workmansnip and materials, close skimming and durable qualities, are the distinguishing points.

No matter what the size of your heard, the **Primrose** is a money maker. Two-or-three-cow farmers use them with profit.

The **Primrose** is the only cream separator that automatically drains out the used oil from the gear case when new oil is added.

Let us demonstrate this and other points. If it is not convenient for you to call, phone us and we will bring a machine out and show you how it operates and what its financiel advantages are to you.

GALAHAD'S EARS

By ALICIA PRESTON.

(©, 1920, by McClure Newspaper Syndicate.)

He found her kneeling on a white bear skin before the hearth, the firelight gleaming over the rosy satin of her gown, making her hair dusky with shadows and her eyes a-dance with flames. And cascading from her lap, strewn about the floor, everywhere were letters, squares of paper, ribbons envelopes.

With a quick movement she tossed the one she was reading into the fireplace before she waved a welcome to him:

"Gracious, Billy, how early you are!"

"Yes, but I thought we could talk before the dance. You look—say, Pris," he challenged, "you look like a valentine and tonight I'm in the mood to say—'may I be your—"

"Are you? Well, don't say it!" interposed Priscilla hastily. "It's not my mood at all. I'm cleaning house—I'm burning love letters."

"Let me help," he picked up an envelope. "Oh, I say, Pris! This is mine! Let's not burn this!"

"All right, you can have it," she teased.

Billy stared suspiciously at a blue-ribboned packet he had started to toss to the flames.

"Aha, so we don't burn all the letters? That looks—"

She snatched them from him, shamefaced but dimpling. "'That looks,' does it? Well, it's nothing at all, but I don't want to burn them somehow."

"Somehow? Humph!"

"Well, I've had them longer than any of the others."

She sat back on her heels and watched the leaping fire. Then she laughed softly.

"You don't know him, Billy. Shall I tell you—?"

"Yellow curls and blue eyes, I suppose—an Apollo!"

"No, but I called him 'Sir Galahad,'" she confessed.

"I'll bet it's because of Sir Galahad that you treat the rest of us so," hazarded Billy.

"Oh—well, I sometimes wonder myself," the girl admitted, "but more likely I—"

"Say," said Billy, "what was there about Sir Galahad that made him so different from the rest of us?"

"He—" Priscilla smiled with dreamy reminiscence at the blue-ribboned package—he could wiggle his ears."

"The donkey!" sputtered Billy.

Priscilla started indignantly—"why!" Then she sprang, laughing to her feet and reached for her cloak.

It was during the first dance that Billy said suddenly:

"Well, I suppose I could practice?"

"Practice what?"

"Sir Galahad's parlor trick."

"Billy Martin! Don't you dare or I'll never—"

"Have you seen the diplomat yet?" Helene whispered in Pris' ear as the couples happened to bunch in a corner. "The best-looking thing, and he's been everywhere and—"

But the couples had drifted apart again and Priscilla, forgetful of the diplomat, turned impulsively to Billy.

"Billy, I've just had an idea!"

"No!"

"Yes, I have—" she paused until they finished some intricate steps. "Billy, I think—I don't believe you're in love with me."

"Well, I've told you—"

"But I think it would be best—Billy, why don't you fall in love with Helene?"

"I might just as well!" fumed Billy.

"Good! I've begun to think," she added, seriously, "it isn't fair to dawdle you when I'm perfectly sure—"

"You're all right, Priscilla," he patted her approvingly and in big brother fashion. "But, Pris, before you marry a man for his ears, consult me."

"Poor boy! Sir Galahad rankles. Billy, who is that black-haired, distinguished looking man? Billy, who is he?"

"He? Oh, he's that diplomat."

"Billy, introduce him to me! Next dance! Will you, please?"

"Sure, what's the rush?" questioned the faithful.

But the orchestra leader began waving his arms frantically—"Men on one side of room—girls on other!"

Laughing, the couples complied. These dances were highly informal.

"Men advance on run to choose—" boomed the deep voice again, and the music commenced a new theme of whimsy allurement.

Dash—slide—a stampede descended upon the expectant line of girls and—

"Pris, please—"

"Miss Bartelle, may I?"

"Just this one—"

As usual, an unfair percentage of swallow-tails clustered urgently in front of Priscilla. There was a witchery about the girl and they adored her.

She caught sight of the black-haired diplomat in the background—and then she dimpled—

"I wonder," she confided, whimsically—"can any of you wiggle your ears?"

There was a moment of startled silence, then a mad quiver of facial contortions.

"By George, what—"

"Oh, I say—"

"Have a—"

"Sure," grinned the diplomat, and proved it as he offered his arm.

"Pris, you imp," he said, boyishly. "I wasn't sure it was really you—"

"Sir Galahad!" she exulted, "those ears!" and then grew unaccountably shy as he led her away.

Announcement---

The property of the Western States Lumber Company in Klemme has been sold to the Farmers Lumber Company.

The Farmers Lbr. Co. have taken possession and are after your business and will appreciate your help to make this one of the best organizations in the county.

We will give you a fair treatment in all your business transactions with us so as to create a kindly feeling for this yard.

It is a Home Company, ouned by farmers in the vicinity of Klemme and deserves you honest support.

THE KLEMME TIMES

Twenty-fifth Year Number 22 Klemme, Iowa, Thursday, February 3, 1921 $2.00 In Advance. $2.50 Outside of County

News Reported By The K. H. School

(Reported by Earl E. Josten)

The Freshmen induced Mildred Johnson to play a piano solo Friday morning. It was enjoyed by all.

Mrs. A. H. Meyer was a visitor last Thursday afternoon. We were very much pleased to have her present. Remember, callers are always welcome.

Marie Blank has been absent for over a week, due to the illness of her sister, Gretchen. It is hoped that her sister will recover soon.

Last Thursday morning we were entertained for about twenty minutes by the Victrola belonging to the Primary Room. We found it to be a fine instrument.

Chapel exercises were made interesting last Wednesday morning by Clarence Elder, who gave a fine reading. It was historical in nature, and dealt with n incident of the Civil War

On the evening of Thursday, January 27th, the Freshmen entertained the High School students and teachers in the basement of the First National Bank. It was SOME event! The invitations were especially clever. The manner in which the party was conducted surprised the skeptical members of the upper grades. The eats were plentiful and delicious. We certainly have to "hand it to" the Freshies when it comes to parties; but just wait till the Seniors stage THEIR blowout.

(Note—The scholars present were not the only persons who enjoyed this party, as was evidenced by the row of faces whose owners were eagerly peering through tshe windows. We refrain from further comment.)

On the morning of Monday, January 31st, Rev. A. E. Buriff again entertained the H. S. with one of his witty talks. The fact that this was his third appearance did not lessen the enjoyment which the students derived from his brief remarks. He spoke on "The Lubricants of Life," a very pleasant-sounding subject, and his talk fairly radiated with sunshine and good-fellowship. The three "lubricants" which he mentioned were courtesy, humor and good humor. He recommended these qualities as being the best means of doing away with the friction which is often encountered in life. H's humorous illustrations kept h's hearers in a pleased and attentive mood. He spoke at the invitation of the Sophomore class.

INCOME TAX

On April 6, 1920, there was established a Division office for the convenience of taxpayers in your vicinity. All matters pertaining to the Revenue Laws should be taken up with this office.

During the filing period of 1921 please mail all forms to this office, and make all requests for blanks here. Make all checks, money orders, or drafts payable to H. A. McIntosh, Acting Collector.

Will you please advise all taxpayers in your vicinity the location of his office?

Respectfully,
C. C. Summers,
Commercial Bank Bldg.,
Mason City, Iowa

An income tax man will be in your county assisting taxpayers making their returns at the following places and dates:

Garner, Court House, February 28 to March 9th, Inc.

Britt, City Hall, March 10th to 12, Inc.

Art Wellemeyer is improving his office in the store by making a few changes which we believe will be for the better. He has a stairway connecting the office with the furniture department now and has the office partitioned off so that he has a private office and the other section is used by his book keeper.

Reports from County Treasurer Suurballe's office indicate that that office has been very busy the past month. The office has issued over 2100 auto licenses and are now nearly caught up on the work. Quite a number of the 2100 licenses issued had to pay the first month's penalty, but there are still about 1,000 or 1100 more to pay the penalty unless they got in before Feb. 1st, when another month's fine would be slapped against the license.

America Means Salvation to These Little Ones

The European Relief Council, which seeks to raise $33,000,000 at the Christmas season, has been formed for the purpose of throwing the entire charitable energy of the United States into the vital task of providing food and medical assistance to 3,500,000 children in eastern and central Europe this winter. Representatives of eight great relief organizations, working independently, gathered overwhelming evidence that the plight of these unfortunates should take precedence in world charity until they are saved. The co-operating agencies which form the Council are the American Relief Administration, the American Red Cross, the American Friends' Service Committee (Quakers), the Jewish Joint Distribution Committee, the Federal Council of the Churches of Christ in America, the Knights of Columbus, the Y. M. C. A and the Y. W. C. A.

High Commissioner Praises Near East Relief

Rear Adm'l Bristol

Constantinople: Everybody seems to have a good word to say for the wonderful work being done by the more than 500 American men and women workers of the Near East Relief. In a public address, Rear Admiral Mark L. Bristol, U. S. Navy, High Commissioner to Turkey, who has charge of all American interests in the Near East, went on record whole-heartedly in support of the American relief organization.

"If I have been able to encourage the workers of the Near East Relief or give them assistance in any way," the Admiral said, "I feel that I am more than repaid in keeping with the success that has attended the efforts of the Near East Relief Committee in this part of the world in the past. I hope the future will bring you greater success. It will always give me pleasure to render any assistance possible to the Committee as a whole, to any of the workers, and to the great work of humanity that the committee represents."

When 139,000 Russian refugees from the Crimea arrived off Constantinople, Admiral Bristol immediately cabled the Near East Relief for help, and the Near East Relief bakeries fed these refugees and N. E. R. workers helped the American sailors to get the sick to hospitals.

Admiral Bristol is in intimate touch with all the work being conducted by the Near East Relief and speaks from personal knowledge of its accomplishments.

INVESTIGATOR INDORSES NEAR EAST RELIEF

During the Peace Conference in Paris the American Commission to Negotiate Peace, appreciating the importance of accurate, first hand information about the Armenian situation, sent Capt. Benjamin Burges Moore of the American Red Cross as head of a special mission to study and report on conditions. Captain Moore's findings as to the value of the work done by the Near East Relief form part of his official report.

"Armenians are sincerely grateful to us," Captain Moore states, "since it is no exaggeration to say that they would have disappeared as a nation had it not been for this splendid help given them by the Near East Relief and the American Food Administration. The best that sympathetic Americans can do is to continue and enlarge the present admirable work of the Near East Relief."

Strange Lack of Harmony.

"A red face and a scarlet nose used to be signs of intoxication."

"That was odd, considering that temperance is a cardinal virtue."

The Tragedy.

Romeo explained.

"I coudln't tell near bier from the real thing," he mourned.

This is the year when Klemme will have a town election, which we believe comes in March. A mayor, five councilmen, assessor and treasurer are to be elected. We also believe that at the same time some school directors will be elected. It is not too early to begin to think and talk about selecting the men you want to run the town for the next two years. There is perhaps no particular fault to find with the present officials for they have done commendable work while in office and have run the town to the best of their ability. However, it is quite human nature to demand a change, or at least part of a change as some of the men have been at the helm a little more than their share and it is a good thing to pass it around and give others a chance at having the experience. Women are now eligible to fill offices and perhaps it would be a good thing to have some women on the board of officers. We believe women should at least be represented on the school board as they are especially interested in that line. All right, lets get our heads together and start something, might as well have some fun at the town election as it comes but once every two years so lets make it snappy and put up a good fight.

NOTICE OF PROBATE OF WILL

In District Court, February Term, 1921

State of Iowa,
Hancock County, ss .
TO ALL WHOM IT MAY CONCERN

YOU ARE HEREBY NOTIFIED, That an instrument of writing purporting to be the last Will and Testament of Carlena Griffen, deceased, dated September 30th, 1920, having been this day filed, opened and read by me, the 28th day of February, 1921, is fixed for hearing proof of same at the Court House in Garner, Iowa, before the District Court of said County or the Clerk of said Court; and at 3 o'clock P. M., of the day above mentioned, all persons interested are hereby notified and required to appear, and show cause, if any they have, why said instrument should not be probated and allowed as and for the last Will and Testament of said deceased.

Dated at Garner, Iowa, this 27th day of January, 1921.

(Seal) A. E. Baumgartner,
F3-10-17 Clerk of District Court

Avery Township News

Albert Fuller went to Iowa City, Iowa, on business last week.

Johnnie Reed was absent from school last Monday.

Wava Bachman is visiting at the home of her parents this week.

Willie Nelson of Forest City, Iowa, was visiting at the home of Tom Nelsons the past week.

Peter Trampel of Kameron, Iowa, was visiting withhis brother, August Trampel this week.

School began at the Prairie Queen school, Monday, January 31st, with Miss Mildred Fuller as teacher.

Gertie Trampel has been absent from school three weeks on account of sickness.

School was closed in Goodell Monday, Tuesday and Wednesday of this week.

Mrs. G. A. Goll died at her home Sunday morning at 6 o'clock. She was bedfast not quite three weeks.

Bert Dutton left Monday noon for Missouri. He will return some time the end of the week.

Wm. Bell and son Fred shelled corn Wednesday of last week for H. R. Gibbs.

E. C. Knapp and son Frank, and Geo. Porter were Mason City callers Monday.

Mr. and Mrs. Clint Stokesbary are the proud parents of a baby boy, who arrived at their place last week. Elsie Petesson is working at that place now.

A party was held at the W. M. Hersom home last Thursday night. Quite a number from this vicinity were there.

Liberty Township News

Milton Schaper left for Wapello Iowa, last Monday.

O. E. Carlson left by rail the other day for a few days absence.

Frank Miller left for Petersburg, Nebr., last Friday to visit relatives and friends.

Miss Faye Bridges assisted Mrs Will Suckow with her housework a few days last week.

Prof. Wilson of Klemme filled the pulpit at the Liberty Township church in Rev. Meyer's place last Sunday morning.

Lou Suckow went to Mason City last Monday for a scrap with a dentist. The former won out after parting with some of his hard earned dough.

The Womans Foreign Missionary Society of the Liberty Township church held a big social at the church last Tuesday afternoon in honor of the families that are leaving the community. The men were also invited. There was quite a turnout.

CHURCH PARTY AT THE IDLE HOUR FRIDAY EVENING

A large gathering of Methodists met at the Idle Hour last Friday evening to enjoy a social good time. A fine program was given, each class of the Sunday School had a part. music by the male quartet, stunts and games, were the amusement features of the evening. A picnic lunch was later served in the evening after which more games were enjoyed. All report a good time.

Mrs. G. A. Goll Died Sunday A. M.

The community was saddened when it heard of the untimely death of Mrs. G. A. Goll, who passed away early Sunday morning following a long illness and suffering. She was about forty-four years old at the time of her death an dleaves to mourn her loss her husband and four children. Funeral services were held yesterday from the Reform Church of Klemme conducted by Rev. Depping. Mrs. Goll was active in church work, was a lovable mother and wife and her place in the home and church will always make a vacancy which can never be filled. Mr. Goll and the children have the heartfelt sympathy of the entire community in their bereavement. We will publish the obituary next week.

MRS. GAUGER DEAD

Klemme friends of Mrs. (Rev.) Gauger at Garner were saddened when they heard of her death. Funeral services were held Monday at Garner and the remains were shipped to Charles City for burial.

LOSING SERMON OF SERIES

Continued existence after death is ...once "our dearest hope, our ghastliest doubt." Poets have sung of it. ...losophers have weighed its evi...nces, curious inquirers have sought ...testation from those who have pass... over. Christianity affirms it as a ...tter of faith, but has this faith any ...fficient foundation? Can we reach ...y certainty here and now; can we ...ally know for ourselves before we ...urselves have made the great experiment? Is demonstration possible; ...nd if not, can we come to certainty ...y any means short of demonstra...on? Has modern necromancy, or ...piritualism, any reliable message.

The fourth sermon of the series on Great Problems will be devoted to a discussion of these and kindred questions under the general theme, The Problem of Destiny. At Methodist Episcopal church next Sunday evening. All who may be interested are invited to attend this service.

A. E. Buriff, minister

THIS MAN BAKES 'EM ALIVE

If it wasn't for the fact that he is married, this Klemme man would make any husband a fine wife. Sure he can bake cakes. That may sound shy but we will swear by the great horn spoons that Marlin Croner baked the finest angel food cake we have ever tasted. He brought us a sample of a cake he baked the other day and it was O. K. Any one thinking of having a wedding can perhaps get Marlin to engineer the cake baking of them. We will guarantee that his cakes will not shrink, ravel or fall apart, or cause lock-jaw, broken teeth or spavins.

Farmer Take Notice!

URGES TWO WIVES TO SOLVE FARM WORRY

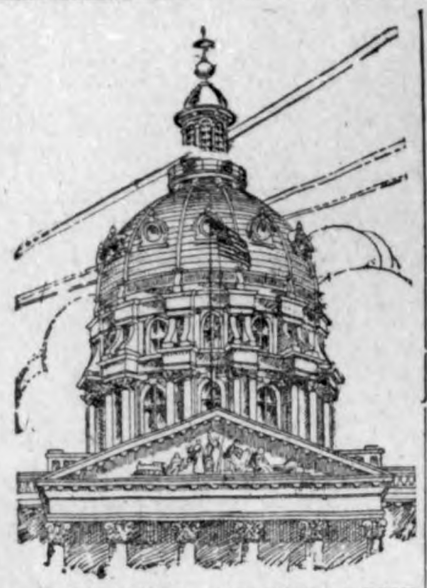
Denver, Colo.—A farmer who signs his name as George Smith, has written to Governor Shoup:

"I am a farmer, seven miles south of Denver. You are a good State Governor, and I offer you something to help the farmers.

"Let a city man have one wife and farmers have two wives. You see, one would help the other and a farmer would more surely raise boys to work on the farm and not need to hire at high wages. Then the farmers could sell cheap crops and living in cities would be cheaper, and many young men would leave the cities to be on a farm.

"I am certain a farmer can't get any help unless it is born and raised on a farm.

"You would be a greater man than Lincoln if you can get the United States to let all the farmers have two wives. You see, the farmer would be independent of hired help in a few years, both on the farm and in the housework."



UNDER THE GOLDEN DOME

Des Moines, Iowa.—Iowa's legislature staged its first squabble of the session over a minor question of a clerk's salary which took up about $2,500 worth of time over a matter of $200 expenditure.

A strong element in the senate led by Senator M. B. Pitt of Harrison county started the disturbance by opposing concurrence in a house resolution granting Miss Mable Elwood, enrolling clerk, $9 per diem instead of $7. Miss Elwood has served as an assistant in the house machinery for the past four sessions.

The house passed the resolution unanimously. The senate refused to concur. The resolution was sent back to the house, which stood pat, and a conference committee was appointed. The house conferees insisted upon the extra $2 per day, and the senate members of the committee finally gave in. Then the resolution again came up in the senate, and Lieutenant Governor Hammill declared that the senate having acted once upon the matter, could not again take up the resolution.

The next move is up to the house, but it appears that the senate has the better of the argument so far.

The senate objection was based upon a general plea for economy. Senator Pitt charged that house leaders has promised Miss Elwood her increase upon her consent to withdraw as a candidate for the position of chief clerk of the house, to which A. C. Gustafson was elected. Considerable bitterness of feeling was displayed.

Just Getting Busy

The committees are just getting down to action and so far no legislation of importance has been enacted. The bills introduced exceed 400 in both house and senate, including a heavy grist of the usual amendments and new legislation, but none of the "big" bills have come from the committees as yet.

Neither has any appreciable progress been made on code revision, and there is little indication that much will be accomplished along this line at the regular session. A strong sentiment of opposition is developing to the report of the code commission, and the impression is gaining strength that the work of revision will in large part disregard the recommendations of the committee.

Governor Kendall's first important list of appointees was submitted to the senate, and introduced innovations in the fact that three women were included in the number.

The appointees recommended by the governor were Mrs. Mary Snyder of Davenport to succeed W. D. Sheean of Anamosa as a member of the board of control; Miss Anna B. Lawther of Dubuque, to succeed B. F. Ketcham of Farmington as a member of the state board of education, Mrs. James Devitt of Oskaloosa to succeed F. F. Jones of Villisca as a member of the board of education; Charles H. Thomas of Creston, to succeed Paul Stillman of Jefferson as a member of the state board of education, Edward P. Schoentgen of Council Bluffs, renamed as a member of the board of education, and Wilson Cornwall of Clay county, succeeding W. S. Withrow of Mt. Pleasant, resigned, as a member of the board of parole.

Three Are Democrats

Three of these appointees, Miss Lawther, Mrs. Snyder and Mr. Schoentgen, are democrats, appointments from the minority party being required by law.

Miss Lawther is the national committee woman from Iowa for the democratic state organization, and is widely known as a club woman and suffrage leader.

Mrs. Devitt has been prominent in politics and club work, and Mrs. Snyder is high in state federation club circles, as well as a prominent democratic worker.

Under the law these appointments must be confirmed by the senate. At the first opportunity the senate did confirm all save that of Mrs. Snyder, upon which action was deferred.

A strong sentiment developed in the senate against the naming of a woman on the board of control, and there was also opposition from her own district upon the grounds that she is not a resident of Davenport, but of Des Moines. Whether the governor will withdraw the appointment, or the senate will confirm Mrs. Snyder will be determined when the senate again takes up the matter.

F. F. Jones, who retires from the state board of education, figured as a storm center in the Villisca axe murder cases through an effort upon the part of Detective Wilkerson to fasten this crime upon the former senator. His successor was formerly a member of the senate, and candidate for state treasurer.

Governor Kendall has announced the appointment of Mrs. Emma K. Blaise to serve as his secretary. She was secretary during the closing months of Governor Harding's term.

That there will be no state constitutional convention before 1923, is the general opinion at the statehouse. Several bills have been prepared on the subject, but it seems like the constitutional convention when called will be a nonpartisan body of probably sixty members, one elected from each senatorial district, and two from the ten having the largest populations. These will be chosen at the regular election of 1922, and as it is believed that numerous members of the convention may also be members of the legislature, it is not probable that they will meet before the winter of 1923-24. The present members of the legislature do not seem to be losing any sleep over the revision of the constitution, figuring that the revision of the code is enough to keep them happy.

Railway rate legislation is occupying considerable attention in the house and senate. A recent ruling of the interstate commerce commission has practically wiped out the control of the state over rate legislation, it is believed, unless the supreme court of the United States rules differently. The board has declared that it is discriminatory for states to enforce lower rates for business within the state than are charged on interstate business passing through it. This order was upheld by the United States commerce court, and an appeal has been taken to the supreme court of the United States. If it is sustained, then Iowa railroads will be permitted to charge 3.6 per mile for passenger traffic, and the same rates for short haul freight traffic entirely within the state as when hauls of similar distance cross the state boarder.

The railroads have enjoined the state officials from interfering in the collection of the rates, and probably the new figures will be in effect in Iowa in a very short time.

Iowa still has a two cent fare law, but it cannot be enforced because of rulings of the interstate commerce commission.

The powers of the state railway commission will be limited under the news rulings to anti-pass legislation, scraps over grade decision, of depot scraps, and similar matters.

The large number of new members in the house has made progress somewhat slow on that end of the state house, but the new members are rapidly getting their bearings.

Road Fight Unlikely

Discussion of a new drive against the state highway commission is heard incidentally about the corridors, but so far the movement has gained no formidable strength. In the senate Senators Pitt and Johnston are regarded as the possible leaders of such a fight, but a heavy majority of the senate favors retention of the commission. The road issue was the main problem before the thirty-sixth and thirty-seventh assemblies, but most of the members seem contented to stand pat this trip and permit the present law to operate for another year or two.

Strong support from cities and towns is becoming evident in behalf of the proposal to permit the expenditure of a portion of the motor vehicle license funds to be used for improvement of roads within the corporate limits of towns and cities. Rural representatives are strongly opposed to any change, and as more than half of the members of the house are farmers, there does not seem to be much prospect of legislation in this line. However, numerous petitions are being received from towns in conection with this proposed legislation.

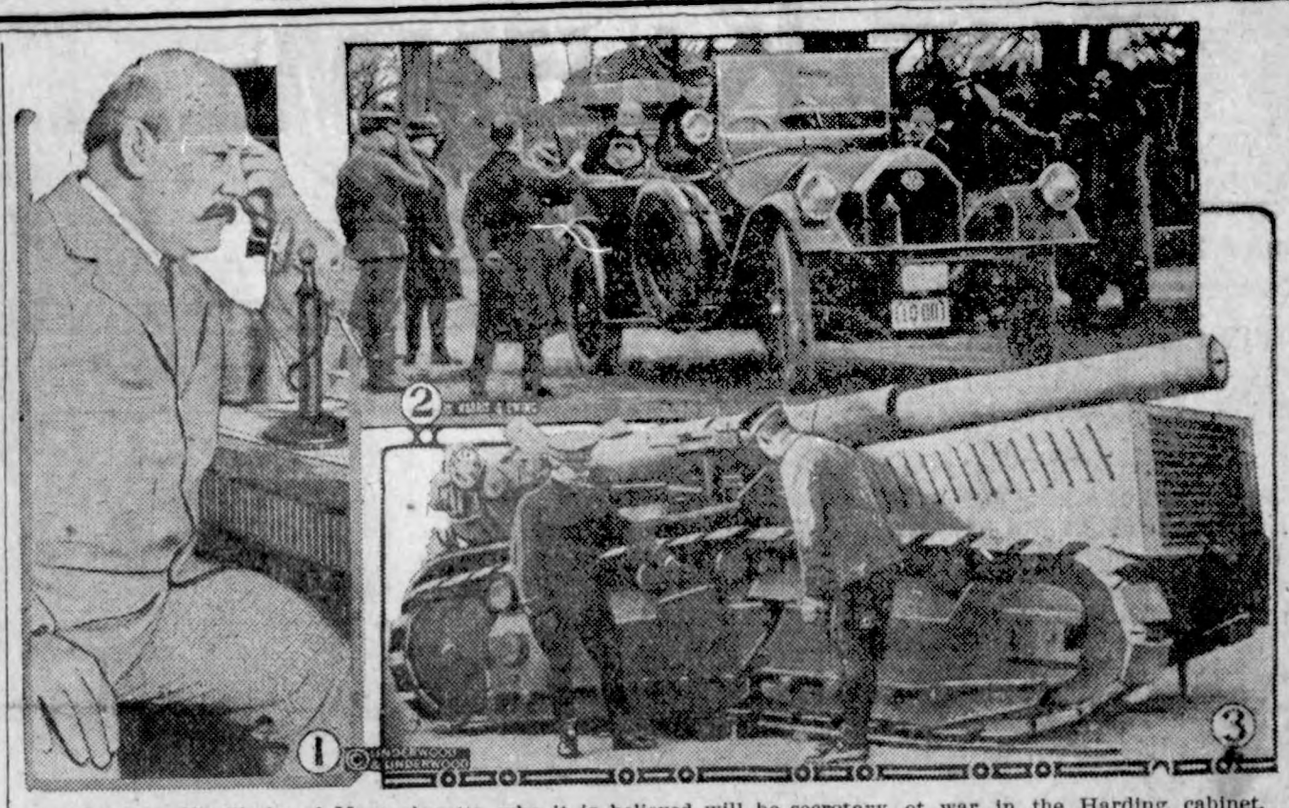
Would Curb Missouri

Residents along the Missouri river end of the state will be interested in proposed legislation introduced by Senator Pitt permitting the creation of river protection districts similar to drainage districts, and the bonding of improvements of this kind. That Missouri has a habit of getting up early in the morning occasionally and biting off a forty acre farm or so for breakfast, and united action is wanted to finance construction of revetments and likes for protection. The law if passed would also be of some value on the Mississippi and Sioux river borders of the state, but the Missouri is the chief offender.

The usual pleas for salary increases are being received, and promise to meet with hard sledding, and the legislature does not appear friendly to many boosts in salary for this year.

Flags carried by Iowa troops during the world war may find a resting place with those borne by cival war battalions, under a concurrent resolution ordered by Senator Stoddard, and adopted by both house and senate. The resolution authorizes the purchase of a case in which to exhibit the flags of Iowa's regiments and battalions of historical interest.

While there are a number of flags which will be displayed under this provision, they will be of a considerably different type than those now on display. The regimental standards used during the world war are with the exception of a few small pennons not at all battle scarred, for the reason that in modern warfare flags are not displayed while the troops are in action.



1—John W. Weeks of Massachusetts, who it is believed will be secretary of war in the Harding cabinet. 2—President Wilson leaving the White House grounds for his daily ride. 3—Test of the new Holt gun mount tractor carrying a 155 MM howitzer near Stockton, Cal.

NEWS REVIEW OF CURRENT EVENTS

Supreme Council Attempts to Settle German Reparations and Disarmaments.

EXTEND TIME FOR LATTER

Austria's Plight to Be Investigated—Morris and Shidehara Devise Plan for American-Japanese Accord—Railways Prepare to Ask Reduction of Wages.

By EDWARD W. PICKARD.

Germany, Austria and Turkey were on the anxious seat last week; and various other nations were only less concerned. For the supreme council of the allies was in session in Paris discussing reparations, disarmament, the salvation of Austria and the revision of the treaty of Sevres. Between sessions Premier Lloyd George lunched and dined and talked in private with Premier Briand, and gradually won him over to a policy of greater conciliation. It is probable that this was quite agreeable to M. Briand, but he had to put up some argument to satisfy the French people, who are doomed to disappointment.

When the matter of German reparations came up, Doumer, the French minister of finance, made a long address in which he insisted that France must be paid 400,000,000,000 gold marks. He stated, as the policy of France, that Germany must be presented with an itemized bill for war damages caused by her, and that the supreme council should then fix the amount that Germany must pay within the next five years. Lloyd George and his colleagues wished to concentrate on what Germany is able to pay, and said there were three ways in which she could make payment—in silver, in gold and in goods. The discussion developed that Great Britain has objections to the two last named. It is held that if Germany is compelled to pay over any considerable amount of the hundred million gold marks she is supposed to be holding as a reserve, the mark would become practically worthless and the economic situation in Europe would be worse than ever. The British also point out that if Germany pays in goods the markets would be glutted and English industries ruined. One other method of partial payment to France has been proposed—the sending of German laborers to reconstruct the devastated regions. But this is opposed by France on the ground that the people of those regions are without employment and need the payment for doing the reconstruction work.

It was on the question of disarmament that the French yielded most. General Nollet's report said that the Germans were not faithfully carrying out the treaty terms in that respect, but this was contradicted by the report of the British General Bingham. The council's military experts, with Marshal Foch as chairman, then got together and agreed to abandon the original French demand that the civil military organizations of Bavaria and East Prussia be disbanded at once. A delay until July 1 was granted, but Foch insisted on guarantees by military occupation of the Ruhr district if the terms were not executed by that date. In view of the stubborn attitude maintained by the governments of Bavaria and East Prussia and the leaders of the organizations in question, it is not easy to see how the central government at Berlin can bring about the disbandment by July 1 if, as it says, it cannot do so now.

The plea for immediate relief for starving Austria, made to the supreme council by Sir William Goode, British representative in Vienna, and other representatives of the allied nations, was made in vain. The plan proposed by Goode was that Great Britain and France should lend Austria £50,000,000 in ten annual installments, and he suggested the United States might participate in the loan. But Lloyd George said this was out of the question, calling attention to the difficulty in obtaining £10,000,000 to build houses in London. The council, feeling that the case of Austria is so closely bound up in the general central European situation, referred the whole matter to a special committee, made up of the commerce ministers of the allied nations, for investigation.

Admitting that the treaty of Sevres, with Turkey, must be revised, the council decided that representatives of the allies shall hold a conference with Turkish and Greek representatives in London in the latter part of February. If the governments of Constantinople and Angora can get together for the purpose, they will be allowed to send a joint delegation. To this extent the council recognizes the Turkish Nationalist government, and it probably is the least it can do in view of the strong position of Mustapha Kemal Pasha and his recent military successes against the Greeks in Asia Minor.

Disagreeing with the views of President Wilson as set forth in Secretary Colby's note to the Italian ambassador last November, the council decided that Esthonia and Latvia, two of the states carved out of the old Russian empire, should be recognized as sovereign states. Action on Georgia and Lithuania was deferred.

From the other side of the fence—Berlin—comes the information that the German government will not recognize the right of the supreme council to settle the subject of reparations. Berlin holds that there must be first a discussion by industrial experts regarding deliveries, and then the conference of the governments at Geneva as promised at the Spa meeting.

"Pertinax," a usually well-informed Paris journalist, says Great Britain is going to propose that payment of the British war debt to the United States be postponed until 1936 and 1947. This debt now amounts to something over four billion dollars. It is said Lord Chalmers, permanent secretary of the British treasury, will come over here with the plan for postponement.

President Wilson's note, asking that, before he undertake mediation for Armenia, the great powers promise Russia that her territorial integrity shall not be invaded, seems to have met with little response from the capitals of Europe, though it may be the statesmen are merely digesting it. Armenia herself appears to have ceased to interest any except the philanthropists who know that her people still are suffering and oppressed. As for Russia, the main development of recent days is the progress of the negotiations for resumption of trade between her and Great Britain. The soviet envoy has received the terms demanded by the British, and it is likely they will be accepted. The movement toward the same end in the United States has received a setback in the senate committee, where a majority seems opposed to an arrangement which they think involves the recognition of the soviet government.

That same Wilson note was interpreted in this country as aiming chiefly at Japan's continued occupation of Vladivostok and the surrounding portion of Siberia, and in this light might have been generally approved if the Republican press had not jumped on it as a presumptuous attempt to establish a policy by a repudiated administration. Anyhow, the Japanese so far have not given it official attention; neither have they made any move toward getting out of Vladivostok. The murder of an American naval lieutenant by one of their sentries, and other unwarranted acts, however, have forced Tokyo to disavow all such actions.

Ambassadors Morris and Shidehara have concluded their negotiations for the settlement of the California alien land law question and the definition of the rights of Japanese in the United States, and their recommendations are embodied in a report which Mr. Morris has submitted to Secretary of State Colby. The principal features of this report are as follows:

1. An amendment to the existing commercial treaty which will grant to Japanese subjects lawfully in this country equal civil rights with the nationals of any other foreign nation.

2. A revision of the existing "gentlemen's agreement," so as to make it conform to present-day requirements, and to that end would absolutely prohibit Japanese emigration to America and the Hawaiian islands, while admitting it to the Philippines.

At home the Japanese government was violently attacked by the opposition leaders for its alleged failure in diplomatic negotiations with the United States, Great Britain, China and Siberia, and for keeping troops in Siberia. In reply to the latter charge Premier Hara said he would like to withdraw those troops, but he believed their maintenance in Siberia was necessary for the national defense. He admitted that the bolshevizing of Siberia could not be checked.

Hundreds of thousands of workers in the United States are without employment, but the situation is growing better daily. In the North the textile mills and many of the automobile plants are reopening, and in the South the cotton mills are resuming operations. To be sure, the worker is often compelled to accept either a shorter week or reduced wages. The downward trend in pay has now reached the railways, and last week the labor committee of the American Association of Railway Executives met in Chicago to lay plans for a request that the United States railway labor board authorize a reduction of wages. One minor road in the Southeast already has asked for such authority.

The railway executives say that at the present rates the properties are not earning the 6 per cent return guaranteed by the transportation act; that the rates now are as high as the business can be expected to bear; that forces have been cut to the minimum consistent with safe operation, and that the only remaining place for a reduction in expenses is the wage scale. They also will show the federal board that wage increases of more than 120 per cent since the President signed the Adamson eight-hour law have accounted for almost two-thirds of the increase in operating expenses from $3,100,000,000 to nearly $6,000,000,000 a year and that the national industrial conference board's estimates show that the cost of living has decreased.

Union laborers who believe Samuel Gompers and his associates have proved incompetent leaders and "have directed the toilers' industrial ship into the whirlpool of fallacy and corrupt politics" have just started the organization of a new national labor movement called the American League of Union Workingmen. Its organizers declare they are for America and American ideals and conceptions and that they hope to establish cordial relations between their leaders and the Harding administration.

The senate has passed the bill for government regulation of the meat packing industry, which, according to its proponents, will protect both the stock raisers and the consumers from alleged price control by the packers. Eighteen Republicans, mostly Progressives, joined forces with 28 Democrats to carry the bill through, the vote being 46 to 33. Washington correspondents predicted that it would not get through the house, at least during this session.

Charles M. Schwab, the steel magnate, who was accused of having taken from the government $269,543 for his personal expenses while he was director general of the Emergency Fleet corporation, was fully exonerated by the house committee investigating the shipping board, after a somewhat sensational session during which Mr. Schwab wept over the false charges that impugned his patriotism.

Attorney General Palmer and Samuel Untermyer continued their wordy battle, the former accusing the latter of having served the German embassy as "unpaid judicial and legal political adviser" during the early years of the war, and of "still serving his old clients." Untermyer countered with flat denials and with charges that Palmer is a grossly incompetent official who has misused his patronage.

CHAPTER XII—Continued.

—13—

"And I have given you my heart ng ago. Kiss me, Tom."

They sat there, closely pressed to-ether in that narrow space, scarcely ware any longer of the danger at and, eager only to hear each other's ice. Above the crackle of the ames, and the crashing of falling mbers, they could distinguish the in-rmittent crack of a rifle, and the cho of voices calling. Shelby began dig with one hand at the pile of rth beside him so as to widen the ace between its summit and the of. The action caused his mind to vert to the imminent peril of their tuation.

"It will be all over with before day-ght," he said soberly, "and that will e our chance to get out."

"How do you suppose Macklin ever ot through there?" she questioned onderingly.

"That's what bothers me. Either e wasn't hurt much, or he had help. is my notion the girl brought him ut in some way. The shooting was n act of sudden anger, for which she as sorry the very next moment. They ay be hiding there now, somewhere the tunnel."

She lifted herself up and peered rough the opening; the glare of the ames did not penetrate beyond the arrier of earth and she saw nothing ut impenetrable blackness.

"Shall we go, and see?"

"Not yet; we are safer here, until ose devils give up. You can hear eir voices yet out there."

They had no way of telling time, nd the hours dragged. The sound of ring had entirely ceased, and the outs of voices died away one after e other. Shelby waited patiently, stening for the slightest sound, but, last, could restrain himself no nger.

"I do not know how late it is," he id finally, "yet it must be nearly orning. Most of those fellows must gone. Shall we try our luck, little rl?"

She put her hand silently into his.

CHAPTER XIII.

The Fugitives.

He led the way, finding little diffi-lty in crawling over the mound of rth, and Olga followed easily. The ol darkness into which they ad-nced was a great relief, while the ense of action restored their shat-ered nerves. They encountered no rther obstruction of any kind, but ddenly reached a sharp turn to-ard the left. Shelby felt his pass-ge around the corner, aware of the essure of Olga's fingers on his leeve, but his eyes could perceive othing unusual beyond. Yet, with is first step forward, he came to a dden halt.

"Stay where you are, senor," said low voice, "not a move till I speak." He caught his breath quickly, carcely daring to set down an uplifted oot. There was no doubt who that as that spoke out of the darkness.

"But I am Shelby," he blurted forth wiftly. "You have no reason to fear e."

"Shelby! How you come here? You ound the trap? And—and is she with ou?"

"Yes, senorita. An accident re-ealed to us a way out. It was you, hen, who took Macklin away; he was ot killed?"

A moment there was silence; then he broke out suddenly, passionately, he words fairly falling over each oth-r in her eagerness of expression.

"I am not afraid, Senor Shelby. No! No! I hav' ze pistol in my hand. I shoot. The dark eet make no differ-nce, for you are there just before me —she an you are there. Listen, then; I tell you what happen. I hate an' I love—see! Then I make meestake. Madre de Dios! I know not how eet was, but I shoot the man I love. Eet was crazy thing; but I not keel heem; I know I not keel heem. How I know? Santa Marie! The good God would not let me believe that. What could I do? I ran away mad into the woods. I would maybe yet save heem, but how? You know, senor, eet was I who shoot Senor Macklin?"

"Yes, Pancha; the lady here saw your face."

"Yes, it was I, senor—I who love heem. Why should eet be so? I went there not for that—no! I tell you how eet all come. Eet was because of my brother, senor—you know my brother, Juan Villemonte? He dead, senor, dead. You know how he die? Eet was a quarrel with Senor Laud an' Senor Hanley—they keel heem, the two against the one. I not know what happen. I wait in the cabin for Juan to come, but he stay away. No one tell me teel an Indian boy come an' he tell. Then I know Juan is dead, an' I go crazy like that. I am Span-ish, senor; I hate an' I love—then only I hate! I would avenge my brother; I would keel the man that keeled heem. I care only for to do that. He was there in this cabin; I creep up an' see. Eet was dark in there, yet I saw hees face. He could not see me, but I aim. Senor Macklin was there too, an' the other girl, but I care not then for them at all. I hate an' I see only the one I hate. Santa Marie! Why was eet so?"

"You shot the wrong man?"

"Si, senor. Senor Macklin, he step forward quick just when I fire; he drop an' I run."

Shelby felt Olga grip him and heard her voice at his ear.

"She never heard what Macklin said; don't let her know."

He crushed the question already on his lips back into his throat.

"Yes," Shelby said: "I see how it happened, now. And what did you do then, Pancha?"

She was not sobbing, but her quick breathing gave the impression in the darkness.

"What I do, senor? I pray the Virgin that I may save heem. Then I remember this passage from the ravine. How I know eet? Juan and I, we live in the cabin a month; 'twas then I found eet. I was underneath when you fought, senor; then, when you were both outside I got heem—"

"Macklin, you mean? He was alive?"

"Yes, senor, alive. Maybe he live, maybe he die; I know not. I do what I can. Eet took long time; even I carried heem alone."

"But how did you get across that cave-in of earth?"

"Eet was not there; eet come later," she explained. "I would go back, senor, when they fired the cabin, but the earth had caved and I could not get through."

"To help us?"

"Si, senor; to help you and me. What could I do alone? That is why I tell you; why I talk. Eet is not for you, nor for me. I would save heem an' only can eet be done if I have help. I do all I can—Madre de Dios, yes. But how I get heem out, senor?"

"But why not call the others?" Shelby asked suddenly in suspicion. "What danger is Macklin in?"

"You know not?" in surprise. "The Indian boy tell me—he an' Hanley. They plan eet all out. 'Twas because Juan would not be one of them they keel heem. They would hold her for ransom; they say a man comes soon here who would pay much; so they try to put out of the way Senor Macklin. 'Tis to get her that Slagin go to the cabin; he fail, and then Senor Laud try another way. He not know when he come that Senor Macklin get back. No one know."

Shelby smothered an oath; the whole foul plot suddenly revealed to him in all its hideousness. This then was what these fiends had been planning; it was plot within plot; criminal against criminal. He was blind not to have perceived the truth before; now it stood before him in all its sheer nakedness. Macklin's drunken boast had brought forth its full brood; Hanley, too brainless and cowardly to lead, had told all he knew to Indian Joe—embellished it, no doubt—and it was just the sort of thing the latter was eager to get his hands into—seemingly a safe game, with a good stake. Shelby reached out and drew Olga closer to him in the darkness.

"I understand, now," he said tersely. "We've got to fight this out together. All right, I'm ready. What is it you want me to do? Can Macklin walk?"

"No, senor; I think maybe he verra bad off; he not speak now for long time. Maybe you tell what we do for heem."

"I'm afraid not, Pancha. I've doctored some wounds, but I'm no expert. Where is he? Oh, here."

He bent down in the dark and touched the motionless figure. His fingers sought the man's pulse, which showed weak but rapid.

"Where was the wound?"

"In the right chest, senor."

"And you have dressed and bandaged it?"

"Yes, senor; the best I could. I tore up my underskirt."

"Do you know if he bled much?"

"Not since I found heem—no; eet was very little. You think maybe he live, senor?"

"I am unable to answer that, Pancha," he replied soberly, rising to his feet. "The man is evidently hard hit, weak from loss of blood and in a coma now from fever. This is no place for him. If we could get him out into the open, bandage his wound properly and get a doctor for the ball he might have a fair chance. I can say no more than that."

"A doctor! Where would there be a doctor?"

"I know of none this side of Gerlasche; an army surgeon is at the camp there; no doubt he would come."

"Gerlasche! And—and he could save heem, senor?"

"He might; I can promise nothing; but that would be the only hope."

"But you will help me? You pledge that?"

"I will do whatever I can," Shelby said earnestly. "I hardly know how we are going to manage it. Once outside, we might find some poles, rig up a litter, and so get along, the three of us."

"Yes," interposed Olga sympathetically, "we must do that if possible. He cannot be left to die alone in this horrible place. I am strong, and will help all I can. Could we now start at once?"

"Just a moment. Is there an entrance not far away, Pancha?"

"Not 50 feet, senor."

"Then we ought to hear any firing or shouting without. Everything seems quiet. Let's make the effort now."

He sent the Mexican girl on in advance, and lifted the unconscious Macklin upon his back, Olga partially supporting the helpless body. The wounded man groaned at the first movement, but lapsed immediately into silence again, and Shelby moved slowly forward with his burden along the dark, narrow passage. It terminated in a small hole, well protected by a covert of brush, through which the fellow had to be drawn cautiously. Once on the outside, under the cold gleam of the stars, they found themselves protected by the high banks of a gully, that turned sharply to the left, connecting with a deeper ravine. The three clustered close, and listened, but no sound broke the stillness. Satisfied they were not observed, Shelby again picked up the wounded man, and, with Pancha guiding, her figure barely discernible in the gloom, slowly advanced down the depression.

It was hard, slow work, as Shelby had to carefully pick his way among the stones, seeking a safe resting place for each foot. They must move noiselessly. Their only hope lay in the confidence the Indians felt in their death within the cabin. If they were assured as to this, then they had probably scattered, willing to wait until morning to search the debris for their bodies. But this they couldn't know. As they turned into the ravine they obtained a glimpse of the burned cabin. One wall yet stood, ragged against the sky, and there was a gleam of red embers. Occasionally a gust of air sent sparks flying upward and spirals of black smoke were visible. No moving forms could be perceived about the ruins, and it was evident the spot was still in a condition to render exploration impossible.

Huddled closely together in the shelter of the rocks the fugitives stared across the open space at the red gleam. The Mexican girl had lifted herself upon a projecting stone, and was searching the shadows with keen eyes.

"Where do we go?" Shelby questioned.

"Up the rock trail, senor; there is no other safe place."

"So I thought. Then we must get under cover before daylight. Dawn is not far off from the looks of the sky." He paused suddenly. "What kind of a looking guy is Hanley?"

"He tall, scrawny, red whiskers."

"Then I got him; plugged the fellow through the arm. He won't want any more for awhile. Come, let's move on," he added impatiently. "It's doing no good to remain here and stare at that fire, and it is no light load I've got on my back."

The way was a rough one, strewn with stones, but well protected by high banks, on either side. Pancha seemingly knew every inch of it, for she advanced confidently, selecting the

Lifted the Unconscious Macklin Upon His Back.

easier path. So they came to the end of the cleft, where it terminated at the bank of the creek.

The light from the slowly graying sky overhead scarcely penetrated the depths of the ravine, and to the burden of carying the heavy body of Macklin was added the weariness of the frequent stumbling over the stones with which the path was strewn. Olga, fighting off the deadly faintness which threatened every moment to overcome her, bore her share of the burden with a courage that moved her husband strongly, inasmuch as he felt he was nearing the end of his strength and realized what the strain must be on her.

The events of the next hour remained in Shelby's mind more like some terrible dream than a remembrance. He was conscious of being excessively worn, hungry, tired. His mind did not function, yet he clung doggedly to his task, with teeth clinched, and every muscle aching from the effort. Macklin moaned once or twice, but without regaining consciousness, and twice Shelby felt compelled to lay the wounded man on the ground, while he regained sufficient strength to proceed. Once they endeavored to shift the burden, Olga insisting on helping him to bear the man. But this proved impracticable, and again Shelby shouldered the body and staggered blindly up stream.

The sky was gray, a heavy mist shrouding the valley below, when they finally attained the opening into the trail sought. Nothing could be seen of their enemies, and, convinced that, as yet, there was no pursuit, the three crept breathlessly into the shadow of the bushes, dragging the unconscious Macklin with them. For some minutes Shelby lay motionless, struggling for breath, feeling that all strength had deserted him. He scarcely realized that Olga had lifted his head into her lap, and was wiping the beads of perspiration from his face. At last, however, his eyes opened, and he saw her bending over him. The man's lips broke into an effort to smile.

"Some soft, ain't I, little girl?" he muttered, "but gee! That was a pull, and I was about all in. Where's Pancha?"

"Back there, where she can look out. Is it much farther?"

"To the cave, you mean? Yes? It is a hard climb yet, but we will have it easier. I'll be all right presently; we'll cut some stakes, and make a litter.

"I don't know what is the matter with me," he apologized, ashamed of his weakness, "hungry, and overstrained, I guess. Maybe I ought to have left the fellow there."

"Oh, no, Tom! We couldn't do that. The poor thing is nearly crazed."

"Pancha? Yes, I know; but she'd be a heap sight better off with the guy dead."

"But she will not believe that. She thinks it is all her fault, and—and she is such a wild, passionate little thing. I would do anything to save him for her."

"There is about one chance in a thousand. Still he's just about ornary enough to make it. We sure don't owe him anything."

"I am not so certain of that," she said softly. "I wonder when I would have known my husband, but for him? I doubt if you half believe all I confessed to you now."

"I can scarcely realize it is true, but belief is not absent."

The motionless girl at the end of the rock suddenly turned her head, and glanced back at them with her piercing black eyes.

"Senor, is it true that you love her—your wife?"

"True; of course, Pancha. I told you so even before I told her."

"An' she love you?"

"I am Senor Shelby's wife, Pancha," spoke up Olga quickly, a flash burning red on her cheeks. "I have no other ambition."

"But the money! You rich, he say that, Senor Macklin. You not even care for that?"

"Not very much—no. I know nothing about it, and am perfectly content if it never comes. You must know what I mean—you have loved."

"Yes, senora; I have loved, and would still love; money is nothing. Senor."

"Yes, Pancha."

"I think as I lie here what it was best to do. They stir down there. I cannot see yet for the fog, but I hear sounds. Pretty soon they will know, perhaps. They hunt the burned cabin an' find no bone, no flesh. What will they do?"

"Laud will suspect the truth."

"'Tis so, perhaps; yet I believe we left no trail, senor. It was all rock an' water; even the Sioux cannot follow that. You know the way now?"

"To the cave—yes."

"It is safe. But if the senor lives he must have a doctor. You tell me that, and there is but one way; I must ride."

Shelby straightened up, instantly grasping her purpose.

"You mean you will leave us here to go on alone?"

"Yes, senor; eet is best. They will not stop me; they will not know. Unless I meet Senor Laud there is no danger; perhaps even he will not suspect, or interfere. There are horses there, and I ride often—sometimes even up onto the mesa; no one will care."

"You are sure you can pass?"

"I am sure I will pass," she said firmly. "I ride for hees life, senor."

It was the better plan, nor could Shelby deny the probability of its success. No one, unless possibly it might be Laud, or Hanley, had any reason to suspect her now. It was a long journey to Gerlasche, too long to be made on foot, and if the girl went with them up the trail, every effort at rescue would be delayed.

"You are right, Pancha," he admitted. "We'll get him up there someway. But you better go now, before the fog rises."

"Yes, senor."

She came over and knelt beside Macklin, who was moaning slightly, his head resting on a pillow made by Shelby's coat. As she bent over him his eyes partially opened, but with no light of intelligence in them; they were dull, lusterless.

"Senor, senor," she sobbed, pressing his hand between both her own, "I am going to ride for you."

Some angel of mercy must have put the words on his lips, for certainly he knew her not, yet faint, fitful, there came from his lips the cry:

"Pancha! I want you, Pancha!"

She must have understood, known, and yet the comfort of that call was hers.

She looked at him dry-eyed, motionless; then bent and kissed his lips. Slowly, regretfully she arose to her feet, and faced them, her cheeks white.

"'Tis all," she said simply, "now I go."

She vanished without a sound, gliding through the fringe of bushes and down the steep bank to the protection

"Now I Go."

of the creek. They were alone, but with their own work to do. Shelby went at his with quiet efficiency. Selecting two stout limbs, similar in size and length, he ran these through the arms of his strong corduroy jacket, binding them into position by two cross-pieces, hastily prepared, and lashed firmly with strips torn from his neckerchief. Macklin, now once again silent, and motionless, his eyes closed, was lifted gently onto the outspread coat, his limbs upheld by one of the cross-bars, and then the jacket buttoned securely about him, forming a swinging cradle finely adapted for the purpose. Shelby straightened up, quite himself again.

"There, that will answer nicely," he said confidently. "It is bound to be a hard climb, but we'll take our time to it and rest when we are tired. No one can see us from below after we once pass the point yonder."

"Is the trail up hill all the way?" asked the girl, her eyes searching the steep face of the bluff.

"Yes, pretty sharp at times, but we'll manage. It follows a deep cleft through the rocks, and once found cannot be lost. I'll take this end; that will give me the most of the weight, and you lead the way; take it slowly and you'll be all right."

They picked the litter up between them, Olga relieved to discover how lightly, thus distributed, her share of the burden rested upon her. She was able to advance easily and pick her way among the rocks without experiencing great discomfort. The weight of the man's body came far heavier upon Shelby, but the rest and change had largely restored his strength and he felt no doubt of his ability to sustain this end of the burden. Unable to see just where he was placing his feet in the stony path, he stumbled occasionally, causing the wounded man to groan in some sudden spasm of pain; yet it was evident he did not suffer greatly. The trail they followed had so impressed itself on his memory that he recalled every turn clearly and could call out directions to her in a low voice.

"Turn sharply to the right there; we will have to hold the litter higher to get by that rock; here is the only point exposed; once in the shadow of those trees the way is completely covered. Yes, we can move rapidly around this point; from now on there are rocks on both sides. Take it easy, and if you need to rest, say so."

(TO BE CONTINUED.)

The Preacher's Topic.

Billy, not very fond of Sunday school, was promised a dime every time he remembered the sermon. For once he expressed great interest. "Just think, daddy, it was about flying machines." "What?" said daddy, "you're mistaken." And he answered: "No, sir, I'm not. The teacher said Esau sold his heirship to his brother Jacob."

BELL-ANS
FOR INDIGESTION

ROPE SUPERIOR TO LEATHER

Fibrous Material Rapidly Supplanting Belting in American and European Mills and Factories.

For 20 years there has been an increasing use in this country of manila rope for power transmission in mills and factories in place of leather belting. In English factories ropes superseded belting long ago, and their use is nearly universal. In the United States the change that has taken place began with the acquisition of the Philippine Islands, where, as everybody knows, the Manila hemp flourishes. The fiber of the hemp varies in length from 6 to 12 feet, and occasionally attains a length of 18 feet. It is said to possess greater tensile strength than any other fiber known, exceeding 50,000 pounds per square inch. Rope drives, as transmission ropes are called, possess the advantage of noiselessness, owing to their flexibility and to the existence of an air passage in the grooves between the rope and the sheath.

SWAMP-ROOT FOR KIDNEY AILMENTS

There is only one medicine that really stands out pre-eminent as a medicine for curable ailments of the kidneys, liver and bladder.

Dr. Kilmer's Swamp-Root stands the highest for the reason that it has proven to be just the remedy needed in thousands upon thousands of distressing cases. Swamp-Root makes friends quickly because its mild and immediate effect is soon realized in most cases. It is a gentle, healing vegetable compound.

Start treatment at once. Sold at all drug stores in bottles of two sizes, medium and large.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Adv.

Accounted For.

Cortland Bleecker, the well-known clubman and connoisseur, said at a dinner in New York:

"We live in an age of substitutes, and we pay three times more for these substitutes than we ought to pay for the real thing.

"A pretty debutante said to me at a dance:

"'I see that you're admiring my stockings. Don't they glisten beautifully? And yet they're not real silk, you know. They're an artificial silk made of wood.'

"'Wood, eh?' said I. 'Then that accounts for the ladder just below your knee.'"

He and Edison.

Paulie was ten years old. He had written a paper that was so good that his teacher called up his mother to tell her about it.

Paulie's mother called him in to her and said: "What did you write that your teacher liked so much?"

"Oh, I just told about Edison. What he'd done with electricity and what I'd done with it," answered Paulie modestly.

Catarrhal Deafness Cannot Be Cured

by local applications, as they cannot reach the diseased portion of the ear. Catarrhal Deafness requires constitutional treatment. HALL'S CATARRH MEDICINE is a constitutional remedy. Catarrhal Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result. Unless the inflammation can be reduced, your hearing may be destroyed forever. HALL'S CATARRH MEDICINE acts through the blood on the mucous surfaces of the system, thus reducing the inflammation and restoring normal conditions.

CONDENSED CLASSICS

THE STRANGE CASE OF DR JEKYLL AND MR. HYDE

By ROBERT LOUIS STEVENSON

Condensation by Irving Bachelle

Robert Louis Stevenson called himself an idler. He was a natural vagabond who loved to go in old clothes upon his own way through the strange city haunts of the disinherited, or out upon the open road. He despised smug society, but talked eagerly with all sorts of men and women. Yet even as a boy he always carried a notebook and a pencil and constantly put into words what he saw and thought and felt. He wrote till his health gave way again and again, and then he wrote of that.

MR. UTTERSON was a lawyer who believed in letting people go to the devil in their own way. He and Richard Enfield, a man about town, who was at once his distant kinsman and his friend, often walked about the London streets together. One day they came upon a sinister, windowless, two-story building in a byway.

Enfield told of seeing a man in this street run into a little girl, knock her down and walk over her body. "It sounds nothing to hear, but it was hellish to see," he said. "I collared the man and held him, and though he made no resistance he gave me a look so ugly that it set me in a sweat. He offered to pay damages and came to his house to get the money. He gave me 10 pounds in gold and a check signed by a man I knew. A forgery? Not a bit of it—perfectly good!"

Mr. Utterson asked the name of the man. Enfield with some hesitation said: "His name is Hyde."

"You see I don't ask you the name of the man who signed the check, for I know it already," said Utterson.

That night the latter opened his safe and took from it a will which he re-examined with care. It provided that in case of the death of Henry Jekyll all his possessions were to pass to Edward Hyde, and in case of the disappearance, or unexplained absence for three months of said Jekyll, Edward Hyde should step into Jekyll's shoes without delay. As he studied it the lawyer said: "I thought it madness, now I begin to fear it is disgrace."

He decided to talk with Doctor Lanyon, a great physician and an old friend of Jekyll.

"I see very little of Henry now," said Lanyon. "He began to go wrong some ten years ago. He became too fanciful for me."

Lanyon had never heard of Hyde.

From that time forward Utterson began to haunt that sinister doorway into which Hyde had disappeared. He determined to discover its owner. At last one night a small plainly dressed man approached and drew a key from his pocket. His look suggested deformity but did not show it. Utterson accosted him and said: "Now I shall know you again. It may be useful."

Hyde gave his address in Soho, admitted knowing Jekyll, and disappeared within. Utterson turned away convinced that this loathsome little man had some dark hold upon Doctor Jekyll. In sorrow and in pity he went to call upon Jekyll who lived just around the corner. He was away.

To the butler Utterson said: "I saw Mr. Hyde go in by the old dissecting room door, Poole, is that right when Doctor Jekyll is away?"

"Quite right, sir. Mr. Hyde has a key."

Utterson went home with a feeling that some danger menaced his friend Jekyll.

A year later London was startled by a singularly inhuman murder case. A housemaid, looking from a window, saw a man who resembled Mr. Hyde strike down her master, a venerable, white-haired man, and trample his body under foot in a hellish fury. The old man was Sir Danvers Carew.

The case came to Utterson who alone recognized the weapon which the assassin had dropped. It was a cane which he had himself presented to Henry Jekyll. It was another link in the chain. Utterson took an officer to the address which Hyde had given. The latter was not at home.

The house was empty, and nothing suspicious was to be seen except a pile of ashes on the hearth as if many papers had been burned. Among these the detective discovered a partially burned checkbook. Following this clue they located several thousand pounds at a certain bank.

Hyde did not claim the money. He had gone away, swiftly and safely.

The next step was to visit the sinister house, which was in truth a part of Jekyll's property and known as "The Laboratory." Light fell through a foggy cupola. At the farther end a flight of stairs led to a large room lighted by three iron barred windows which looked on the court. A fire burned in the grate, and there, cowering close to it, sat Doctor Jekyll, looking deathly sick. He held out a cold hand.

Utterson asked if he had heard the news. Jekyll replied that he had heard it cried in the street. Utterson said: "Carew is my client, but so are you, and I want to know what I am doing. Are you hiding this murderer?"

Jekyll swore that he was not but added: "He is safe—quite safe. He will never more be heard of."

He showed Utterson a letter from Hyde in a queer, upright handwriting.

As he went out Utterson asked Poole about the man who had brought the letter to his master. Poole was sure no letter had been handed in. The letter must have come in by the way of the laboratory. Utterson's clerk, an expert in handwriting, put the two letters side by side. After careful study he said: "The two hands are in many points identical. They are differently sloped, that is all."

Utterson's blood ran cold in his veins. "Henry Jekyll has forged in defense of a ferocious murderer," he said.

In less than a week Lanyon took to his bed and died. A day or two after the funeral, a letter from the dead man came by messenger to the lawyer, a missive marked "Private. Not to be opened till the death or disappearance of Henry Jekyll."

Utterson did not open the letter but went at once to call upon Jekyll. He saw only Poole who said his master was hardly ever seen outside the room in the laboratory, and that he had grown very silent and morose.

One evening as Utterson and Enfield went across the court in the rear of the Jekyll house they saw the doctor sitting at one of the windows taking the air with an infinite sadness of mien, like some disconsolate prisoner.

Utterson, shocked at his looks, urged him to come down and walk with him. Jekyll refused sadly. Suddenly as they both stood looking at him his smile vanished and an expression of abject terror and despair came upon his face. He turned away. The window was thrust down. Utterson turned and looked at his companion Enfield. Both were pale, there was an answering horror in their eyes.

One night Poole suddenly appeared at Utterson's house. He came to say that for a week his master had been shut up in his cabinet and that he was alarmed. "I can't bear it any longer."

He could not explain his fears but begged the lawyer to go back with him. His face was white and his voice broken.

Utterson found the entire household in Jekyll's house in a state of panic.

"They're all afraid," said Poole. "Follow me," he added; "I want you to hear, and I want you to be heard—but don't go in, sir."

They knocked on Jekyll's door but a voice said: "I cannot see anyone."

When they returned to the kitchen Poole asked: "Was that my master's voice?" Utterson admitted it was changed. Poole then opened his heart. "I believe my master has been made away with," he said.

Poole thought it strange that the murderer stayed. He said that the man in the cabinet room had been crying out night and day for help, and had thrown out papers on which were written orders for certain drugs.

Utterson examined some of these papers which were agonized pleas for a special kind of salt which he had used and wanted again. They were all in Jekyll's hand as Poole admitted. He also explained that once he had caught sight of the man inside. "The hair stood up at sight of him. If that was my master why had he a mask on his face?"

Poole said: "That thing was not my master. My master was a tall fine man—this is a kind of dwarf."

They decided to break down the door.

Poole said: "Once I heard it weeping." This added to the terror and mystery.

They stood before the door and Utterson demanded entrance. A voice from within cried: "For God's sake have mercy."

"That is not Jekyll's voice—it is Hyde's," shouted Utterson, and swung his ax against the door.

Shattering the lock they rushed in. On the floor lay the form of a man contorted and twitching. They drew near and turned the body on its back. It was Edward Hyde, and by his side was an empty vial. He was dead.

Jekyll was not to be found, but the dead Hyde was dressed in what seemed to be a suit of Jekyll's clothes much too large for him.

On the table was a confession addressed to Utterson, and a will drawn in his favor. Lanyon's letter explained the mystery. Hyde had come one night to his office very ill and asked for some powders which Jekyll had left with Lanyon to be given to Hyde when he should call for them. Hyde, a small man, with clothes grotesquely large, eagerly seized the powder and mixed a liquid which had quickly turned from purple to green.

The man drank. He reeled. He staggered. He clutched the table. He seemed to swell. His features changed, and there before Lanyon's eyes, pale and fainting, groping before him with his hands, like a man restored to life stood Henry Jekyll.

Hyde and Jekyll were inhabitants of the same body! By the use of a drug he had been able to change from one personality to the other. Hyde was wholly evil. Jekyll, the amiable, respected professor, had but to drink that powerful drug to become the revolting Hyde.

PRESIDENT GETS LETTER FROM HEAD OF ARMENIAN CHURCH

Washington.—Archbishop Khoren, whose archepiscopal see is Erivan, capital of the Armenian Republic, journeyed seven thousand miles to present President Wilson one of the quaintest and most touching documents in the archives of the State Department. It is illuminated by the monks of Etchmiadzin, the seat of the Armenian church since its separation from the Greek church, after the Council of Chalcedon in the year 451.

The Encyclical Letter, which the Archbishop presented to the President, reads:

"GEORGE, Servant of Jesus Christ and by the Omniscient Will of God, Arch-Priest and CATHOLICOS OF ALL THE ARMENIANS, Supreme Patriarch of the highest Armenian See of Ararat and of the Apostolic Mother Church at Etchmiadzin the Holy.

"To the NOBLE CITIZENS OF THE UNITED STATES OF AMERICA.

"AFFECTIONATE GREETINGS AND BLESSINGS from the CATHOLICOS OF ALL ARMENIANS and Apostolic Chief of the Holy Church of Armenia.

"With placid, profound feelings of devotion, we desire, through this En-

ARCHBISHOP KHOREN.

cyclical Letter of Ours, to place before you and to make known to you the expression of Our deep gratitude for the liberal help which, inspired by a spirit of philanthropy, you have extended to Us both by individual personal donations and through the sustaining assistance and alleviating instrumentality of the Near East Relief Organization. Individually and Collectively, combined in one body as it were, you gave and you brought to Us the fruits of your offerings, to the salvation and protection of Our Flock during the most bitter days of their suffering—sufferings which We attribute to the rigours of the War of Liberation, and to the cruelty of Our implacable Oppressors.

"In expressing Our thanks for your generosity and for your evangelical commisseration, We, as the recognized Head of Our Spiritual Children, comprising the entire Armenian Nation, would be glad to view your acts of mercy as tokens of your continued assistance in the future, and that it is your purpose to continue to assist Us in Our regeneration and complete liberation, in the habiliment of a self-governing Nation. With these things in mind, We appeal to you all; to the Prelates of your Churches; to your devout Bishops, Our Brethren and beloved in Our Lord Jesus Christ; to men endowed with political and civil acumen; to those who have been called upon by the Lord in the Conduct of Public thought; and to every soul in which the spirit of Christian philanthropy glows. Come to our defense and to the cause of the Freedom of Our Flock. Come from the pulpits of your Churches; from the seats of your Council Chambers; from the platforms of Public Associations; from the sanctum of your journals. Raise the mighty voices of your Nation and of your sympathetic people, as those of unfailing and unfaltering friends. We need them for the salvation of Our Flock, tortured in body and soul through centuries of suffering. And Our people will forever stand in history as witness that a Great Nation, prolific of welfare, stretched its helping hand and mighty arm to raise them up.

"The Grace of Our Lord Jesus Christ, and Our thankful Blessings be with you all, evermore, Amen.

"GEORGE V.,
"Catholicos and Supreme Patriarch of All Armenians."

During the VIII. year of Our Patriarchate at the Mother See of Ararat Etchmiadzin the Holy.

PROPER RECORDS WILL AID FARMERS

Both Happenings and Money Affairs Should Be Carefully Kept During Year.

SIMPLE SYSTEM IS FAVORED

Accurately Kept Accounts and Intelligently Utilized Are of Great Assistance in Showing Where Money Can Be Made.

(Prepared by the United States Department of Agriculture.)

In order to know what progress is being made in farm operations and to determine what crops or branches of farming are producing the greatest profits, it is necessary for the farmer to keep a system of accounts, say specialists of the United States Department of Agriculture. The practice will not of itself turn a poor farm into a rich one, a poor farmer into a good one, or losses into profits, but farm records, if accurately kept and intelligently utilized, are an aid to a better understanding and insight into the farming business.

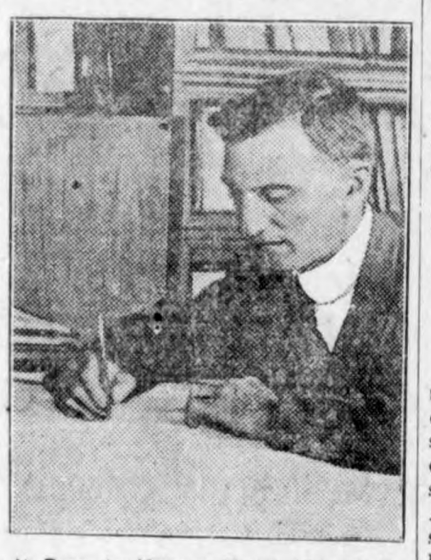
The keeping of accounts need not take a great amount of time nor is it necessary to have an elaborate system.

Two Kinds Advisable.

Farm records may be roughly divided into two heads—records of happenings and records of money transactions. The former proves useful when memory fails. Among the happenings that should be recorded are the dates when animals are bred, men hired or discharged, accidents occur, pasture season begins and ends, first and last frosts occur, incubators are set, spring work begins and fall work ends, seed time and harvest occur, etc. Such notes as these, when systematically recorded and constantly referred to, are of much value.

The most important use many farmers make of the records of cash received and paid out is as a means of checking up bills when sent in to see whether all payments have been duly credited. While this alone is only a small part of the value which can be derived from such records, it will frequently justify the time required to keep them.

When the year's record is made the cash account can be assembled under headings that will show exactly what each branch of the farm activities returned in cash and what each required to keep it going. Some farmers are apt to judge the importance of the



It Pays to Keep a Farm Inventory.

various farm projects by the time required to put them through. To such, a complete cash record for a year, properly assembled, will be an eye opener. Often seemingly unimportant things, such as the flock of poultry or the orchard, produce nearly as much net cash as the obviously important.

At some regular time each year—usually about the first of the calendar year—a farm inventory should be made. In any system of accounting the inventory is absolutely essential, as upon it is based the division of one year's business from another. The inventory is simply a list of farm property and farm debts, and corresponds to the "stock taking" which every merchant does periodically.

An Aid to Credit.

Taken alone, the inventory will show a farmer the exact net value of his property, and will be a guaranty of solvency and an aid in securing credits and loans from the bank in time of need. The inventories of two dates, a year apart, show whether progress or retrogression has occurred during the year and definitely measure the degree of change.

Taken in conjunction with a cash account for the year, the inventory shows how much has been made by farming and to what extent the personal and household expenses have offset profits. It also gives a much better insight into the income produced by each farm department, as a decrease in inventory value of hogs, for instance, may offset to some extent what, from the cash account, looks like a very large income from that source.

RULES TO PREVENT CHOLERA

Hog Raisers Who Do Not Vaccinate Must Observe Some Plan to Keep Disease Away.

Many small-scale hog raisers and a few who raise hogs on a large scale do not vaccinate. A few general rules must be observed by such stock raisers or cholera will get into their herd.

EXERCISE FOR SOWS OF BIG IMPORTANCE

Necessary to Use Good Judgment in Management.

Corn Alone Is Very Poor Feed for Pregnant Animals Because It Lacks in Essential Protein and Mineral Matter.

E. F. Ferrin, in charge of swine production at University Farm, St. Paul, Minn., believes that good judgment in the care and handling of brood sows during the winter is as necessary as good feed in making a success with the pig crop.

"The cheapest grain for brood sows," he says, "is corn, but this feed alone is a very poor one for pregnant sows or gilts. Corn lacks in protein and mineral matter, each of which is essential if strong pigs are to be produced. Oats will supplement corn fairly well, and a ration of two-thirds corn and one-third oats is reasonably good. One of the best feeds to be used with corn is meat meal or tankage, the proportion of one part to nine or ten of corn. Alfalfa or clover hay is an

Hogs Raised Under Modern Methods Realize Far More Than Those Raised Under the Old Systems.

excellent addition to the grain ration, and will reduce the cost of the winter's feed if used.

"Amounts of feed to be given can well be governed by the gains made by the sows. Yearling, or older sows, need not gain more than a half pound daily during pregnancy, unless they are very thin in the fall. Gilts have growth to make as well as litter to produce, and consequently should increase more in weight than mature sows; from one-half to three-fourths of a pound is a reasonable amount.

"Exercise is one of the important factors in producing strong pigs. When the snow is not too deep, it is a good plan to feed ear corn some distance from the house or shed so that the sows will have to exercise to get their feed. It is probable that exercise is a big factor in avoiding hairless pigs."

PROPER SIZE OF CONTAINERS

Dissatisfaction Caused by Use of Receptacles Not Sufficiently Strong Enough.

Much dissatisfaction with direct marketing has been caused by using containers that were not sufficiently strong. That is especially true when containers are used more than once, says the United States Department of Agriculture. Shipping containers should be light in weight but sufficiently durable to carry the produce safely.

The proper size of a container depends upon the desires of the customers. Most persons wish to obtain small quantities of each product at a time. Containers should be just large enough for the produce shipped. If the carton is too large or too small, both the produce and the container are likely to be damaged, for the produce will not be kept in place, and the container will be crushed.

The larger the quantity of produce shipped in one parcel the lower will be the cost per pound for transportation, and the lower the container cost per pound.

PREPARE GARDEN SOIL EARLY

"Planting Over" May Be Necessary Sometimes, but Labor Is Always Well Rewarded.

An early beginning in preparing the land and planting gardens is of much importance. Regardless of the seasons, it is well to get an early start. That "planting over" may sometimes be necessary cannot be denied. But little is lost when garden land must be planted over, for the labor necessary to prepare the land is always well-employed. Much is lost if early maturing vegetables are planted too late. Get your garden land ready and plant on time.

BE CAREFUL WITH LANTERNS

Little, Flickering Flame Has It in Its Power to Destroy Anything of Inflammable Character.

These are the days of lanterns in the barn night and morning. It is well to remember that this little, flickering flame has in it the power to destroy your home and all you have brought together in a lifetime. So never set it down in the barn, but hang it up securely. A wire running the length of the barn with a common harness snap on it, makes a safe holder. Better still, is an electric light system!

Live Stock Facts

CALF FED TO WEANING TIME

Quite Simple Matter if Mother Has Sufficient Milk to Nourish Youngster Properly.

The feeding of a beef calf from birth until it is weaned is a very simple matter if its mother gives milk enough to nourish it properly. The principal part of the calf's ration, therefore, may be cheaply and safely provided by giving its mother the proper feeds for the production of milk. Do not feed the cow too heavily on grain soon after she has dropped the calf. While it is important that the calf have plenty of milk at all times, it should never have too much, especially soon after birth. The following suggestions are designed particularly for select animals chosen especially for breeding purposes, says the United States Department of Agriculture.

A calf dropped in the fall or winter probably will do better if kept separated from its mother and allowed to suck night and morning. In summer it should be provided with a lot for exercise and pasture in the daytime, and during the winter with a well-bedded box stall at night. When the calf is from four to six weeks old it is a good plan to bring it from the lot early in the morning, allow it to suck, then take it to the pen or stall to be fed some grain. It should also be suckled at night before grain is fed, then taken out to the grass lot or be fed a little hay in the stall. To be kept contented when away from its mother a calf should run with other calves. A bull calf should be separated from the heifers at the age of three or four months. If the calf is dropped late in winter or spring it may be more convenient to allow it to run with its dam for several months on pasture.

Since milk is nature's food for the calf it would be reasonable to suppose that milk alone is sufficient feed for it. In all cases, however, it should be provided with a little grain in addition to milk. If both the cow and the calf have good pasture and the cow is giving milk enough, the calf will grow to weaning age in good condition with less grain than otherwise would be needed. Frequently, however, the amounts of both pasture and milk are somewhat limited. Then the feeding of more grain is absolutely essential for best results.

When from four to six weeks old a calf may be taught to eat grain. This may be done by feeding it in a creep

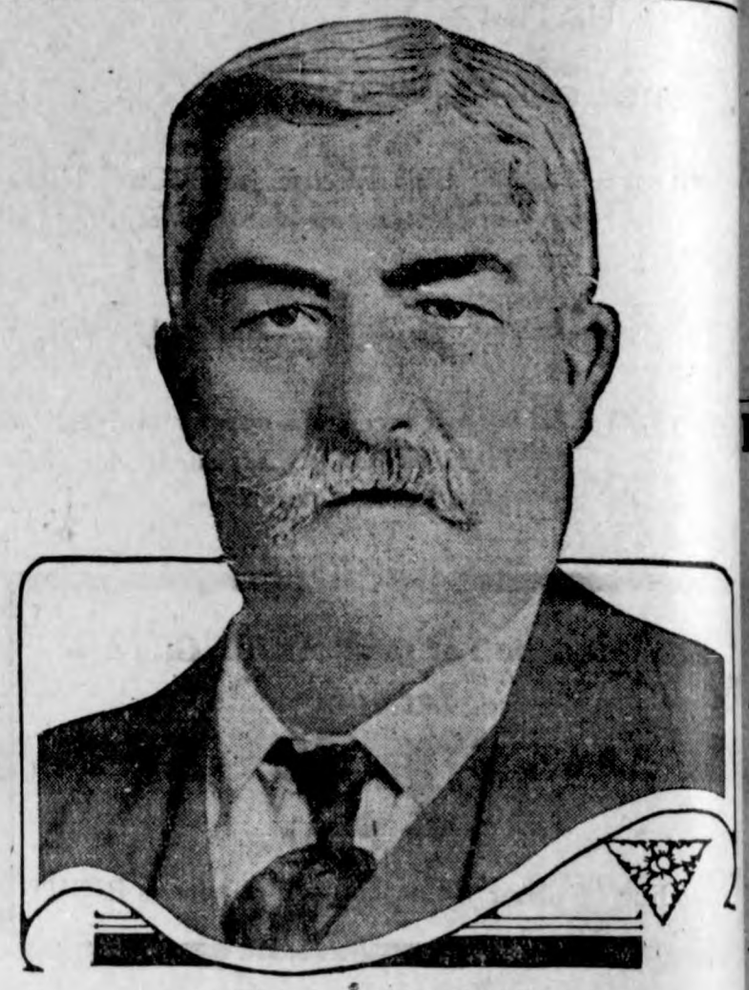
Good Breeding and Quality Are Necessary for Best Returns With Beef Calves.

or pen to which the cow does not have access. Wheat bran is an excellent feed for this purpose. A good ration for the first few weeks would be coarsely ground corn, oats and wheat bran, equal parts by weight, with a small quantity of oil meal added every few days. Feed the calf at first one-fourth of a pound of grain a day, or just what it will eat up clean, giving one-half of the amount night and morning. After a few weeks a ration of whole oats four parts, shelled corn two parts, and oil meal one part by weight should be substituted for the ground feeds. The calf should be eating from two to three pounds of grain a day when six months old, or approximately one-half to one pound of grain per 100 pounds live weight.

Unless the cow has been giving sufficient milk previous to this age of the calf, it may be advisable to provide a nurse cow for the calf. To make the most satisfactory growth the calf should have a liberal supply of milk for several months longer. This is especially true if it is to make a maximum growth and show to the best advantage when the fair season arrives. By being fed in the way described, it should make a continuous growth from birth. If weaned properly, so that none of the calf fat or bloom is lost, the chances for it to grow out and make a profitable and useful animal are decidedly in its favor.

The calf is old enough to wean when from eight to twelve months old. Weaning should take from 12 to 15 days, and should be done gradually. When old enough to wean allow it to suck once a day for a week, then every other day for four or five days, and increase the interval until no milk at all is allowed.

Prominent Western Man Praises Tanlac



G. W. Logan, Peabody, Kansas

"Tanlac has completely restored my health and I feel finer than in years," was the straightforward statement made recently by Mr. George W. Logan of Peabody, Kansas, one of the most prominent stock-dealers in the Middle West.

"It has not only made a new man of me but I have actually gained thirty-five pounds in weight and feel as well as I ever did in my life. I am telling all of my friends about Tanlac, but they can see for themselves what it has done in my case.

"When I began taking Tanlac I was in an awfully run-down condition. I was away off in weight, felt weak and nervous all of the time and couldn't take any interest in my work or anything else. My main trouble was digestion. Nothing seemed to agree with me. At times I would have dizzy spells and at other times my head would ache so bad that I could hardly get up and down in my chair. That is just the condition I was in when I started to take this medicine. I took just six bottles to make a new man of me. I now have a fine appetite, everything tastes good and my digestion is perfect.

"My wife was also troubled with indigestion at times and it relieved her the same way. You may publish my statement wherever you like and if anyone doubts it, just tell them to see me."

Tanlac is sold by leading druggists everywhere.

Many a Pretty Face Spoiled by Pimples

Not only are these pimples and splotches disfiguring, but they lead to serious skin diseases that spread and cause the most discomforting irritation and pain. Sometimes they foretell Eczema, boils, blisters, scaly eruptions and other annoyances that burn like flames of fire, and make you feel that your skin is ablaze.

If you are afflicted with this form of skin disease do not expect to be cured by lotions, ointments, salves and other local remedies, as they can not possibly reach the source of the trouble, which is in the blood. Begin taking S.S.S. today, and write a complete history of your case to our chief medical adviser who will give you special instructions, without charge. Write at once to Medical Director, 152 Swift Laboratory, Atlanta, Ga.

More Suitable.

"So the stork has just visited Zeke Yawkey's home for the eleventh time," said the presiding elder.

"Stork?" returned Gap Johnson of Rumpus Ridge. "You mought say 'stork,' if you want to, parson, but if you'll take a look at them children of Zeke's you'll swear it was a byena."—Kansas City Star.

A cup of Garfield Tea before retiring will next day relieve your system gently and thoroughly of all impurities.—Adv.

Inutile Fame.

"Why are you sure there is no Santa Claus?" asked the small boy.

"Because," answered the small girl, "if there were anybody with all that popular pull, he'd have been put up as a candidate for office years ago."

Australian Wool Industry.

The capital invested in woollen manufactures in Australia amounts to about £3,000,000 ($13,500,000), at pre-war prices, and it gives employment to between 5,000 and 6,000 people. One company has recently organized in Melbourne with a capital of £500,000 ($2,250,000), about two-fifths of which represents English and the balance Australian interests.

Catty.

"She has been asked to act as patroness at a cat show."

"She is well qualified."

New Rich Society.

"Who's the loud gent?"

"Goes in for coaching. I believe. Drives a ballyhoo."

Genuine Aspirin

BAYER

You must say "Bayer"

Warning! Unless you see the name "Bayer" on tablets, you are not getting genuine Aspirin prescribed by physicians for 21 years and proved safe by millions.

Accept only an "unbroken package" of "Bayer Tablets of Aspirin," which contains proper directions for Colds, Headache, Pain, Toothache, Neuralgia, Rheumatism, Neuritis, Lumbago.

Handy tin boxes of 12 tablets cost but a few cents—Larger packages.

Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid

"Made Me Well and Strong"

ANOTHER WOMAN WHO IS THANKFUL FOR

PE-RU-NA

"I have taken several bottles of Pe-ru-na and find it a great benefit. I had pains in my stomach and bowels, but by the use of Pe-ru-na and Man-a-lin, I am well and strong again. I always keep a few bottles in the house." MRS. OSCAR GRAY, R. F. D No. 2, Box 19, Nichols, Iowa

Mrs. Gray's experience is just more evidence that Pe-ru-na is quite as good a remedy for catarrh of the stomach, bowels or other organs as it is for coughs, colds and nasal catarrh. Pe-ru-na is a wonderfully fine medicine to have in the house for everyday ills.

Proof Positive.

"What did you do with that man you caught dealing off the bottom of the deck?"

"Committed him to the asylum," replied Cactus Joe. "Anybody who would try a trick like that in Crimson Gulch don't leave enough doubt about his sanity to be worth arguin' over."

A Lady of Distinction

Is recognized by the delicate fascinating influence of the perfume she uses. A bath with Cuticura Soap and hot water to thoroughly cleanse the pores, followed by a dusting with Cuticura Talcum powder usually means a clear, sweet, healthy skin.—Adv.

SPECIAL MEDAL FOR THIS DOG

St. Bernard Forgot Eternal Feud With Cat Family and Braved Flames to Save Pussy.

The supply of Carnegie hero medals would soon give out if all the brave and thoughtful dogs were remembered. A St. Bernard in the town of Everett, Mass., mindful of the traditions of snowbound travelers and his Alpine monastery, has just effected a triple rescue that entitles him to whatever dogdom can offer in the way of canonization, to match the name of the saint that his devoted breed already bears. First he woke up the families in two apartments by his loud barking when a fire broke out, and then, having started the human beings on their hurried exodus to safety, he darted back through the smoke, got the family cat, which had been forgotten in the excitement, and reappeared with his tribal enemy in his mouth. Would all human beings have been so magnanimous?—Philadelphia Ledger.

Identified.

"Was that your wife I saw with you the other evening, headed for the train?"

"My wife was with me one evening, and the next I happened to meet up with a young lady who lives out at our station. Don't know which—by the way, who was carrying the parcels?"

"You were, of course."

"Oh, that was Miss Cutely, you saw."—Philadelphia Ledger.

Selection.

"I don't believe half of what I hear in a political campaign."

"Neither do I. I believe only the half that suits my own personal beliefs."

WOMEN! USE "DIAMOND DYES"

Dye Old Skirts, Dresses, Waists, Coats, Stockings, Draperies—Everything.

Each package of "Diamond Dyes" contains easy directions for dyeing any article of wool, silk, cotton, linen, or mixed goods. Beware! Poor dye streaks, spots, fades, and ruins material by giving it a "dyed-look." Buy "Diamond Dyes" only. Druggist has Color Card.—Adv.

FACTS OF SACRED WRITINGS

Information That Will Be New to Those Who Have Not Recently Searched the Scriptures.

The longest chapter of the New Testament is the first chapter of Luke; it contains 80 verses. The shortest is I John, first chapter; it contains ten verses. The longest verse in the Old Testament is the ninth verse of the eighth chapter of Esther. It contains 90 words composed of 426 letters. The shortest verse is the twenty-fifth verse of the first chapter of I Chronicles, consisting of twelve letters and three words. The middle verse is the eighth verse of the one hundred and eighteenth psalm. The nineteenth chapter of II Kings and thirty-seventh chapter of Isaiah read alike. The book of Job is the oldest book in the Bible and the twenty-first verse of the seventh chapter of Ezra contains all the letters of the alphabet with the exception of "J." The thirty-fifth verse, eleventh chapter, of St. John is the shortest in the Bible.

Auto's Heavy Toll of Death.

According to statistics compiled by the National Safety council, three times as many people are being killed by automobiles as in all the factories, mines, railroads and other industries in America. The annual toll of automobile accidents at grade crossings averages 1,000 persons killed and 3,000 injured.

LINCOLN THE MAN

House in which Abraham Lincoln was born

"Let not him who is homeless pull down the house of another, but let him labor diligently to build one for himself."

A. Lincoln

A recent writer on Lincoln as a "lover of mankind" has likened him to two other great men who have become a common possession of our Anglo-Saxon race. Although they seem almost as far separated from each other as from Lincoln himself, both Chaucer and Sir Walter Scott reveal to the careful observer the qualities that provoked a comparison apparently so remote. These are the qualities of a lover of mankind.

Chaucer displayed them in depicting, with sympathy for all, the group of widely various characters who made their immortal Canterbury Pilgrimage together. Scott displayed them not only through the creatures of his imagination, but also in his recorded relations with all his fellow beings. In that respect Chaucer is at a disadvantage, because he lived long before biography had attained anything like its modern abundance. Lincoln, later than Scott, and more tempting to biographers because of his high place, is the most fully recorded of them all—although there is no single book about him that seems so sure to persist as the "Life of Scott," by Scott's son-in-law, Lockhart.

It is in the very variety and extent of the studies of Lincoln's character that the strength of his hold on the imagination of the world is shown. Fifty-six years have passed since he met his tragic death. Through all that period the interpretations of his character—historical, analytical, poetical—have steadily increased in number. The bare facts of his unique, yet strangely typical and significant career, arrange themselves in perspective like the acts of a great uplifting tragedy. If he had lived in the days when myths were made, it is easy to imagine that in the process of time he would have grown into a great mythical figure, a King Arthur of the New World, a half-divine hero like those that we associate with the most distant antiquity.

But he belonged to no such period. His age is one of the most amply recorded in all history, and the records of his life are so intertwined with those of men and events quite without poetic or heroic suggestion, that his feet can never be wholly removed from the earth. Indeed, it is much better that no such possibility exists. We need to know that out of our common life can spring so extraordinary an example of the development of which our human nature is capable.

When all is said and done, when his wisdom, his patience, his sacrifice are fully remembered, we shall delight pre-eminently to recall him as the friendly, humorous, accessible lover of mankind.—Youth's Companion.

Lincoln and Sumner.

Lincoln was modestly proud of his stature and of the effect of the physical man, especially when actuated by noble sentiments. He used to speak of his height to every tall man he met, and to propose measuring—another guileless habit of self-gratification. The only refusal he is known to have received was from Charles Sumner, who was also tall and proud of his height. Sumner was worrying the President, as he often did, about some perplexing matter, when Lincoln abruptly challenged him to measure. "Sumner declined," said Lincoln, "making a fine speech about this being the time for uniting our fronts against the enemy, and not our backs. But I guess he was afraid, though he is a good piece of a man. I have never had much to do with bishops where I live, but, do you know, Sumner is my idea of a bishop."—Harper's Weekly.

As Lincoln Is Remembered.

The work he did, the sum of his deeds and their great fruitage, may inspire the chronicler of our national life and the recorder of God's handwriting in the annals of His world; but to the rank and file, who know but vaguely the details of his heroic achievements, the memory of Lincoln takes the form of a warming, loving, saddening personal presence, a latter-day reflection of the everlasting Man of Sorrows.

Why Lincoln Helped a Bug.

President Lincoln was walking with a friend about Washington and turned back for some distance to assist a beetle that had got on its back and lay on the walk, legs sprawling in air, vainly trying to turn itself over. The friend expressed surprise that the President, burdened with the cares of a warring nation, should find time to spare in assisting a bug.

"Well," said Lincoln, with that homely sincerity that touched the hearts of millions of his countrymen, "do you know that if I had left that bug struggling there on his back I wouldn't have felt just right? I wanted to put him on his feet and give him an equal chance with all the other bugs of his class."

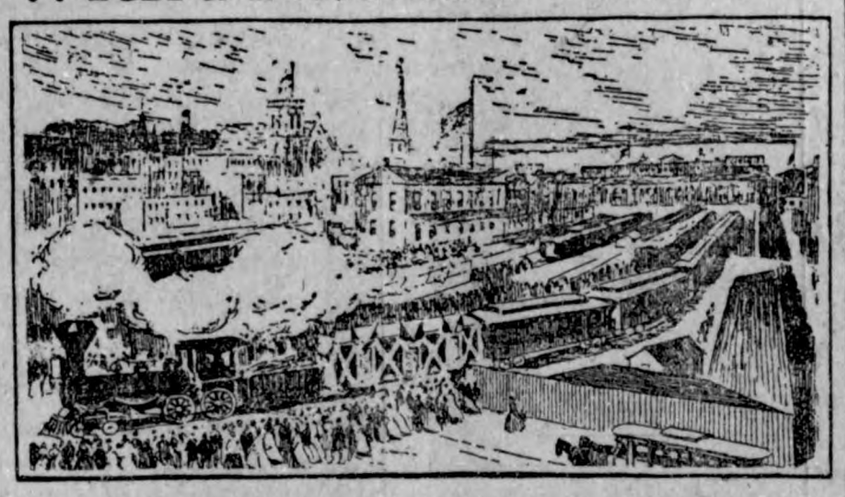
Cut Lincoln Off His List.

General Huidekoper in 1862 detailed two companies of his regiment to guard President Lincoln's summer residence. He saw the President constantly and they became real friends.

The first time the general met the President, Lincoln, who had heard that the Huidekopers came from Holland, inquired: "What is the difference between an Amsterdam Dutchman and any other damn Dutchman?"

And the general, who admired Lincoln above all other Americans, adds: "If I had had any awe of the President it was then and there forever gone."—Girard, in Philadelphia Ledger.

With a Nation's Tribute



Funeral Train of the Martyred President Leaving Washington Under Escort. [From an Old Print.]

The splendor of the ceremonials which aggrandize living royalty as much as they glorify dead heroism was wholly wanting in the obsequies of Mr. Lincoln. No part was taken by the government except the provision of a suitable military escort. All beyond was the spontaneous movement of the people. For seventeen hundred miles, through eight great states of the Union whose population was not less than 15 million, an almost continuous procession of mourners attended the remains of the beloved President. There was no pageantry save their presence. There was no tribute but their tears. They bowed before the bier of him who had been prophet, priest and king to his people, who had struck the shackles from the slave, who had taught a higher sense of duty to the free man, who had raised the nation to a loftier conception of faith and hope and charity.

HOW WOMEN AVOID SURGICAL OPERATIONS

Some Are Extremely Necessary, Others May Not Be

Every Woman Should Give Lydia E. Pinkham's Vegetable Compound a Trial First

Chicago, Ill.—"I was in bed with a female trouble and inflammation and had four doctors but none of them did me any good. They all said I would have to have an operation. A druggist's wife told me to take Lydia E. Pinkham's Vegetable Compound and I took 22 bottles, never missing a dose and at the end of that time I was perfectly well. I have never had occasion to take it again as I have been so well. I have a six room flat and do all my work. My two sisters are taking the Compound upon my recommendation and you may publish my letter. It is the gospel truth and I will write to any one who wants a personal letter."—Mrs. E. H. HAYDOCK, 6824 St. Lawrence Ave., Chicago, Ill.

A Vermont woman adds her testimony to the long line of those fortunate women who have been restored to health by Lydia E. Pinkham's Vegetable Compound, after it had been decided an operation was necessary:

Burlington, Vt.—"I suffered with female trouble, and had a number of doctors who said that I would never be any better until I had an operation. I was so bad I could hardly walk across the floor and could not do a thing. My sister-in-law induced me to try Lydia E. Pinkham's Vegetable Compound and it certainly has helped me wonderfully. I keep house and do my work and have a small child. I have recommended Vegetable Compound to a number of my friends and you may publish my testimonial."—Mrs. H. R. SHARON, Apple Tree Point Farm, Burlington, Vt.

In hospitals are many women who are there for surgical operations, and there is nothing a woman dreads more than the thought of an operation, and the long weary months of recovery and restoration to strength if it is successful.

It is very true that female troubles may through neglect reach a stage where an operation is the only resource, but most of the commoner ailments of women are not the surgical ones; they are not caused by serious displacements, tumors or growths, although the symptoms may appear the same. When disturbing ailments first appear take Lydia E. Pinkham's Vegetable Compound to relieve the present distress and prevent more serious troubles. In fact, many letters have been received from women who have been restored to health by Lydia E. Pinkham's Vegetable Compound after operations have been advised by attending physicians.

Lydia E. Pinkham's Private Text-Book upon "Ailments Peculiar to Women" will be sent to you free upon request. Write to The Lydia E. Pinkham Medicine Co., Lynn, Massachusetts. This book contains valuable information.

Mrs. George Gould, at a New York reception, was praising to a friend the toilet of a beautiful young woman nearby.

"Mrs. Blank certainly looks stunning tonight," said Mrs. Gould.

"Mrs. Blank? She isn't Mrs. Blank now," her friend answered. "Don't you remember she divorced Blank in June and she is now Mrs. Brown?"

"Oh, dear, yes," Mrs. Gould replied. "I forgot. But I'd like to know how anyone can keep in mind all the matrimonial changes nowadays. Why doesn't somebody get out a new reference book to help us," she added, smiling—"one entitled 'Who's Whose?'"

Garfield Tea, taken regularly, will correct both liver and kidney disorders.—Adv.

Delicate Discretion.

"You did not use the form 'Merry Xmas' this year."

"I avoided the 'X.' There is a time for everything, and I thought it would be as well not to do anything which might get article X mixed into the holiday picture."

If you remind another of his faults you find he is already sore on that subject.

Our idea of a speaking likeness of a woman is a moving picture showing her chin in action.

A St. Louis Woman Tells Her Experience

St. Louis, Mo.—"During my early married life I found 'Favorite Prescription' a wonderful help. At one time I was in very poor health and became nervous and irritable I took Dr. Pierce's Favorite Prescription and it was not long until I was a well woman. I certainly feel very grateful for what this medicine did for me and am glad to recommend it."—MRS. WALTER NAUMANN, 4053 Taft Ave.

Send to Dr. Pierce, Buffalo, N. Y., for a ten-cent trial package.

Supt. Wilson, of the Klemme school, occupied the pulpit at the First Methodist church Sunday. Rev. Meyer was called to Garner to take charge of the services there. Mr. Wilson's talk was enjoyed by all.

M. O. Hocum went to Gowrie, Ia., last Saturday for a visit with his parents. He returned Monday. Last week he said he went to Ft. Dodge on business but we made a mistake—he did go.

Notice—The Farmers Lumber Co., has taken over all book accounts of the Western States Lbr. Co. All owed to the old firm please call and settle. Olaf Brynteson, Manager Farmers Lumber Company.

C. M. Bredbenner was putting up ice the past week. He cut the ice from Silver White pond south of town. It was a pretty good quality considering the unfavorable weather we have had for ice men.

NOTICE—All those who are indebted to the Western States Lbr. Co. will please settle your account with the Farmers Lumber Co., who have taken over all the accounts. Call at the office.

Ben Reemstma, our auctioneer, is at Belmond today assisting Auctioneer Rankin at that with a farm sale of Theodore Bonte, residing east of Belmond. Ben is becoming quite popular as an auctioneer and has frequent calls to other towns to assist with sales.

Ye Editor has been well supplied with good smokes the past few weeks. Every time a baby is born in this vicinity the happy father hikes to the Times Office, hands over some good cigars and tells us all about the wonderful baby. Such was the case the other day again when E. C. Buntenbach came into our office and told us a fine baby girl weighing eight pounds was born to Mr. and Mrs. E. C. Buntenbach on January 15th. Elane Martha is the young ladies name.

CONDEM HIGH PRICED STOCK FOOD

Eminent Hog Raiser Says Prices Charged Are Unwarranted—Makes His Own Hog Food, With Better Results.

"That he is all through paying high prices for stock foods and hog remedies and that he is raising some of the best hogs ever placed on the market." was the statement made recently by E. H. Beckstead, well-known hog raiser and authority on live stock.

Mr. Beckstead's hogs are the envy of his neighbors, and have "topped the market" for several years in succession. He states that for years he bought high-priced hog foods and hog remedies but he is all through paying extravagant prices for what he can make himself. He states that what the hogs need are minerals, and tells the secret of his wonderful success by explaining that he takes about five pounds of ordinary mineraline (which is pure concentrated minerals and cost only a couple of dollars) and mixes same with enough bran or filler to make a hundred pounds. All hogs, and especially brood sows require minerals as they keep them free from worms, and in the pink of condition, and are essential to the hogs growth an a well balanced ration. This inexpensive mixture placed in a sheltered box where hogs can get at it as the need it, will produce far better results than any high priced so-called stock foods.

Send two dollars to The Mineraline Chemical Co., 1638 North Wells St., Chicago, Ill., and they will forward you by prepaid parcel post enough mineraline to make a full hundred pounds. Adv.-J27-F17

Ford
THE UNIVERSAL CAR

Announcement

Mr. Edsel B. Ford, President of the Ford Motor Company, gives out the following statement:

"The price of the FORDSON Tractor has been reduced from $790.00 to $625.00"

Effective Immediately

"This price change has been made possible through lower costs of material and the fact that we are now located in our new Tractor Plant with greatly increased economic manufacturing facilities in immediate connection with our foundry and machine shops and large blast furnaces where iron is poured directly from the ore, giving us maximum efficiency with the power to reduce cost of production, and down comes the price in line with our policy to market our products at the lowest possible figure without in any way effecting our high standard of quality.

"We are particularly pleased in being able to bring about this big reduction in price at this time because the farmer needs all the help we can give him and this big cut in price will be the means of placing a valuable power unit within the reach of practically every one of them, not to mention industrial and commercial concerns which likewise have benifited through its use and are already realizing, to a much greater extent, its value as a power and hauling unit. But particularly has the FORDSON Tractor proved a most valuable factor in the saving of farm labor at the same time increasing the per acre crop yield as well as making possible a utilization of previously uncultivated land, to say nothing of removing no end to drudgery.

"Their is no question that the use of machine power on the farm is the greatest advancement made in the development of agriculture, not only in money saving and money woking results, as well as raising the standards of living on the farm to a much higher level, but because of its proved value in makiog every type of land more productive, and consequently our desire to place the FORDSON within the reach of all.

"THERE IS NO CHANGE IN THE PRESENT FORD CAR AND TRUCK PRICES, which are already at the lowest possible price and now with rock bottom reached on the tractor price a further reduction in price of either the Car, Truck, or Tractor is out of the question; in fact, the big price cuts have been make in anticipation of continuous maximum production and increases may be necessary before long if a large volume of new business is not obtained. Therefore, present prices of Ford products cannot be Cuaruteed in opposition to possible increases."

News Reported By The K. H. School

(Reported by Earl E. Josten)

K. H. S. Items

We are becoming quite accustomed to the frequent visits of the local clergy. It was our privilege to hear both Rev. Buriff and Rev. Meyer last week. As Rev. Buriff intimated, we are certainly receiving our share of good advice. It is fortunate that the Ministers take such an interest in High School affairs.

The members of the Senior class delivered some "wonderful" five-minute talks Friday afternoon. They came very near to being extemporaneous "stump-speeches," through a noticeable lack of previous preparation. Strange to relate, Miss McKahan (our English teacher) lived thru it all. However, she will probably reward us by giving us another assignment of the same nature.

Rev. Meyer spoke last Friday morning on "The False Philosophy of Life." He quoted many so-called "proverbs" and explained how fallacious they really are. Some of them—he termed them "the Devil's Proverbs"—are as follows: "When in Rome, do as the Romans do"; "The world owes me a living"; and "A young man must sow his wild oats." He gave a very worth-while and helpful talk, and his hearers will profit greatly by heeding his advice.

You might be interested to learn that we went on a foreign tour Monday morning. We didn't lose any time either, as we were out of the country only twenty minutes, touring France. We learned about the railway and roads leading to the birthplace of Joan of Arc, and also some interesting things concerning the adjacent villages and chateaux. We visited this famous French maid's birthplace and early home (Domremy), and enjoyed the beauties of the surrounding country. This beautiful section of France lies in the valley of the famous Meuse river, which is, however, a very insignificant stream at this place.

Before proceeding, we must enlighten you. This trip was merely imaginary and was made with the aid of a map and a short illustrative lecture by Prof. Wilson, who was stationed in this section of the country (at Neufchateau) during much of the time he spent in France. He has several hundred pictures which he took in this district, and we are all anxious to see them, and to learn more of his experiences.

The Senior class is making life miserable for the rest of the high school this week by conducting the chapel exercises.

Grammar Room Notes

The spelling contest came to a close last Wednesday evening. The members of the seventh grade were the losers; consequently they will entertain the eighth grade by giving a party on Friday night.

Eighth grade County Examinations were held last Thursday and Friday. Fourteen pupils came in from the country to write them with the eight eighth graders here, making a total of twenty-two.

Glen Busch was absent from school on Monday.

The seventh grade was dismissed Thursday and Friday to make room for those coming from the country schools to write the County Exams.

Announcing a new method for the modern treatment of chronic diseases in general and especially for the benefit and cure of high blood pressure, auto-intoxication, kidney trouble, (Bright's disease,) diabetes and constipation. A painless guaranteed cure for piles (hemorrhoids) in any form. Diseases of the rectum and lower bowel a specialty. Dr. R. W.. Schultz, Masonic Bldg., Garner, Ia. J13tf

Watch for the "Klemme Koon Komedians". They will appear in Klemme soon. This will be the biggest fun show ever seen in this town. Watch for dates.

Obituary of Mrs. Gottlieb A. Goll

It is with deepest regret that we pen the following obituary.

Once more was the peace and joy of a happy home turned into sorrow and mourning, by the departure of a kind mother and lovable wife.

Mrs. Gottlieb A. Goll nee Schlawein, was born August 20th, 1876, in Pommern, Germany. In her infancy she received the rite of Holy Baptism and after being duly instructed in God's Word and the fundamentals of the Christian religion, she was by the rite of confirmation received into the active membership of the Lutheran church. Soon after her confirmation she came with her parents to America in 1890 where they made their new home at Garner, Hancock county, Iowa. Here, under the care and guidance of her parents, she grew into womanhood.

On February 9, 1899, she was united in marriage to Mr. Gottlieb Goll. This union was blessed with four children, Paul, Edna, Alvin and Emma.

Filled with the ambition and spirit of their ancestors to be industrious and progressive and to establish a home of their own, Mr. and Mrs. Goll soon settled on a farm in Avery township, where the Lord blessed abundantly the work of their toilsome hands.

Mrs. Goll was formerly a member of Ell Township Reform Church and later became a member of the Klemme congregation where her memory will long be cherished.

Until about a year ago Mrs. Goll enjoyed good health, but then she began to fail, and soon her condition became alarming. The best medical care was given her but all was in vain. Her nerves were wrecked and the hopelessness of her case was soon realized.

She passed away on Sunday morning, January 30th. Her age was 44 years and 5 months. She leaves her husband, four children, her aged parents, three brothers and two sisters, and many relatives and friends to mourn her loss.

The funeral services were held from the Reform church of Klemme last Wednesday at 2 o'clock, Rev. Depping preaching the services. Interment was made in Klemme cemetery.

(By Rev. A. A. Depping)

CARD OF THANKS

We wish to thank all those who so kindly assisted us during our recent bereavement. We also wish to extend thanks to those who contributed the beautiful floral offerings presented in memory of Mrs. Goll.

G. A. Goll and Children

THE SKY SEEMS TO BE THE LIMIT

The railroads continue to boost their rates in the face of a decline in other lines of business. Last week Tuesday the railroads made another raise in passenger rates. The fare from here to Garner was formerly twenty cents, now you must shell out twenty-four cents in order to ride on this dilapidated antique of a ailroad. Well now if the company would invest those extra pennies and put electric lights in the depot and out on the platform, would fix up the stock yards so the smell wouldn't go more than forty miles from here, would install running water in the stock yards so the farmers wouldn't have to pump water all night to water their stock being shipped, if they would put in cement floors in the yards so the stock wouldn't have to take swimming lessons in order to survive in the muck and dirt—then maybe we would cheerfully smile and call it a great company. The railroads seem to think that the sky is their limit when it comes to boosting rates. Everything seems to be going up and nothing comin gdown—you can blame the railroads for a lot of it. We wouldn't be a bit surprised to see express and freight rates jump some more. "There is something rotten in Denmark" as Shakespeare says.

Have you paid up your subscription to the Klemme Times? Set down and write out a check now while you think of it.

Children at the Bread Kitchens

Three and a half million children in eastern and central Europe wait, gaunt and pinched like these, at the American kitchens for the hot soup and bread that mean life to them. In the winters since the Armistice, America has been the one friend that had food to give them. It is a common sight in Europe today to see a child five or six years old whose head has not healed. With a healthy well fed baby the skull should close before two years. America must see these children through the rigors of another winter, and to that end eight great relief organizations have combined into the European Relief Council. They seek to raise $33,000,000 to save this generation of Europe from death by starvation and the diseases that come with under-feeding.

The Churches

METHODIST EPISCOPAL CHURCH

Sermons on the fundamental factors in Christian experience will mark the Sunday morning services during Lent. On next Sunday morning the subject will be "What Is a Christian?" or the foundation of Christian experience. This will be followed on successive Sunday mornings by sermons on How May I Know that I am a Christian?; the Christian life continued, or progressive sanctification; the Christian life perfected, or the Christian's goal, and others of similar trend of thought.

Subject Sunday evening, "The Call for Volunteers." Morning worship at 10:00 a. m.; evening worship at 7:30 p. m.; Sunday School at 11:00 a. m. There were 185 at Sunday School last Sunday in spite of the storm, but there is still room for you.

A. E. Buriff, minister

FIRST METHODIST EPISCOPAL CHURCH

Preaching service Sunday morning at 10 o'clock.

Sunday School at the close of the preaching service.

There will be no service in Town church Sunday night.

Epworth League in Liberty Township church Sunday night at 7:30 and preaching service at 8 o'clock.

Midweek prayer service on each Thursday evening.

There has been a splendid attendance at church service and Sunday School. Let's keep it up.

A. H. Meyer, Pastor

A LIVELY CONTEST

The Sunday School at the Methodist Episcopal church has been divided into two sections, a Red and a Blue. Each class has a captain. The idea of the contest is "a trip to the Panama Canal." Each section has a "special train" on a chart and each Sunday the train of each side is moved ahead according to which side has gained the most points (members present each Sunday). They are going on their third week of the contest and last Sunday the Blue side was about one hundred and seventy miles ahead of the Red train. However, the Reds claim they will get to the Canal, spend a week's time fishing there and meet the Blue train on their way home. The losers will eat crackers and cheese with a glass of water. The winners will eat a royal banquet consisting of sandwiches, pickles, ice cream, coffee, "hot dogs," or any other variety of choice food they wish to choose.

NOTICE TO CATTLE OWNERS

I will pasture cattle on my ranch seven miles west of Klemme through the season of 1921. Call on me to give your order and number of cattle in time before pasture is filled. A. C. Lau, Klemme, Iowa. F3-24c.

Farm Sales

EMIL LAU'S FIRST DUROC JERSEY SALE

Emil Lau, a hustling young farmer of Klemme, will hold his first Duroc Jersey hog sale next week on Thursday, February 17th. Emil is using a half page ad in the Times this week to tell the farmers of Klemme and vicinity what he has to offer in fine hogs. Emil believes in using a lot of prners ink nd so accordingly had us order for him a quarter page advertisement at each of the following towns: Garner, Britt, Kanawha, Belmond and Meservey. He is after the business and we predict that he will make good in the Duroc Jersey line. Look over his half page ad which you will find elsewhere in this issue and see what wonderful animals he has to offer at the sale.

Wm. Bachman was a business caller at Garner between trains Monday morning.

C. I. SCHAPER WILL HAVE CLOSING OUT SALE

In this issue of the Times we are advertising in a half page space the closing out sale of G. I. Schaper which will be held at his farm west of town on Wednesday, February 16th. Read over the ad and see what he has to offer in the way of stock and machinery.

OTHER SALES NEXT WEEK

In this issue of the Times you will find several large sale ads. Wermerson & Dexter will have a large sale on their farm 7 miles west and 1 mile north of Klemme on Wednesday, February 16th. 107 head of Live Stock, together with a lot of machinery, is offered at this sale.

C. Rasmusson & W. M. Kester, of Garner, have an ad in this issue of the Times telling about the big Duroc Jersey sale they will hold at Garner on Saturday, Feb. 19th. They are offering 32 head of tried sows and gilts. Farmers interested in high class hogs should look over this ad.

SALES ARE GOING GOOD

Farm sales the past two weeks have been going good. For a time it was thought that stuff would sell for almost nothing but that is not the case. Well advertised sales the past week or wo have brought a large number of good buyers who paid prices that were as good as any paid at sales last year. It pays to advertise a sale and use plenty of space in the newspapers—the farmers who have had successful sales will back this statement.

We were rumaging around the other day a Carl Beiers garage and we found Geoge Lwhorn at work under a car. We inquired why he was performing an operation on an innocent car and he told us he was working there nw. George joined the force at the Beier garage two weeks ago in the capacity of a mechanic.

Avery Township News

Wava Bachman was a visitor at the Hartfelder school last Friday.

Henry Helps and son shelled corn for Edd Rooks Friday.

Wyne Bachman and Dorothy Hoffman were absent from school a few days last week.

Mr. and Mrs. John Bachman and children were Sunday visitors at the Chas. Fritzel home.

Miss Myrtle Bell spent from Monday until Wednesday at Titonka with old friends.

Kathrine Willie left Wednesday evening for Ventura, where she will visit with friends.

Fred and Russell Bell, Ernest Helps and Arthur Bachman assisted Martin Jensen in driving his cattle to town Saturday afternoon.

Martin Jensen shipped two carloads of cattle to Chicago Saturday. Ernest Helps is doing his work during his absence.

Liberty Township News

The Standard Bearer Society of the M. E. church will meet next Friday evening, the 11th, at the church. All the young people of the community are invited.

A monthly meeting of the American Alliance was held in the center school house last week Wednesday evening. Mr. Quist and Mr. Halstead were the principal speakers.

A large number of the farmers of this community attended Gilbert's sale near Garner last Thursday. The good weather brought a large crowd there and things sold exceptionally high.

Misses Mildred Anderson and Emma Dexter went to Cedar Falls last Friday to visit some of their girl friends of this locality who are attending the State Teachers College there. Perhaps they also intended to visit some boy friends; we cannot say

The center school has been holding school on Saturdays. We presume they are making up time so as to get out earlier in the spring. Some of the pupils are opposed to this system. They probably think that they are entitled to one day each week to have to themselves and we believe that most people will agree with them.

We are again reminded of winter by having the pleasure of plowing through a foot of snow. It looks as though February is making up for that part of winter that January lost never-the-less let's believe that February is the best month of the year until March comes.

BASKET SOCIAL WAS BIG SUCCESS

The basket social and program held at Miss Annetta Schuldt's school last Friday evening was a big success in every way. The program, a farce entitled "Jumbo Jum" was a scream. The basket sale brought in $86. The highest priced basket brought $8 and was sold to our townsman, Ed Jacobs. Ben Reemstma auctioneered the sale. All report a big crowd and a big time.

Sleighing is nw fine, the best we have had this year. Sunday it snowed hard nearly all day. Tuesday it snowed again so this part of Iowa at lest has enough snow to last the balance of the season—unless our famous California weather takes a come back again. Maybe friend Ground Hog is taking advantage of us now and is giving us six weeks more of winter weather because he had plenty of opportunity to see his shadow last week on the 2nd day of February.

"THE MISLEADING WIDOW"

A Rhymed Review by Russell Holman

Mrs. Betty Taradine
Quite upset the town,
Scandalized the minister,
Made the neighbors frown.

Betty had such lovely ways;
Captains loved her so!
Butchers, grocers, laundrymen
Clamored for their dough.

Where was Mr. Taradine
All this joyous time?
"Must be dead," said Betty,
"Haven't had a line."

Such a lovely widow!
Fairest of the queens!
'Til a chap named Rymill
Up and spilled the beans.

Happens in the movies;
Billie Burke's the star.
Bring along the missus;
Spread the news afar.
IDLE HOUR THEATRE,
SATURDAY, FEBRUARY 12

MISS GRETCHEN BLANK AT ROCHESTER HOSPITAL

Miss Gretchen Blank, who was taken to the hospital at Belmond a couple of weeks ago to undergo an operation was taken to Rochester, Minn., hospital one day last week where her case could be more successfully treated. We understand she will be given a radium treatment there for her trouble. Her many Klemme friends hope for her rapid recovery and that she may regain her health so that she may soon come home again.

Mr. U. G. Smid returned from Illinois last Thursday. He went there a couple of weeks ago, being called there by the death of his brother John. He remained there a while visiting relatives and friends.

COMING, FEBRUARY 18th
At The Idle Hour Theatre

At Eight O'Clock P. M.

ASPIRIN

Name "Bayer" on Genuine

Beware! Unless you see the name "Bayer" on package or on tablets you are not getting genuine Aspirin prescribed by physicians for twenty-one years and proved safe by millions. Take Aspirin only as told in the Bayer package for Colds, Headache, Neuralgia, Rheumatism, Earache, Toothache, Lumbago, and for Pain. Handy tin boxes of twelve Bayer Tablets of Aspirin cost few cents. Druggists also sell larger packages. Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid. —Adv.

His Feelings.

Figg—What do you do when your wife tells you about her first husband?

Fogg—Envy him!

Civilization will almost reach its apex when every bedroom has its bathroom.

All Set.

Bertram, age eight, was begging his mother to give him some coffee. He had asked for it about nine times, and finally his mother said: "Bertram, the next time you ask me for coffee I'll slap you."

The little chap waited for about five minutes and could stand it no longer, remarking: "Mother, get ready to slap me."—Indianapolis News.

The Supreme Test.

Deacon Gildrow says that if a man loves a woman well enough to cheerfully write a check in payment for her new fall suit, though he knows it means that he will have to make his old overcoat do another winter, it is safe to marry her.

And Mrs. Deacon Gildrow says that if you love a man well enough to think you would like to see the floor of the closet littered with old shoes it will be perfectly safe to marry him.—Houston Press.

Fifty-Fifty.

Ward's latest collection in the dog line was a young puppy which his father compelled him to put in the barn for the night.

It wailed the whole night through and next morning Ward's father said indignantly: "Ward, you get rid of that pup. It howled all night and I did not get a bit of sleep."

With eyes full of indignation the little boy replied: "Well, papa, you got as much sleep as the pup did."

Important to all Women Readers of this Paper

Thousands upon thousands of women have kidney or bladder trouble and never suspect it.

Women's complaints often prove to be nothing else but kidney trouble, or the *result* of kidney or bladder disease.

If the kidneys are not in a healthy condition, they may cause the other organs to become diseased.

You may suffer pain in the back, headache and loss of ambition.

Poor health makes you nervous, irritable and may be despondent; it makes any one so.

But hundreds of women claim that Dr. Kilmer's Swamp-Root, by restoring health to the kidneys, proved to be just the remedy needed to overcome such conditions.

Many send for a sample bottle to see what Swamp-Root, the great kidney, liver and bladder medicine, will do for them. By enclosing ten cents to Dr. Kilmer & Co., Binghamton, N. Y., you may receive sample size bottle by Parcel Post. You can purchase medium and large size bottles at all drug stores.—Adv.

Window Shopping.

"Why do you stare so at that fur coat?"

"That's the one my husband is going to give me."

"Eh?"

"When fur coats are cheaper."

There is nothing heavenly about war, or dyspepsia. The world is outgrowing the first and Garfield Tea will conquer dyspepsia.—Adv.

Too many men make strenuous efforts to get a liberal share of something that doesn't belong to them.

Diligence is the mother of good fortune.

ST. LOUIS, MO.—"I have taken Dr. Pierce's Favorite Prescription for general weakness and when rundown and suffering with nervousness, and can truthfully say it has done me more good than any medicine I have ever taken, and I find Dr. Pierce's Pleasant Pellets very good to regulate the system. They aid very much in keeping a person in a good healthy state."—MRS. AMELIA THORN, 4204 John Avenue.

At all first-class drug stores.

FARM STOCK

HOG-CHOLERA LOSS REDUCED

Estimated Saving of $6,000 to Farmers of Alabama County Brought About by County Agent.

Losses by hog cholera have been materially reduced in Bullock county, Alabama, as a result of the work of the county agent in training farmers in various centers throughout the county to use the serum and apparatus developed by the United States Department of Agriculture. Forty-nine cars of

Vaccinating a Hog for Cholera—Don't Run Risks or Waste Feed With Unhealthy Live Stock.

hogs, 3,928 head, have been marketed from the county through co-operative work, with an estimated saving of $6,000. In Houston county the department's representative taught 18 men to vaccinate hogs. Six sets of instruments owned by the Dothan Rotary club were supplied to the demonstrators and a serum-distributing point was established in charge of a reliable veterinarian. More than 9,000 head of hogs were treated. In many cases it was found that sickness, other than cholera, was due to some incidental cause, such as bad peanut meal, and balanced rations were advised. The county agent's work resulted in 32 farmers establishing pastures to keep their hogs off the open range, the land thus pastured being freed from many noxious weeds by the rooting of the animals, and prepared for future cultivation. Forty-four farmers in the county were interested in stump removing, and about 2,000 acres of land was cleared in this movement. About five tons of dynamite was bought for the purpose largely on the co-operative plan.

FEEDING GARBAGE TO SWINE

Practical Means of Producing Pork, According to Department of Agriculture Bulletin.

When properly managed, the feeding of garbage to swine is a practical means of pork production, according to Farmers' Bulletin 1133 issued by the United States Department of Agriculture.

In addition it helps to settle a problem which confronts many cities and towns—that of effective and economical garbage disposal. The wholesomeness of garbage depends greatly on the care it receives in households. Tin cans, glass, paper, oyster shells, sawdust, soap, and other foreign materials when mixed with garbage may cause numerous losses of hogs. But it has been found that this evil can be minimized by proper precaution and published requests to householders to be careful.

Immunizing of hogs is necessary to prevent hog cholera and frequent collection is urged to keep the feed fresh. Copies of the bulletin may be had free by applying to the United States Department of Agriculture.

SEGREGATE ALL NEW ANIMALS

Wise Plan to Place Recent Purchases in Quarantine for at Least Twenty-One Days.

The proper and only safe thing to do with the recently purchased animal is to place it in quarantine upon its arrival. Better keep it there not less than 21 days at least. This enables you to keep a careful watch over the animal at all times, and to determine that the animal is healthy, and in case there should be any disease, it would not be carried to those animals already on the farm.

SUPPLY PIGS PLENTY WATER

Young Porkers Drink Often and in Small Quantities—Non-Freezer Is Very Useful.

A pig likes to drink water often and in small quantities. It drinks water the same as it eats feed—a little at a time and often. That is why a non-freezing waterer and a self-feeder for grain are so very valuable in the hog lot.

NATION IN DANGER

Farm Abandonment Has Created Most Serious Situation.

Food Supply Threatened Through the Drift of the Population to the Cities—Now Is Great Opportunity to Take Up Land.

The question, "How is the country to be fed if the population continues to drift to the cities?" is one that should create an agitation that will bring about a reply that will mean a solution. The census, recently completed, reveals a situation truly alarming, one that has never been known in the United States before. The urban population is now greater than that of the rural districts by about 4,000,000. Cities and towns, each with more than 2,500 inhabitants, contain 54,318,032 persons, or 51.4 per cent of the total population, while the farms and smaller towns together claim only 51,399,739 persons, or 48.6 per cent of the total.

As is pointed out by an influential Chicago daily, "the drift to the cities is thus proved and reduced to figures, showing a top-heavy condition of the industrial life."

Farming is and must remain the basic industry of the world, and certainly should remain the basic industry of a nation with a continental area like ours. It is small profit to gain the markets of the world with manufactured goods if agriculture has decayed so badly as to furnish an uncertain subsistence for our people, and fluctuating crops are reflected in price changes that upset the economic life of the country. Yet we are within measurable distance of that condition, if the present or recent drift toward the cities continues.

Most writers on this topic take it for granted that young folks go from farms to cities merely to make more money. Doubtless that is something of a motive at all times and was a very strong one in the period immediately after the war, when city industries paid wages totally impossible for farmers to rival.

It is hoped that this drifting has reached its apex. Unless it has, and there still remains a possibility of its continuance, the effect cannot be foretold. The great wave of manufactures for war purposes has ceased, and with it the number of those employed in factories is diminishing by thousands daily. It is therefore hoped that there will again be heard the slogan, "Forward to the Land." If prices to which farm land has reached are prices prohibitive to many, the opportunity is still open elsewhere. There are states possessing large areas of good land that may still be had at prices within the reach of many, and it is doubtless true that in self-preservation it will be necessary to bring these lands under cultivation. The prices are not high, considering their value. Then, too, there are the lands of Western Canada, that hold out an inviting prospect. Reports from there show that the prosperity of the farmers there is not mythical. Farming there is conducted on scientific principles, and the climate is such as appeals. The production amply repays all the expenditure that may be made. The social conditions are of a character that make farm life a pleasure, and tends to keep the young man and young woman from pining for urban life with so many drawbacks. If conditions as above mentioned, showing such a large percentage of population in the cities and towns, continues, they will require food. The opportunity to supply it is by the means suggested. Go forward to the farm, become independent, and become a factor in supplying the world's needs in cattle, sheep, grain and such other commodities as the farm will produce and the resident of the city requires.—Advertisement.

A Good Many Like Him.

Catarrhal Deafness Cannot Be Cured

by local applications, as they cannot reach the diseased portion of the ear. Catarrhal Deafness requires constitutional treatment. HALL'S CATARRH MEDICINE is a constitutional remedy. Catarrhal Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result. Unless the inflammation can be reduced, your hearing may be destroyed forever. HALL'S CATARRH MEDICINE acts through the blood on the mucous surfaces of the system, thus reducing the inflammation and restoring normal conditions.

CUPID'S OWN DAY

Fourteenth of February Belongs to Him Alone.

Anniversary Brightens the Drab Month With Memories of the Past and Joy of the Present.

Brightening the dull, drab month of February and doing their very best to cheer up and bring love into our hearts, the valentines—the valentines smile at us with their lace-and-forget-me-not daintiness from the shop windows.

There are elaborate "millionaire" valentines of celluloid and blue ribbons that come in big lace boxes, like French dolls; there are valentines that when pulled out like an accordion become Cinderella coaches of cardboard, laden with Loves and Venuses and Cupids. Others resolve themselves into airy pink-and-blue palaces—you never know—peopled with delightful goddesses and doves.

But the best and most sincere, perhaps, are the old-fashioned valentines—vistas of foamy paper lace, through which you look upon hearts redder than lovers' lips, in a prospect of violets and forget-me-nots. And hidden away, like a billet doux in a bouquet, a little verse:

This heart, sweet love, I send to you,
Together with these violets blue;
And if you like this heart of mine,
I pray you be my valentine.

Could anything be more simple or direct to the point? As unerringly as Cupid's darts or a beau's rapier, the verse carries its message home. It may be that the Elizabethan lyrics, the love songs of Herrick and Lovelace and Suckling, survive today only in the valentine.

And, ah, what memories these harbingers of love bring with them! They lead us back along the columbine-bordered road to yesterday, over the asphodel meadows of Youth and First Love and Childhood Fancies, and we meet and kiss our first sweethearts again—alas, they have gone out of our lives these many years.

And so, dear little Valentine, accept these violets and forget-me-nots, and hug this message close to your heart—for surely a sweetheart is the sweeter for a valentine, and, as all wise men know, 'tis love that makes the world go round.

GOOD OLD SAINT IN TROUBLE

Embarrassed by Shower of Hearts, Though It Would Seem He Should Be Used to It.

St. Valentine slyly
Put up his umbrella.
"This shower of hearts
Would embarrass a fellow.

"I'm glad that I manage it
Once in a year.
Exercise is the thing
Hearts are needing, I fear.

"While many are beating,
They're all out of tune,
And cold as December
Instead of warm June.

"So I'll mix 'em and change 'em
And warm 'em up, too."
I wonder if he'll fix
Your heart up for you?

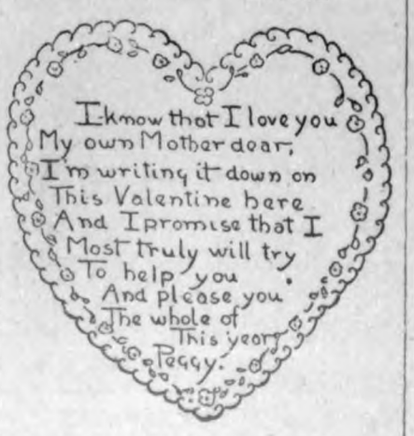
Valentine Challenge.

One form which the observance of Valentine's day took in England was that of a person's valentine being the first young man or woman that person saw on Valentine's day. This developed into the custom of challenging one's valentine by saying, "Good morrow, 'tis St. Valentine's day." The one who said it first upon meeting a person of the opposite sex received a gift.

Interesting Valentine Reading.

Interesting reading for Valentine's day is Dickens' account of Samivel Weller's laborious writing of a valentine to his housemaid love, signed "Your lovesick Pickwick."

TEDDY'S VALENTINE



WRIGLEY'S

"After Every Meal"

Everywhere

All over the world people use this goody for its benefits, as well as its pleasure.

Keeps teeth clean, breath sweet, throat soothed.

Aids appetite and digestion.

Sealed Tight — Kept Right

SEES HIMSELF IN SPOTLIGHT

Bachelor Is Naturally Wondering if That Is How the Ladies Really Regard Him.

A Terre Haute bachelor stopped at a friend's house the other night to get him to accompany him to a community meeting. The friend was a "much married" man and his spouse did not wish him to go to the lecture. So she told her husband so.

They were in the next room and her husband was afraid the bachelor might hear her and he did not desire for the other man to think that he was so henpecked. So he raised a warning hand at his wife. But she continued in a voice louder than ever. "I don't care if he does hear. If there's anything that makes me tired it is some old bachelor going around cluttering up the earth."

The bachelor was startled. What he wants to know now is whether or not all women regard him in the same light.—Indianapolis News.

Bootlegging, Perhaps.

Stranger—I hear the police have been investigating in this vicinity. Did they find anything?

Urchin—Yes, dey fined me fader $10.

We bow to the inevitable, but make a face over it.

FURTHER USE FOR RADIUM

Its Employment in Pottery Is Said to Be Productive of Results of Great Benefit.

Water containing radioactive compounds is used as a curative agent for certain illnesses. Mere contact with such compounds for a sufficient length of time will make water slightly radioactive.

Pottery is now manufactured which has in it a small percentage of radioactive material. This is mixed with the clay and baked in the kiln. Water left in pottery of this nature for a short time will become radioactive by "induction," and a health-giving drink is made.

Such water may also be employed in the watering of plants with good results, since the presence of a radioactive compound near the roots of a plant is very helpful to its growth.—Popular Science Monthly.

Eyes Occupied.

First Constable—Did yer git that feller's number?

Second Constable—No, he was too golderned fast fer me. That was a perty lookin' gal in the back seat, wasn't it?

First Constable—She shure was.—Hum Bug.

CONDEM HIGH PRICED STOCK FOOD

Prominent Hog Raiser Says Prices Charged Are Unwarranted—Makes His Own Hog Food, With Better Results.

"That he is all through paying fancy prices for stock foods and hog remedies and that he is raising some of the best hogs ever placed on the market." was the statement made recently by E. H. Beckstead, well-known hog raiser and authority on live stock.

Mr. Beckstead's hogs are the envy of his neighbors, and have "topped the market" for several years in Iowa. He states that for years he bought high-priced hog foods and hog remedies but he is all through paying extravagant prices for what he can make himself. He states that what the hogs need are minerals, and tells the secret of his wonderful success by explaining that he takes about five pounds of ordinary mineraline (which is pure concentrated minerals and cost only a couple of dollars) and mixes same with enough bran or filler to make a hundred pounds. All hogs, and especially brood sows require minerals as they keep them free from worms, and in the pink of condition, and are essential to the hogs growth an a well balanced ration. This inexpensive mixture placed in a sheltered box the hogs can get at it as they need it, will produce far better results than any high priced so-called stock foods.

Send two dollars to The Mineraline Chemical Co., 1638 North Wells St., Chicago, Ill., and they will forward you by prepaid parcel post, enough mineraline to make a full hundred pounds. Adv.-J27-F17.

Overland

TRADE MARK REG.

New Riding Qualities

OVERLAND 4 is a new type of car. It sets a new standard for light car riding COMFORT. Its three-point suspension TRIPLEX springs are unquestionably the most important in motor car riding qualities since the introduction of pneumotic tires

They not only make riding easy, they guard equally the mechanism of the car from the shocks of the road, prolonging the car's life and greatly reducing the costly wear and tear of upkeep.

By thus shielding the mechanism, they make possible very light weight construction, permitting highest QUALITY in every part without excessive cost. Light weight in turn shows great ECONOMY of fuel and tires.

Thus Overland 4 combines in a remarkable way the comfort and luxury of the heavy expensive car with the economy and convenience of the light weight car. Its springbase is 130 inches, yet its wheelbase is only 100 inches. It turns around in 33 1-2 feet. It rides well on any road. Its equipment is COMPLETE from demountable rims to Auto-Light starter, lights, and horn.

Its extraordinary qualities were tried and proved by two years of tests covering more than 250,000 miles under every extreme of climate, altitude and road condition.

The longer you ride in it, the better you like it.

The narrow selfishness becomes intelligent selfishness, with realization that under true co-operation each always gets more than he gives.—Murray Springer in Forbes Magazine.

Memorial to Norsemen.

Nearly five centuries before Columbus sailed to America, according to some historians, a party of Norsemen landed on the northeastern coast of the continent, and a few years later established a colony. As a memorial to these early explorers a rough stone tower has been erected at Auburndale, Mass., a town that is believed to occupy the same site as the legendary settlement. Investigation has failed to reveal any traces of building ruins in the vicinity, but has resulted in the finding of several old stone walks, which are thought to have been constructed by the inhabitants of the ancient village.

Strength in Faith.

It is the man or the woman of faith, and hence of courage, who is the master of circumstances, and who makes his or her power felt in the world. It is the man or the woman who lacks faith and who as a consequence is weakened and crippled by fears and forebodings, who is the creature of all passing occurrences.—Exchange.

Inevitable.

"They say that Washington never told a lie," ruminated the Red Chevronite, "but I don't believe it possible. Why, look here, when he got his discharge somebody was bound to ask him to tell about his war experiences, and—

"No, sir. Washington just must have lied some."—The Home Sector.

His Modest Wish.

"Brudder Bosanko, how much y'-all gwine to tax me for de use o' dat new black swing-tail coat o' yo'n for a couple o' days?"

"What yo' want wid that coat for a couple o' days, sah?"

"Muh wife died yiste'd'y, sah, and I aims to enjoy a short mou'n."—Kansas City Star.

Hard Luck, Indeed.

The new baby brother was sleeping and Mary Elizabeth had been chided several times for playing and laughing rather noisily. "O, dear," she grumbled, "since that baby came I can't even whisper laugh."

Skies Foretell Weather.

A deep-blue colored sky, even when seen through clouds, indicates fair weather, while a growing whiteness indicates an approaching rain.

MADE HIS POSITION PLAIN

Visitor Bound to Notify Big-Game Hunter That He Would Not Accompany Him.

He was a big-game hunter and he had inserted an advertisement in a morning paper asking if any man would accompany him to central Africa to shoot lions, rhinos, hippos, etc., the said companion to bear half the cost of the expedition.

Late that night or, rather, at 2 o'clock the next morning, his household was awakened by a violent ringing of the front-door bell and a man was admitted who, to put it mildly, appeared to have been wining.

"Look here," explained the visitor. "I read your 'vertisement this mornin' and I was bound to come to you."

"Well?" queried the hunter, "It's a bit late to talk business, but will you accompany me?"

"'Company you?" retorted the visitor. "No, shir. I called to tell you I'd shee you hanged first."

Spirits.

Little Harold one day overheard a discussion upon the subject of "spirit" seances, which aroused his curiosity. Some time afterwards, his uncle came to stay a while.

"Oh, Uncle Henry," said Harold, "when you go to the next seance, will you take me with you?"

"Seance?" exclaimed his uncle. "Why, bless you, I'm not a bit interested in such nonsense."

"That's strange," answered his nephew, "because I heard mamma say you were fond of spirits."—Edinburgh Scotsman.

Fascination of Mendacity.

"Ever read Aesop's fables?"

"You mean the stories in which the animals are supposed to talk?" asked Senator Sorghum.

"The same."

"Yes. I've read 'em. Aesop was a smart man. He realized it was almost impossible to interest the public in a simple statement of honest truth without mixing it in with some gilded and fantastical whopper."

Complications.

"What was the trouble with your singing society?"

"It was a fine society," replied Jud Tunkins, "but the singing was hard to regulate. The wealthy and influential members we depended on to keep it going all happened to have poor voices."

Appropriate.

"So you graduated from a barber college. What is your college yell?"

"Cut his lip, cut his jaw, leave his face. Raw, raw, raw!"—Florida Times-Union.

Bred Sow Sale

Pure Bred Duroc Jerseys

At West End Garage, Garner, Iowa

Saturday, February 19th

Sale to Commence at 1:30 o'clock

32 Head Tried Sows and Gilts

While this is a purebred sow sale we wish our farmer friends to understand that we are anxious for them to attend. THE FAIRY GODSON

By MARY ISABEL BOYNTONE

(©, 1920, by McClure Newspaper Syndicate.)

For years Jane Judson had lived "on the tail-end of nothin'," as one of her neighbors expressed it, and might still have contrived to keep her old home if, on her seventieth birthday she had not fallen down the cellar stairs and broken her leg. Then, with no money and nobody to take care of her, it was generally agreed to be the sensible thing for her to go to the Old Ladies' home in Dixville.

The interest on the mortgage on her home being considerably in arrears, Deacon Small promptly foreclosed, donating fifty of the one hundred dollars necessary for her admittance to the institution, the neighbors contributing the other fifty, and in September Jane became an inmate of the home.

Of course it was the "sensible" thing to do; nobody realized that more than Jane herself; only for the kindness of her old neighbors she must have gone to the poorhouse. But oh! how her old heart ached for the weather-beaten old house where she had gone as a bride; where Billy, her only baby, had been born and died; where, later, her husband had died; the spot where all her memories had once had life.

Two graves there were just outside the "south pasture lot," under a huge maple tree, where a dozen times a day as she went about her work she could see them. As she sat in her little room—they gave her a small room, she was so little and fragile she could fit in anywhere—she saw in imagination the leaves turning to gold and red and russet, and then falling—falling gently as tender thoughts on the dust of the two who had lain there so many years.

Everyone was kind to Jane, but it was such an impersonal, sort of professional kindness it left an ache in her lonely heart; but she never complained, and Miss Boggs, her tablemate, often reminded her of how thankful they all should feel to be in "the place where Providence had seen fit to place them." Miss Boggs spent many miserable hours in being thankfully resigned.

When spring came Jane spent long hours gazing in the direction where, sixteen miles away, she knew her beloved home was. In imagination she saw the buds swelling on the maple above the roof; saw the lilac bushes turn from brown to green; saw the tulips and daffodils pushing their tiny heads out of the brown earth by the kitchen door. She was fortunate to have food and clothes, and a roof over her head, but these things alone never made a home.

Then came the event, so great an event that it shook the home to its very foundations. The great limousine rolled majestically up the modest drive and, coming to a stop before the front door, disgorged a big man with flaming red hair showing from beneath his glossy silk hat, and with merry Irish blue eyes, and under whose tread the steps fairly trembled. He asked in a booming voice for Mrs. Jane Judson, and Jane, big eyed and wondering and a little trembly, came.

"Don't you know me?" the big man boomed. "Timmie Duanne, the little red-headed devil (Mrs. Boggs, listening behind the door, gasped) who lived on the poor farm, and you helped out of many a scrape? The boy who never knew home nor father or mother, only what you gave him? I run away and I've lived in wild times and wild places, but the memory of you kept me clean and decent. I struck it rich—in oil—and I come back to let you know the black sheep had grown some white wool, and I find you here!"

"Timmie Duanne!" the old woman cried. She tottered and he caught her in his arms, kissing the silvery hair as he swung her clear from the floor in his strong arms.

"Timmie Duanne himself!" he cried. "I came back a week ago, and I've bought the old place back and it's ready and waitin' for ye. Even the old cat is there. Nobody could catch him. He's thin—but alive. Got down to his ninth life, I guess, but we'll feed him up! There's salmon and cream in the larder for him. Hurry, get your belongin's, Mother Jane, and we'll go home. When I come home for my vacation every year, you've got to squeeze me in somewhere, for sure we belong together!"

It was like a dream riding along in the swiftly purring car, with one fragile hand held close in the big fist of Timmie Duanne, and when at last the old gray house came in sight it was through a mist of happy tears that she saw it. It was quite unchanged, as she wished it, only fresh and sweet from recent scrubbing.

Jane sat before the open fire—for there was a chill in the air—in the old rocking chair with its patchwork cover that she had made herself, and the cat, thin but contented, purred on her lap, Timmie came in softly and knelt beside her chair.

"This is the happiest day of my life!" he said, and his big voice was soft and tender. Mother Jane reached out her hand and let it fall gently on his head.

"Heaven can hold little better for me," she said happily. Then with a sobbing little laugh: "I've heard often of the fairy godmother, but, Timmie Duanne, you're the first fairy godson I've ever heard of!"

Size of Humming Bird.

When a humming bird is stripped of its feathers it is no larger than a bumble bee.

HER MISTAKE

By IRENE E. HAYES.

(©, 1920, by McClure Newspaper Syndicate.)

Alicia and Caroline were quarreling about a man. It was ever thus when there were newcomers—male ones—in Silverwaters. As for the men, well, it depended on whom they saw first. It seemed as though Alicia were to be victor this time, since, as she maliciously told Caroline, Mr. Barton was to spend the coming week-end with her folks.

Alicia Grant was a statuesque blonde. She gave one the impression of being ever cool and unrumpled. Caroline was of the tawny type—red golden hair, Carmen complexion, temper and all. Betty Murray was their go-between in quarrels, besides an effective foil for their respective charms. From childhood it had been so. Betty's home, appropriately enough, separated those of her two friends, and like theirs, the lawn sloped to the river from which the town derived its name.

"I do wish I weren't so plain!" Betty wanted to compete in this particular affair. She had seen Mr. Keene Barton's picture, and for one solid week had listened to his praise as sung by Alicia. Heretofore the victims had never appealed to her as being real, worthwhile men. But now—why, Mr. Barton had just the right kind of wavy black hair, the ideal chin and nose!

Still there were possibilities. It was a dear little heart-shaped, rosy flushed face peeping at her from the mirror. The velvet blue eyes could look almost satanic and the nose was saucily tilted, the mouth deceitfully demure.

"There are no homely women in the world, only those who do not know how." That quotation inspired her. "I'm going to the city."

Having no family to say her no, only a grandparent who always said yes—she did go. If I should enumerate the things she bought you might get the impression that she was going to partake in some theatricals.

No sooner had she returned than Alicia phoned. For a moment her plans seemed all for naught.

"News, Bets, dear. Dad has sent word that Mr. Barton will arrive tonight instead of tomorrow! His things are here now."

"May I come over and size him up by his trunks?" Betty's voice sounded gay over the wire."

And another inspiration came to her during the examination of the stranger's luggage.

"Oh, Liccy dear, lend me your new bag; mine is too shabby to take with me when I go to cousin Sue's." The bag was brought and Alicia thanked.

"And now I'll be going. I hope Mr. Barton will prove the man his trunk indicates." With this enigmatic remark she was gone.

Living alone with only a grandparent has its compensations, especially when one wants to be alone.

"Grampie, dear, let me fix you a nice something and tuck you up for a sleep." "Grampie" fell into the trap neatly.

You'd think she was expecting some intimate caller to see her preen when once alone in her room. She donned the flimsiest of negligees—the kind they wear only in the movies—all ribbons and lace and rosettes. Moreover, she used one of her recent purchases—an eyebrow pencil.

It was perhaps 10 o'clock when the door bell rang. Betty received the unexpected caller, who, when he could, apologized.

"I'm awfully sorry to intrude—but—" It transpired then that Betty had taken his bag by mistake.

"What a lot of trouble I've caused you." She was blushing most charmingly. He was watching a little curl try to kiss a dimple near the moist red lips. Ah! the attempt had been successful. Betty brushed the audacious thing away.

"I'm afraid I'm keeping you from your beauty sleep."

"Oh, beauty sleep! Early morning dips in the river are so much more beneficial. Don't you think so?" The dimples winked.

Keen Barton evidently thought so. At any rate, he was "Johnny-on-the-spot" next morning.

"Yes, I enjoyed my swim." In answer to Alicia's query at breakfast later.

"Fibber," he hadn't been in the water any longer than it took to swim to the Murray landing place. Alicia became uneasy—he wasn't responding to her smiles.

The reception that evening was a very brilliant occasion. Alicia wore an artistic black gown. Caroline—well, Caroline was a Cleopatra for gorgeousness.

"I wonder why Betty came in her grandfather's old barouche when the machine—Oh, look, Liccy, who's that with Mr. Barton?"

Could this pansy-eyed imp be Betty? This pink-clouded butterfly with the tantalizing dimples? Betty herself reassured them.

"Mr. Barton and I have met before." They exchanged smiles.

Wise little Betty to prefer the slow carriage to the more modern car. "The longest way round is ever the shortest way—"

"You see"—Betty finished her confession to Barton while he held the hand adorned by his ring—"I had to take a chance on your coming for the bag yourself."

"Not so much of a chance"—he kissed the flirtatious dimple—"I had seen a group picture of your two friends—and you."

Income Tax Returns

Once more we are prepared to help onr customers with their income tax returns.

Blanks should be in by March 15th, and we will appreciate it if you will come in and have the returns made out as soon as you can.

Last year so many pnt it off until the last week before the returns were due, that it was hard to give all the excellent service we try to give at this bank at all times.

First National Bank
KLEMME, IOWA

Service to Customers

It has always been our policy to help customers save money, avoid waste and get complete satisfaction in the purchase of all building material. When they tell us there plans we tell them how to buy economically and what to use. When their plans are indefinate, we frequently make suggestions that suit the need.

Our Customers Are Friends

because we are friends to them first, last and all the time. With a high quality for a fair price guarnteed, profits take care of themselves. Come in and get acquainted.

NORTHERN LUMBER CO.
BUILDING MATERIAL

Ede Fur Coats--

Prices cheaper than
A good Cloth Coat

EDE LIFE TIME GUARANTEE

Have that hide or fur converted into a beautiful Fur Coat---either ladies or gentlemens, at a very small cost.

We can also have hides and furs made into rugs, collars, caps, mittens, gloves, muffs, etc.

The cost of tanning and making up the hides and furs is very reasonable.

Ask us for prices

We will tan and make up a complete EDE FUR COAT, with collar of same fur for only - - - **$26.50**

A HOME

By MARY WINIFRED FORD.

(©, 1920, by McClure Newspaper Syndicate.)

"Good luck, Tom. I only wish it were possible for me to leave the sultry city behind and take the path to God's own land," and Jerry Barton shook hands with Tom Ranger, the best-hearted boy in all Newbury town—at least the whole town would tell you that had you asked about Tom Ranger.

Tom was an engineer on train No. 155. All the children in Newbury raced down to Ingalls Crossing every afternoon after school to see the No. 155 flying by and to wave to their beloved "Mr. Tom." Tom always had a smile for every one, but today his heart was heavy and sad. The smile had left his eyes and his lips quivered as the train sped on its way to Ellis Falls. This time Tom was on a different mission—it was not his old No. 155 he was running, just sitting with the other passengers deep in thought.

He had just buried his best friend—his mother. It was her last request that he would take care of her childhood home in Ellis Falls. Before her death she had put it into a real estate agent's hands. Why, Tom never knew; in fact, never knew she had thought of selling the little home she had known and loved since childhood. He had worked in the city, coming home once a month to that little house at Ellis Falls where over the week end he would find a peace too sweet to define. Now he was going to fight to get that house back.

"Poor little mother. She couldn't have been in her right mind to sell the place we loved—the home we said we would never part with!"

* * * * * * *

"Pardon, I have made a mistake. I thought I was in Mr. Hammond's office—er—the real estate—"

"Please be seated. I am M. Hammond but not a 'Mr.' as you can readily see." And the girl sitting at the desk near the door where Tom was standing continued writing.

"But—but—"

At this moment the girl laughed heartily.

"Please don't look as though you don't credit my statement. I assure you I am M. Hammond, the real estate—well, shall I say agentess, or what?"

"Why, yes, I did sell that property to a Miss Marietta, a young girl who had lost all her own folks and wanted a nice, quiet place out in the country, so after I talked with your mother I decided I would sell it to one who would take good care of the place, as those were her last wishes, and this girl surely will take good care of your old home.

"But—but I must have that home—mother's home from infancy—my boyhood home!"

"I must see her—this girl who bought my home—tell me where I can locate her," he begged.

"She has gone away for a month, but if you will leave your address I promise I will do my utmost to persuade her to give up your old home."

Ten minutes later Tom was traveling back to the city.

True to Miss Hammond's word, Tom heard within a month's time:

"Dear Mr. Ranger—I wouldn't think of taking the only home you have ever known away from you, and your mother was my dearest friend. I spent many happy hours with her. Why, I took the house you will never know, but I am giving it back to you and hope you will be happy.

"MISS MARIETTA—"

The very next train out of Newbury carried Tom back to his childhood home—the girl had sent the key with the note. As he was about to fit the key to the door he noticed that it was ajar and he could hear someone moving around. He let himself in quietly and there before him was the real estate little lady enveloped in an apron with a duster in hand and humming softly as she dusted. She uttered an "Oh!" as she espied Tom in the doorway. Then because she didn't know what to do or how to escape she burst into tears.

"Why, Miss Hammond, I don't understand!" and Tom waited for an explanation.

"I didn't think you would come so soon and I just wanted to have everything ready and comfy—you see your mother loved me as dearly as I loved her. I came to see her quite often, but I would never allow her to talk of me to you. I had reasons of my own. She made me promise that I—that I—"

"Please go on, Miss Hammond. Anything that concerns, or concerned, mother; you don't know how—"

This time the tears fell fast as the girl answered.

"Well, she wanted me to keep the home for—for—well for you and me, but I knew that was impossible, so I did think I could keep the home because I loved it. But now—I was trying to fix things up just as she would have done for you, and never let you know the truth; but I am Miss Marietta Hammond."

And picking up her coat, she rushed for the door.

But Tom, as she was talking to him and of his mother, felt a wonderful something come over him, and he defined it as "Love," as she was leaving.

"Don't—don't go, little girl—stay here and we'll take care of this little home together—you see we were both looking for a home."

And the little mother's wishes were fulfilled.

THE DOLPHINS

By CLARA C. HOLMES.

(©, 1920, by McClure Newspaper Syndicate.)

"Oh, Mr. Campbell, see!" exclaimed Janet Ashmont, rising in her seat in the motorboat.

"Those monsters are called 'blackfish,'" he replied. "There is a big school and some of them are 10 feet long. I'm going ashore."

"Please, don't go—the fishermen aren't minding," remonstrated the fearless young woman.

"But the creatures are chasing us, Janet. See, one just leaped right out of the water! Suppose one jumps at us!"

Campbell put on speed and soon reached the boat moorings, some distance from the rock-bound shore.

Janet sat silent; she was disappointed, for she had been enjoying her boat ride.

Frank stopped and gazed up and around the sky. A black cloudbank hovered on the eastern horizon. Frank knotted the ropes securely and then adjusted a canvas covering. He was very methodical.

"My boat is dancing where I tied her myself before I was ill; I haven't a cover, either," ejaculated Janet, spitefuly.

"That is only a matter of judgment," Frank responded, assisting the girl into his rowboat. He was gentle, but not loverlike; but she was cross with him.

On the shore, delaying to push off his dory, Atwell Reynolds awaited them.

"Engine trouble, Campbell," he asked.

"No, black fish," frankly admitted Frank.

"Oh, ho!" scoffed Afwell. "Dolphins avoid motorboats."

"They are strange creatures to me, so I took no chances," retorted Frank.

"Miss Ashmont," smiled the suave Reynolds, "may I ask you to accompany me? The dolphins are sportful, and like to race at a safe distance."

"I'll go with you; the water is rough."

Frank sauntered toward an old fisherman repairing traps. He began to chat, but he was jealously watching the couple rowing away.

Since she had met Reynolds, three weeks before at this Cape Cod resort, Miss Ashmont had encouraged the new friend's advances, and had seemed annoyed because Frank was so unyielding.

"So ye're afeerd of black fish?" asked the old lobsterman, quizzically.

"I did not want to chance the lady's safety," explained Frank.

"Ye're safe in a motorboat; them fish ain't got no use for propellers."

The old man was a true weather prophet. Suddenly the wind turned northeast and rain fell. Frank hurried out and refastened Janet's motorboat. Atwell landed his passenger; but she was frightened and drenched.

All day the storm raged, and all night. Several in-bound boats came ashore. Atwell's launch was dashed to pieces upon the rocks. Mud-black waves rolled in, and, curling, spent their fury in a seething, angry foam.

Among the on-lookers upon the bank Janet stood worrying about her boat.

At length, when the wind abated, two hardy fishermen launched a rowboat.

"The fishermen will look after their property, and wisely leave us to do likewise," sagely suggested Frank Campbell. "Come, Reynolds," he continued deliberately, "you are the best boatman and swimmer here; it is up to you to assist me in saving our friends sinking boats."

"All the boats in this bay aren't worth two human lives," refused Reynolds.

Then a U. S. marine volunteered to accompany Frank.

With hearts beating anxiously, the people gathering saw the young men battling with the breakers. They watched them struggle from craft to craft and bail each one light. They cheered when the brave boatmen, drenched and chilled, reached the shore.

The next day Frank Campbell made a business trip to town. He was so deeply engrossed in business affairs for a week, indeed, that Janet hesitated to approach him. At last she met him alone in a grove path. His manner was formal, but she slipped her arm into his.

"I told father about the dolphins," she ventured, "and he admires your discretion. I got a scolding for going out with Mr. Reynolds."

"I'm sorry, Janet, you were scolded; I dare say I bored you enough with my logic."

"Your logic!" she repeated.

"Yes; in this I am a disciple of Colton: 'Deliberate with caution but act with decision.'"

After a pause she resumed, sweetly: "The girl you choose for your wife will be honored."

For the moment he lost his head; his arm tightened around her as he asked tensely:

"Do you sincerely think so, Janet?"

"Yes."

To her surprise he smiled and changed the subject.

She was constant afterward. Several times she tried to infatuate him again, but he was adamant until near the close of his vacation; then he declared his intention to secure a license and wished her to marry him the very next week. In her surprise she said nothing.

Later, when she conferred with her mother, she advised:

"It's no use trying to change his dear, stubborn head."

CHAPTER XIV.

The Story of a Plot.

was Macklin, burning with fever,
ous, yet partially conscious once
uttering sounds which could
y be distinguished as words, and
gling vainly to lift his body into
right position. Through the dusk
e place he stared dully into Shel-
face, at first without recognition;
his eyes exhibited terror and he
peared to wrench away, cowering
gainst the rock wall, as though he beheld a ghost. The horror he felt gave volume to his voice.

"Good God!" he shrieked. "Am I dead? Is this hell?"

"No, Kid," and Shelby held him firmly, his tone full of sympathy, "everything is all right. Lie still and don't worry."

"But who the h—l are you? Ain't you Tom Shelby?" he laughed wildly. "Lord, no; he's dead!"

"That is where you are wrong, my boy. I'm Shelby all right, but a long ways from being dead."

"You, Shelby? Didn't he get you?"

"Well, yes, he got me, but not quite strong enough. I failed to stay got. You lie down, and be still. Here, take a drink of this."

The fellow did as he was ordered, his hands shaking so that Shelby had to hold the bottle to his lips. Even as he drank greedily, his eyes never deserted the other's face; until the girl, creeping silently up behind, came also into his range of vision. Her presence seemed to give him a sense of reality.

"Say, this is too much for me," he said huskily, but lying back quiet, "the two of yer here. Just what's happened enyhow? It was Pancha, wasn't it, who hauled me out o' that cabin. Well, where's Pancha? an' what the h—l is this place I'm in?"

"Let me tell him, Tom," broke in Olga, pressing forward, and lifting his head into her lap. "He will believe me, and he is afraid of you yet. You can hear what I say, Mr. Macklin?"

He nodded, gasping, his eyes on her face.

"Then listen closely. It will only take a moment to explain. You were shot—"

"Yes, yes," he stuttered, "I know; she did it."

"Oh, you saw, then, who fired. It was all a mistake, and she was so sorry. The bullet was meant for Indian Joe Laud, but you stepped in the way."

"Pancha tried to kill Laud?"

"Yes; it was all on account of me. You—you carried me off because you believed I had the right to some money, didn't you?"

His eyes brightened, but still with the dull glow of fever in them.

"Sure; you got it comin', too. But what's that got to do with Joe Laud? He wasn't noway hooked up on this game."

"Oh, yes, he was. I'll explain all that. You told something to a man named Matt Hanley once."

"Me! maybe I did, when we was drunk tergether over at Gerlasche. I'd just found out 'bout it then. But he never remembered—Hanley didn't."

"Yes, he did, and he kept watch on you ever since; he and a fellow, Slagin. They were somewhere up the valley the night you brought me in here, and they knew what was up. They followed, meaning to get you put out of the way somehow, so they could get hold of me themselves. I guess they didn't have brains enough to make it. I don't know exactly what happened, but after Slagin got killed—"

"H—l was that what that guy came to the cabin for?"

"We suppose so; at least that was what caused Hanley to tell the story to Indian Joe Laud, and get him to take a hand. They tried to get the Mexican, Pancha's brother, to help them, but something brought on a quarrel, and Laud killed him. An Indian boy told Pancha, and she went crazy over you both. That was what brought her to the cabin."

"An' that ol' devil come there to get me, did he?"

"Yes, but first he tried to learn all he could; things Hanley didn't know, so he could make the job worth while. Then Pancha tried to shoot him, and got you."

He struggled to speak.

"Say, lift me up a little more. That's it; something seems to fill up in my throat. You sure she didn't hear nothin' I said there—'bout leavin' her, an' marryin' you?"

"I know she didn't."

"Lord, I'm sure glad o' that. I sorter thought that was what she plugged me for; that would be the Mex of it; they're h—l on that sort o' thing. I like her, she's a good scout. Why ain't she here? Where is she now?"

"She has gone for a doctor; went down into the Hole to get a horse to ride."

"Where is she goin'?"

"Gerlasche; there's an army surgeon there."

"Yes, I know," wearily, "an' where you got me?"

"In a small cave part way up the bluff."

"Sure, Eagle's cave. Pancha took me up yere onct, an' showed it to me. An' you two lugged me all that ways?"

"Yes."

He struggled to force back the obstruction in his throat.

"Well, what did you do that for?" he asked almost savagely. "That's what I don't get through my nut. I ain't done nuthin' to make either one of yer decent ter me. I thought Shelby here was deader'n a doornail, an' I reckon you know what I was aimin' ter do with you. There ain't no use beatin' about the bush. So now, what'd yer do it for?"

Shelby's hand reached out and touched that of his wife.

"Well, Kid, I'll tell you," he said frankly, "we did it for Pancha."

Macklin grinned grimly, exposing his teeth.

"I reckoned that was 'bout the truth," he said recklessly. "But I'll tell yer one thing—Pancha's never goin' ter get back before I slide out. I got what's comin' to me, an' there ain't no doc ever goin' ter hold me back from goin'—that's straight, ol' man."

"I'm not so sure, Kid."

"Well, I am. Lord, a man generally knows when he's got his dose, I reckon; an' it ain't goin' ter do nobody no good fer me ter keep my lips shut. Say, lady, you let your man put his shoulder back o' me, an' hoist me up higher. There, now maybe I can get this thing off my chest."

"You want to explain something?"

"Sure; didn't I tell you. I ain't goin' ter leave this game wide open fer Indian Joe to cash in on. You been decent to me, an' I'll play white as I can."

He spoke slow, hesitatingly, as though his mind wandered, stopping every moment or two for breath. Once he coughed sharply, an expression of pain on his face, but he went grimly on.

"I'd been on considerable of a bat down there, an' was soberin' up. You know the Custer house?"

"Yes; the old hotel."

"Well, it ain't no palace; you could throw a cat through them partitions in places; an' I woke up to hear a couple o' guys talkin' in the next room. Furst I didn't care what they was sayin', an' then I begun to take an interest. Seems one of 'em was a lawyer from Kansas City, or Omaha; an' the other gazabo was a rich guy from down East, who was huntin' a niece who had disappeared out in this country—the name was Churchill—"

"Is your name Churchill?"

"Mine! Not in a thousand years. That was all a lie. Well, as near as I could get hold of the story, this yere girl's mother was nursin' in Richmond durin' the war, an' fell in love with a Yank an' married him. She never know'd she was no heiress, an' didn't dare go home 'cause she'd married a Yank. Her people didn't get on to it for a long while, an' then, I reckon, they didn't get the story straight. Maybe they didn't try very hard—anyhow she'd dropped plum outer sight. Later they found out somehow that she'd married a regular army officer, named Carlyn, an' gone West with him. I dunno just what delayed 'em after that, but afore they got these folks located the woman died, leavin' a little girl, an' her husband—he was a colonel by that time—put her into a Catholic school. Meanwhile, the colonel got on to some extent, an' began to make inquiries down East; but, before he accomplished much, he got mixed up one night in a street fight down in Sheridan, an' would have been killed if it hadn't been for a sergeant he had with him named Calkins. He got him home alive, but he croaked later. That left the kid alone at school, but these folks didn't know where."

"It was in St. Louis."

"Sure, they found out later, but by that time she'd gone. This yere old sergeant, Calkins, had come with a

"I Got What's Comin' to Me."

power of attorney, or something, an' got her out. That's where I furst begun to get real interested—after this fellow Calkins got into the game. I'll tell yer why I got it into my nut that maybe I'd hit a hot trail, where, if it panned out all right, there might be some boodle in it for me. I run steers for the XL about four months once, and we used to drive into Ponca to blow ourselves. I knowed there was an ol' fellow hangin' 'round there, in McCarthy's place mostly, a sorter tinhorn sport, they called Ol' Dad Calkins; an' I'd heard somewhere he had a girl livin' with him 'bout seventeen, or so. Somehow I got to mullin' over this, an' finally decided to see what kind of a lead I'd struck. It looked like easy money, if she was the girl, an' didn't know yet what was up."

"You went to Ponca for that purpose?"

"Just prospectin' like. Them other two guys went off somewhere else, an' so I had easy sailin'. I couldn't get next the girl at all. I reckon she never left the shack; but I got a look at her, an' it wasn't no trouble to pick up an acquaintance with Old Dad. He was tight-mouthed, though, drunk or sober, an' finallly I had to throw the fear of God into him to make him spill."

"You mean you threatened him?"

"Yep! I never supposed it would shake the guts out of him the way it did, though. The old fool went plum batty when I told him what I knowed. He thought I was after him—a detective, or something—an' he just crumbled up, without makin' no fight at all. I reckon he'd been hidin' her so long, he just naturally got it into his nut he was guilty of some crime. Enyhow, the next thing I knowed, he'd gone out back of the dance hall an' shot himself."

He stopped, shaken by a paroxysm of coughing. Shelby held him tightly, and finally this passed away, the man resting weakly on his arms, but with mind evidently wandering.

"I used to talk all right," he whispered hoarsely, gasping for breath, "an' I could warble some, too. Say, did you ever hear me sing?"

"Yes, Kid, I've heard you."

"Sure, you did. Everybody said I had a wonderful voice. Trouble with me is I never ain't had no show. If I could'er got started in opera, I'd never been out yere getting plugged by no Mex woman. It's hell, ain't it? But, say; where was I, enyhow?"

"You just explained why Calkins killed himself."

"Oh, yes, that's it. Well, o' course I felt bad about the ol' man, but it wasn't no fault o' mine. Then it seemed like his shufflin' off put the cards right in my hands. It sure proved she was the girl an' now she was left plum alone, it didn't look no awful hard job for me to shine up an' marry her, before enybody else got wise. Say, I had it all figured out when you an' Dan McCarthy horned in on that fool stunt of yours, an' knocked my game galley-west. Then I cottoned onto that job with you. I didn't aim to stay out there punchin' steers, but just thought I'd see how things turned out. I sorter figured it this way—the girl she didn't care nothin' for you; she just married yer ter get out er there, an' hav' some place ter live; an' maybe, out there on the Cottonwood, I could make love to her, an' some day we'd skip out together. That's as far as I went at furst, an' goin' out over them prairies, I got it into my head that she didn't have no objection to a little flirtation. I was feelin' quite foxy about it when we got to the ranch."

The lashes drooped low over Olga's eyes, and her cheeks burned.

"Then I reckon the devil must er took charge o' the game, fer the minute I was left alone out there I run into a bunch o' Indian cattle thieves. I knew two of 'em for they were out of the Hole here, an' all at onct, it struck me I might just as well have the job over with. I took it she didn't care about you, an' that a little strong arm stuff would pan out all right. It works with most women. I didn't have no notion then of bumping you off, Shelby, but the buck who took that job cracked you good an' hard. Well, that makes the whole story, don't it?"

He shut his eyes, his head falling back in complete exhaustion. Only his labored breathing proved that Macklin still lived. Olga held him motionless in her lap, bending over and softly smoothing back his hair with one hand. Shelby left them there, creeping out through the entrance onto the rock platform without.

It had ceased snowing, but enough had fallen to cover the bluff with a white mantle, obliterating the trail, and leaving the valley below covered. The sky arched over all dull and gray. Shelby hung out over the ledge, watchfully studying the view outspread beneath. It was a peaceful scene enough, with scarcely a moving figure visible. He could hardly realize that this was the haunt of outlaws, where only a few hours before he had been desperately struggling for life. The daylight revealed no sign of disorder or pursuit, the only reminder of what had occurred being the blackened ruins of the burned cabin almost directly below. Yet this was deserted and the snow about appeared untrampled. The sight gave him hope, yet he felt strangely depressed and unnerved. The remembrance of the scene just witnessed could not be cast off. He had no reason to question the truth of that occasion and it had impressed him strongly. Macklin was evidently dying; was already beyond help. Any breath might prove to be his last, and it was even then too late for any doctor to save him. But would Pancha return in time to assist them? Would she bring sufficient help with her? In spite of the ominous quiet below he felt no faith that Indian Joe would so easily abandon their trail. He was not that kind. Something would assuredly arouse his suspicion that they had not perished in the flames. Indeed, that could be easily ascertained by a search of the debris, and the perturbed ranchman was far from being satisfied that Pancha alone knew of this secret trail. Why, Macklin stated he had himself been up as far as the cave; and it was scarcely likely it had been entirely overlooked so long by these others—the Indians certainly must have scoured every inch of these bluffs at one time or another. Something, for the moment, may have drawn aside suspicions of his escape, yet those devils would track him down. The conviction haunted him.

He drew back just in time. There was the sharp crack of a rifle; a bullet chipped the outer edge of the parapet, and a little puff of smoke curled up away to the left and vanished against the leaden sky. Shelby fell flat on his face and crept backward, seeking instinctively the protection of an overhanging rock, his eyes instantly marking that vague spiral of smoke. He had guessed right. Indian cunning had already learned the truth and had found means of approach unknown even to the Mexican girl. Somewhere in the security of those rocks, keen eyes were watching every movement, savagely eager to end all by some well-directed shot. Yet, with the chug of the bullet, all depression left him. He knew now what he had to face; that narrow platform must be defended, for hours probably, revolvers pitted against rifles; himself alone against an unknown number of assailants. It

"Stay Back!" He Ordered Sternly.

meant caution as well as bravery, the quick wit of a white man outgeneraling savage treachery. Even as he rolled over, so as to cautiously lift his head, the "45" was jerked from its holster and rested ready in his hand. He heard Olga at the cave entrance.

"Stay back!" he ordered sternly. "Don't venture out here yet."

"But what is it? I heard a shot."

"Yes; they have found us all right. Hand me another gun; I may need it. Did Macklin have one?"

"Yes; it is still at his belt."

"Get it, and with whatever cartridges he may have. This is going to be a fight at short range. How is the fellow?"

"I—I am sure he must be dying, Tom," she said breathlessly. "He scarcely breathes any more. Isn't there any way I can help?"

"Only by doing what I asked; get his gun. This is bound to be some fight. I don't know how many are out there; the bird who shot at me is behind that rock yonder; he's Indian all right; you can glimpse his scalplock just over the edge. If he would only shove his nut up about half an inch more I'd show him that a '45' ain't such a bad weapon, when you know how to use it."

He advanced, his revolver barrel across the top, and lay motionless, sighting along the smooth steel.

"Now, boy, you do that again. Can't make out exactly where I have gone, can you? Well, you are going to find out in about a minute." His grip tightened. "Ah! there you are!"

His finger pressed the trigger, sending forth a spurt of flame. A brawny red arm was flung up, the hand gripping at the rock for support; then a rifle went crashing down into the chasm and the next instant an Indian whirled head downward, the body striking a narrow ledge and bouncing off into space. Three shots answered the crack of the revolver, so swiftly as to seem echoes, the bullets striking the solid rock wall, one, crushed out of all shape, dropping directly in front of Olga, crouching in the entrance. Shelby laughed, but with eyes stern and watchful.

"Three more located," he said pleasantly. "Seem to have us pretty well trapped. I'd like to know how they got up here without using the trail. I thought you were goin' after that extra gun?"

"I am, Tom, but I can't stay in there. I want to be out here with you."

"Why I ain't in a mite o' danger, little girl. Those reds can't shoot through this rock. All I got to do is lie here quiet an' take 'em on the jump."

"But suppose they rush in on you?"

"It don't hardly look reasonable. Still, o' course, they might try it, if they got a white leader. Indians never would themselves; it's liable to cost too heavy."

(TO BE CONTINUED.)

"King's Tobacco Pipe."

This is a popular nickname for a peculiarly shaped kiln or furnace in the northeast corner of the tobacco warehouse belonging to the London docks. Here contraband goods, such as tobacco, cigars and tea, which had been smuggled in, were burned. Seized and unclaimed goods are now sold at periodical sales, or distributed among public institutions, but damaged and worthless goods are still burned.

Wanted Salesman With Auto

Prefer man with selling experience in small towns and country districts. Opportunity for energetic man to establish permanent and profitable business in own community. Liberal commission settled in full each week. H. W. SWIFT, Sales Manager, Stetson Oil Company, CLEVELAND, OHIO.

Seeing and Saying.

Every business man, whether employer or employee, may well heed the remark of an old philosopher, that we have two eyes and one tongue because we are supposed to see twice as much as we say.—The Nation's Business.

SHOE PRICES AT LAST HIT BOTTOM

A sharp decline of from one to three dollars per pair on their entire line of work shoes, has been made by the Harsh & Chapline Shoe Co., Milwaukee, makers of the well known Lion Brand Work Shoes for men and Lion Brand Everyday Shoes for boys.

"The greatest progress in American business during this generation, has been in factory organization," says Geo. R. Harsh, President of the company. "The problems of production have been met by experts who have brought the cost of manufacture to a lower figure every year.

"But how about selling costs? The expenses of the manufacturer's salesmen have mounted steadily—the jobber must still have his discount—and the storekeeper his.

"The best and quickest way to reduce prices is to reduce selling costs—by cutting out the unnecessary profits between manufacturer and consumer. By selling Lion Brand Shoes direct from the factory, and confining the entire profit from maker to wearer to one small profit, we can offer first quality work shoes to the public at very low prices. For example, our No. 76 Brown Blucher, with hard toe cap, made of Lion Brand Leather (our own tannage) in regular sizes, 6 to 11, is now being sold by mail on receipt of money order, draft or buyer's own check at $3.35. This shoe formerly sold through the stores as high as $6.50.

"It was only after long and serious deliberation that we decided to go straight to the public with our product. In the past fifteen years, through 15,000 dealers, we have sold 10,500,000 pairs of work shoes—over $6,000,000 worth last year alone. The only way open to us to get Lion Brand Shoes to the wearer at a fair price, was to drop our jobbers and dealers and sell by mail. Catalog No. 1 is being distributed from our factory at Hanover and Maple Sts., Milwaukee, Wisconsin. Shoes shipped within 24 hours of receipt of order."—Adv.

Ford

THE UNIVERSAL CAR

Announcement

Mr. Edsel B. Ford, President of the Ford Motor Company, gives out the following statement:

"The price of the FORDSON Tractor has been reduced from $790.00 to $625.00"

Effective Immediately

"This price change has been made possible through lower costs of materi and the fact that we are now located in our new Tractor Plant with greatly creased economic manufacturin facilities in imediate connection with our found and machine shops and large blast furnaces where iron is poured directly from ore, giviug us maximum efficiency with the power to reduce cost of production, a donw comes the price in line with our policy to market our products at the lowe possible figure without in any way effecting our high standard of quality.

"We are particularly pleased in being able to bring about this big reducti in price at this time because the farmer needs all the help we can give him a this big cut in price will be the means of placing a valuable power unit within t reach of practically every one of them, not to mention industrial and commerci concerns which likewise have benifited through its use and are already realizi to a much greater extent, its value as a power and hauling unit. But particular has the FORDSON Tractor proved a most valuable factor in the saving of farm lab at the same time increasing the per acre crop yield as well as making possible utilization of previously uncultivated land, to say nothing of removing no end drudgery.

"Their is no question that the use of machine power on the farm is th greatest advancement made in the developement of agriculture, not only money saving and money woking results, as well as raising the standards of livi on the farm to a much higher level, but because of its proved value in makiog ever type of land more productive, and consequently our desire to place the FORDSO within the reach of all.

"THERE IS NO CHANGE IN THE PRESENT FORD CAR AND TRUC PRICES, which are already at the lowest possible price and now with rock botto reached on the tractor price a further reduction in price of either the Car, Truck or Tractor is out of the question; in fact, the big price cuts have been make in an ticipation of continuous maximum production and increases may be necessary be fore long if a large volume of new business is not obtained. Therefore, presen prices of Ford products cannot be guarnteed in opposition to possible increases."

News Reported By The K. H. School

(Reported by Earl E. Josten)

K. H. S. Items

Last Wednesday morning Arthur Wellemeyer, our enterprising townsman and progressive merchant, gave us a fine lecture on the subject, "It's up to you! Are you shaking up or rattling down?" In our opinion, he delivered it as well as Ralph Parlette, the original author, could have done. He illustrated the lecture by using a large jar containing beans and walnuts. This fact may sound strange, but it certainly proved to be a capital method of illustration. His remarks will not be soon forgotten. Come again, Art.

Those who are to participate in the Declamatory Contest are choosing their selections, and some of the contestants have theirs partly learned. Much progress is being made so watch for further news in regard to the contest.

In due consideration of the fact that February 12th is nationall observed in honor of the great American who was born on that day, and in deference to him, Miss McKahan read a short selection dealing with the Emancipation Proclamation on last Thursday morning.

The Sophomores have chosen their class play and will soon start rehearsing. It is planned to stage the play in about five weeks from now.

Prof. Wilson has been enjoying an attack of sore throat, or something, as his voice has been sadly affected. It is expected that he will recover before this item appears—if something else doesn't happen to him before that time.

Last Friday morning we again enjoyed a piano solo by Mildred Johnson. She's a talented musician, we'll say.

Plans are being discussed for a Literary Society. Such an organization is just what we need. We are hoping it will be successful. We should be able to accomplish a great deal in the time we have left, if we get busy and all pull together.

Our K. H. S. male quartet is not very active at present. If we would only get together and do some practicing, "the world" would hear from us within a short time.

Fred Arnold was again absent on Monday morning. From the sound of his voice, we conclude that he has been attacked by the same germ that caused Prof. Wilson's recent affliction

Ella Barz took charge of the Primary Room on Monday, in the absence of Miss Sullivan. A little practice in this line is a great benefit to a student.

As Monday morning was "moving day" for Prof. Wilson, he did not get to school until about eleven-thirty. This gave Charles Gibbs the opportunity of conducting the Freshman Algebra class, which he did to the satisfaction of all. In a spirit of humble obedience, the editor of this column consented to guide the Sophomores through the parallel tangents of their Geometry lesson. Needless to say, no one received a zero that day. It might be added, though, that we enjoy Prof's. presence more than his absence.

Marie Blank returned to school on Monday afternoon, and was welcomed by all her school mates.

Grammar Room News

The Grammar Room students had a sleighing party last Tuesday night. It included a ride to Garner and an evening there at the movies.

Last Friday night the members of the 7th grade gave a party in honor of the 8th graders who won the recent spelling contest. A perfect attendance is reported.

FOR SALE—A good sanitary cot with mattress, cheap. Phone 58. tf

WHY NOT A LEGION POST HERE?

In looking over our exchanges from various neighboring towns we note that Klemme seems to be the only town which does not boast of American Legion activities. Now we ask you a fair question, "Why should Klemme be without an American Legion Post?" You can give no good reason why. There are a large number of ex-soldiers and sailors in and about Klemme and we believe they would be interested in having a post here for their own good as well as that of the community. We have as lively and peppy a bunch of ex-service men as can be found anywhere but as yet no one has attempted to organize a post here. Perhaps they need some assistance in the matter. Then it is up to everyone to help them get started if they really want a post here. Now boys, let's hear from you about this matter. If you are interested in establishing an American Legion Post here we will help the matter along. We would like to have a letter from some ex-soldier or sailor for publication in regard to organizing a post for Klemme.

THAT SMALL BROTHER AGAIN

This Time It Really Seems That He Has Cooked Sister Evelina's Goose for Good.

Some things do fall out awkwardly, don't they?

One evening the fair Evelina was expecting her latest admirer to call and her mother hadn't come back from shopping. So, while Evelina slipped upstairs to don her best blouse and some powder on her nose, the young brother was left on guard.

The expected visitor arrived, and was ushered into the parlor by William Edward, who promptly began to ask questions, as small boys always do.

"Mr. Slowcombe," he said "what's a popinjay?"

"A popinjay my boy," repeated the young man, thinking hard. "Why—er—it's a rare bird."

"Are you a bird, Mr. Slowcombe?" persisted the inquisitor.

"Of course not! Ha, Ha!" squirmed his victim.

"Well, that's funny!" mused William Edward. "Last night, after you'd gone, ma' said you were a jay, and father said there was no doubt about that, but there didn't seem much poppin' the question about you. And now you say you're not a bird at all!"

ADMITTED HE WAS LOSER

Convivial Gentleman Preferred to Buy His Wine Rather Than Comply With Wife's Request.

Three men about town had a very good day at the races. Each vowed that he would go home and cheerfully obey the first request that his wife made him. A bottle of wine depended upon the result.

The following night they compared notes.

"My wife told me, as I slipped on the cat's saucer, to break all the china in the house, so I did," said No. 1.

"I happened accidentally to sit on the piano," said No. 2, and my wife suggested that I should utterly ruin it, so that instrument will be heard no more."

Then No. 3 spoke. "I went for the top step that was not there and fell full length," he explained, "and my wife remarked that she would be pleased to see me break my neck."

"And—?" queried his companions, breathlessly.

"Oh, I am paying."

ART SCHOENWETTER TO HAVE BIG SALE

Perhaps the last closing out sale of the season in this vicinity will be that of Art Schoenwetter who will have his sale next Wednesday. Art is using half a page ad in this issue of the Times. He has a fine bunch of stock and machinery, look it over and then attend his sale.

Heart-Breaking Smiles

There are thousands of kinds of smiles, but it would be mighty hard to picture even in the mind's eye smiles more poignantly tragic than those here seen. Two years of life have held little save misery for these Vienna youngsters, yet, even though the result is painful, they smile. They are victims of rickets, the offspring of near-starvation, and that countless others in stricken Europe may not have to share their fate eight American relief organizations, under the name of the European Relief Council, are making a joint appeal for the conscience of America to complete relief work which this winter faces its crisis. These agencies are the American Relief Administration, the American Red Cross, the American Friends' Service Committee (Quakers), the Jewish Joint Distribution Committee, the Federal Council of Churches of Christ in America, the Knights of Columbus, the Y. M. C. A. and the Y. W. C. A.

The Churches

METHODIST EPISCOPAL CHURCH

WE NEED SOME DOUGH TO MAKE BISCUITS

Everybody will agree with us that in order to make biscuits one must first have the dough. The same with us. The "dough" we are after is that two bucks which you owe us on subscription—the biscuits we are planning to make is printers machinery. The reason for the new "biscuits" is to get out a better and newsier paper for our readers so in that way by contributing your "dough" you will help us eat the biscuits—by reading a better paper. Some wise guy said "It takes money to make the mare go"—he did not say where but he was right. Now loosen up your pocket book and hand us a couple of cart wheels. Don't wait until you have paid your income tax because you might be broke by that time. Don't all crowd to the front gentlemen—one at a time please. Editor.

WHO SWIPED OUR CATALOG?

Shears Sawbuck & Co. sent out a lot of invitations to their Klemme friends the other day. They get out a real handsome invitation in the form of a pretty book with a lot of pictures to be sure. Most people do not have to be invited to read it, they can't hardly wait until they get home to see if they can still buy a non-scratchable, bug-proof, rippable suit of wool-less suit of underwear for 98c. After having elected the item you don't need they invite you to send your hard earned shekels and are perfectly willing to trade with you sight-unseen for your good U. S. coin for their "great bargain". Sure—they also invite you to wait three or four weeks, you can pay the freight too, they invite you to do that much for them, sure, and then when you unwrap that package containing the here mentioned underwear you discover it ain't for a man at all—no, by gosh,—it's for a little boy! We are awful peaved at Mr. Shears Humbug, here we are, he won't send us one at all, maybe Post Master Waterman owned ours. We wanted to put one where most catalogues can be found.

Will have car of Old Reliable Washed Egg coal this week for $9.50 off car. W. F. Lau. adv

TAKEN UP—Bay mare colt, 2 years old, dark mane and tail. Came to my barn about four weeks ago. Owner can have animal by proving ownership, and paying cost of keep and advertising. C. M. Bredbenner, Klemme, Iowa.

There will be a good time dance at the Idle Hour Theatre on Wednesday, Feb. 23. Come.

His Debauch.

"Emmett Whillikens just ratcherly dazed up heck while his wife was away, didn't he?" "Gosh! I should say so!" replied a prominent citizen at Yuma. "Why, he had a gang of fellers at his house 'most every night till 'bout 0 drinking elderberry wine, playin' phonoes and listenin' to dance tunes on the phonograph!"—Kansas City Star.

In Bad Both Ways.

During a social evening a woman sang for the guests. One of the guests turned to a meek-looking little man sitting at his side and said: "How awful! Who can she be?" "That," replied the man addressed, "is my wife." "Oh, I b-b-beg your pardon," stuttered the other. "She's really a—I know she'd sing beautifully if she made a better selection of her music. Who do you suppose wrote that song?" "I am the author of that song!" replied the meek-looking little man.

Bird's Power of Vision.

A bird's power of vision is, on the average, about 100 times greater than man's. Birds have been known to see a worm on freshly plowed ground at a distance of 300 feet.

Special Feature

Special Writers For The Times

Avery Township News

Martin Jensen returned Wednesday afternoon from Chicago. While there he purchased more cattle and shipped them here.

Walter Reed and family were Sunday visitors at the home of John Bachman.

A party was held at the home of Mr. and Mrs. Martin Jensen last Friday night, there being about fifty people. All report a good time.

Wm. Bell and son shelled corn for D. A. Marshall Friday, Saturday and Monday.

Mr. and Mrs. Sylvan Johnson and Lulu Neuberger and Garland Hoffman attended the social given in Goodell last Thursday night.

Mr. and Mrs. Clint Stokesbary went to Miller, Iowa, Saturday, to visit with friends until Monday.

Henry Helps and son shelled corn for Lynn Sherwood and Griggs last week.

Jeff Bell visited at the home of his parents last Sunday.

Mr. and Mrs. Bert Dutton and son, were visitors at Dows from Wednesday until Friday.

Liberty Township News

"Cap" Panhoff is helping his brother-in-law Charlie Mickish with his work this week.

Milton, Homer and Roxana Scheer and Mildred Anderson were callers at the C. C. Schaefer home last Sunday.

There will eb an Epworth League social at the Liberty Township church next Friday evening, the 18th. All the young people of the community are invited.

Johnny Borchers from Garner was around these parts last Sunday visiting friends, one in particular, but sorry to say, luck was not with him

Miss Hannah Einhouse has been visiting at the home of Walter Bredlow the past week.

Nettie and Fern Ulrich, Faye and Orvel Bridges and Elmer Beier were entertained by Arthur Wade at his home last Sunday.

Walter Bredlow and family and Elmer Bredlow were visitors at the Will Suckow home last Sunday.

Miss Mildred Anderson is assisting with the work at the Schaper home.

Rev. Meyer broke a minor part of his car while at the Liberty Township church last Sunday morning which resulted in his leaving his car there and depending upon someone else for transportation for the rest of the day. Preachers also have bad luck sometimes.

The asket social at the Lillebridge school last Friday was well attended and the baskets sold good. A very good program was also given.

Mrs. Herman Bridges and Mrs Paul Stille left by rail last Monday for a few days absence.

Mr. Roy Schaefer and family were callers at the Lawrence Schaefer home last Sunday.

WHO SENT 'EM?

Ed. Jacobs and Bert Mathews each received two nice valentines Monday. When they opened them their little hearts went pitty-pat and chuggy-chug. They are endeavoring to find out who the "young ladies" are who sent the sweet verses.

LEMME YOUNG PEOPLE FIGURE IN DOUBLE WEDDING

Two Eens Marry Twins

On Thursday, February 10th, occurred a double wedding at the home of Mr. and Mrs. Fred Gates at Ingram, Wisconsin, but formerly of Klemme. Their twin daughters, Hattie and Mattie were married to young men of Klemme, in the following order: Miss Hattie Elizabeth is now Mrs. Benjamin F. Ridder; Miss Mattie Mildred is now Mrs. Benjamin Reimer. These four young people were all born and raised in Hancock county and have spent practically all their life here. The Brides are the twin daughters of Mr. and Mrs. Fred Gates who lived near Klemme until about a year ago. The young men in the case are energetic and ambitious young men. Ben Ridder is the son of Mr. and Mrs. August Ridder who live here in Klemme. Ben Reimer is the son of Mr. and Mrs. Albert Reimer who live near Klemme. They are all very popular with the younger set of Klemme. This double courtship which has ended so satisfactory has been going on for several years and so the news of the happy wedding has been somewhat looked forward to. The young couples will go to housekeeping some time in the near future on farms near Klemme. The Times joins their many friends in wishing them happy and prosperous married lives.

BIRTHDAY SURPRISE PARTY

Last Sunday afternoon Miss Adel Broeder was completely and pleasantly surprised when her Sunday School Class, which numbered fifteen came to spend the afternoon with her being her fifteenth birthday. The surprise was gotten up by her mother and grandmother.

At four o'clock ice cream, cake, fruit and candy were served. Two beautiful cakes were placed upon the table—one a class cake with fifteen candles and the other a birthday cake with fifteen candles on it. The colors were pink and white.

She received many beautiful and useful gifts. All report having had an excellent time.

IOWA FALLS ELECTRIC CO. EXPLAINS RATES

Mr. Williams, a representative of the Iowa Falls Electric Co., was in Klemme last Thursday and while here dropped into the Times Office for an interview with the Editor. Mr. Williams explained a few things in regard to the recent advance in light rates. He stated that the big factors in determining rates with the company were Labor and Coal. He compared prices now with pre-war prices. They are paying their men top wages they have been paying during the war and after. He claimed machinery and material had not dropped very noticeably. We remarked that coal was cheaper now to which he replied "Yes coal is cheaper, but freight rates have advanced so that we are paying more for coal now than before the war." Coal is one of their big items. Last winter he stated they had to get coal wherever procurable and had to pay sometimes as high as $14 to $15 in order to keep the plant running and give service. The Company are planning an advertising campaign to better acquaint their patrons with the actual conditions of conducting the business according to what Williams told us and in this way they hope to establish more harmony between the company and patrons by letting the latter "on the inside workings" and show the reason for rates, etc.

What the Dots Mean.

When you see . . . three little dots . . . such as these . . . in the stuff of a modern versifier . . . as in our stuff . . . it means that the writer . . . is trying to get something rather . . . elusive, if you get what we mean . . . and the reason he suggests it instead of expressing it . . . is . . . very often . . . because . . . an almost idea . . . instead of an actual idea . . .—New York Post.

Harmful Inquisitiveness.

In Asia and Africa the eagerness of baboons enables the natives to capture them by placing bottles of sweetened water out where they can reach it. The liquid contains a certain variety of dopey herb. As the curious creatures advance cautiously toward the jars and taste the water, then finding the taste agreeable, they proceed to drink the jars empty. As a result they soon become quite drowsy and offer no resistance when the natives approach to take them.

Origin of "Gob."

A side-light was thrown upon the word "gob" by the Scotsman of August 4, 1889, which said that when a meeting of the coastguard takes place the men indulge in protracted yarns, a draw of the pipe, and a friendly chew. Such a session is invariably productive of a considerable amount of good-natured banter, as well as free expectoration all around, wherefrom our friends came to be known as "gobbies" (from "gob" the mouth). In the process of time gob and gobbie came to be applied to the ships manned by the gobs.

New Science Center.

Some time ago the Carnegie corporation of New York provided funds for erecting in Washington a building to serve as a home for the National Academy of Sciences and the National Research council. Subsequently a number of individual patrons of science contributed a fund of $200,000 for the purchase of a site, which has now been secured. It comprises the entire block bounded by B and C streets and Twenty-first and Twenty-second streets, Northwest, facing the new Lincoln memorial in Potomac Park.

Notice a la Dutch.

The Pennsylvania Dutch have their own way of saying things and generally they manage to make their meaning clear, although sometimes in unconventional language.

Over the bell on the front door of a house in a little town near Gettysburg was affixed a card reading:

"Button doesn't bell. Bump." —American Legion Weekly.

Children Who Are Sickly

When your child cries at night, tosses restlessly in its sleep, is constipated, feverish or has symptoms of worms, you feel worried. Mothers who value their own comfort and the welfare of their children, should never be without a box of

Mother Gray's Sweet Powders for Children

for use throughout the season. They tend to Break up Colds, relieve Feverishness, Constipation, Teething Disorders, move and regulate the Bowels and destroy Worms. These powders are pleasant to take and easy for parents to give. They cleanse the stomach, act on the Liver and give healthful sleep by regulating the child's system.

Trade Mark.
Don't accept any substitute.

Used by mothers for over 30 years. Sold by all druggists. Sample mailed FREE. Address, Mother Gray Co., Le Roy, N. Y.

DAIRY THE DAIRY

WATER IS PRIME REQUISITE

Labor of Watering Stock Can Be Practically Eliminated by Installing Automatic Bowls.

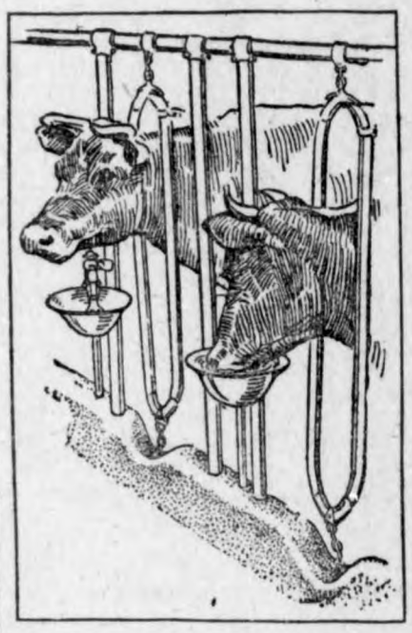
Many dairy farmers are still depending on their hired help to lead the cows to the watering trough for water during the times they are confined to their stalls, depending on the workman to remember when a cow may need water and requiring much of the man's valuable time in watering the stock.

The labor of watering the stock can be practically eliminated and at the same time the milk production of the cow increased by installing sanitary automatic watering bowls.

Most dairy farmers realize the importance of an abundance of pure water for the cow, but do not realize the cost of labor consumed in watering the cow, nor the importance of the cow getting her drink just when she wants it, says Dairy Farmer.

About 87 per cent of the milk is water. A cow requires 8 gallons of water to produce 10 gallons of milk, besides the water she needs for her body. She requires 2½ pounds of water for each pound of milk produced. Why supply high-priced feed to increase milk production and neglect to give her sufficient water?

In answer to letters sent to dairy farmers in 15 states using various makes of water bowls, which will allow the cow to drink at any time, 65



Importance of Water Supply for Cows Is Realized by Many Dairymen.

replies stated that there was a saving of labor ranging from one-half hour to five hours per day. An approximate average of these would be about 1½ hours, depending upon the size of the herd.

DAIRY CATTLE NEED SILAGE

Succulence It Supplies Is Very Necessary for Large Milk Production —Cheapest of Feeds.

Silage is the best and cheapest form in which to store succulent feed. Many forage crops can be made into silage, but corn, where it can be grown successfully, makes the best silage.

Good silage depends upon cutting the crop at the right stage, fine cutting, even distribution, thorough packing and plenty of moisture in the cut material. When rightly put up and carefully fed, there should be little if any loss through spoiling.

Silage is well suited for feeding to all live stock. Dairy cows need it perhaps more than other classes of animals, because the succulence it supplies is very necessary for large milk production. It is a cheap and economical feed for beef cattle, from breeding cow to fattening steer. Sheep like it, and it is well suited to their needs. Even horses and mules may be fed limited quantities of good silage with excellent results.

OBTAIN PROFIT IN DAIRYING

Feed Prices Have Slumped While Price of Butter Still Remains at High Figure in Cities.

Feed prices down 50 per cent or more and butterfat prices still high should mean that men who are now milking cows or who get into the dairy business will make money. Corn and alfalfa have made decided drops in price, while butter is still retailing around 60 cents a pound in these cities. Hence the best way to market these two feeds would appear to be through stock, especially milk cows. A few good milk cows, with feed as cheap as it now is, assures an income and should mean a good profit.

FAULT IN CREAM SEPARATOR

Often Happens That Foreign Matter Lodges in Screw Causing Decrease in the Flow.

If the flow from the cream spout of the separator seems smaller than ordinarily, it usually pays to investigate. In spite of all precautions, it often happens that foreign matter lodges in the cream screw thus causing part of the cream to be retained with the skim milk. A test of the skimmilk will tell.

DISEASE CAUSE OF ANIMAL LOSS

Three-Fourths of Ailments Which Ruin Valuable Herds Can Be Prevented.

STRICT SANITATION NEEDED

Contagious Maladies, Sporadic Ailments, Parasitic Troubles, Accidents and Neglect Are All Quite Disastrous.

(Prepared by the United States Department of Agriculture.)

Every year the people of the United States lose over $200,000,000, directly (and no one knows how much indirectly) through diseases of farm animals. This is a large toll when divided on a per capita basis, and when it comes home to the farm stock-raiser who finds a valuable animal dead in the barn, or an epidemic spreading into his herd, the loss is sometimes disastrous. The most regrettable feature of the case is that probably three-fourths of the loss could be prevented.

Five Causes of Disease.

There are five principal causes of disease and death of farm animals — contagious diseases, sporadic disease, parasitic troubles, accidents and neglect. Contagious diseases can be avoided, or at least their consequences greatly diminished, if farmers will learn to co-operate with the United States Department of Agriculture and the various state livestock and sanitary authorities, who are striving to maintain animal health. Farmers should report promptly to the nearest officials any suspicion of the presence of contagious disease, and they should observe carefully all regulations in regard to quarantine, sanitation, and care of animals, as protection against contagion.

Tuberculosis is one of the worst scourges among animals and it thrives best in damp, dark, ill-ventilated stables. It is less common among animals running at large. Light, dry, well-ventilated stables and dry, clean barnyards or paddocks are essential to the health of farm animals. One valuable point in combating contagious diseases, especially tuberculosis, is to start the herd with animals that not only are free from disease, but are of

Proper Care Keeps Farm Animals Healthy.

stock that is not predisposed to disease. Official tests of herds are made on request and through co-operation of the United States Department of Agriculture with livestock sanitary officials. Purchase of breeding stock from these herds is a wise precaution. Care also should be taken to obtain stock adapted to climatic and local conditions. The other sources of animal loss are largely a matter of intelligent and careful handling.

Sporadic and incidental diseases, such as disorders of the digestive and respiratory tracts, can be avoided largely by proper handling and feeding. A proper balancing of rations has a material influence on the health of live stock. Too much of any food element is likely to result in digestive disorders, thus predisposing the animal to disease.

Parasitic diseases also carry off large numbers of valuable animals every year. They are largely the result of improper housing and neglect. The average farmer can not be expected to have the time and aptitude for study which will keep him apace with the latest developments in feeds and feeding, animal nutrition and medicines, hygiene, and other important matters related to the stock-raising industry. He can, however, avail himself of the benefit of the studies and demonstrations of specialists who have devoted their entire time to these subjects. Every state agricultural college maintains a corps of specialists whose publications and services are available.

Department Offers Aid.

The department of agriculture is constantly giving out important information in books and bulletins which may be had on request and in every state the department has representatives combating animal diseases. It is well to consult a local veterinarian in case of any disturbing symptoms and to report to the state veterinarian or the United States Department of Agriculture, any symptoms which indicate the possibility of an epidemic. The wise breeder is ever on the lookout to prevent disease instead of waiting until a cure is necessary.

MAKE COMPOST HEAP FOR USE IN GARDEN

Start By Laying Down Bed of Fresh Stable Manure

Organic Rubbish, Decayed Vegetables, Dead Vines, Weeds and Other Truck May Be Used—Size Plot Necessarily Varies.

(Prepared by the United States Department of Agriculture.)

Garden waste, decayed vegetables, dead vines, weeds, and the organic rubbish that collects about the place during a busy summer may be cleaned up and put to work again through the agency of a compost heap. Start the heap by laying down a bed of stable manure which has not been burned or heated. The size of the plot will vary with the amount of refuse to be used; for ordinary uses, if the bed is made 8 feet long by 6 feet wide and 2 feet deep it will serve the purpose. Over the manure spread a two-foot layer of refuse and cover it with another layer of manure. This last layer need be only a foot in thickness. Re-

Don't Leave Manure in Piles Exposed to Weather Conditions Favorable to Loss By Washing—Use It to Make a Compost Heap.

peat the layers until all the waste has been disposed of and then cover the whole with a layer of earth.

If it is desired to add to the heap from time to time the top layer may be opened and the new material emptied into the hole thus made. This is convenient for the suburban home where there is no animal to consume the kitchen waste. In the spring the heap is well mixed with a fork and the compost is ready to be spread on the garden plot. The heating manure will effectively destroy any weed seed present and will also break down the structure of most of the materials that have been thrown upon the pile. The process may be continued indefinitely by simply adding enough manure to insure heating. Compost is especially valuable for use in hotbeds and coldframes.

CLEANING UP INSECT PESTS

Many of Hibernating Species May Be Destroyed in Winter By Cleaning Up Obscure Corners.

Much can be done now to reduce the possibility of insect plagues next summer if a little effort is directed toward the destruction of insect shelter areas. Around the grounds and gardens, under hedges, beside ditches, and in fence corners are bunches of insect-sheltering weeds or grass. By the time cold weather approaches many kinds of insects in the adult or immature stages have taken full advantage of these nooks and hidden away there for the winter. The bureau of entomology, United States Department of Agriculture, says that if these spots are cleaned up and the refuse cut and burned, many of these hibernating insects will be destroyed and the damage from such pests during the coming season will be materially lessened.

PROVIDE BATH FOR POULTRY

Chickens Cleanse Themselves by Wallowing in Soil and Dust Box Should Be Accessible.

Chickens never wash, as many other birds do, but cleanse themselves by wallowing in soil. Where board or cement floors are used in the chicken house, some means for dusting should be provided during the winter months, say poultry specialists of the United States Department of Agriculture. For a flock of 50 to 60 fowls a dust box 3 by 5 feet or 4 by 4 feet will generally be found large enough, and should be placed where it can be reached by sunlight during as much of the day as possible.

Fine, light, dry dust is the best kind with which to fill the box, but sandy loam is good. Road dust is recommended by many, but it is apt to be filthy. Coal or wood ashes may be mixed with the soil if desired.

FARM FOR CENSUS PURPOSES

Is All Land Which Is Farmed by One Person, Either by His Own Labor or With Assistance.

According to the 1920 census there are 6,449,998 farms in the United States. A "farm" for census purposes is all the land which is directly farmed by one person, either by his own labor alone or with the assistance of members of the household or hired employees. When a landowner has one or more tenants, renters, croppers or managers, the land operated by each is considered a "farm."

Home Town Helps

BOOSTER

Boost your country, boost your friend,
Boost the lodge that you attend;
Boost the town in which you're dwelling,
Boost the goods that you are selling;
Boost the people round about you,
Possibly they can do without you;
But success will quicker find them
If they know that you're behind them.

Boost for every forward movement,
Boost for every new improvement;
Boost the stranger and the neighbor,
Boost the man for whom you labor.
Cease to be a chronic knocker,
Cease to be a progress blocker;
And if you would have your home town better,
Boost it to the final letter.

Be a booster if you can, booster of your fellow man,
Boost your project, boost your state, boost your town, at any rate;
Boost it as a place to live, boost it—every boost you give
Makes the town a better town. Boost it up. Don't knock it down.
Be a booster—for you can! boosting is the better plan.
Boosters always win acclaim; boost the knockers to their shame.
Boost them when they need your help,
Make them yell instead of yelp.
Boost them till they have to boost; boost them up or off the roost.
—Louisiana Oil News.

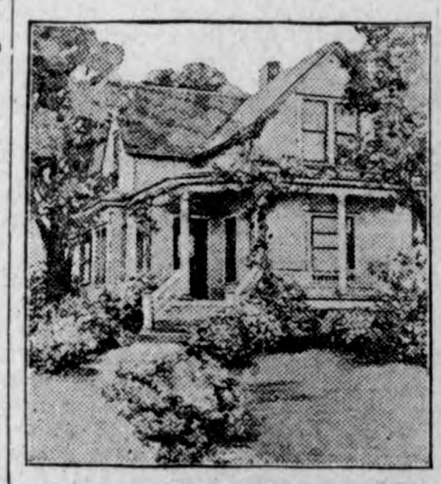
PROVIDE TREES AND SHRUBS

No Real Necessity Why Any House Should Present the Appearance of Barrenness.

Barrenness of land around the home does not call to mind pleasant thoughts, but suggests the glare and heat of summer, the fury of the wind in winter, and a monotony of outlook. What a difference if trees and shrubs, as shown in the second picture, had

Has Look of Desolation.

been planted when the house was built. Shade, shelter, pleasing color and a sense of privacy, all of which combine to give the atmosphere of a real home. No, it is not too late



Transformation Wrought by Shrubs.

even now, to begin the transformation. Planting according to suggestions in United States Department of Agriculture bulletin will work the change in a few seasons.

Give a Hand.

In every community there are successful men—men of experience, men of means. In every community there are young men who might make a success of life. They have it in them, all they lack is some one to give a hand. It may not be money they need, perhaps only an interested friend. Somebody helps whenever a young man gets started right in anything. Somewhere every successful man got a start by some one's help. To keep the world moving on an upward slope the process must be made perpetual. Each man, once started, should become a starter of others. And who starts another gets himself along at a more rapid gait. There is that in helping another that reflects not credit alone to the agent, but a bent of mind, an outlook on life, a generosity of soul, that wins a way forward for himself also.—Thrift Magazine.

Garden Photographer.

"Change the back yard into a garden," says Miss Frances Benjamin Johnston. "It can be done, no matter what difficulty there is to overcome. The first green shoot is ample reward. Soil that is sour can be cured and freshened by systematic labor. And with the growth of the garden, the disposition of those city dwellers whose windows overlook will subtly change with the elimination of the unsightly back yard. In fact, the conditions of many back yards are more than a mere nuisance; they are a serious menace."—The Independent Woman.

Baker's Cocoa *is for* Robust Men

and all who must have a great deal of tissue building material to repair the waste caused by physical and mental labor. It is delicious, pure and wholesome, and is made by a perfect mechanical process, without the use of chemicals, so preserving the exquisite flavor, aroma and color of the high grade cocoa beans.

"Yes. And with what charming sloppiness she wears her galoshes."

How we all do love to crush vanity; and there is a vanity in that.

Back Given Out?

There's surely some reason for that lame, achy back. Likely it's your kidneys. A cold or strain ofttimes congests the kidneys and slows them up. That may be the reason for that nagging backache, those sharp pains, that tired, worn-out feeling. You may have headaches and dizzy spells, too, with annoying bladder irregularity. Use *Doan's Kidney Pills*. They have helped thousands. *Ask your neighbor!*

An Iowa Case

C. Wall, plumber, 1410 S. 8th St., Council Bluffs, Iowa, says: "Three years ago I was troubled with my kidneys being weak. I couldn't bend my back. My kidneys were sore and weak and fairly beat with pain. My back felt as if I had a heavy weight across it. The kidney secretions were highly colored and passed too freely. After doctors' medicine had failed to help, Doan's Kidney Pills gave me relief. Three boxes cured me of the trouble."

Judge Couldn't Be Spoiling the Water When He Didn't Use Any Soap in the Bath.

A serious inconvenience is caused in Australia by the lack of spring water. The trouble is partly overcome by the use of huge tin tanks in which the rain is caught.

Naturally, toward the breaking up of the dry season, water becomes very precious.

A judge, on circuit, arriving at a bush shanty, asked for a bath. Such a luxury was naturally refused, as there was only a little water left at the bottom of the tank reserved for drinking purposes, says the author of "Quaint Acquaintances."

When dinner was ready, as the judge could not be found, the landlord went to call him; whereupon a muffled voice issued from the tank, where the judge was bathing!

The landlord, justly furious, roundly abused his guest.

"Do not excite yourself," the latter observed, casually. "I am not spoiling the water, for I am not using any soap!"

Promoting Human Happiness.

"Did you wish all your constituents a happy New Year?"

"Yes," replied Senator Sorghum; "and I felt it was a pretty serious occasion. When a man in my position makes a wish of that kind it is considered a promise and a lot of fellows expect you to get together your influence and make good."

MONEY IN BREEDING MUSSELS

United States Fisheries Bureau Reports That a Profit May Confidently Be Looked For.

The business of breeding pearly mussels artificially has been carried so far by the United States fisheries bureaus that a money profit is confidently promised.

To produce in this way 1,000 baby mussels costs about 20 cents. When they are full grown 13,000 of them will weigh a ton. Thus the cost of producing a ton of pearly mussels of market size (if all survived) would be, as exactly reckoned, $2.68. Assuming a loss of 50 per cent, the cost would be $5.36.

Pearly mussels occasionally yield valuable pearls, but commercially it is the shells, utilizable for mother-of-pearl, that are importantly to be considered.

The fisheries bureau has devoted its attention wholly to the propagation of superior varieties of mussels, the shells of which have at present time a market value of $35 a ton.

Another Way to Put It.

"There are two sides to every question," argued Mrs. Gabb.

"Yes," sneered Mr. Gabb. "The right side and your side."—Cincinnati Enquirer.

The Sweetness of Wheat and Malted Barley is the sweetness of

Grape-Nuts

The delicately rich flavor, natural to the grains, is developed through 20 hours' baking. Grape-Nuts needs no added sugar, and is rich in nourishment of a form easy to digest.

This ready-cooked food is economical

"There's a Reason"

HENS NEED CARE IN COLD MONTHS

Precautions Which Guard Health of Fowls and Increase Productivity Urged.

VENTILATION IS ESSENTIAL

Chickens Can Stand Much Cold Air Provided It Is Dry—Scratch Grains Compel Hens to Take Necessary Exercise.

(Prepared by the United States Department of Agriculture.)

If good results are to be obtained from the flock in winter the houses, which should have been put in good condition at the beginning of the winter, must be kept clean and well ventilated, and the proper kind of feed provided.

Guard Against Drafts.

Drafts should be avoided in the hen house, poultry specialists of the United States Department of Agriculture say. If hens are placed in a draft in winter, colds will develop, which may result in roup or other ailments. The south side, or front, of the poultry house may be left comparatively open, but should be under control, so the openings may be closed gradually as cold weather approaches. Have muslin curtains at the front openings of the house. One window should be left partly open in each pen, even on the coldest nights, to permit ventilation. Fowls can stand considerable cold air provided it is dry.

Feed the grain in a deep litter on the floor in the winter to compel the hens to exercise for all of their grain. The mash may be fed either wet or dry and should be so regulated that the fowls will get about equal parts of mash and scratch grains. It is necessary to give the fowls plenty to eat to obtain good results, but the birds should be eager for each feed. In cold weather feed about one-fourth of the scratch grains in the morning and three-fourths at night.

A good scratch mixture may be made of three parts by weight of cracked corn, one part wheat and two parts oats; and a mash may be made of two parts cornmeal and one part each of wheat bran, wheat middlings and beef scrap. Green feed, such as cabbages, mangel wurzel beets, cut alfalfa or sprouted oats, should be provided to replace the green feed which the fowls have been obtaining in the fields; and beef scrap, skim milk, cut green bone or similar feed is needed to replace the insects which the fowls have been getting on the range. Beef scrap or feed of this nature is essential in obtaining a good supply of eggs during the winter months.

The Hen Is One Pet That Brings in Dollars and Cents.

Clean the dropping boards at least once a week and spray the roosts with kerosene or some commercial preparation to kill mites. Have a good supply of sand or dry dirt to use on the dropping boards during the winter.

If any of the birds develop colds, dissolve as much potassium permanganate as will remain on the surface of a dime into a gallon of water and keep this mixture in their drinking water for several days, or until the symptoms of the colds have disappeared. Remove any sick birds from the flock as soon as they are observed, and treat them in coops by themselves.

Keep Fowls Free of Vermin.

Examine the pullets and hens for lice, and dust them with insect powder or apply a mixture of two parts of vaseline and one part of mercurial or blue ointment, about the size of a pea, 1 inch below the vent of the bird, rubbing the mixture lightly on the skin. An application of this ointment two or three times a year will keep the fowls free from lice. Sodium fluoride is one of the best powders to use to kill lice and only needs to be applied three or four times a year, or oftener, if the fowls become infested. Hens like a small box in the house partly filled with dry road dust or fine dirt in which they may dust.

HIGH VALUE OF RED CLOVER

On Many Farms Crop Has a Place Because of Its Adaptability to Short Rotations.

Undoubtedly much land formerly in red clover is now growing alfalfa; but on many farms red clover has a place and is more valuable than alfalfa because of its adaptability to short rotations.

SHIPPING CONTAINER IS QUITE IMPORTANT

Factors to Be Considered in Selecting Receptacles.

Basket, Crate or Carton Should Be Suited Especially to Produce to Be Marketed—Desires of Customers Must Be Met.

(Prepared by the United States Department of Agriculture.)

One important requirement for marketing farm produce from producer direct to consumer is a proper and satisfactory shipping container, say marketing specialists of the United States Department of Agriculture. A container should be suited especially to the produce to be shipped and should be selected only after considering such factors as durability, size, appearance and cost.

Durability. — Much dissatisfaction with direct marketing has been caused by using containers which were not sufficiently strong. This is especially true when containers are used more than once. Shipping containers should be light in weight but sufficiently durable to carry the produce.

Satisfactory Basket for Potatoes.

Size.—The size of a container depends upon the desires of the customers. Most persons wish to obtain small quantities of each product at a time. Containers should be just large enough for the produce shipped. If the carton is too large or too small, both the produce and the container are likely to be damaged, for the produce will not be kept in place and the container will be crushed. The larger the quantity of produce shipped in one parcel the lower will be the cost per pound for transportation and the lower the container cost per pound.

Appearance.—A container should present an attractive appearance, both on arrival and when opened, and should show the produce to advantage. Of course, new containers are more attractive than those which have been used; and only those second-hand containers which are clean should be used again.

Cost.—The cost of containers puts a distinct limitation on small shipments of farm produce. A shipment must have considerable value in order that the transportation charges and cost of container may not equal a large percentage of the price. The price which can be reasonably paid for a container will depend on the value of the contents, the cost of transportation, and the price received for the produce as compared with the price that could be received locally. A maximum price that should be paid cannot be stated, as each case must be decided by studying all of the factors involved.

Cheap splint baskets are satisfactory for many kinds of produce. For products that need no special type, attractive and satisfactory containers often can be made by the producer at a low cost from clean, discarded paper-board boxes in which merchandise has been shipped.

INSECT DOES SMALL DAMAGE

Leaf-Roller Has Attracted Attention on Account of Its Attack on Many Vegetables.

A minute, green caterpillar, called the red-banded leaf-roller, has attracted attention through its attack on vegetable crops, particularly beans, sweet potatoes, asparagus and corn, as well as strawberries and other plants. The extent of the damage, however, which has been investigated by entomologists of the United States Department of Agriculture is not large, seldom being sufficient to warrant artificial control measures.

This caterpillar rolls a leaf shelter, the interior of which is rather difficult to reach with insecticides. Ordinarily, the rolled leaves can be clipped and burned, as they are easily detected. Arsenate of lead, two or three pounds to 50 gallons of water, is recommended as a foliage spray when the leaf-roller becomes abundant.

MAKE WOODLAND PROFITABLE

Plan to Have It Permanently Productive by Protecting It From Fire and Overgrazing.

Make your woodland permanently profitable by protecting it from fire and from overgrazing; select for cutting only the mature, defective, overcrowded and inferior kinds of trees, leaving the straight, thrifty and better kinds to grow for a future crop.

MRS. ALICE GRESHAM DODD, mother of the first American soldier killed in France, who gives entire credit for recovery of her health to the well-known medicine Tanlac.

The following remarkable endorsement of Tanlac was given recently by Mrs. Alice Gresham Dodd, at the Gresham Memorial Home, Gavin Park, Evansville, Ind., which home was presented to her by the patriotic people of Indiana, as evidence of their appreciation of the services rendered to his country by her son, Corporal James B. Gresham, the first American soldier killed in France. Expressions of sympathy were received by Mrs. Dodd from all parts of the United States, and the newspapers of the country carried the story of the first "war mother."

The shock of her son's death resulted in the serious breakdown of Mrs. Dodd's health, but everyone will learn with interest and pleasure that she is now in splendid health again. When seen at her home recently she made the following statement, giving the entire credit for her recovery to the well-known medicine, Tanlac.

"After my dear boy's death I had a general breakdown in health," said Mrs. Dodd. "At first it was just indigestion. My food used to upset me and I had to diet myself very carefully, which wasn't much hardship, as I lost all desire to eat. Then I had an attack of rheumatism, with severe pains in my shoulders, back and arms. Sometimes I used to suffer a great deal, and my joints would get all swollen up and stiff. I was able to do very little about the house, and at times couldn't even cook a meal. I got very nervous and restless, and at night would lay awake for hours, and lost many a night's sleep as a consequence.

"A friend of mine had received a great deal of help from Tanlac, and it was she who advised me to try it. I am so glad I did for it proved the best medicine I have ever taken. It soon gave me a good appetite and seemed to settle my stomach so that I was no longer troubled with indigestion. I don't know what it is to have rheumatic pains now, the swelling and stiffness has all gone out of my joints and I am able to do the work of the house with the greatest ease. My nerves are now steady and strong. I sleep fine at night, and I feel better in health than ever before in my life. I shall always be grateful for what Tanlac has done for me, and shall recommend it every chance I get."

Tanlac is sold by leading druggists everywhere.—Adv.

Keep Your Blood Pure Nature Will Do the Rest

Did you know that ninety per cent of all human ailments depend upon the condition of your blood?

Nature gives her warnings in various unmistakable ways, so that when the appetite fails, and you become weak and listless and a general run-down condition seems to take possession of the whole body, it is an unfailing sign that impurities will steadily accumulate until your general health will be seriously affected. You should recognize the importance, therefore, of very promptly cleansing out the system, and keeping the blood supply pure and robust.

Get a bottle of S. S. S. at your drugstore to day, and note how promptly it builds up the appetite and gives new strength and vitality. Write for free literature and medical advice to Chief Medical Adviser, 153 Swift Laboratory, Atlanta, Ga.

Thousands of Happy Housewives in WESTERN CANADA

are helping their husbands to prosper—are glad they encouraged them to go where they could make a home of their own—save paying rent and reduce cost of living—where they could reach prosperity and independence by buying on easy terms.

Fertile Land at $15 to $30 an Acre

—land similar to that which through many years has yielded from 20 to 45 bushels of wheat to the acre. Hundreds of farmers in Western Canada have raised crops in a single season worth more than the whole cost of their land. With such crops come prosperity, independence, good homes, and all the comforts and conveniences which make for happy living.

Farm Gardens—Poultry—Dairying

are sources of income second only to grain growing and stock raising. Good climate, good neighbors, churches, schools, rural telephone, etc., give you the opportunities of a new land with the conveniences of old settled districts.

For illustrated literature, maps, description of farm opportunities in Manitoba, Saskatchewan, and Alberta, reduced railway rates, etc., write Department of Immigration, Ottawa, Can., or

KLEMME, IOWA

W. F. Pavey went to Mason City Monday to be in attendance at the Case Tractor School course which lasted for three days. Mr. Pavey is the Case Tractor dealer here.

Renew your subscriptions to the Des Moines Daily Register at the Klemme Times Office. We take subscriptions for every newspaper and magazine published in the U. S.. We can save you money on most of them.

"Those Husbands of Ours" home talent play, with music and drills, opera house, Friday evening, February 18. Admission 25c, children 15c. Box supper follows. Everybody invited. Ladies urged to bring baskets. Hot coffee served free.

Miss Gretchen Blank came home from the hospital at Rochester, Minn., Monday. After a rest of a couple of days she was taken to the Methodist Hospital at Des Moines for treatment. She is geting along nicely and is feeling much better.

Ivan Anderson returned from Fort Sims, near San Francisco, Monday. He enlisted in the navy about six months ago but as the navy are reducing the number of men he was among the number to be given a discharge.

Miss McKahan, our school teacher, is working out an elaborate Easter program which will be put on at the First Methodist Church. Miss McKahan has spent a great deal of her time in dramatic and work of this kind and can be considered an expert.

Ed. G. Ell and Elmer Fuller drove to Mason City Tuesday to attend a banquet given to the Ford dealers of this neck of the woods. They didn't look very starved when they got back so we presume they enjoyed the eats anyway.

Mr. Henry Suckow (Senior) had a birthday last Friday. We have not yet learned whether or not he had a party. Since moving to Klemme Henry gets younger each year so we have not figured out yet just how young he was on his birthday. He must be some younger for his mustache has fallen off and he looks real youthful.

Dave Schwichtenberg returned Friday from his visit at Des Moines, Aldora and other points.

Mrs. W. H. Trafford entertained the Ladies Aid Society last Thursday afternoon.

Mrs. G. Schaefer and Mrs. Ben Walve were Garner visitors between trains last Thursday.

Mrs. Meinders came from Meservey Friday for a few days visit with her daughter, Mrs. Andrew Nelson.

Mr. and Mrs. C. H. Tompkins were down from Garner Thursday visiting Klemme friends.

Miss Myrtle Gast of Garner, was visiting with Klemme friends Saturday. She teaches the Henry Josten school near Klemme this year.

A NEW USE DISCOVERED FOR CHURCHES

Good Roosting Place After Services

Those who delight in gossiping have something real interesting to tell about now and what has come to our ears we are perfectly willing to pass along, although we do not as a rule care to publish scandal cases. But here is one that is sure a peach. There are about three, possibly more couples of lovers in Klemme, (young ones too) who have discovered a new use for the church. In fact, last Sunday evening when the church was let out and the lights turned off and the good janitor went away without locking up, two of the young couples of lovers entered the protecting darkness of the church to spoon to their hearts content, little dreaming that they had been watched and would soon be disturbed. The disturbers were some young men of Klemme out for some fun. They quietly entered the church, listened for lovey talk and smacks, located the parties—turned on a flash light—and bingo—out went the lovers. Not being content with chasing out couples from this church they had also followed a couple to the tracks. The same stunt was tried and they succeeded in routing one couple out of a box car. Now folks, isn't that interesting dope? We might add that this is not the first time this has occurred. Dark churches and box cars are not the proper places for young girls to entertain their boy friends.

UNDER THE GOLDEN DOME

Des Moines, Ia.—The mills of the lawmakers grind slowly, but are beginning to produce a sizeable grist of new legislation. So far none of the more important bills before the house and senate have been acted upon, emergency legislation having occupied the chief attention of the session.

The tempest in a tea pot over the question of the salary of Mabel Elwood, house enrolling clerk, was finally settled by the passage of a compromise which granted her $8.25 per day instead of the $9 recommended by the house. The matter took up most of three days activity by both branches, and was finally disposed of after appointment of conference committees.

Reject Mrs. Snyder

The senate placed itself upon record as opposed to the selection of women as members of the state board of control by rejecting Governor Kendall's appointment of Mrs. W. H. Snyder of Davenport to succeed Former Senator W. D. Sheean of Anamosa, whose term expires soon.

The action was taken in executive session. It is reported that there were 27 votes for confirmation with six members absent. A two thirds majority, or 34 votes, is required for confirmation.

Whether Governor Kendall will resubmit the name of Mrs. Snyder, or name some other person is not yet known. The question of sex is understood to have predominated in the opposition, but there was a certain showing of opposition to the appointment by strong supporters of E. R. Moore in the last gubernatorial campaign.

Considerable controversy is promised over legislation affecting the state highway commission, which seems, however to have a strong, majority of friends. The opposition to the commission is more strongly evident in the senate than in the house. The senate by unanimous vote has requested the highway commission to present facts and figures as to the division of federal aid and automobile license receipts for the use of the lawmakers in pending legislation. So far no important bills relating to the road question have been presented.

An emergency bill introduced by Senator Whitmore of Wapello county, increasing the legal interest permissible upon school bonds too from five to six per cent was passed by the senate 30 to 18 after a spirited debate. Efforts were made by opponents of the bill to confine its provisions to issues already voted but not issued, and to permit the sale of bonds at a discount of from 3 to 5 per cent.

The bill as passed by the senate is for a two year period only. It is declared that under present conditions of the bond market it is impossible to dispose of five per cent bonds.

Rural Credits Bill

Representative A. O. Hauge of Polk county will soon present a bill providing for a state rural credit department for the purpose of assisting in the financing of farm purchases and improvements.

Mr. Hauge proposes to use the endowment fund of the state college at Ames as a starter for the rural credits system. This fund now amounts to about $700,000 and is invested in farm mortgages. Hauge's proposal is to establish a rural credits corporation which would have the power to issue and dispose of debenture bonds with the present loans as security, thereby creating a revolving fund for the further extension of the loaning powers of the fund.

He believes that the state can enter into this line of activity and dispose of its bonds with equal facility to the trust companies now engaged in similar business. The bonds would be tax exempt and he believes would have a ready market. Mr. Hauge is a prominent banker of Des Moines.

The funds would be loaned out at legal rates of interest upon approved security, and any profits would be used to increase the endowment fund of the college.

A state tax upon amusements will be submitted to both house and senate which it is believed will increase the state revenues by approximately $1,000,000 per year. Moving picture houses, theaters, and other commercial entertainments would be required to collect a tax of one cent or more on each admission, the amount to be paid to the state for general fund uses. A state tax upon franchises of corporations is also suggested in a bill introduced in the house by Representative Springer of Wapello and in the senate by Senator Newberry of Strawberry Point.

Bonus Bill Presented

The American Legion Soldier Bonus bill, already outlined in these columns, has been introduced in both house and senate by the military affairs committees. It provides for the submission at the general election of 1922 a $22,000,000 bond issue for the payment of a bonus of 50 cents per day for each day in service during the war of all veterans who had more than 60 days service. Its passage without material opposition is forecasted.

The conservative tone of the session is becoming more and more evident every day. The action of the senate in rejecting the appointment of Mrs. Snider on sex grounds is a fair indication of the attitude of that body at least upon participation of women in public affairs.

A bill presented by Senator Cessna of Poweshiek county providing for voluntary exemption of women from jury service will probably be amended by the senate committee on the juidiciary to bar women from jury service at all. A number of the legislative legal lights hold that women are not specifically given the privilege of serving upon juries by the new national constitutional amendment, or by any Iowa statutes, and in view of the fact that suitable accomodations are declared to be unobtainable in many of the counties of the state it is not unlikely that women will be barred from jury service entirely by the present general assembly.

Code revision is providing plenty of labor during the evening hours for members of the house and senate. The present task is the checking up of the new compilation of the statutes, paragraph by paragraph, in order to detect errors and omissions.

Hold Up Code Bills

None of the new code bills have been introduced, and it is probable that they will not be taken up this session. Numbers have been reserved for them on the house and senate journals, and if there is any possibility of acting upon any of them they will be presented.

The code commission is coming in for plenty of criticism both by members of the legislature and outside sources. Many members feel that the committee has exceeded its authority in its recommendations of extensive changes in existing laws, and outside interests affected by changes in existing statutes are opposing acceptance of many of the bills.

Several omissions from the old code have been detected in the new compilation. One whole law relating to the prohibition of the advertising of cigarettes in Iowa, has apparently been entirely overlooked, and other similar instances are bobbing up.

No drastic bills relating to consolidation of departments have been presented. The committees on departmental affairs are studying the matter, and will have some recommendations soon.

More For Education

Liberal treatment to the educational institutions of the state is forecasted by the appropriations bills. The state board of education is asking for a special levy of one mill annually for the improvement and extension of facilities at the state university, Ames, State Normal school, school for the deaf and schools for the blind, in addition to current appropriations.

The levy would net a total of about $10,000,000 during the ten years.

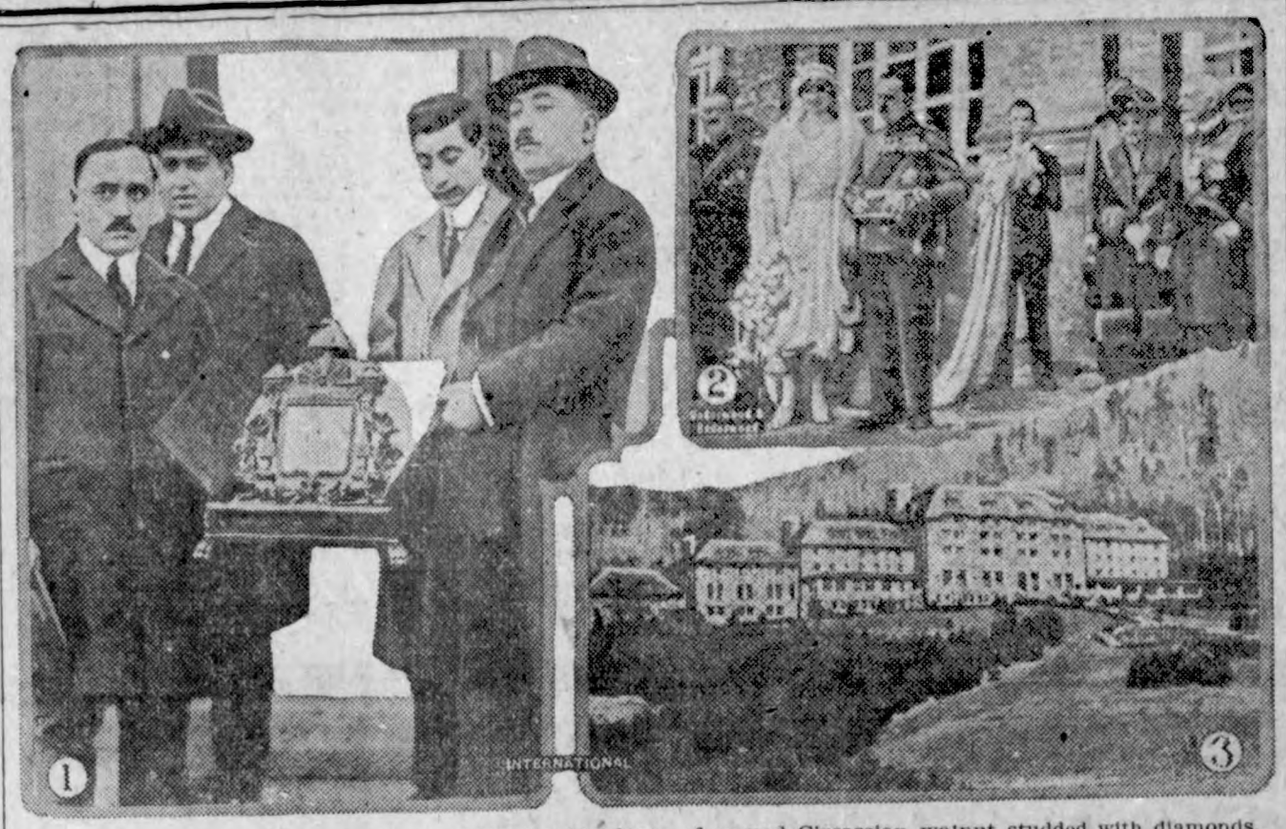
County officials will receive the same salary for the next two years as they have in the past biennium, under a bill which has already passed the house and promises to go through the senate without opposition. The last legislature increased salaries as an emergency measure for a period of two years, and the bill passed by the house merely extends the present law for another two year period. While increases will be asked in some cases, the general disposition is to stand pat on the present figures.

Practically no bills of vital interest to agriculture have been presented as yet, but a number are in prospect. A bill introduced by Senator Brookhart of Washington county would exempt farmer's co-operative societies from the operation of the anti-trust and anti-monopoly acts, providing that the profit to be permitted would not be in excess of eight per cent per annum.

Legislation looking toward the wiping out of tuberculosis of cattle and swine is being considered by a number of legislators, and several bills will be presented upon this subject.

Legalization of boxing in Iowa is asked in a bill to be presented by Representative Lake of Woodbury county. Ten round matches, with a per centage of the receipts to the state, are asked for. While boxing matches of all description save purely amateur affairs are prohibited under the present law, the statute is more or less of a dead letter in many of the cities of the state. The American Legion is backing the boxing bill. Two years ago it was beaten by a big majority.

An appropriation of at least $100,000 per year will be asked to extend the state park system. Several bills relating to the conservation of Iowa beauty spots for the use of the people have been prepared. One bill permits the state to condemn a foot path about the borders of any lake or stream, thus giving the public an undisputed right of access to the waters.



1—Delegation of Syrian residents of Brazil with plaque of carved Circassian walnut studded with diamonds, which they presented to President Wilson. 2—Scene at the wedding of Prince Conrad of Bavaria and Princess Bona of Savoy, Italy—the first royal international marriage between citizens of former enemy states since the war. 3—Grove Park Inn at Asheville, N. C., where Vice President-elect Coolidge is spending part of his vacation.

NEWS REVIEW OF CURRENT EVENTS

Germany Says She Will Not Pay the Reparations Fixed by Supreme Council.

'WOULD ENSLAVE THE NATION'

Putting on Poor Face for Effect—American Unpreparedness Receives Some Blows—Dawes Vigorously Condemns War Management Critics—Latest Cabinet Guesses.

By EDWARD W. PICKARD.

Germany says she neither can nor will pay the total of reparations that was fixed by the supreme council—54 billions in 42 years and a tax of 12 per cent on her exports during the period. Eminent financial and economic experts of the allied countries and America agree that Germany will find it impossible to pay that sum and survive. Nevertheless, it is probable that the German representatives in the forthcoming London conference will sign the agreement laid before them, and that the allies thereafter will get from the defeated country as great a proportion of the 54 billions as they can, modifying the terms from time to time.

The official protest of Germany was voiced by Dr. Walter Simons, the foreign minister, and what he said was concurred in by the reichstag parties through their leaders, with the exception of the ultra radicals, who gloried in the painful position of the government. Doctor Simons asserted that the obligations thus imposed on the Germans would mean the complete economic enslavement of the people, and particularly of the workers. He said the government would offer counter proposals at the London meeting.

Among the people of France there was satisfaction with the reparations plan, especially because it was expected that the first effective payments by Germany will make available for negotiations or for use as security the French share of the 60,000,000,000 gold marks in bonds already delivered by Germany to the reparations commission. Great Britain has agreed not to utilize her claim on Germany as a basis for loans during the next five years, and this gives France the opportunity to make use not only of her share of the bonds but also her part of the 12 per cent tax on Germany's exportations, to raise money to continue the work of reconstruction in northern France.

That tax on German exports is a feature that may cause a lot of trouble. By many it is held to be false economics that will react to the injury of other countries, and in Washington there is talk that our state department may feel called on to make formal protest. Lloyd George says the tax would be easy to collect, and he defends the plan in its entirety. If Germany should absolutely refuse to it, he asserts, "there is nothing for us to do but to apply the treaty literally."

That opinion favoring German claims in the matter may be based on false premises is made clear by the report of the conference of financial experts held in Brussels, in which Germany is shown just how to wipe out the deficit of 76,000,000,000 marks in her 1920 budget. The experts found Germany was deliberately putting on a poor face for the purpose of showing the world her precarious financial condition and her difficult situation. Certain of her expenses were multiplied 75 times over those of 1919, and certain of her taxes vastly below those the people of the allied countries are paying. Furthermore, the budgets of 1919 and 1920 carried a number of credits which were only partly disbursed, such as 16,500,000,000 marks for the allied armies of occupation expenses, of which only 4,500,000,000 marks was spent. The budget for 1920 carried 42,000,000,000 marks for execution of the peace treaty, while only 17,000,000,000 marks had been paid out up to December 1 last.

Disarmament, a small army and other forms of unpreparedness got some hard knocks last week. In the first place the senate naval affairs committee put the snuffer on the Borah resolution for a naval construction holiday, after hearing Admiral Coontz, chief of naval operations, and Admiral Taylor, chief constructor of the navy. Both opposed the plan for a cessation of naval construction for six months. They said it would cost as much to do this as to continue to build, as contractors would be able to collect large damage claims from the government. Furthermore, they see no need for an investigation as to what constitutes a modern navy, being convinced by investigations already made that the capital ship is not obsolete and that the present program of the United States is correct.

General Pershing appeared before the house naval committee and gave a warning against unpreparedness and pacifism. He expressed approval of a world conference on disarmament, but said the United States should proceed with its present army and navy programs until at least five great powers have entered into a definite agreement.

On the other hand, the house foreign affairs committee reported favorably a resolution authorizing the President to invite the nations of the world to send delegates to a conference to provide for disarmament.

In the house, the fight to prevent reduction of the regular army below 175,000, was opened by Chairman Kahn of the military affairs committee. He said President-elect Harding told him recently at Marion that he favored an army of 175,000 men, but that he hoped some day it could be cut down to 150,000. Mr. Kahn also disclosed Mr. Harding's belief that congress should enact legislation providing voluntary military training for 150,000 men annually.

Meanwhile economy of the most rigid sort is being forced on our regular army by great deficiencies in funds for the remainder of the fiscal year. The shortage in the quartermaster corps alone is said to be $94,000,000. In order to reduce the prospective deficits to the lowest possible minimum, the War department ordered reduction of 40 to 60 per cent in the number of civilian employees in the army; reduction of the consumption of gasoline and lubricants by 50 per cent; allowance of clothing, equipage and supplies cut to the lowest possible limit, repaired shoes and salvaged uniforms to be issued wherever possible; substitution of canned food for fresh wherever possible, and expenses for transportation, communication and fuel cut to the bone. Much of the vocational training, upon which the recruiting campaign was based, must now be abandoned, as all the teaching will have to be done by army officers.

Gen. Charles G. Dawes of Chicago, former chief of supply procurement for the American army in France, made lively and interesting two sessions of the house war investigating committee. Severely condemning what he characterized as political attempts to discredit the people who won the war, he defended the work of his department and of the army in general, and denied that there was waste and extravagance in the liquidation of American accounts in France and the sale of surplus stocks to the French government. As to the alleged payment of excessive prices for equipment and material, he said this was necessary to get the job done quickly and was justified by the fact that the army did the job. General Dawes did not mince his language, and what he had to say of our "pink ten" diplomats in Europe who delayed matters with their red tape was tonic in its harshness. The discussion at one time turned on Great Britain, and the general shouted:

"I am no more ashamed to stand up here for Great Britain than for the United States. It seems to be fashionable in American politics to attack Great Britain. I am not in politics, and I am not going to be. And I thank God that in a crisis like we had there were no bickerings between the English-speaking people. Great Britain took over 40 per cent of our troops. Of course General Pershing gave them five divisions, but it had to be done to save the allies' line."

In these remarks Mr. Dawes, who has been a leading probability for the place of secretary of the treasury in the Harding cabinet, seemed to remove himself from the lists. Certainly what he said so frankly will not make him very acceptable to the professional Irishmen of America who are mainly responsible for the anti-British propaganda. However, at this writing he is still among the cabinet possibilities. The latest list, as reported by the correspondents with Mr. Harding in Florida, is:

Secretary of State—Charles E. Hughes of New York.

Secretary of the Treasury—Charles G. Dawes of Illinois or A. W. Mellon of Pennsylvania.

Secretary of War—John W. Weeks of Massachusetts.

Secretary of the Navy—Frank O. Lowden of Illinois.

Attorney General—Harry M. Daugherty of Ohio.

Postmaster General—Will H. Hays of Indiana.

Secretary of Agriculture—Henry C. Wallace of Iowa.

Secretary of Labor—John J. Davis of Pennsylvania.

Secretary of the Interior—Albert D. Fall of New Mexico.

Secretary of Commerce—Still vacant.

Mr. Davis, slated for the labor portfolio, was formerly a steel worker and is now director general of the Loyal Order of Moose.

The fight over wages, between the railway executives and the railroad brotherhoods, is on before the railway labor board, and accusations have been flying thick and fast. The executives asked permission to abrogate the national wage agreements entered into during the war, which would mean the lowering of the present wage scale. The brotherhood leaders immediately entered vigorous protest, asserting that the rail chiefs have conspired to overthrow the railroad labor board and to crush, once for all, the existing labor organizations. They said they could show that if the bankers who are responsible for the fiscal needs of the railroads since their return to private ownership would perform their duty, the roads could be adequately financed and their solvency maintained.

A veiled threat was found in the statement of Grand President Grable of the maintenance of way employees, who said: "The whole thing simmers down to a question of whether the employees are to secure their rights by justice and the proper legal avenues or by the use of economic force. This is the question which is now up for answer, as much as that of whether wages are to stay up or go down."

President Wilson was appealed to by both sides, but decided, it was said, to take no hand in the fight.

The Fordney emergency tariff bill took up a lot of the senate's time, but there was little prospect of getting it to a final vote An attempt to apply cloture was defeated by the Democrats, who then embarrassed the Republicans by consenting to have a showdown on the measure about February 16. The Democrats asserted the Republican leaders had been bluffing about their desire to pass the bill and were buncoing the farmers.

Prohibition Commissioner Kramer put an awful dent in the illicit booze industry last week by an order forbidding further withdrawals from bonded warehouses of any liquor except industrial alcohol, wines for sacremental purposes, and liquor for retail druggists, who will be permitted to withdraw not more than five cases under each authorization. He also ceased issuing permits for wholesale liquor dealers. Having clamped down this lid, certain of the chief's leading aids were sent to the Canadian border to try to stop the smuggling of liquor there.

DRESSMAKER MADE WE

Followed a Neighbor's Ad and Took Lydia E. Pinkham Vegetable Compound

CHAPTER XIV—Continued.

—15—

hat is why I am coming back," insisted. "I told you I could ."

ll right," he grinned cheerfully, e along, then; only you keep down of the way, and let me do the ng. There! now you lost me a Did you see that buck dodge een those two rocks? He'll try trick again presently."

ga came back, creeping out cau- ly and finding a place slightly nd where he lay. She held to weapon, laying the other on the a. together with a belt filled with idges.

elby barely swept his eyes toward his whole attention concentrated hat was occurring below. Some- g was taking place down there, exactly what could not immediate- e determined. He had perceived moving beyond range, dodging g from rock to rock, mere glimpses lark figures, yet plainly enough ans. Once he was almost sure he nguished a white man, through a in a gully, but the fleeting view ed was not convincing. Never- ss he had no doubt but what e were white men present. The od of attack was too bold, and rmined, for savages alone; it was the Sioux idea of war. Besides one man who would have a real ct in this assault would be Laud. nd all question it was he who behind the effort, urged on by onal hatred, as well as a desire ain possession of Olga. Shelby dered what the fellow might know. d he be aware of the escape of klin? and that Pancha had ridden h in search for help? If he did might account for his desperate rness to overcome what resistance could offer before she returned. probably not, for if he did know coward in him would cause him to flight before he could be cornered his place. It was far more likely he believed himself opposed mere- y Shelby and the girl, armed with volver or two, and having a lim- supply of ammunition. He saw peril in the adventure, and fig- that a quick, sharp rush, his war- s leaping from covert to covert, ld win an easy victory. He would p up a steady rifle fire from be- d the rocks, forcing the defenders eep under cover, and then sudden- end a charging party to end the ir.

elby smiled grimly at the mental ure, never turning his head as he e to the silent girl beside him. ow's Macklin?"

ead, I think, Tom. He didn't n to breathe even faintly."

The poor devil; it will be mighty d on Pancha though. You got your ?"

Yes."

All loaded, I reckon; if not you er fill it up. There is goin' to be to pay presently. When I say you let drive. Keep down out o' t till then, but when you begin to , make her act like a gatling."

But can't those riflemen see you e?"

Well, it doesn't look much like they the way they are pepperin' that . Nice little tune the bucks are in'. That's what makes me think ething's up; they aim to keep us n out o' sight, so we won't glimpse t's comin'. 'Tain't Indian nature vaste lead that way. Laud's back e somewhere playin' this game. I k I got sight of the sneakin' cuss inute ago, but he was out of ge."

You believe they intend to try and up here?"

That's my present notion; they 't look for much trouble either. s up to us to give that outfit the prise of their lives."

he reached out her hand and found as it rested on the belt of cart- ges.

Tom!"

Yes," he answered without remov- his gaze from the trail below.

Don't worry about me," she said nestly. "You know what I mean; 't think about me when they do ne. I'll take care of myself, all ht."

He cast a quick glance into her e.

Sure, I know you will. You are trump, a good pardner. I thought at for a long while. You won't get what I told you."

I'll not forget."

There was a moment of silence and en she spoke again, a sharp little tch in her voice which she could t restrain.

"Tom!"

"Yes."

"I—I don't know what is going to ppen. I—I am not afraid, but— t it seems to me I—I would like have you kiss me once more first you only have once, you know."

Shelby turned his body about, leav- g his cocked revolver lying on the one, and caught both her hands gerly.

"Lord, I'm glad to hear you say at, little girl," he exclaimed, his s aglow. "I reckon I've been sorter half afraid o' you. But I ain't goin' to be any more; you sure mean it, don't you?"

Her eyes looked honestly, earnestly into his, answering him before her lips spoke.

"With all my heart, Tom."

He drew her softly toward him, forgetful of all else. Then a rifle spat viciously, and a ball struck the edge of the parapet, sending a splinter of stone flying past them.

It was a long, nerve-racking wait, during which they rested side by side, intent on every movement below, but finding little opportunity for action. Occasionally they spoke, but generally remained silently watchful. The Indians kept up a desultory fire, and behind its screen were evidently making a change of position, yet so stealthily as to be hardly observed. They exposed themselves freely enough beyond pistol range, proof that they were fully aware of the caliber of the weapons confronting them, but closer in the savages crept from rock to rock invisible. Twice only did Shelby succeed in getting a fair shot—once clipping a scalp lock from an incautiously exposed head, and again winging a brave who recklessly attempted to leap across a narrow opening. This fellow dropped in the open trail, wounded in the thigh, and unable to drag himself to shelter, and soon a sinewy red arm reached out from behind a rock in an effort at rescue. This was withdrawn quickly as a speeding bullet struck within an inch of the outstretched hand. The injured warrior lay there twitching with pain.

The minutes dragged into half an hour, the strained nerves of the defenders on edge. Olga was trembling from head to foot, struggling to retain self-control, Shelby never relaxing a muscle, or averting the steady gaze of his eyes. Suddenly he rose to his knees, a revolver gripped in either hand.

"There's Laud now," he announced simply.

She saw the fellow also, lifting her head to peer over the low rim of rock, standing in the open trail, but just beyond range. He held a rifle in his hands, which he swung above his head, at the same time giving utterance to a hoarse shout. It must have been a signal, for instantly those rocks were black with half-naked figures, leaping madly forward, with rifles flung in air, and giving utterance to fierce yells. It was a wild race, but the steep ascent to the cave halted them. The two above, reckless now of exposure, fired as swiftly as they could press trigger, straight into the red faces. Some fell, shot down in their tracks, a few paused to reply, but the majority began to clamber up. Laud ran forward to join them, roaring out his orders. He was in full view against the snow-covered trail, and Shelby swung his smoking muzzle down upon him. To the crack the fellow flung up both hands, whirled about, and crumpled into a shapeless heap. Shelby, scarcely realizing the success of his quick shot, stag-

The Fellow Flung Up Both Hands.

gered back, reversed the gun in his hand, and struck with the butt at the first Indian appearing above the platform. It was hand to hand.

CHAPTER XV.

—

A Squadron of the Sixth.

Pancha vanished into the fog, wading along the creek, and finally creeping out below the burned cabin. If there were any guards left there they were not encountered, and the mists hung so thick at that early hour she took few precautions to avoid them. Her one thought was Macklin; love had conquered hate, and the desire for revenge. There was a chance of success for her mission. The debris had not been searched over; it could not have been, for the fire still smoldered, but the moment the Indians were able to overhaul the wreck they would discover that their victims had, in some way, escaped. There would be no charred bones, no singed flesh, to tell of dead bodies consumed in the flames; they would not even find Macklin's remains. And Laud was no fool. The truth, in some form, would come to him at once; he would know they had got safely away; nor would he ever stop until he again found them. And he would suspect her; perhaps had seen her face when she fired that fatal shot. Her only chance lay now, before this revealment came.

She was cool, resourceful; had shrewdly thought out every step. If she was still unsuspected, no one would stop her. She had always been free to leave the valley. Often she had taken early rides, and none of the ordinary guards would consider her going forth as at all strange. Of course, the Hole was filled now with strange fugitives—Indians hiding from the soldiers, suspicious of every white face. These might cause trouble, but she must take that chance. There was but one way to save Macklin's life—the doctor at Gerlasche. Shelby had told her so, and nothing else remained fixed in her mind. Mother of God, she would save him!

There were three horses in the little stable shack back of the cabin. She crept cautiously up through the fog, unable to see in the gloom, but locating the animals by touch. One was still moist from riding, Laud's pony, no doubt. The next was her own, having scarcely stamina for such a trip, but the third was the bay Juan had always been so proud of. She led the animal out, saddled and bridled him in the darkness, and then, mounting in the gray dawn, with a prayer in her heart for help and guidance she rode slowly out into the trail. A fire burned in front of the little house beside the falls, a mere flicker of half-burned logs, with two men hovering over it. One of them started up, at sound of the horse's hoofs and gripped a rifle. He was white, a flapping hat brim shadowing his face; the other, an Indian, wrapped in a blanket, merely lifted his head, and stared moodily. Her heart gave a sharp bound, but she reined up carelessly, as the fellow stepped into the trail. He peered curiously into her face.

"H—l, young woman, you're out d—d early, ain't you? What's up?"

There was nothing vicious in his greeting, and her heart quit its pounding.

"I'm after a doctor, Sam," she said swiftly, believing boldness the best card to play. "My brother has been shot."

"Sure, I heard that, only they told me he was dead; he ain't, hey? Had a rumpus with Injun Joe, didn't he?"

"Yes; I just heard about it. He must have the doctor right away."

"Where the h—l you aim to find one?"

"Over at Gerlasche. There is an army surgeon there."

"Sure, but I'm bettin' the cuss won't come, 'less he brings the whole army 'long with him. He'd have 'ter mosey in yere blindfold if he did."

"Just the same hee'll come, if I find heem," she said grimly, "for I'll bring heem, dead or alive. Who's out there on the trail?"

"'Red' Haines, an' Stumpy, 'long with a couple of Sioux. The boys are a bit jumpy just now with all them sojers scoutin' the Bad Lands. Maybe they'll try ter stop yer, but yer tell 'em I said it was all right. Say, what was goin' on last night—shootin, ter beat h—l up the canyon, an' there was quite a fire, too?"

"Row over the girl Macklin brought in," she explained calmly, "an' the old cabin got burned."

"Some more o' Injun Joe's cussedness, I reckon?"

"Yes, he was in it; well, Adios Sam."

She rode forward, never even venturing to glance back. Thus far everything had gone easier than she could have hoped. There were no orders out against her, and these night guards were not even aware of what had taken place. She guided her horse under the veil of falling water, and up the steep bank beyond, out into the valley of the Cottonwood. There was little danger of meeting anyone now, she needed to avoid, and once beyond those watchers at the head of the trail, the way would be open. She came upon these just below the crest, grouped for shelter under the ledge of an outcropping rock. Haines had been drinking and was in a good humor, listening to her story with a broad grin, and dismissing her willingly enough.

"To h—l, o' course yer kin go," he said thickly. "Yer brother pulled me out o' the Sowskin onct. He's a d—n good scout of a Mex. Go to it, girl; you know the trail?"

"Yes, along the edge of the Bad Lands."

"Sure; better keep in the first gully, er yer might run inter a sojer outfit. They're thicker than fleas out there now, they tell me. So long, sister."

It had begun to snow, big, heavy flakes, drifting with the wind, quickly whitening the landscape. The slight marks of the trail were almost instantly obliterated, but the low range of hills ahead were a sufficient landmark, and she forced her horse into a swift pace; riding with her head lowered, but with watchful eyes peering through the snow curtain.

She was alone now; free, with nothing intervening between her and Gerlasche. Her heart bounded with the elixir of success—she would bring back the doctor to Macklin. She felt no doubt any more.

The direct trail circled just within the outer range of the sand hills, making it impossible for her to mistake the way even in that maze of snow. She rode more carelessly now that she was safely out of sight, and free from any possibility of pursuit. The horse, with lowered head, seemed to feel the urgency, and plunged forward eagerly. Suddenly as they swept around a sharp corner, seeing and hearing nothing to warn of any other presence in that solitude, they came at full tilt against a halted column

"Well, What's This?" He Growled.

of cavalry. Before Pancha could even jerk up her reins, a startled trooper had gripped the bit, and held her mount helplessly pawing the air.

"Well, what's this?" he growled, tugging at the frightened animal, and dragged half off his feet in the fierce struggle. "A Mex! Say, fellows, this looks like Arizona. Lay hold here, Mapes! Call the sergeant, somebody; I've got this bird! whoa there! now, what's all this about, young lady?"

"What is it Summers?" the sergeant, pushing through the ring of men, peered curiously up at her from under the brim of a battered campaign hat.

"She just come atearing in, sergeant, like she was goin' somewhere. She was sure ridin' like h—l, an' she is Mex, all right.'

"So I see. Well, senorita, what are you doing out here?"

His face was kindly, if stern.

"Senor, I ride for a doctor," she said earnestly. "Please do not stop me—a man is dying."

"A man? Where? Is he a Mexican?"

"No, senor, an Americano; he was shot; he verra bad; if I find no doctor, he die maybe."

"But where were you going?"

"To Gerlasche, senor, there is army doctor there."

"Not now there ain't; he's back here with us somewhere. Where is this fellow who's hurt?"

She hesitated just an instant, yet there was no avoiding the truth. If the doctor was here among these soldiers, she would have to tell the truth or else desert Macklin to his fate. Besides, what did she care? Her hatred of Laud suddenly flared into new life. Here was the opportunity for revenge, as well as service.

"In Wolves' hole, senor."

"Wolves' hole! Good God! did you come from there? Pass the word for the major, some one. What's that? Oh, excuse me, sir," and he came stiffly to attention, facing the heavy-set, middle-aged officer, with iron-gray mustache and goatee.

"What have you here, sergeant?" the latter asked briefly, "Mexican woman?"

"Yes, sir; she just ran into us at full tilt. She claims to be after a doctor to attend to a wounded American over in Wolves' hole."

"Is that so? Perhaps this is good luck. Who is this American, senorita—some d—n white renegade?"

"He man I love, senor."

"Oh, that's it. Then perhaps we can do business. We've got a surgeon here with us. If you will show us a way to get into Wolves' hole, I'll promise he'll take care of your man, all right."

"You ask me to guide you?"

"That's the bargain. We have been trying to locate the place for two days. Who is the leader of those outlaws?"

"Indian Joe Laud, senor."

"I've heard of the brute. Judging from the way you looked then, he is no friend of yours."

"No, senor; I hate heem; he keel my brother; now he try to keel this man I tell you 'bout—he an' two more Americanos."

"Two more! This is becoming interesting, Sergeant. Let's have the straight story, senorita. You want us to help these people—is that it?"

"Si senor; it is nothing to me what you do. I care for them not at all; they not my people any more. There are many—Indians a lot; they hide there."

"But, who are these Americanos? They belong to the gang?"

"No, senor. One was a woman, senor; young, pretty woman; she captured and brought there. Eet was her husband that try to save her. He follow an' git in some way, like the Mother of God help. Hees name was Shelby."

"Shelby?" broke in the sergeant, forgetful of the officer's presence in his surprise. "What Shelby? Was his other name Tom?"

"Si, senor," and she turned her eyes on him. "You know this Tom Shelby?"

"Do I! of course I do. You remember him, Major Hays. He was with us once in 'C' Troop; then later detailed with the scouts. He's up in this country, I know. I ran into him down at Ponca when I came through there. Why, that was his wedding day, and I saw the bride."

"You say those renegade devils have got them both there in the Hole?" broke in the major, "prisoners?"

"They got away now; they hide in a cave," she explained.

"And you will show us the way in?"

"Senor, the doctor he will care for this man if I do?"

"I pledge you my word he will."

"And you keel Indian Joe Laud, senor?"

"We'll surely do our best."

"Then I show you—yes; who that man there?"

Shaunessy wheeled about to face the fellow she pointed at, gripping him with one hand, and dragging him forth from among the circle of soldiers.

"This is the bird they gave us for a guide," he said shortly. "You know him?"

"He," she gave vent to a bitter laugh. "That fellow Dull Knife; bad Indian, horse thief. Why they give you heem?"

"H—l knows. What'll I do with the cuss, major?"

"Have a couple of men hold him under guard. We seem to be on the right track now; senorita, where is this Wolves' hole?"

"Over there, not far; across the mesa. You come, I show you. That be better first, senor—just you an' some others, so you can tell what to do. Maybe eet be better we go afoot, so we be not seen."

"On foot! You don't mean we are so near the place?"

"Si, senor; I show you."

A little handful followed her lead between the sand ridges out upon the open plain— the major, a lieutenant, the sergeant, and three men. She led them along a slight depression, sufficiently to partially screen them from observation. The steady fall of snow had ceased, although there were occasional flurries, driving sharply into their faces. Overhead the clouds hung low and gray. Hays swore under his breath, half convinced he was being made a fool of. Twice he started to speak, but held his tongue. The girl never turned her head, but moved straight forward.

She came to a slight ridge, and stopped suddenly, pointing.

"'Tis there, senor," she said simply, "Wolves' hole."

The astounded officer stood motionless, his mouth open, his eyes staring at the sight so unexpectedly revealed. For an instant he could not believe what he saw. Almost under his feet the precipice fell away into that tremendous gorge, the mantle of snow emphasizing its depth, but bringing out the black rocks in stern contrast.

"Good God!" he exclaimed, "what a gulf! And not a sign to make you dream of its existence. I'd have sworn ten feet back this plain was a dead level for thirty miles. But how in heaven's name do we ever get down there?"

"There is something going on, sir, up yonder in that canon," spoke up the lieutenant eagerly. "Listen. Those are rifles popping, and I can see white puffs of smoke through the glass. There's a fight going on down there."

"D—d if you ain't right, Boyd; they are certainly popping away rather lively. Cornered Shelby likely, and, as I remember the lad, he'll stay with them as long as he has a cartridge left. By jingo! we've got to get down, and clear this nest out. Where's the trail, senorita?"

"Over yonder to the left, senor. You take your glass, so. Now straight along the bank, where that cedar tree tops the edge. It stands all alone. You see what I mean?"

(TO BE CONTINUED.)

In Position.

From a story—"I am half inclined to kiss you," he said, as he bent over her. —Boston Transcript.

The "war of the union" begins shortly after the marriage ceremony ends.

A Rap.

Ellery Sedgwick, the Boston editor, detests the best-seller type of novelist and avails himself of every opportunity to rap best sellers over the knuckles.

Mr. Sedgwick, at a Cambridge tea, was approached by a best-seller novelist from the West.

"Say, old man," the best seller began, "I'll be sending you a thing or two of mine one of these days. I suppose you know about the success of my last yarn? No? Well, by gosh, she's been translated into French, German, Spanish and Chinese."

"Why don't you get somebody to translate her into English?" said Mr. Sedgwick dryly.

Thousands Have Kidney Trouble and Never Suspect It

Applicants for Insurance Often Rejected.

Judging from reports from druggists who are constantly in direct touch with the public, there is one preparation that has been very successful in overcoming these conditions. The mild and healing influence of Dr. Kilmer's Swamp-Root is soon realized. It stands the highest for its remarkable record of success.

An examining physician for one of the prominent Life Insurance Companies, in an interview on the subject, made the astonishing statement that one reason why so many applicants for insurance are rejected is because kidney trouble is so common to the American people, and the large majority of those whose applications are declined do not even suspect that they have the disease. It is on sale at all drug stores in bottles of two sizes, medium and large.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Adv.

Evidently Was Indisposed.

Alfred was a boxer and his father was very anxious to learn the result of his son's first fight. He made the boy promise that a wire should reach him as soon as the contest was over.

"You won't disappoint me, Alfred?" he said.

"No. I promise," replied Alfred, and sallied forth to the fray.

The father waited impatiently until the telegraph boy appeared at last.

Eagerly he seized the envelope and tore it open.

It was signed "Bill Bruiser," and ran;

"Alfred would wire if he could. But he can't."—London Ideas.

End of a Perfect Day!

One tot at kindergarten had a habit of ending her stories with the remark, "And they lived happily ever after."

One day all were surprised to hear her conclude: "And the tiger ate her up, and she lived happily ever after."

Catarrhal Deafness Cannot Be Cured

by local applications, as they cannot reach the diseased portion of the ear. Catarrhal Deafness requires constitutional treatment. HALL'S CATARRH MEDICINE is a constitutional remedy. Catarrhal Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result. Unless the inflammation can be reduced, your hearing may be destroyed forever. HALL'S CATARRH MEDICINE acts through the blood on the mucous surfaces of the system, thus reducing the inflammation and restoring normal conditions.

Circulars free. All Druggists.

Airplanely Evident.

"We should keep up our airship department," thinks a punning correspondent, "because our masculine aviation stars will prove men-aces to unfriendy governments."—Boston Transcript.

WOMEN! USE "DIAMOND DYES"

Dye Old Skirts, Dresses, Waists, Coats, Stockings, Draperies—Everything.

Each package of "Diamond Dyes" contains easy directions for dyeing any article of wool, silk, cotton, linen, or mixed goods. Beware! Poor dye streaks, spots, fades, and ruins material by giving it a "dyed-look." Buy "Diamond Dyes" only. Druggist has Color Card.—Adv.

Who Knows?

A Manhattan dealer in whale meat explains that "the stuff tastes like a beefsteak cooked in clam broth and sugared." Now what does a beefsteak cooked in clam broth and sugared taste like?

Rather.

"That man works by fits and starts."
"Fits and stops, I should say."

For Mothers

Kansas City, Kans.—"After motherhood I became weak and nervous, was run-down to such an extent that I could hardly walk. I ached and pained all over. I was, plainly speaking, a complete wreck when a relative advised me to take Dr. Pierce's Favorite Prescription. This I did and in less than a month I was a well woman. Have been strong and healthy ever since."—MRS. ANNA TIMMERMAN, 302 S. 14th St.

Sold by all druggists; made without alcohol into liquid and tablets.

ARMENIAN GIRL PLEADS FOR SISTERS

Tragic Tale of Harem Victims' Sufferings.

More than ten thousand Armenian girls have been rescued from Turkish harems through the help and generosity of America. This is the statement given out by the Near East Relief, which is making the saving of these tragic victims of Turkish cruelty one of the most important features of its work.

That it is a work which in itself justifies the millions that America has spent in this stricken land is testified to by little Miss Eliza Dodurian, a twenty-year-old Armenian girl recently arrived in this country. Miss Dodurian, through the intervention of American missionaries, was herself spared

ELIZA DODURIAN.

the sufferings of exile and the horrors of slavery; but she knows all too well the terrible fate of her sisters and friends. It is for them—the soft-eyed little girls of fifteen and sixteen whom last she saw being torn from their mothers' arms and carried off on the saddle bows of the Turkish soldiers—that she makes her plea.

What their lives have been since then may be guessed by a look into the faces of any of the ten thousand who have passed through the Rescue Homes of the Near East Relief. Their heads bowed in shame, they creep into the American relief stations, trying vainly to hide the tattoo marks which proclaim to the world their story.

Thousands of these girls have been brought back to life and hope through the work of the Near East Relief. It is to rescue the one hundred thousand more still held captive that the Near East Relief is making its appeal this year.

New Riding Qualities

OVERLAND 4 is a new type of car. It sets a new standard for light car riding COMFORT. Its three point suspension TRIPLEX springs are unquestionably the most important in motor car riding qualities since the introduction of pneumotic tires.

They not only make riding easy, they guard equally the mechanism of the car from the shocks of the road, prolonging the car's life and greatly reducing the costly wear and tear of upkeep.

By thus shielding the mechanism, they make possible very light weight construction, permitting highest QUALITY in every part without excessive cost. Light weight in turn shows great ECONOMY of fuel and tires.

Thus Overland 4 combines in a remarkable way the comfort and luxury of the heavy expensive car with the economy and convenience of the light weight car. Its springbase is 130 inches, yet its wheelbase is only 100 inches It turns around in 33 1-2 feet. It rides well on any road. Its equipment is COMPLETE from demountable rims to Auto-Light starter, lights, and horn.

Its extraordinary qualities were tried and proved by two years of tests covering more than 250,000 miles under every extreme of climate, altitude and road condition.

The longer you ride in it, the better you like it.

News Reported By The K. H. School

(Reported by Earl E. Josten)

K. H. S. Items

WHAT HAS HAPPENED AT SCHOOL

K. H. S. News

Instead of having our regular chapel exercises on Wednesday, we were surprised and delighted to hear a thirty minute lecture by Mr. Bobblitt, on Tuesday afternoon.. He was here in the interests of the Redpath-Vawter system of Lyceum entertainments. He told of his experiences with the American army in northern Russia, and closed with a stirring patriotic appeal.

It is with much regret that we report the absence of Fred Arnold last Thursday afternoon. He secures a great deal of publicity (through this column) by his repeated absences. However, we all know that this was not his reason for being absent, so we'll let it go at that.

Various sounds (melodious and otherwise) have been issuing from the Grammar room of late. After a little investigation, we discovered that an organ had caused the disturbance in the air.

The Victrola seems to be a popular form of entertainment for all except the unlucky fellows who have to furnish its mode of transportation from the lower floor, and thither again.

Last Friday afternoon, had you been present, you would have heard some more of those wonderful (?) talks by the Seniors. At the rate we are progressing, we will soon be classed as first-rate soap-box orators. Fred Arnold spoke on the Importance of Early Training for the base ball season. Charles Gibbs elucidated a good deal about the unpopular beings known as coal profiteers, and gave eloquent and important advice on how to deal with them. Mildred Johnson told about a physiological discovery, but, sad to say, the "conductor" of this column did not remember the particulars. "Art" Johnson spoke on "Americans in the Making"—a very important topic. And, lastly, your humble servant who submits the "dope" for this column told some facts about the Islands of the South Pacific. It is rather doubtful whether Miss McKahan will be able to induce herself to assign another series of five-minute talks or not.

The regular routine of recitations is now being interrupted by the contestants who are rehearsing their selections for the Declamatory Contest.

The Sophs are busy rehearsing "Tompkins' Hired Man," which happens to be their class play.

"Colonel" (Howard) Wiles had charge of the High School for about fifteen minutes last Friday and obediently wrote the names of the "Whisperers" in a small book which Prof. Wilson had given him for the purpose It reminded us of the days gone by, don't you know, when those who whispered were either stationed in the various corners of the room, or else detained for a short (?) session after school-hours. The man who first said, "History repeats itself" must have known what he was talking about, for truly, it does.

Mr. P. M. Griesemer gave a short talk before the High School on Monday morning, entitled, "The Worth of Ambition," or "The Value of an Ideal." He pointed out the necessity of having an ideal and a goal to look forwrd to. We were certinly glad to have him with us and we greatly appreciated his brief remarks. We hope the Sophomores will invite him again.

Grammar Room Notes

The eighth grade has taken up the study of Agriculture, having dropped History since taking the County Examinations.

The pupils of the Seventh and Eighth Grades had a peanut shower on their teacher last Friday afternoon

(Note: Said shower sounded more like a battle. It was very audible all over the building. If it would ever rain as hard as it rained peanuts last Friday, we should certainly be drowned before this time.)

John Baumgartner was absent from school last Wednesday afternoon and Thursday morning, having gone to Garner.

ELECTION NOTICE

NOTICE IS HEREBY GIVEN THAT there will be an Election of the Qualified Voters of the Town of Klemme, Iowa, at the Town Hall on the 28th day of March, 1921.

At this time a Mayr, Five Councilmen, a Treasurer and an Assessor will be elected. Polls will open at 8:00 o'clock A. M. and will close at 7:00 P. M.

FRANK GRUETZMACHER,
(ad-tfc) Mayor

OUR ROLLERS WENT KERFLOOIE

The rollers on our big news press went on the bum but we have ordered a new set and we are in hopes that they will arrive to print this week's edition of the Klemme Times. That is the reason why the paper has been hard to read the past week. Rollers have a queer habit of getting on the bum all at once—they act like heart trouble—never can tell when they will "kick out." Printers have their troubles just like everybody else.

TAKEN UP—Bay mare colt, 2 year old, dark mane and tail. Came to my barn about four weeks ago. Owner can have animal by proving ownership, and paying cost of keep and advertising. C. M. Bredbenner, Klemme, Iowa.

The Churches

METHODIST EPISCOPAL CHURCH

Morning worship at 10:00 a. m.
Evening worship at 7:30 p. m.
Sunday School at 11:00 a. m.

Morning sermon subject, "The Christian Life Continued or Progressive Sanctification," being the third of a series of four sermons on the fundamentals of Christian experience Evening subject, "The Daughters of the Horse Leech."

It seems very probable that one or both of the groups of travelers will reach Panama in week or two; better get on board one boat or the other next Sunday; the officers and crews of boh will make you welcome, whichever you choose. Sunday School social at Lyric Theatre Thursday evening, February 24th.

A. E. Buriff, minister

FIRST METHODIST EPISCOPAL CHURCH

Preaching service Sunday morning at 10 o'clock. Topic for the morning sermon, "The Disciples Vision."

Sunday School meets at the close of the preaching service at 11 o'clock.

There will be no service Sunday night.

Midweek prayer service on Thursday evening at 7:30.

A. H. Meyer, Pastor

A FINE PROGRAM—GOOD TIME

The program put on at the Idle Hour Theatre last Friday evening by the Methodist Church drew a packed house and all thoroughly enjoyed the play. After the program a basket social ws given which brought the total receipts up to $118.00. Everybody had a fine time.

W. F. M. S.

The W. F. M. S. of the First Methodist Church will meet on March 3rd, at the home of Mrs Chas. Stiehl. Members are requested to respond to roll call with a Bible verse from Acts.

NOTICE, K. C. B. MEMBERS!

Don't forget that Monday night is our regular practice night. We had a fine rehearsal last Monday night, but there is much room for improvement. Mr. Anderson is kindly donating his services for the time being, acting as Leader, so let's take advantage of our opportunities and have a perfect attendance on the evening of Monday, Feb. 28th. Please be present at 7:30 in the basement of the First National Bank. We are doing our best to secure a leader for the summer, so please be patient and, as far as possible, attend all the rehearsals.

KLEMME FARMERS TO RAISE BEETS

Tom Copeland, field man for the Iowa Valley Sugar Co., of Belmond, has been in and around Klemme the past week interviewing farmers in regard to signing up sugar beet acreage. Mr. Copeland was in our office the other day and infomed us that he only needed about 200 acres more to insure having a sugar beet dump installed here. These dumps cost about $5,000 to erect and unless enough acreage can be secured it would not pay to put up a dump here. He is quite hopeful that the necessary acreage will soon be signed up as the prospects are good here. Albert Schmidt raised beets last year and has again signed up for forty acres this season. Emil Kraus has signed again to raise beets and Wm. Baack has contracted to put in fifty-five acres. There are of course numerous other contracts of varying size acreage. Mr Copeland states that sugr beets will bring fr more clear profit to the acre than can possibly be made with corn or any other farm product.

FARM MANAGEMENT SHORT COURSE

The County Agent has arranged a Farm Management Short Course to be held in Klemme on March 1st, per the following program. The meeting will be held in the basement of the First National Bank and all who are interested are requested to come. Mr. Galloway of the Farm Management Department hs been secured to conduct the course in Hncock County. It will be well worth the time for any farmer to plan on attending this meeting next Tuesday.

PROGRAM FOR ONE DAY SHORT COURSE

9:30 A. M.—Preliminary Statement: Purpose of the Farm Management Short Course.

9:45 A. M.—Why the Inventory should be used in making income tax returns.

10:00 A. M.—Demonstration of how to keep the record.

(a) Opening inventory
(b) Entering sales and expense
(c) Closing inventory

12:00 M.—INTERMISSION

1:00 P. M. — Demonstration of summarizing and interpreting the book.

(a) Labor income
(b) Income tax statement
(c) Efficiency factors
(d) Net worth statement

2:30 P. M.—Demonstration of how to keep a single enterprize cost account.

(a) Labor record
(b) Feed record
(c) Summary

3:15 P. M.—Land values and labor income.

3:45 P. M.—General discussion

4:00 P. M.—Adjournement

STOCK SHIPMENTS CONTINUE HEAVY HERE

Saturday night another large shipment of live stock was sent out of the Klemme yards. This time fifteen car loads were shipped divided as follows: 2 cars of hogs, 13 cars of cattle. Ths week Saiturday is looked forward to as a record breaker for the amount of stock to be shipped out.

SHIPMENTS IN ALL LINES FOR THE YEAR

As a bit of valuable information on shipments from Klemme for the past year and thru the courtesy of Agent Barr we have compiled the following incoming and outgoing shipments for Klemme over the two year period of 1919 and 1920 as a comparison. You will note that the year 1919 was heavier in both incoming and outgoing business.

Total cars received 1920, 300; 1919, 363.

Total cars shipped out 1920, 474; 1919, 569.

The cars received in Klemme the two year period were divided as follows, we give the first 1920 and the second figure in each case for 1919: Flour and Feed, 18-16; Live Stock, 19-11; Grain, 6-8; Agri. Impl., 10-6; Machinery, 19; Household and Imigrants, 5-5; Beverages, 1; Miscellanous, 64-113; Coal, 80-75; Lumber, 19-13; Salt, 5-5; Bldg. Mat., 15-27; Hay, 2-1; Vegetables, 1. Total, 300-363.

Cars shipped out were classified as follows: Wheat 2-6; Corn 58-63; Ots 93-140; Seeds 2; Horses 3; Cattle 97-106; Hogs 183-223; Sheep 3-3; Potatoes 3-1; Vegetables 16; Miscellaneous 24-1. Total 474-569.

EMIL LAU HAS SUCCESSFUL SALE OF DUROC JERSEY SOWS

Emil Lu had a very successful Duroc Jersey Bred Sow sale last week. This was Emil's first sale and he was very pleased with the way things went. In fact, he did much better than many breeders who have been in the business for a number of years. He had an offering of forty-two animals and they averaged better than $64 per head. Victor Hueneman purchased the highest priced sow at $185. Emil also sold a number of registered bulls at the same time. The buyers were all home men and nearly all new men in this line of business. Emil also praises the result of a good advertising campaign and says that it certainly pays well to spend a little extra money in letting the people know what he had to offer. Following is a list of the pigs offered, the name of the purchaser and the amount paid:—A. G. Lau $72.50, John Velau 72.50, Albert Preibe 67.50, Hans Willer 50.00, Harry Gibbs 105, C. W. Dorwager 55, Herman Ax 55, C. W. Dorwager 60, A. G. Lau 140.00, Harry Sandry 62.50, John Velau 57.50, W. S. Cunningham 47.50, Herman Ax 50.00, Herman Ax 62.50, Herman Ax 72.50, H. Gibbs 70.00, Harry Sandry 50.00, H. Ax 60.00, Victor Hueneman 185.00, H. Sandry 87.50, F. Sandry 60.00, Albert Preibe 55.00, V. Hueneman 77.50, H. Sandry 55.00, H. Sandry 55.00, H. Sandry 50.00, Chas. Stiehl 62.50, F. Sandry 52.00, Han Willer 47.50, C. Stiehl 67.00, C. Stiehl 55.00, C. Steihl 51.00, H. Willer 51. H. Sandry 52.00, H. Sandry 52 00, H Sandry 51.00, H. Sandry 51.00, H. A. 66.00, Herman Lemke 41.00, Herman Lemke 51.00, Herman Lemke 41.00, Herman Lemke 41.00.

COUNCIL PROCEEDINGS

Delayed

Mayor's Office, Oct. 18th, 1920

All members present. The following bill was allowed:

Freight on Water Mains, lute and lead ---------- $30.13

Moved and carried to place a "T" in the water mains at the N. W. corner of Clarence Kluckhohn's place.

T. Blank, allowance for sewer crossing out Lot 7 and Blk. 18	400.00

December 28th, 1920

In the matter of clerk being absent A. G. Koerner was appointed clerk pro tem; Ordinance No. 37, an ordinance granting the Standard Oil Co. permission to erect and maintain warehouse, tanks and other buildings necessry for the conduct of its business in Klemme, was duly passed.

January 10th, 1921

Regular meeting called to order by Mayor.

Mr. McElligott was granted an extension of time to finish sewer until July 1st, 1921.

The following bills were allowed:

L. A. Ridder, pumping for December	$15.00
E. S. D. Kahrs, Paint	.90
Mrs. A. G. Koerner, Collecting water rent	5.30

February 14th, 1921

The following bills were allowed:

L. A. Ridder, pumping water for January	$15.00
F. H. Ridder, gasoline	19.25
C. M. Bredbenner, hauling water mains	9.25

Moved and carried to adjourn.

Your Suit for Easter

Easter Sunday is generally the conceded time to wear your new Spring Suit.

We are showing some very nifty paterns in the new models and at prices that are much lower than the past year.

Suits to Measure

We are exclusive agents for the ED. V. PRICE line of tailor-made clothing. If you are difficult to fit or desire a suit made to your measure, call in and look over the samples.

UNDER THE GOLDEN DOME

Des Moines.—Investigation of the official conduct of numerous members of the state house family, undertaken by the departmental affairs committee of house and senate, promises to provide the first developments of anything like a sensational nature of the present session of the general assembly.

This committee is referred to in state house circles as the "hell raiser," and is already making good its title. The members are Senators Walter Anderson of Greene county, Ray P. Scott of Marshall county, H. I. Foskett of Page county, M. B. Pitt of Harrison county, H. C. White of Benton county, G. S. Banta of Delaware county, C. M. Dutcher of Johnson county and Representatives Charles Gilmore of Clay county, William Becker of Clayton county, H. S. Berry of Monroe county, H. H. Dodd of Howard county, R. L. Rumley of Decatur county, W. C. Edson of Buena Vista county, J. S. Garber of Floyd county, and C. B. Santee of Blackhawk county.

The financial end of the conduct of various departments is at present being given a thorough going over by the committee, and already several officials and department heads have been summoned upon the carpet.

McClenahan Hit First

The first of the elective state officers to come up for a grilling was P. E. McClenahan, state superintendent of public instruction.

McClenahan, it was declared, had charged several county teachers institutes a fee of $50 for addressing them, and had also charged the expenses of the trip to the state. He was furthermore alleged to have indulged in considerable nepotism in connection with the maintenance of his office, and was charged with having had his wife and two daughters both employed in the office.

There is no charge against McClenahan or any of the other state officials or employees under fire that they actually converted any state funds to their own personal use.

Traveling expenses of various state officers are being investigated, including those of McClenahan, Secretary Guilford Sumner of the state board of health, former Governor W. L. Harding, and others.

The Committee discovered that Attorney General H. M. Havner, who retired January 1, had never taken an oath of office for his second term, or caused a new bond to be deposited. Havner is being subjected to criticism because of the fact that most of the contingent fund for the two year period ending July 1 is exhausted, leaving the present incumbent somewhat cramped for funds.

Looking Up Fee

The committee is also investigating alleged exorbitant fees which it is said were paid to Attorney H. L. Adams of Des Moines in connection with his services in obtaining through the state banking department a charter for a new bank at Farmington, and State Superintendent of Banking, M. B. Henderson, has been thus brought into the limelight in the general epidemic of investigating.

With the exception of the activity of the hell raising committee the session has moved very slowly to date, and very little important legislation has been enacted. The proposed new taxation measure to impose a tax upon all amusements where an admission fee is charged has been introduced in the house and senate, and is already facing the opposition of an earnest and able lobby.

A proposed tonnage tax of 2 cents per ton on all coal mined in the state is also proposed, the money to be devoted to assisting in the support of schools in mining communities.

Russell Sage Bills

The Russell Sage foundation is actively interested in two bills which have been presented, one by Representative Weaver and Senator Whitmore to make adoption a court proceeding instead of a mere contract, and another, presented in the house by Representative O'Donnell and in the Senate by Senator Horchem asking for the passage of a model small loan bill directed at the loan sharks of the state.

It is alleged that under the present law it is possible to collect as high as 168 per cent interest on small loans made with chattels for security.

The chiropractors of the state are aggressively fighting for a law which will legalize their practice in Iowa, and their bill was passed by the senate 29 to 18 after a somewhat heated scrap in which Senator Price acted as its champion. This was the first really important bill outside of the routine of legislation to pass either house or senate. The bill passed the senate two years ago, but was defeated in the house. It is strongly opposed by the old line medical fraternity. At present chiropractors have no legal standing in Iowa. Its friends believe that it will pass this time.

As the session continues the probability of any considerable attention to code revision during the current session is waning rapidly. In fact, a strong inclination to chuck the entire batch of code revision bills presented by the code revision committee into the wastebasket, and postpone action until after the coming constitutional convention is evident. It would not be surprising if no action were taken other than the acceptance of the compiled code.

Kendall A Scrapper

Governor Kendall has shown himself determined to be something more than a figurehead, and has started a spirited scrap with the senate over its rejection of the appointment of Mrs. Snider of Davenport as a member of the board of control. He has not submitted another name, and read the riot act to both the house and senate in a message discussing the rejection of the appointment. Bills requiring the appointment of at least one woman member of the board have been introduced, Senator Whitmore having presented one bill, and Senator Holdoegel another having the same purpose in view.

Kendall seems to have a majority behind him in the senate, while there has been no test in the house.

The senate passed Whitmore's bill permitting the payment of six per cent interest upon school bonds instead of five, after a warm fight. Friends of the bill declared that the real object of the opposition was to put a crimp in consolidated school construction by making it impossible to finance school construction during the next two years.

Labor leaders and women's clubs are fighting for the passage of a nine hour day law for women workers and have good prospects of success.

A very active labor lobby is present at the state house, but so far has had very little to do.

The proposed state constabulary bill has not yet appeared on the horizon, and will get a chilly reception when it does. The Kime industrial court bill has made little progress, and seems destined to meet an early death. These bills are both bitterly opposed by organized labor.

The legislature will take its usual adjournment beginning Feb. 25 over the March 1 settlement period, when both the legal members and the farmers generally have plenty to keep them occupied at home.

House Kills Junket

The house sat upon a senate resolution providing for the appointment of a joint committee of twelve to visit the state educational institutions and report upon their needs. The opposition didn't feel that the trip was necessary.

Representative Joe Anderson of Winnebago has presented a bill which if adopted will take control of the secondary road system from the state highway commission, and give authority over these highways to the township trustees and boards of supervisors as before. He expects important operations such as those concerning the construction of large bridges. Anderson has always been considered friendly to the highway commission, and his attitude is regarded as being of considerable importance.

The tendency in road legislation is to get away from too much centralization of power in the state highway commission.

Construction of the proposed new temple of justice is going to wait until materials are cheaper, judging from sentiment of legislators. The million dollars now available for this purpose will be turned into the general fund, in all probability, thus permitting the chopping off of a mill levy, or at least rendering it unnecessary to add one which otherwise might have to be imposed. This million is the residue of the million dollar war fund voted by the general assembly in 1917, with an additional appropriation made by the last assembly. Plans have been drawn for the temple, but the amount of funds on hand was inadequate to pay for the building.

For Compulsory Nurse

A large number of measures relating to public health problems are pending. Senator Van Alstine will probably present a bill making the employment of a county public health nurse mandatory, and providing for a state director of nursing. The nurses work would be primarily in the public schools, and the expense would be defrayed by the boards of supervisors. Most of the counties of the state now have nurses supported by the Red Cross or other agencies, but these agencies are having difficuty in either supplying the demand or defraying the expense.

Much less new legislation of importance is being presented than in most sessions, and the percentage of bills receiving favorable consideration is also smaller than ordinarily. The conservative tone of the assembly toward appropriations continues, and very little wild expenditure of funds is expected.

NEWS REVIEW OF CURRENT EVENTS

Railway Labor Board Refuses to Abrogate the National Working Agreement.

IS WITHOUT JURISDICTION

Senate Committees Report Against Naval Holiday and Suspension of Immigration—Germans Are Preparing Their Counter-Proposals on Reparations.

By EDWARD W. PICKARD.

This year's first big labor fight, that between the railways and the rail workers, really opened last week when the national railroad labor board took up the appeal of the rail executives for immediate abrogation of the national working agreements. The hearing drew to Chicago the heavy guns of both the executives and the railway brotherhoods. The board decided against the railways, which, however, have not abandoned the fight.

As was foreseen, President Wilson declined to intervene, though asked to by both sides, stating he would not take any action "which would interfere with the orderly procedure of the interstate commerce commission or the railway labor board."

Frank P. Walsh, counsel for the rail unions, and B. M. Jewell, head of their department of the American Federation of Labor, are leading the fight of the brotherhoods. Their first action was to question the jurisdiction of the labor board in this matter, on the ground that a question involving the financial ability of the roads to pay is within the province of the interstate commerce commission, the labor board being limited by law to questions of wages and working conditions. This point the board decided was well taken.

Chairman Bartow said the board for several months had been considering the national working agreement, clause by clause, to determine whether any parts were unreasonable, and he urged that it be "not further interrupted by the introduction of unwarranted demands by either party."

The second part of the general argument of Mr. Walsh was that the move by the railroad executives is part of a "Wall street conspiracy" to kill the power of the unions, establish the open shop, crush collective bargaining and reduce wages.

"Twelve New York banks," said Mr. Walsh, "through interlocking directorates, control 92 class I roads, which have 80 per cent of the class I mileage and 76 per cent of the total railroad mileage of the United States. In the hearings of the Lockwood committee in New York the testimony revealed a movement on the part of certain interests to crush unions and establish the 'open shop.' It is directed first at the two basic industries of building construction and transportation."

A great many persons not directly concerned in the present controversy believe with Mr. Walsh that there is a concerted movement to establish the open shop, and, likewise, a great many persons are in sympathy with such a movement. These persons see the impending conflict as a fight not between labor and capital, but between tyrannical labor unions and industry. Most of them have suffered and are suffering from the intolerance of both organized labor and organized capital, and they are very tired of it.

What railroad men said was one of the most far reaching decisions made by the labor board was handed down last week, the ruling being that it was the duty of the Boston and Maine railroad to confer with the committees of the American Federation of Labor over the grievances of its workers. Employees said the decision upheld the right of independent organizations of railway workers to present their grievances to road officials. In the Boston and Maine case it was said a conference was refused because those with the grievances were not a party to the national agreement.

Inspired by the conviction that the United States should have a navy as strong as that of any other nation, the senate naval affairs committee reported against the Borah resolution for a six months' naval construction holiday. The report, presented by Senator Poindexter, said the committee was as anxious as possible to bring about a reduction of armaments, but that no disarmament would be of value unless it were general and, in the case of the great maritime powers, universal. "Unhappily this is not the case at the present time," continued the report, "and we must deal with conditions as they exist. For one nation to leave itself exposed to attack while another is preparing all the engines of war would be not only folly, but the greatest danger to the peace of the world that could be imagined."

A temporary suspension of building, it was pointed out, would cost the government immense sums through deterioration of material and dislocation of contracts; would throw large numbers of workmen out of employment, and, by rendering it difficult or impossible to reassemble these forces should work on vessels be resumed, would give an immense advantage to powers that had not interrupted the construction of their fleets.

The committee upheld the contention of the navy board that the capital ship is not obsolete. It recommended that twelve destroyers and six submarines, authorized in 1916 but not yet contracted for, be eliminated from the building program. These 18 ships were expected to cost the government about $55,000,000. The committee suggested the use of this amount for the constfuction of two airplane carriers of the most modern type and of the most advantageous size.

Another senate committee—that on immigration—also took important action when it rejected, by a vote of 5 to 4, the bill passed by the house providing for the suspension of immigration for one year. Senators Johnson, Washington; Harris, Georgia; Harrison, Mississippi, and King, Utah, voted for the bill, and Colt, Rhode Island, chairman; Dillingham, Vermont; Sterling, South Dakota; Keyes, New Hampshire, and Phelan, California, against it.

Next day the committee began consideration of the Dillingham substitute for the house bill, and the indications were that it would be acted on favorably. This measure provides that the number of aliens of any nationality entering as immigrants in any one year shall be limited to 5 per cent of the total number of persons of such nationality already in the country, as determined by the latest census. The legislation would not apply to immigrants from the American continents and adjacent islands, nor to the Asiatic "barred zone," from which immigrants already are excluded, nor to Japan, immigration from which is regulated by agreement. Some of the radical restrictionists will make a fight to have the percentage cut down, perhaps as low as 2 per cent. In Washington it was said there was no likelihood that the bill would get through congress before March 4.

Frequent charges that thousands of sick or disabled ex-service men are being inadequately cared for by the government had their effect on congress. The senate adopted an amendment to the sundry civil bill appropriating $12,500,000 for five new buildings and $6,100,000 for the enlargement and improvement of existing hospitals. The house, by unanimous vote, passed a bill carrying an appropriation for $13,000,000 for additional hospitals and enlarged facilities. Under this bill five new hospitals are to be located—one in the central Atlantic states, one in the region of the Great Lakes, one in the central southwestern states, one in the Rocky mountain states and one in southern California. In addition, the secretary of war is instructed to take over at once and equip for hospital use Fort Mackenzie, Wyoming, and Fort Walla Walla, Washington.

Foreign Minister Simons has notified the allies that the German government will send qualified delegates to the reparations conference in London March 1, "provided negotiations are based on proposals which the German government reserves to itself the right to lay before the conference." This acceptance being satisfactory, Doctor Simons called into consultation a large number of experts in finance, industry and economics, and they proceeded to frame the counter-proposals which Germany will submit.

Premier Briand has obtained from the French chamber of deputies the support he required before going to the London conference. The chamber voted 395 to 83 to approve the reparations terms framed by the supreme council, and then gave a vote of confidence in Briand, 387 to 125. The opposition was led by members of the former Clemenceau cabinet. The premier closed the debate with the statement: "The fate of Germany lies in her own hands. Should she, after May 1, 1921, refuse to fulfill her pledges the French government can be relied upon to take all measures to make her."

The Hansa league, the great economic association of Germany, says many of its members urge a boycott of French and English goods in favor of goods from America, and adds that the directors of the league may adopt the suggestion if Great Britain continues to support France in the reparations claims.

Of the two great military operations in the Near East that are believed to be impending, one, that of the soviet Russians against Poland and Roumania, has not yet been started. The other, the conflict between the Greeks and the Turkish nationalists, may already be under way. The news from Asia Minor that comes through Paris is carefully censored, and advices by other routes are conflicting at this writing. There is no doubt, however, that the Greeks have been concentrating large forces for this fight, and that Kemal Pasha also has gathered together most of his troops for what he hopes to make a decisive operation. Greece relies on financial assistance from the allies for this warfare, and without it she will have great difficulty, for her expenses are now vastly greater than her revenues. Chronic trouble-makers and trouble-seekers are trying to find in the Greek operations in Asia Minor a cause for serious conflict between France and Great Britain; but there is no reason to believe that their hopes will be realized.

Walter Lyman Brown, director of American relief work in Europe, has been making a tour of all the countries in his jurisdiction, and is skeptical concerning the expected Russian offensive this spring. He thinks the Bolshevik government would scarcely dare to undertake an attack on Poland that would lose to its cause the support of the workers of western Europe. He says Hungary and Latvia are sure the attack is coming, Poland is nervous, and Czecho-Slovakia and Esthonia believe the Russians will refrain.

The loyalists of South Africa, headed by General Smuts, won a great victory in the recent elections, and as a result the provinces of the Cape of Good Hope, Transvaal, Natal and Orange Free State will continue as one of the self-governing dominions of the British empire instead of setting up an independent republic. The opposition was led by General Hertzog, who asserted the right of South Africa to secede from the empire despite the act of union.

In India a more liberal self-government was put into effect last week when Prince Arthur of Connaught arrived at Delhi as personal representative of the emperor, King George, and issued a proclamation announcing the surrender of much government power to the native princes.

R. C. Roper of Nebraska makes the interesting announcement that William J. Bryan and his brother, Charles, whom Mr. Roper represents, are planning to reorganize the Democratic party so that the Cox-White and McAdoo-Woolley factions shall be eliminated and the control put in the hands of the "middle class Democrats." The program, said Mr. Roper, will be made public on March 16, W. J. Bryan's birthday.

CHAPTER XV—Continued.

—16—

"Yes, beyond that outcropping of stone; the trail goes down there?"

"Si, senor; but if you ride down, your soldiers, they know."

"They keep guard?"

"Si, senor; just below, out of sight, yet where they can see. When I come out they were under a rock shelf to keep off the snow. Maybe they there yet."

"How many?"

"Five, senor; two white and three Sioux."

He studied the spot carefully through the leveled field glasses, and then swept them inch by inch over the snow-covered plain. He returned them to the case, and cast one more glance into the depths below.

"Very well, men," he said quietly, "We will return to the squadron."

Shaunessy, with ten men, was given the cutting-out job, the major drawing up his command behind the sand hills in readiness for a swift advance. The sergeant led his little force well to the right of where the outpost was believed to be, and finally dismounted them, leaving two men in charge of the animals, while, with the others, he proceeded forward on foot. The sand hills approached much closer to the river at this point, and ridges extended out into the plain, affording them considerable protection as they cautiously advanced, seeking every possible bit of shelter. Shaunessy, using the field glasses loaned him by the major, surveyed the ground carefully before venturing to lead the way, and, in this manner, the little party finally crept in behind the crest of land overlooking the valley of the Cottonwood.

It had been the plan to drop silently over the edge of the bank, and work their way along, so as to attack the outlaws from the rear, thus hindering the escape of any possible. But once there on the ground the slope was found to be far too abrupt for this purpose, and the idea had to be abandoned. The only other procedure was to creep along under the protection of the ridge, trusting to swiftness of attack. The sergeant crept forward, inch by inch, watchful of everything in front. He never glanced back, but his carbine was thrust forward, cocked and ready. It was fifty yards to where the gnarled cedar protruded above the bank, but no sign of any movement greeted him until he had nearly reached that point. Then, suddenly, with no warning of any kind, a red, bloated face shoved itself up above the edge of the bank. The startled eyes looked directly into the muzzle of the carbine.

"Stop right there, buddy!" said the sergeant sternly. "Now lads, over you go!"

They took the leap recklessly, some sliding down the steep slope, others finding some sort of foothold and rushing fiercely forward. The guard was taken by complete surprise, helpless ere any of them before they could even reach their feet or grasp their weapons. Shaunessy backed his prisoner down to where the others stood sullenly and surveyed the scene.

"Five; that's the whole bunch," he said with satisfaction. "A very good haul. Now, Gates, go up there and wig-wag the major."

Ten minutes later the advance files of the squadron topped the edge of the bluff and began to slowly move down the steep trail. Hays expressed his approval.

"Exceedingly well done, sergeant; all the whole outfit, I see. Have your men bring up your horses. The girl says us we have a free road now into the valley, so we will move right along. Quietly, men, and keep your distance. Dismounting carbines! Forward!"

They moved steadily at a walk, the troopers eagerly peering ahead, yet cautiously reining back their mounts. There was scarcely a tinkling of accoutrements as the long column of horsemen slowly advanced down the crooked trail toward the snow-covered valley far below. Pancha, riding beside the major, led the way through the curtain to where the Cottonwood plunged over the rock precipice into the deeper gorge beyond. To her uplifted hand of warning the column halted, the Mexican girl leaning over to explain the situation ahead.

"Eet is verra steep grade," she said, "an' a sharp turn at the bottom, where the trail runs under the falls. On the other side is a log house, and they always keep a guard there, senor."

"And beyond?"

"The valley is open."

He tried to see through the snow curtain, but with little success.

"How heavy is the guard?"

"That I cannot tell, senor. There were but two men there, when I come at. But the log hut is a saloon, and many may be there now. Eet is best to use utmost caution."

"No one is likely to be between this and that?"

"Not on watch—no; some one might be passing out; they come and go."

"Of course, we run that risk. The falling water makes noise enough to prevent our being heard, yet I think it may be best to use a scouting party. The only way we can trap those fellows into a fight is through a surprise. If they become alarmed they'll scatter and find a way out before we can strike a blow. Isn't that your idea, captain?"

"Yes, sir; we've got to get in behind and cut them off."

"I presume there is a back door to this Hole, somewhere, senorita?"

"Yes, senor; way down yonder, but eet can only be made on foot."

"Then we've got the villains, if we only move secretly enough. Take a dozen men, and come along with me, captain. Dismount them. Senorita, it will be best for you to show us the way."

They disappeared into the curtain of falling snow, and cautiously advanced beneath the veil of overflowing water. The outlines of the log house could be plainly discerned, the storm suddenly ceasing. The door stood open, smoke arose from the chimney, but no one was visible outside. The dull glow of an expiring fire appeared on the ground in front, but no guard was squatted about it. Evidently the fellows had retired to shelter. The major grasped all this in a glance, but what interested him most was the sound of steady firing some distance away.

"They have either all gone inside," he whispered to Pancha, crouching beside him, "out of the storm, or else they are over there where the fighting is. You hear those rifles?"

"Yes, senor."

"You don't suppose some other outfit had got in here ahead of us, do you?" he asked anxiously.

"No, senor," earnestly grasping his arm. "Eet is not that. I know; they fight up the canyon. Listen, eet is over there the sound. They try to capture Senor Shelby; if we go quick we save them; we wait, maybe all be dead. Now we get all in the rocks, so none get away."

"I see." He looked at her keenly; then stepped back to where the men were clustered. "Captain, scatter these lads out about that house there; move quickly, and see that no one gets away. Stiles, run back and have the squadron move forward. Bring up your horses."

The men dashed forward in a half-circle, the major, with Pancha at his shoulder advancing close behind them, his objective the open door. No sooner had they broken cover when the alarm sounded; a muffled voice yelled excitedly; a rifle or two cracked; a soldier running rapidly, plunged forward on his face, and lay still. Then white and red surged crowding through the door, surprised, trapped, crazy to escape. Only one among them dared the venture in face of those leveled carbines. A tall, gaunt white renegade, with red whiskers, and one arm in a sling, his uninjured hand gripping a revolver, leaped from the front step in a reckless endeavor to get out of sight around the corner of the cabin. The major flung up his arm and fired, the fellow whirling about in his stride and stumbling as he fell. He got upon one knee again, and the ".45" spat twice viciously before a trooper sent a bullet crashing into his brain. Hays felt the zipp of lead past his face, but stood erect, unhurt. Behind him Pancha uttered a startled sob and sank slowly onto the snow. He sprang back and caught her, holding her head up on his knee, his eyes

Down the Crooked Trail.

staring down into her white, upturned face. She breathed once—that was all; never spoke, never moved, except for the slight tremor of her slender form in his arms. The major laid her softly down, his own face drawn and white with sudden passion, and strode across to where the slain outlaw lay in a huddled heap. An instant he looked down at the brutal face, oblivious to all else.

"D—n you!" he muttered in useless rage. "I wish I'd killed you!"

Then he turned suddenly, the spirit of the soldier in the ascendancy.

"Deploy your men, Captain Giles," he commanded, his voice hard and stern. "Swing them into line. Leave a squad here under a sergeant. Lively, boys; that is one of our old lads fighting those devils over yonder. Now we're going to strike in, and d—n me, if I care if you never take a prisoner. Good! give me my horse. All ready? Bugler, sound the charge!"

They swept forward on a walk, then a trot, spreading out onto long, double line, as they swung into the more open valley, riding knee to knee, the men bending forward in their stirrups, with left hand grasping the reins, the right gripping the short carbines. A hundred yards and they were at the gallop, a blue torrent, at the heels of their leader; tearing through weeds and underbrush, spurring recklessly into and over the creek, dashing up the other bank to the very foot of the bluff beyond. It was then the major saw the uselessness of it. He whirled with uplifted saber.

"Fight on foot. Horse-holders to the rear. Come on, lads!" he shouted, his voice pealing above even the thud of hoofs. "Get up there some way, you terriers, and give those red devils h—l!"

They came forward at a run, yelling as they came, and leaped in among the rocks, their carbines beginning to spit as they clambered upward. Overhead were skurrying figures, and spurts of black smoke, as the Indian rifles made answer.

CHAPTER XVI.

The Rock Platform.

Shelby had no time to think, or to even comprehend clearly what confronted him. There was a second in which he rammed a handful of cartridges into his empty gun; and then they were on him, a dozen Indians swarming up the face of the rock, and clutching for a hold on the parapet. He fired blindly straight into their faces, aware that another revolver cracked close beside his ear, yet with no opportunity to glance about. He saw assailants topple backward, clutching fingers release their hold, rifles flung high in air, and roll down the slope. Savage yells blended into cries of death agony. He felt the clip of a ball in his shoulder and staggered back from the blow; a tomahawk grazed his wrist, and the quick slash of a knife ripped open a leg of his trousers, a red stain discoloring the opening. He had glimpse of fierce, infuriated faces, of waving scalplocks, of naked chests and arms. Fingers clutched at him, and he kicked himself free. Both guns empty, he battered away with the butts, smashing at every face he saw, no desire left but to kill, before he also was dragged down. He knew nothing of Olga, where she was, what she was doing—he only realized that he must stand there, and fight until they got him—she would keep one shot; she had pledged that.

And the devils made it, creeping far out over the gulf, and drawing themselves up beyond reach of his arm. One fell, going down with a howl of terror; a second was struck by a speeding bullet, dead ere he went whirling back into the air—but the third made it, creeping up onto the narrow platform, with others surging behind, knives gripped in their teeth. Shelby hurled his empty pistol into the face of the nearest before the fellow could attain his knees, and grasped a discarded rifle which dangled over the stone coping. With one bound he was at the edge swinging this weapon as a woodsman might an ax, driving the iron stock against every head that appeared. He staggered back, breathless, half blinded by a wound over his eye, aware only that the front of the rock was swept clear, that not a savage was left for him to strike at. She touched him, and he whirled, thinking it another enemy.

"Don't, Tom, don't!" she begged. "Merciful heaven, you are all blood. Look out there! are those soldiers?"

He held up the flap of skin, and stared where she pointed. Across the white snow covering the valley below, riding stirrup to stirrup in a wild charge, two lines of cavalry were sweeping straight toward the foot of the bluff. He knew what they were at a glance; their lines steady even at a gallop, the spurring officer in front, the glitter of carbines, the silence, left no doubt. No Indians rode like that. He watched them, grasping her tightly to him now, scarcely able to speak. Once only, he gave utterance.

"My God! See those fellows ride!"

"They are soldiers?"

"Yes, yes! Good Lord, lassie, but that looks like old Hays leading 'em. Its the Sixth, the Sixth—a squadron of the Sixth!"

He staggered to his knees, but still held himself up, peering over the coping. She knelt beside him, half supporting him against her shoulder. The charging horsemen swept in out of sight below, but they could hear them crash through the underbrush, and splash their way across the stream. Then there echoed up to them the ringing cheer of white voices, and the dull bang of the carbines.

How they made that ascent it is doubtful if a trooper knows; but they did, creeping from rock to rock, dragging themselves along gullies, hauling their bodies up by sheer strength of arm, springing from point to point—inch by inch, foot by foot, fighting as they advanced, firing at every skulking figure in their front, skirting precipices, leaping across chasms, clinging desperately to every rock or shrub, their carbines spitting viciously, eager only to get at hand's grips with the foe. High above, Shelby and Olga caught glimpses of toiling figures, of leaping jets of flame, of fierce struggles hand to hand, of Indians seeking to escape. Sharp-voiced rifles answered the carbines, and a dead soldier hung dangling over the edge of a rock; another nursed a bleeding arm in the shelter of a cedar. But the unhurt came on. Some among them had stumbled onto the trail, for soon a squad appeared just below. They stopped and turned over the body of Laud, so as to see the man's face; then tramped forward, paying no heed to the dead Indians. Shelby recognized the major among them, and arose to his feet with difficulty, supporting himself with one arm about Olga's shoulder. The major was panting from the exertion of the climb, never glancing up until brought to a halt by the rock, its foot littered with the dead bodies of savages.

"Good God! look here," he exclaimed excitedly. "Those devils were paying the price," he choked and coughed. "Whew! that sort of thing winds me. Must be getting old, sergeant, yet, by Jove! I passed the test two weeks ago." He cast his eyes upward, and saw the two standing just above him. "Hullo, Shelby! we are here in time, then. Some good fighting, my boy. Here, a couple of you, give me a lift. I'll never make it alone."

He was hoisted over the stone coping, instantly straightening up and warmly grasping Shelby's outstretched hand.

"Not badly hurt, I judge, lad!"

"No, sir; chipped here and there is all, and have lost some blood."

"Mighty glad of that. By God, you are an honor to the regiment." He turned about, and stared down the

The Ringing Cheer of White Voices and the Dull Bang of the Carbines.

bluff, his eyes brightening with appreciation. "Talk about your Alpine chasseurs; those fellows of mine could give pointers to a mountain goat. Just look at them come up there. By the way, Shelby, we've got a surgeon back there somewhere. If you don't need him yourself, you've got a wounded man here, I understand."

"No, sir; his name was Macklin, and he's dead. He died before the fight began. Who told you?"

"A little Mexican girl; seemed to think a lot of the fellow. Meeting up with her is what brought us in here."

"Pancha—yes; where is she?"

The major removed his hat soberly.

"I am sorry to say she got hurt—yonder by the waterfall."

"Hurt! Not killed?"

"Yes, instantly."

Shelby drew a long breath, and his eyes and those of his wife's met.

"She is happier that way, Tom," she said understandingly. "Now she will never know. I dreaded so to tell her."

Hays caught the words, his eyes seeking the speaker's face.

"Who was the man?" he asked shortly. "One of the outfit?"

"Yes; in no way worthy."

"I thought likely; and you, I take it, madam, you are Tom Shelby's wife?"

"Yes," she answered quietly, her clasp tightening on her husband's arm. "I am, and also Colonel Carlyn's daughter. We both belong to the Sixth."

"Carlyn's daughter! Great Scott! do you actually mean that? Do you know they have been hunting you from one end of the border to the other? There was a lawyer in my quarters a week ago questioning me about what had become of Sergeant Calkins. Lord, I didn't know."

"It is true, then, that I am wanted?"

"They've been trying to strike your trail for years, the lawyer told me. Some money down East which was left to your mother; let's see, she was a—a—"

"Churchill."

"That's it. The first thing you better do, young woman, is to take a trip to old Virginia."

She smiled, a wistful look in the depths of her eyes, as they sought the face of her husband.

"It is just as Tom says," she answered quietly. "I am very content now."

The firing had ceased, and soldiers crowded the trail below; the play was ended.

[THE END.]

Poesy.

Poesy is a beauteous damsel, chaste, honorable, discreet, witty, retired, and who keeps herself within the limits of propriety. She is a friend of solitude; fountains entertain her, meadows console her, woods free her from ennui, flowers delight her; in short, she gives pleasure and instruction to all with whom she communicates.—Cervantes

LIVE STOCK

SELECTING BREEDING STOCK

Stock Improvement Is Closely Related to Heredity Control Which Insures Best Matings.

(Prepared by the United States Department of Agriculture.)

Raising the standard of farm animals and poultry and bringing out certain desirable characteristics by slective breeding is receiving more attention as methods of farming for profit become intensified.

The breeding of domestic animals dates back to remote antiquity, when the most advanced races of the old world were still on the border line between savagery and barbarism. It far antedates any but the simplest mechanical arts. Yet while our knowledge of the laws of nature as they apply to mechanics has reached very great magnitude and complexity, it is comparatively only a few years since the principles of breeding have been more than a collection of unrelated traditional beliefs.

The same supersitions on which the shepherds of Asia based their practices at least 30 centuries ago are still widely current, while the one sound principle known to the ancients—selection of the best for breeding stock—is still largely neglected.

The principles of successful animal breeding, as they have been learned by practical experience in the United States and other older countries, and by careful scientific study along definite lines, are outlined in Department Bulletin 905, recently issued by the United States Department of Agriculture.

This bulletin goes into the first principles of reproduction and follows the means by which certain characteristics of one or the other parent are transmitted to the offspring, the methods of selection best suited to intensify the desirable characteristics and weed out the undesirable, the characteristics which can with certainty be expected to continue from one generation to another, those which are uncertain, those which will blend, and those which cannot be inherited.

Aside from mere increase in numbers the purposes which the breeder is likely to have in mind fall under two more or less distinct heads, namely, production of a uniform product, and improvement. A uniform product depends on such control over the heredity of the stock that matings can be made with the assurance that the offspring will be of a certain definite type for which there is a

Calves Selected for Breeding Purposes.

demand. Improvement is, of course, closely related to control over heredity, but the methods which give the greatest control are not necessarily those which lead to the most rapid improvement.

In a broad sense the whole subject of practical breeding comes under the head of selection. The most obvious basis for such selection is the performance of the animals themselves. Unfortunately, the merit of most kinds of live stock cannot be measured directly. The study of conformation as an index of useful qualities has accordingly held a high place as a basis for selection of breeding stock. Live stock judging has this for its purpose. An animal of good breeding is a better one to breed than one of equal individual merit but of mixed or common breeding. Pedigree, though often misused, is a valuable aid to selection, apart from following a general policy of mating. The soundest basis of all for selection of breeding stock is the record of past performance as a breeder, provided the record is sufficiently extensive to give a fair test.

DISPLACING INFERIOR SIRES

Many Farmers Tell Department of Agriculture of Compliance With Better-Sires Plan.

"I disposed of a grade bull last month."

"I sold a high-grade yearling bull."

"Disposed of a scrub bull because we expect to breed to a purebred."

"I castrated an inferior male hog and put in a purebred."

"I will have to buy hogs and they will be purebred."

These comments were received in one day recently by the United States Department of Agriculture from persons enrolled in the better sires—better stock movement. In addition, many others stated that, although they did not own purebred sires, their female stock was bred to such animals, thus complying with the essential requirements of the better-sires campaign.

WOMEN NEED SWAMP-ROOT

Thousands of women have kidney and bladder trouble and never suspect it.

Womens' complaints often prove to be nothing else but kidney trouble, or the result of kidney or bladder disease.

If the kidneys are not in a healthy condition, they may cause the other organs to become diseased.

Pain in the back, headache, loss of ambition, nervousness, are often times symptoms of kidney trouble.

Don't delay starting treatment. Dr. Kilmer's Swamp-Root, a physician's prescription, obtained at any drug store, may be just the remedy needed to overcome such conditions.

Get a medium or large size bottle immediately from any drug store.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Adv.

Polar Bear Can Swim.

The Polar bear is as fine a swimmer as a seal, and behaves, in the ice-cold seas of the North, with as much unconcern as though it had been born in that element, writes Dr. R. W. Shufeldt in the American Forestry Magazine. It has been known to drift for miles upon a floating iceberg, and this evidently for pleasure and convenience, rather than from necessity, as a number of Arctic explorers have reported having seen Polar bears, hale and hearty, swimming in the open ocean all the way from 40 to 80 miles from land.

WOMEN! USE "DIAMOND DYES"

Dye Old Skirts, Dresses, Waists, Coats, Stockings, Draperies—Everything.

Each package of "Diamond Dyes" contains easy directions for dyeing any article of wool, silk, cotton, linen, or mixed goods. Beware! Poor dye streaks, spots, fades, and ruins material by giving it a "dyed-look." Buy "Diamond Dyes" only. Druggist has Color Card.—Adv.

Thirty Days.

An athletic young fellow in Australia went on a tear and landed in the police court. The magistrate inquired what the prisoner's occupation was.

"He's a professional football player," said his counsel. "He plays outside right for his team."

"Oh, he does, does he?" replied the magistrate; "well, then, we must change his position. He'll be left inside for the next month."

Catarrhal Deafness Cannot Be Cured

by local applications, as they cannot reach the diseased portion of the ear. Catarrhal Deafness requires constitutional treatment. HALL'S CATARRH MEDICINE is a constitutional remedy. Catarrhal Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result. Unless the inflammation can be reduced, your hearing may be destroyed forever. HALL'S CATARRH MEDICINE acts through the blood on the mucous surfaces of the system, thus reducing the inflammation and restoring normal conditions.

Circulars free. All Druggists.
F. J. Cheney & Co., Toledo, Ohio.

A Familiar Warning.

A man was walking down a street in Dorchester the other day and an acquaintance some distance behind was calling out after him: "Hey, Luke-Hey, Luke!"

As the man ahead did not show any sign of hearing, a wag on the street corner shouted: "Stop Luke, and listen!"—Boston Transcript.

Cuticura Soothes Baby Rashes

That itch and burn with hot baths of Cuticura Soap followed by gentle anointings of Cuticura Ointment. Nothing better, purer, sweeter, especially if a little of the fragrant Cuticura Talcum is dusted on at the finish. 25c each everywhere.—Adv.

A burnt cat shuns the fireplace.—Tamil.

Many clergymen in London, it is said, are paid lower wages than street sweepers.

For Constipation use a natural remedy. Garfield Tea is composed of carefully selected herbs only. At all drug stores.—Adv.

It is sweet to suffer when we suffer for those we love.

A life loyal to a high ideal is successful.

Many More Would Testify

Onawa, Iowa.—"I know that Dr. Pierce's Favorite Prescription has helped me a great deal. I have had no return of feminine trouble at all and it is over a year since I stopped taking the 'Prescription.' I shall recommend it whenever I have a chance."—MRS. H. C. VETTER.

Favorite Prescription contains no alcohol. Get it at the drug store or send 10c to Dr. Pierce's Invalids' Hotel, Buffalo, N. Y., for a trial pkg.

Personal Mention

Herbert Bailey returned from his visit at Dows Saturday.

Carl Suckow was a business caller at Garner Monday afternoon.

Fred Kluckhohn went to Garner Monday afternoon on business.

Mary Becker went to Garner Tuesday afternoon for a visit.

N. L. Palmer went to Garner on business last Friday between trains.

Bert Trumbell went to Belmond last Friday evening to attend a basket ball game.

Mrs. Gee was up from Goodell last Friday for a visit with her daughter, Mrs. Chris Gram.

"Bill" Schaper, of Charles City, was in Klemme last week Wednesday to attend his brother's farm sale.

Mr. Sanderfelt went to Chicago Saturday evening with two car loads of live stock.

Herman Pringnitz returned from Chicago Tuesday where he had been on business.

Mrs. Dave Schwichtenberg and baby returned Monday from their visit out of town.

Ed. Jacobs was a business caller at Charles City last Thursday and Friday.

Wm. Trafford left Monday evening for a few days business trip to the Twin Cities.

Mr. Arthur Wellemeyer was a business caller at the county seat town Friday.

Mrs. Tom Hake and Mrs. Walters of Belmond, were Klemme visitors last Friday.

Mrs. J. Jorgenson, of Garner, visited between trains Monday at the Editor's home.

Wes and Clarence Shupeltz returned to their home at Lane, South Dakota, after visiting Klemme relatives and friends for a couple of weeks.

Miss Leafy Wilson returned Monday evening from her visit with her parents and sister in Michigan. She also visited in Indiana while away.

Mrs. George Kessler has been quite ill the past week with pneumonia. Reports are that she is improving at this time.

FARM WANTED—I want to hear from party having farm for sale. Give price and description. B. B. Howard, Champaign, Ill. (F24-M3-10 adv-c.

NOTICE TO CATTLE OWNERS

I will pasture cattle on my ranch seven miles west of Klemme through the season of 1921. Call on me to give your order and number of cattle in time before pasture is filled. A. C. Lau, Klemme, Iowa. F3-24c.

Farm and General
AUCTIONEER

Sales conducted to insure the owners highest approval. See me for dates and terms.
Phone 808

KLEMME, IOWA

The Misses Grace and Elsie Caroles returned last Thursday from their visit. We did not learn where they spent their trip.

Mr. and Mrs. Hod Lawhorn, Mr. and Mrs. Henry Church and Mrs. Chas. Schoenwetter, all of Garner, were Klemme visitors last Saturday.

Mrs. Missman returned Monday from an over Sunday visit spent at Des Moines in company with Secretary of State Ramsay and family.

E. S. D. Kahrs left Monday morning for the Twin Cities on business and also for a few days visit with relatives.

Wm. Tiggemann moved onto the Zinn farm southeast of Klemme this week which he will farm the coming year. Chas. Smith was the former occupant of this farm.

Lloyd Lau has his dray team "all dressed up" now. By that we mean he has the team all fitted out with a swell new harness trimmed in the very latest fashion. The horses are perhaps as proud as Lloyd.

Mr. and Mrs. Johnson, of Sheffield, Iowa, were Klemme visitors last Saturday. While here they took the opportunity to shop with Klemme merchants, being attracted by the low prices offered here.

A gang of railroad carpenters were here last week putting the stock yards in better shape. They sure needed repairing and as far as that goes the farmers here wouldn't kick a bit if they were entirely rebuilt and made larger and more convenient.

Mr. nd Mrs. Ben Ridder, and Mr. and Mrs. Ben Riemer, both couples being newlyweds, returned from their honeymoon trip spent with relatives at Ingram, Wisconsin, on Friday. These young people will settle down on farms near Klemme this spring.

Mrs. Paul Grange and baby, of Webster City, Iowa, spent a few days the pst week visiting with Klemme friends. Mrs. Grnge reports that they like their Webster City home fine and that Mr. Grange and Mr. Uben are enjoying a good business in the creamery.

Mr. and Mrs Will Kirkwood returned from Minnesota last week. They went to the northern state to close up their farming affairs so that they could be in Klemme this year. Will rented the place and equipment to a party who will farm it this year. They drove back with their car and "Bill" says it was some swell (?) going. The paved road between Mason City and Ventura looked like heaven to them after they had plowed thru bad roads from the Twin Cities.

MONEY TALKS

The young men of to-day will rule the enterprises of our Nation in the future. Those with BANK ACCOUNTS will find first favor

It will not be simply because they have bank accounts, but because of the qualities that made them have bank accounts.

They will be turned to because they have exhibited the capacities that win success in any line of endeavor intelligence, foresight, patience, persistence, wise management of affairs.

Belong to this class. There are many tokens of it One of these is a bank account.

5 per cent Interest paid on savings.

First National Bank, Klemme, Clerks

Klemme and Vicinity

A number of Klemme brethren of the Masonic Lodge at Garner went to that place Monday afternoon and evening to witness the installation of officers in the Councel. Work in the R. A. M. was put on in the evening following a banquet at six o'clock. All report a fine time.

John Suckow was prancing around the other day and acting rather queer. On inquiring wht sort of bee had gotten into John's bonnet we found that he was rejoicing over a fine baby girl who arrived at his home Saturday night. All are doing fine is the way John puts it.

Rev. Meyer, Mr. Tom Blank of this plahe and Mrs. H. Lau of Garner, returned from Des Moines Monday afternoon where they had gone in company with Gretchen Blank, who was operated on at Des Moines Saturday.

As. Rev. Meyer was at Des Moines Sunday and could not get back in time for the services, Supt. H. E Wilson of the Klemme school took charge of the morning services and gave a very interesting address. The "Prof." did everything fine—but he forgot to have the collection box passed around. However we presume he will be forgiven for that.

Miss Gretchen Blnk was operated on at the Methodist Hospital at Des Moines, Saturday morning. The surgeon found her trouble to be cancer. Although her case is serious there is still hopes that she may be cured as it is thought that the nature of the cancer is such that it can be treated and the growth stopped by the X-Ray method. Her many Klemme friends sincerely hope that she may recover and be restored to health again.

Dr. R. W. Shultz

Constipation---

COUNTRY ITEMS

Mr. and Mrs. Charles Fritzell were visitors at the home of Mr. and Mrs. Louie Newberger last Sunday.

Chris Bach and Alfred Josten went to Blairstown for a week's visit with relatives and friends. They expect to return home the latter part of this week.

A surprise pary was given on Pearl Newberger last Saturday when a number of little girls came and surprised her in honor of her birthday. Games were played throughout the afternoon and last of all a four o'clock dinner was served. All had a fine time.

See W. M. Baack's big half page ad in this issue. He is having a closing out sale on his farm. He has the biggest list of machinery ever offered at a farm sale in this vicinity. Read the ad.

NOTICE OF INCORPORATION

Notice is hereby given that a corporation named Farmers' Lumber Company of Klemme, Iowa, have its principal place of business and Post Office address at Klemme, Hancock County, Iowa, has been organized for the purpose of buying selling coal, lumber and building material, Brick, Stucco, Lime, Cement, Salt, etc., with an authorized Capital Stock of Forty Thousand ($40,000) Dollars which shall be fully paid for in the manner provided by law before certificates therefor shall be issued.

The Corporation shall commence business on the 9th day of February A. D. 1921, and shall continue for a period of twenty years and its affairs shall be managed by a Board of Five (5) Directors who shall be chosen from among the stockholders at each annual stockholders' meeting to be held on the second Tuesday of January in each year.

The highest amount of indebtedness to which the corporation may subject itself shall not exceed two-thirds of the amount of the Capital Stock at that time fully paid up and issued and the private property of the stockholders shall be exempt from liability for the corporate debts.

Farmers Lumber Company of Klemme, Iowa
By W. C. Schmidt, President
C. W. Wiles, Secretary

Miss Esther Janke, the Klemme "hello girl," returned from a short visit at Garner Monday noon.

Tell your news to the Times.

To The Man Who Wants The Best For His Money

If you seek value we hope to welcome you to our store. Especially when you select your spring suit.

We believe we know something about clothes--about styles, fabrics and tailoring--and something about the cost of these things that go to make up the cost of clothes.

A maket cannot slight any of these features and give you a satisfactory suit of clothes.

Any attempt to get more for your money than you get in the clothing we offer is temporizing with your satisfaction.

We are now showing spring suits and topcoats.

Patton Bros. Co.

"Where a Dollar Does Its Duty"

Mason City, Iowa **Manly, Iowa**

MRS. J. M. CRAIG, of Los Angeles, Calif., who says no one can feel more grateful for what Tanlac has done than she does. Declares she has gained twelve pounds and her health is now better than in years.

"Of all the people who have taken Tanlac, I don't believe there is anyone who feels any more grateful to it than I do," was the statement made recently by Mrs. J. M. Craig of 674½ East Fortieth street, Los Angeles.

"Like so many other families during the influenza epidemic last year we all had it, and my own illness, together with the worry over the rest of our family, brought on a case of genuine nervous prostration.

"I was so weak I couldn't even sweep the floor, and during the day I would have to lie down four or five times. I tried to walk but found out half a block was all I could stand before I gave out. Nervous spells came on me often.

"Every medicine I tried failed to reach my case until finally my husband urged me to try Tanlac, and I am indeed thankful that he did, for it proved to be just what I needed.

"The first two bottles didn't seem to help me. I guess that was because I was so extremely bad off, but on the third bottle I could tell I was improving and that gave me more hopes than ever of getting well.

"My improvement from then on was rapid and by the time I had taken five bottles of Tanlac I was better and stronger than I had been in years. I was sleeping soundly at night and had gained twelve pounds in weight.

"That was several months ago and from then until now I have been in as good health as I ever was in my life and have been doing all the housework by myself.

"It is simply remarkable how Tanlac has built me up and I have told everyone of my friends and relatives what a wonderful medicine it is."

Tanlac is sold by leading druggists everywhere.—Adv.

Good for a Starter Only.

"At luncheon I had something excellent, but not satisfying."

"What was it?"

"An excellent appetite."

HEAD STUFFED FROM CATARRH OR A COLD

Says Cream Applied in Nostrils Opens Air Passages Right Up.

Instant relief—no waiting. Your clogged nostrils open right up; the air passages of your head clear and you can breathe freely. No more hawking, snuffling, blowing, headache, dryness. No struggling for breath at night; your cold or catarrh disappears.

Get a small bottle of Ely's Cream Balm from your druggist now. Apply a little of this fragrant, antiseptic, healing cream in your nostrils. It penetrates through every passage of the head, soothes the inflamed or swollen mucous membrane and relief comes instantly.

It's just fine. Don't stay stuffed-up with a cold or nasty catarrh.—Adv.

Prolonging It.

"Two heads are better than one."

"But some lecturers want about six heads to a discourse."

RUB RHEUMATIC PAIN FROM ACHING JOINTS

Rub Pain right out with small trial bottle of old "St. Jacobs Oil."

Stop "dosing" Rheumatism.

It's pain only; not one case in fifty requires internal treatment. Rub soothing, penetrating "St. Jacobs Oil" right on the "tender spot," and by the time you say Jack Robinson—out comes the rheumatic pain and distress. "St. Jacob's Oil" is a harmless rheumatism liniment which never disappoints and doesn't burn the skin. It takes pain, soreness and stiffness from aching joints, muscles and bones; stops sciatica, lumbago, backache and neuralgia.

Limber up! Get a small trial bottle of old-time, honest "St. Jacobs Oil" from any drug store, and in a moment, you'll be free from pains, aches and stiffness. Don't suffer! Rub rheumatism away.—Adv.

Lots of men wouldn't know what to do with their money if they should ever get out of debt.

Good health cannot be maintained where there is a constipated habit. Garfield Tea overcomes constipation.—Adv.

Trickery comes back to its master.—French Proverb

Yankees Like Western Tales

Doughboys on the Rhine Show Preference for Stories of Adventure in the West.

JULIUS CAESAR A FAVORITE

Activity of Caesar in Rhine Valley Makes Translations of His Gallic Wars of Interest to Soldiers—Legends Also Popular.

Coblenz.—Tales of adventure in the American West are the favorite reading matter of the American forces in Germany, and Zane Grey is the most popular author.

Strangely enough, Julius Caesar runs a close second with the doughboys, who are very keen about translations of Caesar's activities in the Rhine valley and the ruins of a bridge he built across the Rhine, which lifts Caesar's work out of the schoolbook class and makes it a guidebook that carries the Americans back nearly 2,000 years.

Books which describe the legends centering about the Rhine are also popular, especially with the soldiers who are musically inclined and who attend the Wagnerian performances given by the various German grand opera companies which play in Cologne, Coblenz, Wiesbaden and the other cities near the Rhine frequented by soldiers on leave.

Like Story Magazines.

All-story magazines which specialize in adventures are more popular with the American soldiers than any other periodicals, and the American Library association has been unable to supply the demand for publications of this sort.

With the assistance of the Young Men's Christian association, which aids in the distribution of reading material in the American area, Miss Ala Weyth, who is in charge of the American Library association's reading rooms, has been able to make a general poll of the reading taste of the army and finds that foreign residence has not won the young Americans away from fiction laid in America, particularly in the West.

The American Library association has about 30,000 books available for Americans, French, Belgians and English residents of the occupied area, and also has circulated many books by mail to Americans living in other parts of Germany. Three hundred copies each of 36 American weekly and monthly publications, in addition to a large number of newspapers, have been taken by the organization and circulated through the branch libraries at Andernach and Mayen, as well as through the American base hospital and the main library in Coblenz.

Turned Over to Y. M. C. A.

With the beginning of 1921, the American Library association turned its books over to the Y. M. C. A. and is no longer supporting the work.

The main library in Coblenz was formerly a German officers' club and is ideally suited to library purposes. It has a great ballroom, which makes an excellent reading room, and also has sun parlors and large drawing rooms, with many windows. Many Germans have asked for the privilege of using the library, but this has been denied, as the army did not think it advisable. One German told the librarian he had lived many years in America and should really be allowed to have books, because he was an American "in principle."

Man's Gold Tooth Stolen by Expert Pickpocket

New Orleans.—There is in New Orleans a pickpocket who is expert enough to fulfill the time-honored specification test of being "able to steal a man's gold teeth." He demonstrated this when he stole a gold tooth which had previously been the property of Adrien A. Chazulle, 1030 St. Philip street. However, the tooth happened to be in Mr. Chazulle's purse at the time, and it was the purse which the pickpocket took while its owner was a passenger in the Louisiana avenue street car.

Noisy Geese Give Fire Alarm.

New York.—Two thousand geese, ducks and chickens, awaiting death in a poultry shop, chorused an alarm for fire that caused heavy property loss in eleven retail clothing and food stores in the Bronx.

The unusual squawking awakened residents of the neighborhood and attracted a policeman, who telephoned fire headquarters. The blaze was controlled by firemen after a two-hour fight.

Must Have Been.

"He went across to the fire place and stood with his back to its warmth, staring into the fire with unseeing eyes.—From a popular magazine.

Obviously the poor fellow's head was turned.—London Punch.

A girl seldom begins to [think] seriously until she has been [taken] one case of unrequited love.

The glory of life is to love, be loved; to give, not to get; [to] not be served.

Toxic Candles As War Weapon

Diphenylchlorarsine Develops Vapor Which Penetrates Gas Masks, Says Expert.

SMOKE CANDLES ARE USEFUL

Conceal Movements of Small Groups of Men Close at Hand—British Developed Candles Which Were Used by All the Allies.

Philadelphia.—Toxic smoke candles, recently developed, will have an extensive use in future wars, in the opinion of L. I. Shaw of the internal bureau of mines, who recently spoke on "Smoke and Incendiary Material" before the Franklin institute.

"Smoke candles, so called," he said, "are small cylindrical boxes which are ignited by some sort of friction device, and which contains smoke producing mixtures. Their use is in setting up a smoke screen close at hand, for after ignition they are simply set on the ground, not being thrown or projected in any way. The need is very apparent to make the movements of small groups of men close at hand possible.

Tried by British.

"The British, early in the war, developed very satisfactory smoke candles which were used by all the allies. The Americans also developed a candle which was satisfactory, but which did not get into production and use in France before the armistice. The smoke is normally white, must have maximum capacity and be cool enough to prevent the setting up of air currents and thus rise from the ground. It must be heavy so as to be displaced by the minimum amount of wind at low velocity. These requirements are admirably met by candles which produce a smoke consisting of zinc chloride.

"As regards the future of incendiary material, my own opinion, which opinion, however, is substantiated by at least some of the military critics, is that incendiary material, except for small arms and long range shell and drop bombs, will have at least a limited and, perhaps, no use. The flame projectors will probably never be used in a future war. Smoke material, on the other hand, will have a very extensive and ever-increasing use. By the use of the smoke screen during an attack the casualties can be largely reduced.

New Use of Smoke.

There was in progress of development by the British and Americans during the latter part of the war smoke candles which would give a toxic smoke. The toxic material employed was diphenylchlorarsine. Diphenylchlorarsine is a solid which vaporizes in the heat of the candle and is obtained in such a state of division that it will penetrate most gas masks. Such toxic smokes, of which there will probably be others developed, will find a very extensive use in the future. It is the greatest step made thus far in the new use of smoke."

Mary Garden as Opera Director

Mary Garden, the famous operatic star, photographed at her desk on her first day as general director of the Chicago grand opera. Her appointment to the important post caused much excitement in the musical and theatrical world.

There Was She, Waiting.

Flora, Ind.—Fred Rhodes awoke at his home several miles out in the country to find the roads blocked by snow drifts. He was to marry Miss Vera Gardner 80 miles away, but by the time he had cleaned a path through the snow and had made a horseback trip to Elkhart, his train was gone and he was nine hours late reaching the bride's home. She was still waiting.

Slow Clock Costs Railroad Money.

Decatur, Ala.—Because the clock in a railroad station was slow, causing her to miss the train on which the body of her dead son was being conveyed, Mrs. Ellen Carey has been awarded $500 damages against the Louisville and Nashville railroad.

Skin Sufferers Do Not Want Mere Temporary Relief

Of course, if you are content to have only temporary relief from the terrifying itching and burning of fiery, flaming skin diseases, then you are satisfied to remain a slave to ointments, lotions and other local remedies applied to the surface of the skin.

Real genuine relief from eczema, tetter, scaly eruptions or any other form of skin irritations cannot be expected until you free your blood of the germs which cause these disorders. And for this purpose there is no remedy that gives [more] satisfactory results than S.S.S. This fine old blood remedy that [goes] down to the source of every [skin] disorder and routs out the germs which cause the trouble.

S.S.S. is sold by all druggists. Begin taking it today, and if you will write a complete history of your case, our medical director will give you expert advice without charge. Address Chief Medical Adviser, 155 Swift Laboratory, Atlanta, Ga.

SIMPLE ROAD TO HAPPINESS

As Benevolent Old Gentleman Pointed Out, Desired Result Might Easily Be Attained.

The beautiful young woman, dressed in fashion's most pronounced style, entered the street car and sat beside a rather benevolent-looking old man. As the car started she happened to glance out the window at a bunch of little girls playing on the sidewalk.

"Don't they look happy," she gushed. "But no wonder. Why, I remember my happiest days were when I used to wear short, little gingham dresses."

Now, the man had seen her enter the car, and he was well informed about the length of the dress she was wearing, so there was no mistaking his hint. "You might try gingham instead of the silk you're now wearing," he suggested.

True to Form.

Mother—Well, dear, has Jack kissed you under the mistletoe?

Small Daughter (demurely)—Yes, mother.

Mother—And did you enjoy it?

Small Daughter—Yes, thank you, mother, but (very demurely) I struggled.—London Punch.

Where the Ancients Excelled.

Elijah was fed by the ravens.

"This beats carrier pigeons," he boasted.—New York Herald.

SKIPPER REGRETTED H[IS]

Persistent Questioner, in the Language of the Street, "Back at Him."

The deep-sea fisherman often has a sharp tongue and is not likely to get the worst of a verbal duel. George, the skipper of a [North Sea] trawler, who figures in "[North] Fishers and Fighters," by Mr. [Harold] Wood, certainly met with his match once whether he knew it or not.

"There's land people who come bother you with foolish questions," complained in recounting the hardships of a skipper's life. "I tell 'em off, but can't allus do it. There was an old lady who worried my endurance with her questions in' if the herrin's were caught in rels, as she'd sometimes seen them way in shops. I told her no, but she aggravated me to that extent I told the only fib I ever spoke in life.

"'How do you kill 'em when you caught 'em?' she asked.

"'We bite off their heads,' answered.

"She looked at the catch of herring we had. 'My! My!' she said walkin' away. 'How tired your jaws must be!'"

True Vegetarian.

"Waiter, I ordered vegetable soup."

"Well, sir?"

"This has a fly in it."

Find Latent Talent

Psychology Used in Tests at University of Wisconsin.

Experts Hunt Among Freshmen for Material for Likely Journalists and Machinists.

Madison, Wis.—Psychological tests of ability for machine shop work evidenced by freshmen in the college of engineering are being undertaken by the department of psychology at the University of Wisconsin.

The results of the tests are being computed by students in vocational psychology as a part of their work in preparing to become employment managers.

Another set of tests designed to gauge journalistic ability is to be given to freshmen in the course of journalism in conjunction with schools of journalism in other universities. These tests will be given for several successive years to determine whether it is possible to discover latent newspaper talent through psychology tests.

The system of giving psychological tests, instead of regular entrance examinations to students who wish to enter a university, has been tried in several universities. The idea is that a student who has a good mind, but has insufficient or inferior high school training, may be advised as to the lines of study for which he is best fitted.

In this regard, the University of Wisconsin is giving more specific tests than most other universities. By giving a dozen or more tests for the same results, the psychologists at the university are determining which tests are best. In a small series of tests already conducted, however, the results do not correspond well with the scholastic records of the students tested

"Let's Go" Is Foremost Among Slogans of War

Washington.—"Let's go," was the chief battle slogan of the American army in the world war. There were other popular and effective phrases used by the troops—"Where do we go from here?" and "When do we eat?" for instance, but in the opinion of Col. Edward L. Munson, chief of morale, general staff, made public recently, "for everyday use, in rest, or in battle, the slogan 'let's go' stands foremost."

Doe Wanders Through Town.

Beavertown, Pa.—A large doe chased by dogs came down the main street here and taking a flying leap, landed in the garden of Fulmer's hotel.

After a few minutes she again jumped the fence and trotted through the business streets, often stopping to look in windows.

SCENERY BIG PART OF PLAY

Modern Theatrical Productions Evidently Depend a Great Deal on the Stage Settings.

"The Beggar's Opera" is now being presented in New York with the company that was gathered for the London revival, and settings which also crossed the ocean. It was not that it was cheaper to bring the scenery over, but simply because it would have been impossible to duplicate the original sets without doing a great deal of Eighteenth century research work that would mean going over the same ground that had been carefully covered by the London designer.

The situation is hardly a parallel to that of "Her Own Way," the Clyde Fitch comedy which could not be played for several days after the date set for the London opening because the scenery had been put on a steamer other than that taken by the company. Fitch had written this play with intricate, though unobtrusive, scenic effects, constantly in thought. The result was that, broadly speaking, the special scenery for this play actually did some of the acting.

A player piano will play with feeling if one has feeling enough to take proper care of it.

Would lessons in good manners printed in big red letters on the billboards go a great way?

ADVERTISING IN OLDEN DAYS

Collection in Pennsylvania Museum Shows It Was a Fine Art a Few Generation Ago.

Advertising was a fine art in Philadelphia when Dock street was a canal. The proof that the merchants and business men of those days were cognizant of the value of printer's ink is a large collection of billheads, cards, newspapers and other advertising media that has just been purchased by the Pennsylvania museum for display in Memorial hall.

In those days every business man of note used the columns of the newspapers. The front pages of the dailies of the time were devoted largely to advertising matter.

Virtually all of the business men also used elaborately decorated billheads, generally copper plate engravings. The custom was copied from England, although the Philadelphia printers often struck an original style. —Philadelphia Public Ledger.

Rents for $10,000,000.

Ten million dollars in rent from one building will be received by Capt. John Jacob Astor during the next 20 years, under the terms of a lease signed up last week in New York city. The property is the Hotel Astor and site, Broadway between Forty-fourth and Forty-fifth streets. The block is part of the old Eden estate, which originally sold for $34,000.

GEORGE WASHINGTON

"First in war and first in peace"—
With love we speak of him again
Whose praises with the years increase—
"And first in the hearts of his countrymen."

Remarkable Honors Paid Washington on His Inaugural Trip

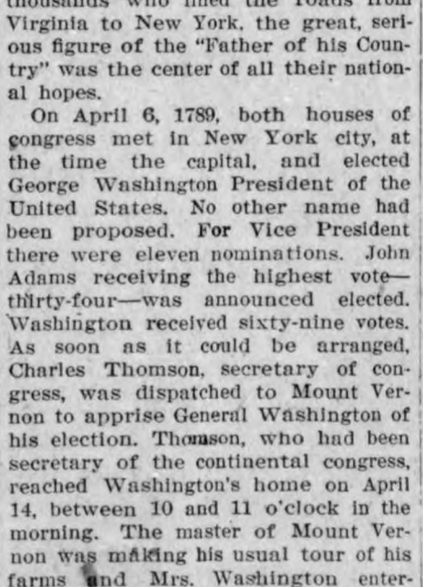
At the time he was unanimously elected President, Washington was the idol of his country, and his name and fame were known to the entire civilized world. His trip from his beautiful home on the Potomac was interrupted by receptions, fetes, addresses and dinners. Every person who was able to reach the roads along which he was to pass, or the cities selected as stations on his slow journey northward, joined the throngs that made his trip the most triumphal procession this continent had witnessed. To those thousands who lined the roads from Virginia to New York, the great, serious figure of the "Father of his Country" was the center of all their national hopes.

On April 6, 1789, both houses of congress met in New York city, at the time the capital, and elected George Washington President of the United States. No other name had been proposed. For Vice President there were eleven nominations. John Adams receiving the highest vote—thirty-four—was announced elected. Washington received sixty-nine votes. As soon as it could be arranged, Charles Thomson, secretary of congress, was dispatched to Mount Vernon to apprise General Washington of his election. Thomson, who had been secretary of the continental congress, reached Washington's home on April 14, between 10 and 11 o'clock in the morning. The master of Mount Vernon was making his usual tour of his farms and Mrs. Washington entertained the messenger of the congress.

Before sunrise on the morning of April 16 a messenger had come from Alexandria with an invitation to a public dinner there, and in his diary for the day Washington wrote:

"About 10 o'clock I bade adieu to Mount Vernon, to private life, and to domestic felicity, and with a mind oppressed with more anxious and painful sensations than I have words to express, set out for New York, in company with Mr. Thomson and Colonel Humphreys, with the best disposition to render service to my country in obedience to its call, but with less hope of answering its expectations."

Of Washington's reception in Philadelphia a chronicler of the day wrote:



Old City Tavern, Philadelphia.

"Thousands of freemen, whose hearts burned with patriotic fire, fell into the ranks almost every square we marched, until the column swelled beyond credibility itself and, having conducted the man of our hearts to the City tavern; he was introduced to a very grand and plentiful banquet, which was prepared for him by the citizens. At dinner thirteen patriotic toasts were drank."

The night of the 20th the President spent as the guest of Robert Morris, then one of the senators of Pennsylvania, and better known as the financial genius of the country, having founded its first bank and financed the cause of liberty at a time when the outlook was chilling.

The trip through New Jersey was continued through Princeton, New Brunswick and Elizabeth, where Washington boarded a barge and was rowed to New York. Flags and floral decorations marked each step; everywhere he went Washington heard shouts for a conqueror's ears. He was hailed as a deliverer and acclaimed as a deity, but throughout all the heartfelt adulation paid him by those who almost worshiped him, the greatness of the man was revealed by his artless modesty, his composure and his graceful, tactful acceptance of the honors paid him.

The Home of Robert Morris, Where Washington Spent the Night of April 20, 1789.

Washington arrived in Elizabeth on April 23, just a week from the day he set out from Mount Vernon. A "propitious gale" was blowing when the party set out across Newark bay for New York. A barge, built for the purpose, and rowed by "twelve old captains of vessels who had retired from business," conveyed the President and party. The oarsmen wore white shirts adorned with ribbons. One after another vessels fell into line behind them and by the time they were nearing the Battery there was a small flotilla. Every ship and sloop bore a holiday appearance save one, a Spanish vessel. It was with some concern the committee noted its solemn aspect. They feared some discourtesy, but, as the barge approached, its captain gave a signal at which flags of all nations were burst into view, and from its battery a salute of thirteen guns was fired.

A large sloop joined the procession off Bedloe's island, and as it neared the barge the party of ladies and gentlemen aboard her sang an "eloquent ode appropriate to the occasion and set to the music of 'God Save the King.'" The wharves from the Battery to Wall street ferry, where the landing was made, were filled with welcoming boats. Boudinot estimated their number as tens of thousands. The ferry stairs were carpeted and the railings covered with crimson hangings. The President, preceded by the committee, was received on the landing by Governor Clinton and some of the foremost citizens. The streets were so blocked with eager citizens that it was half an hour before the committee could fulfill its commission by escorting their eminent charge to the house prepared for his reception.

WELL TO DO FARMER GAINED 20 POUNDS

H. W. Boring Says He Is In Better General Health Than He Has Been in Years Since Taking Tanlac.

H. W. BORING of Overland Park, Kansas

"Since Tanlac has overcome my troubles I have gained twenty pounds in weight and am in better general health than for years past," was the straight-forward statement made a few days ago by H. W. Boring, a prominent and well-to-do farmer living at Overland Park, Kans.

"During the two years I suffered I tried everything I knew of to get relief, but nothing seemed to reach my case until I tried Tanlac. My appetite was poor and my digestion was so bad I could hardly retain my food. Nothing agreed with me; in fact I was almost a confirmed dyspeptic. My whole system seemed to be out of shape. I would have pains across the small of my back so bad at times I could hardly move around.

"My nerves were all unstrung and I would become up-set at the least little thing. I seldom slept well at night and, finally, became so weak and run-down that I lost weight rapidly. I was also troubled a great deal with catarrh and of mornings had to spend a half hour or more clearing up my head.

"This is just the condition I was in when I began taking Tanlac and it certainly has been a blessing to me. It just seemed to be made especially for my case. I improved from the very first. My digestion now is perfect and regardless of what I eat I never suffer any bad after effects.

"The pains across my back have entirely disappeared. The catarrh has left me, too, and my head is perfectly clear. I am no longer nervous and rest well every night. I have regained my lost weight and am feeling better and stronger than I have in years. I am going to keep Tanlac in my house so it will be handy at all times."

Tanlac is sold by leading druggists everywhere.—Adv.

Rheumatism Comes From Tiny Pain Germs

First of all, get it firmly fixed in your mind that all the liniments in the world have no effect whatever on Rheumatism.

A very common form of Rheumatism is caused by millions of tiny disease germs which infest the blood. The one and only sensible treatment, therefore, is one which cleanses the blood of these germs, and routs them entirely out of the circulation.

This is why S.S.S., the greatest known blood purifier is so successful in the treatment of Rheumatism. It is a powerful cleanser of the blood, and will remove the disease germs that cause your Rheumatism, affording relief that is genuine.

S.S.S. is sold by all druggists. Free literature and medical advice can be had by writing to Chief Medical Adviser, 154 Swift Laboratory, Atlanta, Ga.

Authoritative.

She—Do you write poetry?

He—The editors say not.—The Watchman-Examiner (New York).

In Style.

Jacobs & Son

LIBERTY TOWNSHIP NEWS

A large number of young people met at the home of John Heginger last week Wednesday evening for a good time.

School No. 9 has had three different teachers this school year and yet they have been without one of late. We do not know why they cannot or do not keep a teacher, but we would like to suggest to the directors that hey employ an old school master instead of a young school ma'am; by so doing he would overcome the young man problem. That is, the young fellow who visits his lady friend, the school ma'am, during school hours. Later: We understand that Mrs. C. W. Suckow has been employed as teacher. Perhaps a married woman can hold the job.

There was a very large crowd at the Schaper sale last week Wednesdy in spite of the extremely stormy weather and rough roads and the fact that there was another sale in the neighborhood on the same day. Everything sold good.

The social that was announced last week to be held at the Liberty township church on Friday was postponed until this week Tuesday. We hope that all heard of the postponement and that no one went to the church las Friday evening only to meet with disappointment.

Mrs. W. G. Lenz has been at the hospital at Mason City for a week, coming home last Sunday. She underwent an operation there and is on the way to recovery.

We would like to suggest to the township trustees and road boss that they investigate the gravel hauling which was done on the grade south of Henry Wade's place. Now there is nothing wrong with the gravel and the fellows who hauled it were hard workers, but the people that have to travel over it have been complaining as the gravel makes quite a bend on one place, therefore it takes them longer to reach their destination.

NEWS OF ELL TOWNSHIP DISTRICT NO. 6

Last Tuesday evening, February 15th, a kitchen shower was given on Mr. and Mrs. Peter Christians at their beautiful country home east of Klemme. The evening was spent in visiting and dancing. All reported a good time. Music was from Klemme. Quite a few attended from Klemme. Ask the Klemme boys how they found the road.

Chris Anderson and family visited at the Clarence Goosbeck home last Sunday.

Miss Rachel Milhous who has been sick with pneumonia, is able to be around again.

Mr. and Mrs. Peter Christians visited at the home of her parents, Albert Johnson, Sunday afternoon.

Mrs. Chas. Lawhorn and daughter Lenora and Grace Christians visited with Mr. and Mrs. Ed Beutenback and daughter Elane Sunday afternoon.

A young fellow from Klemme took young lady home one evening, but when they arrived home ? ? Daddy met them at the door!

Mrs. Henry Meyer was up to Garner Saturday to have some dental work done.

Irene Marshall, the little daughter of Mr. and Mrs. Herbert Marshall, is just recovering from the measles.

Gace Christians and Lenora Lawhorn entertained friends at the Chas. Lawhorn home Sunday evening.

AVERY TOWNSHIP

Miss Elvina Buss visited over Sunday at the home of her sister Mrs Sylvan Johnson.

Fred Bell was a business caller at Garner Saturday afternoon between trains.

Mr. and Mrs. Jno. Bachman and family visited at the home of Charley Smith Sunday.

A party was held at the home of Walter Reed last Thursday night. All report a good time. About forty were present.

Mr. and Mrs. Sylvan Johnson took supper at the home of Mr. and Mrs. Elko Buss last Sunday night.

Mr. and Mrs. Martin Jensen were Sunday visitors at the home of Wm. Bell and family.

Garland Hoffman is helping C. A. Arnold with his work.

Mr. and Mrs. Walter Reed and son and Ernest Helps were Sunday visitors at the home of Frank Roths.

Miss Gail Buss visited at the home of G. A. Goll a few days last week.

ROUND ABOUT ITEMS

(Too late for last week)

C. A. Arold attended a sale at Wesley, Monday.

Mr. and Mrs. Herman Schuldt and children Sundayed with the latter's parents, Mr. and Mrs. Haupt.

Miss Lulu Neuberger closed a very successful term of school at the Lemke school in Liberty township last Friday. Miss Neuberger will have a two weeks' vacation from her school duties when she will begin teaching the spring term at the home school two miles north of town.

Mr. and Mrs. Sylvan Johnson spent Monday evening with Mrs. Johnson's parents, Mr. and Mrs. E. Busse.

Martin Jensen shipped two carloads of fat cattle last week. Mr. Jensen ccompanied the shipment and while in the smoky city purchased two more carloads of feeders which were shipped here and driven out to his farm on Saturday.

Mr. dnd Mrs. C. A. Arnold and Mr. and Mrs. Perkins from Garner were entertained at the Geo. Stokesbary home Sunday.

Cloyd Hoffmn braved the muddy roads with his "tin lizzie" Sunday evening and made his usual trip to Goodell.

Mr. and Mrs. Andrew Nelson and the latter's mother, Mrs. H. Meinderts of Meservey, who spent the past week at the Nelson home, visited Mrs. Henrietta Wilkins at Goodell, Sunday.

Mr. and Mrs. Peter Christians returned home Monday from a three weeks' wedding trip spent with relatives and friends in the East. The following evening a surprise was given them, by a number of the young people coming in to spend the evening and making merry 'till the wee small hours.

Messrs. and Mesdames Ted Dutheridge and daughter, Miss Jane, and Will Johnson and Misses Effie and Clarice, were Sunday guests at the Fred Hoffman home.

Sylvan Johnson sold a fine draft horse to Rank Busse last week.

E. J. Arnold and family spent the day with his sister, Mr. and Mrs. James Schneider at Goodell, Sunday.

Prepare Now For National

REPAIR WEEK

Feb. 28 to March 5

Keep your eye on the calendar and during that week set aside everything else you possibly can and devote the time to repairing your farm operating equipment.

Don't Suppose

that your farm machinery is all right. Take time now to have all machines and implements thoroughly cleaned, inspected, overhauled, repaired and put in first-class running order. Make a killing at one time. Consider that this Repair Week is the one time in the entire year to get this important work out of the way.

Keep your International machines 100 per cent I H C by using only

Genuine IHC Repairs

Remember that all machines of every description run better and last longer by the use of genuine repairs made only by the manufacturers of these machines. Do not use "Will-Fit" or "Made-For" repairs.

W. M. BAACK

To Our Patrons:-

We understand that considerable public sentiment has arison against our company on account of the electric rates and the claim is advanced that the rates shou.d be reduced in the ame ratio that some other merchandise, including farm products, have declined.

We feel that this statement has been entirely without investigation as to whether prices have declined upon the material which we use in renduring you service.

The fact is that we are paying as much or more today for the two principal things which we use in furnishing you service.

Steam coal from Iowa or Illinois mines constitutes about seventy-five percent of the cost of generating the current which we furnish and nearly [illegible] half of our total operating expense, while labor constitutes about twenty per[illegible]t of our generating cost.

We cannot change employees from day to day in in furnishing you serice. We must retain men who are efficient and skilled in operating our plants--men that are familiar with our plants and the fuel used. S[illegible] that our men holds their jobs until they get something better or it is found the they cannot efficiently serve the company.

Wages in power plants have not gone down, but have been on a continual increase for the past six years. The wages of our chief engineer is typical. In 1916 we paid $85.00 per month for a twelve hour shift, working every day in the month. We are now paying $150.00 per month for an eight hour shift, so that the hourly wage has increased from eighteen cents to sixty-two and a half cents, which has prevailed since October, 1920, so we must look to the coal situation if there is to be any relief.

In 1915 we pnrchased coal from Iowa mines delivered at the plant for $1.82½ a ton less. We are now and since November 1920 have been paying approximately $6.00 per ton. There are certain fixed things which enter into the cost of this coal to us. The pre-war freight rates were increased by the Railroad Administration in 1917 from thirty to fifty percent The Interstate Commerce Commission in August, 1920, autherized a further increase of thirty-five per cent on the one hundred and thirty percent, so that freight rates are now ONE AND THREE FOURTHS TIMES PRE-WAR RATES. To illustrate the freight rates on screenings from the southern Illinois district is 3.66½ cents, which with government tax added makes 3.77 so that the freight alone IS MORE THAN TWICE WHAT WE PAID FOR IOWA COAL IN 1915. To this cost must be added the cost at mines which no one anticipates will be less than $2.50 the coming year. One thing which makes a higher price at the mines necessary is that government investigation discloses that the minors are receiving about $1.47 per ton for mining operation, they have received FIVE INCREASES IN PAY SINCE THE WAR COMMENCED.

Users of large quantities of steam coal through experience have found it advisable to contract for their yearly requirements about April First. The cheap coal we hear about is a little overproduction uot provided for in contracts. It is true that at this time there is come cheap coal on the market but ninety per-cent of the coal is covered by contracts.

Professor Hill, of the State University of Iowa, made a request for information from the operators of municipal and privately owned plants in fifty cities in Iowa' having from three to ten thousand population, and amongst other things inquired as to the price of coal, and the following is the summary of his replies:

Town	Price of 1914	Present Price	Increase
Municipal Plants			
Hawarden	$3.30	$8.00	$4.70
Harlan		3.55 plus freight	
Independenc	4.60	7.00	2.40
Rock Rapids	2.26	5.05	2.79
Spencer	2.70	5.61	2.91
Webster City	1.25 plus freight	3.00 plus freight	1.75 plus frt increase
Atlant c	2.00	5.50	3.50
New Hampton	3.35	7.35	5.00
Mt. Pleasant	1.55 " "	3.05 " "	2.50 " "
Privately Owned			
Cherokee	3.70	9.00	5.30
LeMars	3.90	7.40	3.50
Knoxville	1.33 plus frt.	3.05 plus frt.	1.72 plus frt. increase
Oskaloosa	1.47	5.00	3.53

Coal at plant costing less than $6.00 refers to Iowa coal. Where over $6.00 ordinary Illinois coal.

Our price of $6.00 per ton for Northern Illinois coal at plant is less than the average.

The price of coal in plan has increased from $2.00 to $4.00 per ton since November, 1919, the date of the coal strike, and this alone represents an increase in the cost to the ordinary electric light plant of from two to three cents per kilowatt hour deltvered at the customers meters.

The reason many utilities did not ask increased rates after November 11th, 1918, Armistice Day was because every one expected a rapid decrease in the price of all commodities and labor, thereby reducing the cost of service; and the entire tendency has been for an increase.

This spring we will know what to expect in coal prices for the comming year, but we do not expect any contracts to be made for any less than at 1920 contract prices, and we start out with a freight rate of $3.77 on Illinois coal.

Iowa Falls Electric Company.

THE KLEMME TIMES

Twenty-fifth Year Number 26 | Klemme, Iowa, Thursday, March 3, 1921 | $2.00 In Advance. $2.50 Outside of County

News Reported By The K. H. School

(Reported by Earl E. Josten)

CHRONICLED SCHOOL EVENTS. K. H. S. NEWS

Edwin Bock, one of our most scholarly Sophomores, was absent on Tuesday, Feb. 22nd.

Thanks to Prof. Wilson's generosity, we were allowed a quarterholiday on Washington's birthday. We enjoyed it very much even though we washed the blackboards and performed similar menial duties during part of the time.

Eager to take advantage of the "warm spell", we hauled out the base balls and mitts the other day and indulged in a little early practice. However, we noticed that the weather turned colder the very next day. We wondered why. Still, the occasoinal warm, Spring-like days are now becoming more frequent, much to the delight of the base ball fans.

Chapel exercise last Thursday morning consisted of two short talks —one by Fred Arnold, Jr., and the other by Earl Josten. The other members of the Senior class will have the opportunity to address the high school in the near future. No doubt, they are very anxious to take advantage of this rare opportunity. We await their appearance with joyful expectations.

As last Friday was examination day, we don't think it would be amiss to publish a list of the persons who were so fortunate as to be exempted from their exams. The list follows, by classes and subjects.

Freshman

Algebra; Maybelle Johnson, Clarence Elder, Bertha Johnson; Mable Swartz, Fred Schlichting, Bernice Tanner.

General Science; Clarence Elder and Fred Schlichting.

English; Fred Schlichting, Clarence Elder, Maybelle Johnson, Blanche Medaus, Bertha Johnson, Bernice Tanner.

History; Bertha Johnson, Fred Schlichting, Clarence Elder.

Sophomore

Geometry; Edwin Bock and Howard Wiles.

English; Glenna Gruetzmacher, Dolores Koerner, Esther Beier, Howard Wiles.

Agriculture; Howard Wiles and Edwin Bock.

Modern History; Ella Barz; Edwin Bock, Esther Beier, Pearl Johnson, Howard Wiles.

Senior

Commercial Arithmetic; Fred Arnold and Earl Josten.

Advanced Physiology; Mildred Johnson, Fred Arnold, Charles Gibbs, Arthur Johnson, Earl Josten.

Economics; Fred Arnold and Earl Josten.

English; Fred Arnold and Earl Josten.

Mildred Johnson played "Tripoli" on a piano solo on Monday morning. It was greatly enjoyed by the student body, being a part of the chapel exercises.

A most dreadful apparition appeared last Monday. As a result of a minutely conducted observation, the object was found to be Rudolph Lauritzen, effectively hidden behind his new "goggles". But, speaking seriously, we sympathize with him for having to wear glasses.

The recitation room blackboard indicates that the Freshmen have been studying news-writing. We suggest that they try their hand at this column for a whole.

Donald Stille was horribly afflicted with the toothache one day last week. Drs. Wiles and Lauritzen were employed to remove the distressed member of Donald's oral millstones. It was some tooth, believe me! It was all of six inches long. The competent physicians had to uses a brace and bit, a keyhole saw, a chisel, and three kinds of pinchers. The pantomime was enjoyed by all. (As reported by an observant member of the Senior class, who modestly observes that he is "already too popular in this column," and therefore does not wish to be mentioned as the author of the above item. Nevertheless, the column editor wishes to thank him for the contribution he has given to the literary world, and vites his cooperation in the future.)

No Grammer Room news was submitted this week, so you will undoubtedly be served a double portion next week.

Avery Township News

Miss Lula Newberger visited at the home of Mr. and Mrs. Fritzel over Sunday.

Miss Effie Johnson and Cloyd Hoffman drove to Goodell, Sunday after church to visit with friends.

Miss Leofy Hilson and Chas. Braden were Sunday visitors at the home of Wm. Bell and family.

Harlow and Dwight Helps visited at the home of Oscar Swanson Sunday.

E. C. Knapp shipped a carload of cattle to Chicago Saturday night.

Miss Mildred Fuller visited at the home of Jno. Bachman last Tuesday night.

Mr. and Mrs. Will Johnson and daughter, Mr. and Mrs. R. F. Hoffman and children, and E. Amy and family were Sunday visiors at the Ted Dutheridge home.

Johnny Reed has quit school and will move with his parents to a farm west of town.

A farewell party was held at the home of Mr. and Mrs. Chas. Smth's last Friday night. About forty were present. All report a good time.

Wm. Bell and son Fred, were business callers at Britt, last Saturday.

Mrs. Sylvan Johnson visited at the home of her parents Monday.

Sylvan John helped W. M. Herscm move last Monday.

Liberty Township News

Arthur Wade left for Libson, N. Dak., Tuesday for a couple of weeks visit.

Elmer Beier leaves this week Thursday for Souix City to attend an auto and tractor school.

Lloyd Ulrich has purchased a new Ford. He is trying it out by going to Meservey where he is accustomed to making regular trips as we all know.

Fern Ulrich and Faye Bridges are going to leave for Ames where they will visit relatives. We all hope for them a good time.

Will Riemer has been sick with small pox the past couple of weeks. His home is in quarantine.

Among the families that moved on or about the first of March are the Schaper family who moved to Klemme, the Will Lemke family to the place vacated by Schaper's, Mr. and Mrs. John Lemke to the place vacated by Will Lemke, W. C. Schmidt and family to his farm vacated by John Lemke, Charlie Mickish and family to the place vacated by Henry Lemke,

Mr. and Mrs. John Panoff on a farm three miles east of Klemme, John Heginger and family to Klemme, Lee Price to the Heginger farm, Art Schoenwetter to Klemme, Vic Schoenwetter to the place vacated by Art Schoenwetter.

The Standard Bearers Society of the Liberty Twp. church will meet at the church next Friday evening Mch. 4th. All the young people of the 4th. All the young people of the community are requested to be present.

Mrs. George Baumgartner and daughter and son of Pearl City, Ill., came to visit the Schafer family a couple of weeks ago. The latter two went home about a week ago.

The weather was fine on the day of Art Schoenwetter's sale last week and the attendance was good.

The Churches

FIRST METHODIST EPISCOPAL CHURCH

Preaching service Sunday morning at 10:00 o'clock.

Sunday School at the close of Preaching Service at 11 o'clock.

Epworth League Sunday evening at 7:30.

Preaching service at 8 o'clock.

Midweek prayer service on Thursday evening at 7:30.

Sunday School in Liberty township church Sunday morning at 10:15; preaching service at 11:30. Epworth League Sunday night at 7:30.

A. H. Meyer, Pastor

METHODIST EPISCOPAL CHURCH

Morning worship at 10:00 a. m.; sermon subject, "The Christian's Goal", being the fourth and last of a series on the fundamentals of Christian faith.

Evening worship at 7:30 p. m.; sermon subject, "Called to the Kingdom."

Sunday School at 11:00 a. m. (Stick to your boat; don't fall overboard so far away from home.)

A home-like church with a cordial welcome.

A. E. Buriff, Minister.

TWO CHURCH PARTIES HELD LAST WEEK

Methodist Episcopal Social

Last week on Thursday evening the Methodist Episcopal Church held their monthly social and party at the Idle Hour Theatre. There were perhaps 250 people present, both old and young, to enpoy the fun and also the "eats". All had a very good time and the evening was a great success.

First Methodist Social

Last Friday evening the members of the First Methodist Church held a George Washington Program and social event. Quite an elaborate program was given by the various classes as a whole and a beautiful tableau giving the story of Betsy Ross making the first flag and presenting it to George Washington deserves special mention. Miss McKahan as Betsy Ross and P. M. Griesemer as George Washington were theleading characters. They were costumed in real colonial style, as were the other members in the play. Games of all sorts were enjoyed by both old and young, after which, lunch was served. Cherry pie being one of the items in keeping with the Washington party. All enjoyed themselves and are looking forward to the next big event which we will chronicle in a later issue.

Fred Henschen, Chas. Ax, Henry Barz, George Buseman and M. O. Hocum, all went to Garner Tuesday morning to take in the opening of the court. Mr. Hocum is slated for the grand jury this year. Mrs. C. W. Wiles also went to Garner as she was called there to serve on the jury this term. Mrs. Wiles has the distinction of being the first Klemme woman to be summoned as a juroress.

ELECTION NOTICE

NOTICE IS HEREBY GIVEN THAT there will be an Election of the Qualified Voters of the Town of Klemme, Iowa, at the Town Hall on the 28th day of March, 1921.

At this time a Mayr, Five Councilmen, a Treasurer and an Assessor will be elected. Polls will open at 8:00 o'clock A. M. and will close at 7:00 P. M.

FRANK GRUETZMACHER,
(ad-tfc) Mayor

PAINFUL ACCIDENT

Mrs. John Woods met with a very painful accident the latter part of the week when she was rendering lard. The strainer which she was using above the kettle slipped off in some way and she made a quick grab for it not thinking of the hot lard, she missed the strainer and plunged her hands and arms into the boiling lard. She was severely burned and both hands and arms. At this writing she is getting along very nicely.

ITS MOVING TIME IN KLEMME

The first of March has always gone down in history as a great month in which to move. This year there will be many new neighbors in and about Klemme. We chronicle the following "moving circles":

Walker Schmidt moved from his house in town near the park to the Albert Schmidt farm formerly occupied by John Lemke. John moved to the Will Beier farm which was formerly occupied by Will Lemke. Will bought the George Schaper farm west of Klemme and so he moved onto that. The Schaper family will move to Klemme and will move into the Ralph Elder house which they have purchased. Ralph completed the circle then by moving into the Walker Schmidt house.

John Heginger decided to quit farming and so he moved into town to live in the house which he owns here and which was rented by Wilbur McGee. Mr. McGee bought the Uben property which has been occupied by Ralph Irwing. The Irwing family will move into the property formerly occupied by Chas. Busch and family. We have not learned where the Busch family intend to move to.

Alvina Griffen has gone out into the country to live with her sister, Mrs. Henry Runge. Wm. Stille and family have moved into the Griffen house and Harve Stille and wife have moved into the Johnson house formerly rented by Wm. Stille. Another moving circle completed.

As there are two couples of newly weds in Klemme a place had to be found for them so this is the other circle. Ben Ridder and wife have moved to the Erick Josten farm. Erick has quit the business and will "loaf" for a time. Ben Reimer and wife, the other newly wed have moved to his father's farm formerly occupied by his brother Will. Will Reimer has moved to Miller on a farm. This completes all the moving circles of which we know.

NOTICE OF CAUCAUS

There will be a Caucas held at the City Hall on Monday evening, March 7th at 7:30. Citizens Caucaus.

Rev. Ortmeyer, of Forest City, was visiting Klemme relatives and friends Friday.

MORE LIVE STOCK SHIPMENTS

Eleven more car loads of live stock were shipped out of the Klemme stock yards Saturday night. Five car loads of cattle and six car loads of hogs constituted the shipment. Live stock shipments have been heavy from here the past two months.

COUNCIL AUTHORIZES RATE INCREASE ON LIGHTS

Last week the City Council met at a special session with Mr. Williamson of the Iowa Falls Electric Co., to settle the question of rate increase. The Company asked to have 18c per Kilowatt which was an increase of three cents over the former price. After the question was thoroughly reviewed and discussed it was finally compromised by spiitting the difference in the two prices so that the council authorized the company to charge sixteen and one-half cents with the stipulation that the price would thus stand until the council saw fit to have it reduced when commodities were reduced in price enough to warrant a lower rate. This seems to be satisfactory and fair to everyone.

CLOVER SEED—We are now taking orders for Clover Seed at $14.00 cash. 99½ per-cent pure, 96 germination. Orders must be in before March 10th. W. F. Lau.

FEED—The Farmers Co-Operative Grain Co., is ready to handle Oil Meal, Cotton Meal and Middlings. Letve your orders with Val. Josten. M4tf.

PUBLIC SALES NEXT WEEK

We have three half page ads of sales in this issue of the Times for sales next week. W. M. Baack will have a closing out sale on the 9th. C. M. Bredbenner will have a Horse, Mule and Cattle sale on the 10th. R. F. Hoffman has a Duroc Jersey sale on the 8th. Look over these sales, they are all big ones and will be the last sales held here this season. The offerings on all the sales are first class stuff and just what you may be looking for.

SMILE GOOD BUSINESS ASSET

No Doubt That Cheerfulness Is of Great Advantage in Strenuous Battle of Life.

When it is not a palpable insincerity, a theatric artificiality, turned on to create a fleeting impression of a geniality that is not there, a smile is an asset of business, a lubricant in social life, the outward index of a welcome mood and a happy mind. It cheers the air, relieves the tension, proclaims a cheerful and serene philosophy. Those who smile most work best.

The man whose brow is cloud-hung, whose mind is fog-bound, whose pessimism sees no rainbows and lives beyond the pale of hope and buoyant expectancy, is a poor fellow-workman and an unpopular employer. In the strife for higher wages let it be seen and known that men work for more than material rewards. They toil faster and harder for one they like; and the employer who wins devotion and holds men can see a joke and is a lover of clean fun, and wears in his face the sign of high good humor.

The man who keeps on smiling—not with the insane and constant grin that never wears off, but with the habitual expression of good nature within—has won victories. He has had his share of trials and temptations. Life has not laid a lighter hand on him than on his neighbor. He enjoyed no special privilege and fate did not accord him preferential treatment. But the expression of his face shows that he has come through tribulation and not yielded to bitterness. A light that shines there is the reflection of the refiner's fire. If that smile were the sign of a mirthful irreflectiveness it would not mean so much. The meaning of it is that he who wears the look has toiled and suffered, known the anxieties, been foiled and frustrated, drunk the sup and eaten the bread of sorrow—and still he holds his head on high, and the enthusiasm is unquestioned. This attitude of cheerfulness resolutely maintained bespeaks in him who keeps it an essential greatness. The man who smiles has not lost hope and he still keeps faith with his ideals. You cannot take from him the fortune that he carries in that brave, bright aspect which invigorates as soon as it is seen.—Philadelphia Ledger.

Barbed Wire Disease.

The name "barbed wire disease" as applied to certain war-stricken victims, is believed to have originated in Switzerland, and it applies to a very marked functional mental disorder. The symptoms, recognizable in most men confined more than six months behind barbed wire fencing, are severe in about 10 per cent of all prisoners. Increased irritability appears first, followed by diminished power of concentration, and there is much complaint of loss of memory of persons and places. Insomnia is a secondary symptom. Some prisoners have diminished eyesight, many grow suspicious, all tend to pessimism.

A Touch of Mischief.

There had been a difference of opinion in the preacher's family in which six-year-old Elizabeth thought she got the worst of it. So at prayer time she was unhappy and resentful toward the world in general and her own ministerial family in particular. But she knelt at her mother's knee as usual and went through her usual evening petitions. Finally she prayed:

"Oh, Lord, make all the bad people good."

Then as an afterthought she added:

"And, God, if you can, please make all the good people nice."—The World Outlook.

Changing the View.

A cylindrical tool, described in the Popular Mechanics' Magazine is meant to aid the portrait photographer in posing his subjects. From a switch mounted on the rear of the camera, wires lead to an electric motor concealed in the base of the stool. With his hand on the switch, the photographer is constantly able to turn his subject until the desired view, profile, full face, etc., is seen.

Cutting Out the Cottonwoods.

In many cities of the Southwest, the cottonwood trees have become a nuisance by reason of the litter which they make at certain seasons of the year when little wads of cotton are dropped from them and the matter is being met by the wholesale cutting down of these trees. Thousands of these beautiful shade trees are being sacrificed.

Can't Get Down to That.

Jules, the headwaiter, says he has enough money to retire on, but he can't reconcile himself to the idea of becoming one of the persons who have to give tips.

Only a Theory.

She—I don't think it is right to say a woman can't keep a secret.

He—What makes you say that?

She—No woman ever tried.—The Widow.

Another Quick Firing Pistol.

An Alabama man has invented a pistol that is practically a miniature machine gun, as its cartridges are loaded into a chain of almost any length desired.

Floor Squeaks Silenced.

Where floor boards squeak locate the spot and turn in screws between the boards. This will separate the edges so that they will not rub together.

Domestic Tragedy.

"Henrietta," said Mr. Meekton, "you never ask me to water the rubber tree or put the cat out any more."

"It has been attended to, Leonidas."

"And you don't mind how many cigarettes I smoke nor how late I stay out at night."

"I consider you able to take care of yourself."

"Henrietta, many a home has been wrecked because of ambition and business preoccupation. You have grown to be so interested in woman suffrage I don't believe you care what becomes of me!"

What Worried Him.

"Jimmy, you don't seem to like my family at all," pouted the young wife.

"Give me time, my dear," pleaded her husband. "I am doing my best to be agreeable."

"But what's wrong with my family?" demanded the lady irately.

"Nothing whatever. But I'm a sensitive man, I am, and the look of hopeless resignation your people wear whenever they see me is getting on my nerves."

"Abused" Labor.

"Did you see the bunch of fellers parading for miles from 6 o'clock in the morning till 5 in the evening and then standing up for hours listening to speeches?" asked Mr. Rafferty.

"I did," said Mr. Dolan. "Who are they?"

"They're the lads who say they're totally opposed to working more than six hours a day."—San Francisco Chronicle.

How It Really Happened.

"Why, Jack!" exclaimed Mrs. Horner. "What ever are you doing?"

"I'm sittin' in my torner eatin' my T'ristmas pie an' 'tickin' in my fum, mamma, an' ain't I a dood 'ittle boy?"

"You're a sticky pig, John Horner!"

And Mrs. Horner reached for the hair brush. But as usual, when the incident was tackled by a poet, he got it all wrong.

Orf!

Hubby—That man called me a liar, a cad, a scoundrel, and a dog! Would you advise me to fight?

Wifey—By all means! There's nothing nobler in the world than fighting for the truth!

HAS ANY ONE

Died?
Eloped?
Divorced?
Left town?
Embezzled?
Had a fire?
Had a baby?
Had a party?
Sold a farm?
Been arrested?
Come to town?
Had twins or colic?
Fallen into a well?
Fallen into a legacy?
Fallen from an aeroplane?
Sold a cow or lost an auto?
Committed suicide—or murder?
Stolen a dog—or his friend's Ford?

Well, then—

THAT'S NEWS!

Phone 12 or bring it to the Times

Watch for the "Klemme Koon Komedians". They will appear in Klemme soon. This will be the biggest fun show ever seen in this town. Watch for dates.

Many Species of Bats.

There are about 130 species of bats and these are distributed over nearly every quarter of the globe. The larger bats are found in the warmer regions.

Valuable Thimbles.

All over the world the thimble is a symbol of industry. Fashion in thimbles is very luxurious in the East. Wealthy Chinese ladies have thimbles carved out of mother-of-pearl, and sometimes the top is a single precious stone. Thimbles with an agate or onyx mounted in gold are often seen, as well as thimbles encrusted with rubies. The queen of Siam possesses a thimble in the form of a lotus-bud, with her name exquisitely worked in tiny diamonds round the margin.

UNDER THE GOLDEN DOME

Des Moines.—With the first half of the session completed the Thirty-ninth Iowa general assembly has enacted almost no legislation of general importance.

Adjournment has been ordered over the March 1 settlement period to permit the members to return to their homes and transact such business as may require their personal presence.

The recess will open on Feb. 25, and the assembly will again convene on March 7.

Final adjournment comes as a rule about April 20, and when the wheels start grinding again after the recess they will have to move very fast in order to transact the routine business, without paying much attention to the code revision.

The code revision committee are at present engaged in checking up the new compiled code, and expect to have this section of their labors completed by March 15. This consists merely in comparing the new compiled code with the several volumes from which it was condensed.

Air McClenahan Charges.

The charges that State Superintendent of Public Instruction McClenahan had violated office ethics by charging for his lectures to teacher's institutes have been strengtheened by testimony from the atorney general's office that McClenahan had been informed that the acceptance of these fees was illegal, but had made charges after being given the opinion.

Adjutant General L. G. Lasher is the latest center of criticism. The accusations against Lasher are that he has beeen using an automobile bought and maintained by the state for his own personal use.

Hearings of the committee have been for the most part behind closed doors, but it is not likely that they will recommend the impeachment of any public officials.

Hold up Code Bills.

None of the 273 code revision bills have been introduced.

Senator Pitt is contemplating the presentation to the present session of a revision of the taxation laws, which is in process of preparation. Some action may be taken upon this at this session.

General discussion favors a code revision session next winter. The farmer members are a majority in the house, and do not feel that they can attend a summer or early fall session without great inconvenience and personal loss.

Get First Half of Pay.

Members of both house and senate received the first instalment of their $1,000 salary thirty days after the sesssion convened, and will receive no more until adjournment in April. Each of the members got a check for $500 as his first honorarium.

A bill will probably be presented providing for the per diem compensation of members during the special session to revise the code. The law would allow $10 per diem per member for the special session.

May Require County Nurse.

Senator Van Alstine contemplates the introduction of a bill making it mandatory upon county boards of supervisors to employ a public health school nurse, to devote her time to inspection of school children and general public health work, and providing for a state director of public health nurses. The present law permits county boards to employ a nurse, but does not make it mandatory.

No Action on Kendall Bills.

The bills fathered by Governor Kendall requiring the naming of a woman member of the state board of control are still in committee, and the governor has so far not submitted any name to replace that of Mrs. W. H. Snider of Davenport, whose confirmation was refused by the board. A warm scrap is promised when these bills are presented.

The larger appropriation bills are being carefully checked over, but will not be voted upon until after the recess. About the only extensive improvement which seems likely to the authorized at the institutions under the state board of control is the erection of a new wing at the state tuberculosis sanitorium at Oakdale, and the completion of the labratory there, at a cost of about $300,000. The present institution is unable to meet the needs of the state for treatment of this kind.

Would Censor Films.

The proposed censorship of moving picture films outlined in a bill presented by Senator Greenell and Representative Olson, both of Clinton county, is meeting with opposition of a strenuous nature. The bill provides for state censorship and licensing of all films shown in the state.

Bonus Bill to Pass.

The soldier bonus bill is still in committee, but will be brought out and passed within the next couple of weeks, possibly before recess. The bill will receive an unanimous vote, unless unforseen opposition should arise.

Social Welfare Bills.

A number of bils relating to social welfare have beeen introduced and are being backed by various social agencies of the state. These include the following bills: Senate File 307 by White of Benton and Tama. An act for prevention of blindness from inflammation of eyes of the new-born. House File 431 by Mayne of Palo Alto establishing the age of consent at eighteen years and protecting both girls and boys. House File 432 by Mayne making it a crime to perform any lewd, immoral or lascivious act in the presence of a child. Senate File 315, Whitmore of Wapello, permitting instruction of deaf children in day school up to twelve years instead of ten years. Senate File 373, Horchem of Dubuque, increasing per capita appropriation allowed day schools for deaf children. House File 442, Mills of Harrison, creating wage commission to establish minimum wage for women. Senate File 412, Whitmore of Wapello and House File 445 by Weaver of Polk, regulating adoption of children. A bill to be introduced by Weaver of Polk granting Mothers' Pension to worthy grandparents, to women divorced for desertion and making maximum granted four dollars weekly per child.

General legislation affecting rural communities is very light, and a disposition to stand pat upon present laws is evidence in all of the committees.

While numerous requests for salary increases have been presented, it is not likely that any, save a few exceptional cases, will be allowed by the assembly.

The proposed temple of justice building is in a very precarious situation. It is certain that the assembly will not authorize any activity in its construction during the coming biennium.

While a state income tax has been suggested, the general sentiment seems to be against an imposition of this kind. It is felt that great confusion would result from a double income tax system. The measure has many friends, however, and may be pushed.

So far no important factionalism of dissension has developed in the assembly. Committee work has been very slow, due to the large number of new men in the house and the demands made upon the members because of the beginning of work upon code revision.

Senator Cessna has introduced a bill to return the million dolars now available for this purpose back to the general fund, and Senator Pitt has presented a bill to repeal the law authorizing the construction of the temple. Friends of the project are asking that construction be deferred for two years but that the law be permitted to remain on the books.

The W. C. T. U. and Anti-saloon league of the state are backing the bill which will be presented soon limiting the alcoholic content of patent medicines and licensing their sale. John B. Hamond, legislative representative for various temperance organizations, declares that the patent medicine highball is replacing the old style Manhattan and Bronx varieties, and that something will have to be done about it.

Such road legislation as is likely to be enacted tends somewhat away from centralized control and restores additional powers to the supervisors and township trustees. There is no organized attack so far upon the state highway commission, but probably will be before the sesssion is over. Opposition to the commisssion is hardly strong enough to bring about any drastic changes in the present laws.

The house has passed a bill by Representative Frank Young of Davis county extending the present closed season on quail for another five years. If the senate also passes the bill, which is almost certain, there will be no legalized shooting of quail until 1927. Sentiment in the house was almost unanimous for the extension of the closed season. Representative Young declared that the number of quail had greatly increased under protection but that the birds should continue to remain unmolested. A similar bill extending the closed season on prairie chicken will probably be adopted.

So far the investigations of the various state departments and officers by the departmental affairs committee have developed very few sensations other than those already given publicity.

The ways and means committee is already considering the probable tax levy for the coming biennium. Every effort will be made to provide a sufficient sum for state finances without increasing the present millage tax, through the imposition of special taxes.

1—Indian chiefs on steps of the capitol at Olympia, Wash., where they went to lobby for their fishing rights in the Yakima river. 2—W. Frank Persons, elected vice chairman in charge of domestic operations of the American Red Cross. 3—Immigrants at Ellis island being examined for traces of typhus, several cases of which developed in New York.

NEWS REVIEW OF CURRENT EVENTS

President-Elect Harding Still in Doubt About Three of the Cabinet Places.

WOOD FOR THE PHILIPPINES?

Viereck's Hyphenates Present List of Impudent Demands—Attempt to Impeach Judge Landis—Senate Passes the Emergency Tariff Bill.

By EDWARD W. PICKARD.

As March 4 draws near interest in the make-up of Mr. Harding's cabinet grows acute. The President-elect is, at this writing, believed to have decided upon seven of his ten advisers, while the men to whom he will entrust the navy, labor and commerce portfolios still are to be definitely selected. Former Governor Lowden of Illinois has refused the place of secretary of the navy.

For secretary of labor four men are being considered. They are James J. Davis of Pennsylvania, former steel worker; T. V. O'Connor of New York, leader of the Longshoremen's union; James Duncan of Massachusetts, who has been an official of the American Federation of Labor and of the Granite Cutters' union, and John I. Nolan of California, member of congress and an iron moulder. Mr. O'Connor was one of Mr. Harding's visitors in St. Augustine last week, and it was announced that he would confer with the President-elect again this week.

If the southern states are to have a representative in the cabinet—and they are urgently claiming such recognition—it may be he will be the new secretary of commerce. Many southerners think this would be fitting in view of the existing movement for industrial expansion in the South. Three gentlemen from below Mason and Dixon's line have been especially recommended to Mr. Harding. They are T. H. Huston and Newell Sanders of Tennessee, and Congressman C. Bascom Slemp of Virginia. Many petitions have been sent to St. Augustine asking that either Herbert Hoover or John Hays Hammond be given the commerce portfolio, and among others mentioned for the post is Charles D. Hilles, former chairman of the National Republican committee.

Mr. Harding and those called into conference with him of course have not confined their discussions to cabinet appointments, for the new President will have innumerable diplomatic and other important positions to fill. No formal announcement about any of these places has been made, but it is now taken for granted that Maj. Gen. Leonard Wood will be made governor general of the Philippines to succeed Frederick Burton Harrison. This appointment probably would meet with the approval of all except those who are in favor of giving the islanders their independence immediately, regardless of their ability to govern themselves or to protect themselves against the possible encroachments of the Japanese. American prestige in the islands is said to have declined markedly under Governor Harrison and the movement for independence has grown correspondingly. General Wood's ability as a colonial administrator is unquestioned, and doubtless under him American authority in the Philippines would be strengthened and the defenses in the islands would be perfected.

Albert Fletcher, who was one of Mr. Harding's guests during the houseboat cruise in Florida, is slated for appointment as ambassador to Japan. He was a Roosevelt Rough Rider and served as minister to Mexico.

Probably Mr. Harding cannot well refuse to meet delegations of presumably law-abiding citizens that journey to St. Augustine, but many thousands of Americans whose memory of events during the war has not faded read with resentment that the President-elect last week granted an interview to a committee of the "German-American Citizens' league" headed by the notorious George Sylvester Viereck, former editor of the Fatherland. Why cannot this man and his colleagues, who still cling desperately to their hyphen, lie quiet until time and good behavior have somewhat rehabilitated them in the opinion of decent Americans? Here are the demands, requests and opinions which these hyphenates had the effrontery to present to the President-elect:

1. That Americans of German birth should participate equally with their fellow citizens in the government of "our country."

2. Immediate peace with Germany and the rejection of the "infamous" peace of Versailles.

3. A protest against the French annexation of the "ancient German provinces of Alsace-Lorraine."

4. Immediate withdrawal of the American forces from the occupied portions of Germany.

5. Condemnation of British action in Ireland as "in violation of the principles for which American blood was shed and American treasure lavished in defense of the British empire during the World war."

6. Condemnation of the "attempt to embroil this country in a war with Japan for the benefit of Great Britain."

7. Repeal of the Panama canal tolls act, which it has been said would be violation of our treaty with Great Britain.

8. Opposition to entangling alliances, "especially any alliance with Great Britain."

9. Investigation of the government handling of alien property is demanded.

10. Immediate release of Eugene V. Debs.

11. Resentment of attacks against citizens of German descent.

12. Prohibition condemned as "a breeder of death, corruption and contempt for the law."

13. A study of immigration "in a liberal spirit" urged.

Another man, who during the war made himself only a little less obnoxious than Viereck—Oswald Garrison Villard—ran into a hornets' nest when he undertook to deliver a Lincoln birthday address at the Woman's City club in Cincinnati. A great crowd, made up largely of ex-service men and men and women who lost relatives in the war, tried to break up the meeting, and only the intervention of the police saved Villard from possible injury and enabled him to go on with his speech.

Decidedly interesting if not very important is the attempt to impeach United States Judge Kenesaw M. Landis of Chicago. The attack on this spectacular jurist, who is both much loved and much feared, came from two sources and was based on two grounds, but the actual move for his impeachment was made by Representative Benjamin Welty of Ohio, who asks the senate to remove the judge from the bench because he accepted the office of supreme arbiter of organized baseball. The house committee on judiciary took up the Welty charge, and also received an opinion from Attorney General Palmer who ruled that Judge Landis had committed no offense in holding the two positions. The other attack on the judge was made by Senator N. B. Dial of South Carolina, who was enraged because Landis, in hearing the case of an embezzling bank clerk, criticized the bank directors for paying only $90 a month to a young man who was required to handle large sums. The judge accepted Dial's challenge with glee and said some rather cutting things about the senator's interests in banks, cotton mills and child labor. As Dial has not been an especially influential member of the senate it is not likely his outbreak will have results.

The emergency tariff bill, supposedly designed for the relief of the farmer, was passed by the senate on Wednesday, but with such considerable amendments that the senate and house conferees faced a hard task in trying to complete the measure for submission to the President. Anyhow their labor probably is wasted, for it is assured that Mr. Wilson will veto the bill, and the vote in the senate indicated that it cannot be passed there over the veto. Party lines among the senators were broken in the voting. Among those who assailed the measure most bitterly were Moses of New Hampshire and Edge of New Jersey, both Republicans, and Reed of Missouri, Democrat. The senate is now going to get through with the 11 big appropriation bills which it has not yet passed and which Mr. Harding has especially requested shall be enacted at this session.

Only an immediate application of the principle of collective bargaining will settle the railway labor controversy and avert a national crisis in the transportation industry, according to B. M. Jewell of the railway employees' department of the American Federation of Labor. He told the railway labor board last week that the fight of the executives on the national agreements was a smoke screen to obscure the fundamental issues, and made these suggestions:

"First, that the board refer the national agreements which are now before it to a joint conference of the representatives of the railroads and of the labor organizations with the recommendation that their agreements be adjusted by negotiations as soon as possible, the board agreeing to pass immediately upon any points of difference which may arise from the negotiations.

"Second, that the board request the representatives of the railroads and representatives of the labor organizations to meet the board in conference to consider the establishment of boards of adjustment as contemplated by the transportation pact.

"Third, that in reply to Mr. Atterbury's notice to the board and his subsequent letter to the chairman advising him that he contemplates filing a flood of individual complaints to reduce the wages of unskilled employees, the board recommend to Mr. Atterbury that he meet in general conference with the representatives of the employees affected so that the existing general agreements will not be impaired and the matter brought to the board in the form of a single complaint."

That dreaded pest, typhus, has invaded the United States through the port of New York and there have been several deaths already. It comes from the infected areas of Europe, and its spread here is being effectually fought by the strictest inspection of all immigrants.

Discoveries made and documents seized by the police of Paris, Barcelona and Milan have revealed a great communist conspiracy to overthrow the governments of France, Spain and Italy, the date set for the revolution being May 1. Funds for the conspirators came from Berlin in the form of checks and were transmitted through an American financial organization that has European headquarters in Paris and branches in Berlin and Vienna. The French police say soviets have been organized throughout France ready to take over the banks, railroads and all civil services.

With the opening of the British parliament last week Premier Lloyd George once more "faced the hardest fight of his career." But he is used to that now, and probably will again emerge victorious over his opponents. To be sure, the opposition is unusually powerful this time, and, has been re-enforced by the addition of the Cecil brothers, Lord Robert and Lord Hugh, who are quite influential. As soon as King George had delivered the brief address from the throne the fight began in the house of commons, Herbert Asquith, former premier, and J. H. Thomas, labor leader, heading the attack. Naturally, the Irish question supplied their chief ammunition. In reply to questions the premier said the situation in Ireland had improved greatly in the last six months and that if the British people would have patience order would soon be restored. "Boycotting has completely ceased," he said. "Sinn Fein courts have disappeared; the police are recovering their authority, and the magistrates are coming back to the courts."

Has Your Back Given Out?

Are you dragging along with a dull, throbbing backache? Do you feel lame in the morning; suffer sharp twinges at every sudden move? Then there's something wrong! You may never have suspected your kidneys, yet often it's the kidneys that are at fault. You may have headaches and dizzy spells, too. Use *Doan's Kidney Pills*. They have helped thousands and should help you. *Ask your neighbor!*

An Iowa Case

Mrs. Jane Grace, Bedford, Ia., says: "I used Doan's Kidney Pills for an acute case of kidney trouble and they fixed me up in good shape. I had been having awful bad spells of backache and couldn't sleep from the misery in my back. I had blinding dizzy spells and my feet and ankles swelled. Just as soon as I began using Doan's Kidney Pills I got relief. Three boxes cured me of the trouble."

Get Doan's at Any Store, 60c a Box

DOAN'S KIDNEY PILLS

FOSTER-MILBURN CO., BUFFALO, N. Y.

Dizzy Spells

Hastings, Nebr.—"Some years ago I was troubled greatly with liver trouble; would become dizzy and dark spots would appear before my eyes. I took Dr. Pierce's Golden Medical Discovery and one bottle cured me. I have never had a return of this ailment but have always had good health since. I am glad to recommend this medicine."—MRS. CHAS. WENTZ, 141 So. Bloom.

Dr. Pierce's Golden Medical Discovery is sold by druggists in liquid or tablets. Contains no alcohol. Send 10 cents to Dr. Pierce's Laboratory, Buffalo, N. Y., if you wish a trial pkg.

Advanced Backwards.

Speaking about great retreats, the German army pulled off one that ranks with the best.

The large town of Fanchonville, won by the Germans in their first drive, became a headquarters for the three preceding years. In the meantime they advanced a dozen miles further.

Then came the inevitable. Beset by Yank, Tommy and Poilu, they were obliged to turn their faces back toward Germany. Feeling, however, that an orderly retreat would wreak havoc with the men's morale, the general, in a flash of inspiration, posted this order:

"Advance at once to the rear and retake Fanchonville."—American Legion Weekly.

Leading Industries.

According to the latest available statistics the leading industries of the United States are as follows: 1, foods; 2, textiles; 3, iron and steel; 4, lumber; 5, leather; 6, paper and printing.

The Polynesians believe that the moon at its waning is devoured by the spirits of the dead.

Women Made Youn

Bright eyes, a clear skin and a body full of youth and health may be yours if you will keep your system in order by regularly taking

GOLD MEDAL HAARLEM OIL CAPSULES

The world's standard remedy for kidneys, liver, bladder and uric acid troubles, the enemies of life and looks. In use since 1696. All druggists, three sizes.

Look for the name Gold Medal on every box and accept no imitation

If You Can Knit and Crochet

We will place you in a profitable business. Sample line consisting of a crochet needle, 250-yard spool of tie silk and instruction book and color card will be mailed you upon receipt of $1.00 in stamps or money order. Money refunded if our proposition is not acceptable.

ARTLAND, 28 W. 27th St., N. Y. City

TOBACCO—Ky. extra fine chewing, smoking tobacco. Aged in bulk; rich and mellow; 2 yrs. old. Long, silky leaf. 5 lbs. $2, postpaid. Second grade, 7 lbs. $2. Reference, First National Bank. Adams Bros., Bardwell, Ky.

WHY PAY HIGH RENTS? OWN YOUR HOME. Buy a well improved wheat farm in Oklahoma. Make small payments. Easy terms. Wonderful opportunities. McCord made 1920 wheat crop pay for farm. For particulars, R. H. Thompson, Clinton, Okla.

80 Years Old —Was Sick

Now Feels Young After Taking Eatonic for Sour Stomach

"I had sour stomach ever since I had the grip and it bothered me bad. Have taken Eatonic only a week and am much better. Am 80 years old," says Mrs. John Hill.

Eatonic quickly relieves sour stomach, indigestion, heartburn, bloating and distress after eating because it takes up and carries out the excess acidity and gases which cause most stomach ailments. If you have "tried everything" and still suffer, do not give up hope. Eatonic has brought relief to tens of thousands like you. A big box costs but a trifle with your druggist's guarantee.

SOMETHING JOB NEVER DID

Possibly an Experience Like Mr. Brown's Would Have Shattered His Reputation for Patience.

Filled with pride, Mr. and Mrs. Brown started out for a drive in their new motor car. Mrs. Brown was hoping the neighbors were watching, but her husband was too busy steering to hope about anything.

Alack! Before they reached the end of the road the car stopped, and stayed that way with a mule-like persistency. Mr. Brown tried every lever and handle in turn. Then he got down from his seat and began to investigate.

Presently he lay down and crawled underneath the car until only his number nines were left visible. In a few moments the car gave a sudden jolt and then stopped, and a terrible flow of language, more forcible than polite, became audible.

"Oh, John," exclaimed the wife, in horrified tones, "don't swear so! Have patience, like Job did."

"Job," shrieked Mr. Brown, in a stifled voice. "Job would have sworn, too, if he'd been underneath this beastly car with his mustache caught in a cogwheel."

CLERK MEANT TO GET EVEN

Of Course Congregation Could Get Away, But He Had the Minister In Tight Place.

There was bad blood between the parish clerk and the minister of a certain country church. Neither of them ever missed a chance of getting a bit of his own back.

One Sunday the clerk had a special invitation out to supper with a friend after the evening service, whereupon he asked the minister if he would mind keeping his sermon short.

It was too good a chance to miss. The minister took a few deep breaths, and preached for one hour and a quarter by the clock.

By this time the old clerk's wrath was at boiling point. He hardly waited for the preacher to resume his seat before springing up and announcing loudly:

"Psalm one hundred and nineteen. Fro' end t' end. He's preached all evening, and we'll sing all neet!"—London Answers.

True Enough.

It was a hot day and the teacher was endeavoring to teach his unappreciative class the rudiments of geometry.

"With the point as center," he began placing one leg of the compasses on that point. Then he turned to the boys to make some remark, inadvertently letting the compasses slip.

Immediately the black sheep of the flock raised his hand and waved it wildly.

"Yes, Johnson?" said the master.

"Please, sir," came the prompt reply, "you're off your dot!"—London Tit-Bits.

A Wild, Open-Air Life.

Postmaster General Burleson said at a San Francisco luncheon, apropos of a political dispute:

"Our opponents put up a very warm but very unsatisfactory defense. They remind me of the chorus girl.

"A young divine met in Broadway a chorus girl from his home town. In the course of their conversation the divine said:

"'You like the city best, Lalage, but I love a wild, free, open-air life.'

"'And don't I too?' the chorus girl protested hotly. 'Every evening after the show I get my supper on a roof garden.'"

Quite All Right.

Gladys and George, recently engaged, were having one of their spats. Gladys was endeavoring to make things clear to George, who was inclined to be obstinate.

"No, George, dearie," said she. "I am afraid it's quite impossible. The thing can never be. We should never get on well together. You know I always want my own way."

"That will be all right, Gladys," replied George, "you can continue wanting it after we are married."

It Would Be Reduced.

"Pardon me for referring to it, sir," said the profiteering plute's head accountant, "but your surplus is growing at a really disgraceful rate." "Yes," replied his employer, "but in a short time my wife's bills for the current month for goods purchased from other profiteers will come in, and when I have paid them my hoard will be reduced to respectable proportions."—Kansas City Star.

Coudln't Help Themselves.

Billbord—Jokin' aside, this show was just made for the tired business man.

Krittix—I see. The only fellows who stay for the finish are the men who are too tired to get up and walk out.

First, After a Fashion.

She—Are you quite sure I am the first girl you ever loved?

He—Yes, you are the very first—on my second hundred.

Save Time.

"A man ought not to kiss and tell."

"Still, some summer girls don't mind if you tell a few other nice fellows who are coming down."

That Stroke.

Captain Kidd buried his treasure.

"It is perfectly safe unless some golfer digs it up," he chuckled

Warning Conveyed by Dream.

To dream you are held up by a footpad signifies that unless you use extreme caution your enemies will overthrow you. To dream you are one warns you to proceed cautiously in your business.

Pigmy Pigs.

The smallest known species of hog are the pigmy swine of Austria. They are exactly like other hogs in every particular except size, being no longer than a good-sized house rat.

SHORT AND TO THE POINT

If a woman wants to cut a man's acquaintance she may look daggers at him.

When there is work to be done the buzz saw is always ready to take a hand.

Every boy should learn to write, and as a man he should learn what not to write.

It doesn't bother a lawyer when he sees breakers ahead—if they are law breakers.

Turnhout, Belgium, has a school for lacemaking which is attended by 1,600 children.

The average annual petroleum production of Burma is nearly 300,000,000 gallons.

Most men are qualified to occupy apartments in a lunatic asylum—and they can prove it.

A woman's activities have to speak louder than words in order to make themselves heard.

Many a Sunday church-going man shoots the chutes of forgetfulness the following Monday.

To get on without capital. Literally: He picks up a grain and opens a mill.—Chinese Proverb.

Even after slates were invented people continued to multiply on the face of the earth.

Insanity must be a sensation like the distorted dream that is familiar enough to the sane.

Prices of some articles of food in Syria have increased 500 per cent since the war began.

If laws against our spiritual afflictions really would work we'd call for one against worry.

In English prisons neither male nor female convicts may see a mirror during their imprisonment.

A missionary preacher in the far Northwest makes his visits to remote communities by airplane.

A man cannot be too careful if a woman does not love him, and cannot be too daring if she does.

You are not very good if you are not better than your best friends imagine you to be.—Lavater.

Butter is prime when it is fresh; but man's youthful freshness disappears when he reaches his prime.

If people wouldn't bite until they find out whether it is bread or stone there would be fewer dental parlors.

PLAYING UP TO THE TEACHER

Indianapolis Youngster Had a Pretty Shrewd Idea of What He Was Doing, After All.

John Arthur is a pupil in a Jeffersonville departmental school, and had to write an essay on Woodrow Wilson, among others. He evinced such a high regard for the president, especially in his management of the World war, as to express the view that he was even greater than Washington or Lincoln. He said they made a fine showing in the little wars they had to handle, but could hardly, he thought, have got through the big one. His father, seeing the essay, ventured the opinion that the writer was too positive in his statement, although admiring Wilson himself. John Arthur showed he was perhaps something of a diplomat as well as an essayist.

"Oh, well," he remarked, "the teacher is a Democrat, anyhow."—Indianapolis News.

Talk Less, Listen More.

While we are against the eternal talker and resent being placed in the roster of patient listeners, we are in no position to ignore the circumstance that the Lord gave man two ears to listen with and only one tongue to talk with. Which means he intended people to listen twice as much as they talk. Our kick is we have to listen 40 times as much as talk, and we want to talk.—Houston Post.

LABOR RULES COST ROADS MILLIONS

Public Directly Interested in Effort to Stop Drain on Carriers' Income.

BIG SUMS FOR WORK NOT DONE

Railways Asking Labor Board to Abrogate Wasteful Agreements Made Under Federal Control.

"The entire country, its consumers, its farmers, its workmen, and even the railway employees themselves, are directly interested with the railroads in cutting down railway operating expenses."

This is the keynote of the case presented by the railroads to the United States Railroad Labor Board, now in session in Chicago.

The railroads have submitted evidence to the board to show why the National Agreements affecting railway shop labor should be abrogated, believing that this is a vitally important step in the process of reducing operating expenses.

This step is not only necessary to insure adequate earning power to the railroads, but will make possible an ultimate reduction in rates.

The agreements were made by the Railroad Administration just before the end of Federal control. The sum total of the rules and working conditions provided by the National Agreements have increased the operating expenses of the railroads by hundreds of millions, and have decreased the efficiency and output of the employees in other ways resulting in losses which cannot be calculated in dollars and cents.

For several weeks the railroads have been multiplying instances of the absurd and extravagant results of the labor rules fastened upon them by the National Agreements.

In one case cited before the board a machinist was paid 16½ hours' wages for work all performed within eight hours. This case illustrated the effect of the rule that for each "call" the worker is to be paid five hours' wages even if he works only ten minutes.

The case of a car repairer on the Virginian Railway, who was recently paid over $1,000 for services which were never rendered, and in addition the same amount of overtime as was made by his gang, was another example.

In connection with the rule that none but mechanics or apprentices shall do mechanics' work, the following was cited to indicate its unfairness:

Five Hours' Pay for 30 Minutes' Work

"The El Paso & Southwestern Railroad recently had an engine set out at Douglas, and about the time it was ready to go to its train it developed that a window light was broken in the cab. It was necessary for the foreman to call a carpenter to do the work that he could have performed himself in a few minutes. The train was delayed one hour and 30 minutes, and the employee called to do the work was paid five hours for work requiring 30 minutes."

The inefficiency created in inflexible application of the rules contained in the agreements in question was illustrated in the following actual case which recently occurred on the Baltimore & Ohio Railroad:

> "An engine was placed in the shops for certain repairs. Because of the provisions of the National Agreement, it was necessary that members of five crafts perform parts of this work; formerly, the entire operation was performed by the members of but two crafts."

$6,500,000 for Work Not Performed

How the railroads of the country were compelled to pay almost $6,500,000 in the first six months of 1920 for service not rendered because of the effects of but one of the 182 rules included in the Shop Crafts National Agreement was shown in the testimony.

This punitive payment for work never performed was required by a clause in the National Agreement, which provides that when employees are required to check in and out on their own time they will be paid one hour extra at the close of each week.

The rigid classifications of labor, when taken in connection with the rule that requires that a man must have four years' experience before being employed to perform any of the work listed in them, result in paying rates applicable to men who are supposed to be fully qualified for work which does not require men of four years' experience.

To illustrate how the inflexibilities of many of the rules now enforced operate to mulct the railroads of large sums for services which in the absence of these rules could be obtained for relatively moderate sums, evidence was laid before the Labor Board showing that three men who were employed at a small pumping station in Michigan, performing unskilled work, would, when classified under the rules, receive an excess of pay amounting to more than the value of all the water pumped and current generated at this station.

The Chicago testimony contains literally hundreds of instances such as these, all supporting the contention of the railroads that the labor rules under which they have been forced to work are such as to prevent the "honest, efficient and economical management" demanded by the Transportation Act.

SONNY-BUNNY

By ANNETTE C. SYMMES.

(©, 1920, by McClure Newspaper Syndicate.)

Sonny-Bunny and Little Mother were looking in at the milliner's window. They were almost laughably alike, with their curly brown hair, blue eyes and trim slightness, and the expression on the two faces was much the same as Sonny-Bunny's in front of the candy shop display. Their eyes were riveted upon a dainty creation of white straw and pink roses. Even the little boy knew it just to be the thing for Little Mother.

"Go in an' buy it, moth'," he begged.

"Can't, Sonny," said Little Mother, her cheery tone belying her longing eyes. "There haven't been enough weddings this spring."

"Weddings?" queried the child.

"Yes; you know daddy gives me the wedding fees for my own. This year there haven't been enough so I can afford a new hat."

At this moment the minister drove up in his shiny Ford and took his wife and little son for the homeward drive. The new Ford had been necessary, but almost too expensive. This had something to do with the lack of money for a new hat for Little Mother.

When Sonny-Bunny got home he changed into his blue overall suit and went out in the parsonage orchard to reflect. He did it in the crotch of the August-sweet tree, which grew low and was a capital nest for a small boy.

Little Mother needed some weddings. He knew a little about weddings, for mother had explained something about them when young couples had come to the house. As far as he could see, though, weddings came unsolicited. Sonny-Bunny was positive that his father did nothing to attract custom.

At this moment Silas Lovejoy chanced to drive by. The sight of him started the child's mind upon a new tack. A conversation between his parents, overheard only the other day, recurred to his memory.

"How long has Silas Lovejoy been going with Abbie Dunn?" mother had asked.

"Seven or eight years," had been the minister's reply.

"Well, I should think they would get married now," mother had said. "Since old Mrs. Lovejoy died there's nothing to prevent."

"Silas is a man of habit," responded the minister. "He's got into a rut, and he will stick there till somebody or something jolts him out of it."

The mental processes of a child may be as direct as light, or as circuitous—well, as a country road. After mulling it over for a while Sonny-Bunny concluded that it would be a good idea to mention the subject of weddings to Mr. Lovejoy.

That afternoon Sonny-Bunny went fishing in the brook. There was a myth that a trout lived in this brook, and Sonny had spells of trying to catch him. On the other side of the brook was Mr. Lovejoy's potato patch, and in the patch the owner, hoeing. Sonny had thought he might be there. By and by, the trout declining to appear, the small boy went over to visit Mr. Lovejoy.

"Hullo, Sonny," boomed Silas.

"Hullo," responded the child. He sat down beside the green rows, in the shade, and watched the man work. By-and-by Mr. Lovejoy came and drank from the water jug hidden in the bushes near the child and sat down to rest a bit.

"Mr. Lovejoy," said Sonny-Bunny seriously, "did you ever think about getting married?"

"Hey? What? Git married? What for?' cried the man.

"Why lots of folks do—you know—and then you'd have somebody to do the housework," stammered Sonny, a trifle frightened.

Silas had not only common sense, but a sense of humor. Seeing that the child meant no harm he answered jokingly:

"Well, I never seemed to get round to it."

"It says on one of the motto cards at school, 'Never put off till tomorrow what you can do today,'" said Sonny. "And Moth' says today is all the time anybody ever has to do anything. Yesterday's gone and tomorrow never gets here."

"She's a wise woman," said Silas.

"Daddy says a man without a wife is a poor mis'ble thing," remarked Sonny. "He says Moth' has been the making of him."

"Sho!"

"Mr. Lovejoy," timidly, "are you a poor mis'ble thing 'cause you ain't married?"

A pause. "Yes, I be!" was the reply.

"Then don't you think you better get married right off?" suggested Sonny.

"Yes, I do!" came the answer with emphasis.

A week later the minister almost had heart failure when Silas and Abbie Dunn appeared at the parsonage to get married. Unfortunately Sonny-Bunny was in bed and knew nothing about it till next morning. He saw the bill which his father gave to his mother, however, the same that Mr. Lovejoy had handed him with the license. It was big enough to cover the new hat and the white pumps little mother wanted.

Sonny-Bunny feels sure that he engineered that wedding—and so he did—but somehow he has never felt just like telling even little mother anything about his connection with it!

"A BIG CUT IN PIE"

Means nothing in a resturant until you know whether it applies to the price or a slice.

Nor does does a big cut in clothing mean more--until the quality is bared by examination.

Good stores have always asked more for good goods than cheap stores for low merchandise. When the reliable clothier establishes a standard good suit price at $35.00 there has always been someone to come along and quote $27.50.

In conversation pertaining to values—we are inducing our personal friends wherever possible to COMPARE as never before—and we mean it with all our hearts.

We know our business—we know our qualities and our values—and if we can win you over to our side of the house by COMPARISON—its a longer feather in our cap than if we simply sold you a suit without a struggle.

They'll stand all the comparison you can give them.

Patton Bros. Co

"Where a Dollar Does Its Duty"

Mason City, Iowa **Manly, Iow**

Public Utilities and the Public

We have selected this title for a series of articles which we propose to write cencerning the relationship existing between the public service corporation and the public, and the mutual dependance of the one upon the other.

It is hardly necessary to point out the great force the utilities have been in the development of the country, of the States and the Communities. One has only to recall what conditions were before the railroads, the telegraph, the telephone, street cars and electrical inventions had entered the field of development and progress, or to imagine the general paralysis that would insue should they by some means be suddenly be removed, to realize their importance. It goes, therefore practically without saying that the utilities have played a part in the development of present day civilization second to no other force. They have grown to be an absolute necessity, and no one would think of doing without them.

Utilities have grown to their present magnitude because their was an urgent demand for them, and also because their development promised an adequate return to their promoters for the money and energy invested in them. Nothing in a business sence can possibly be of permance unless it combines these two elements--public necessity and promise of fair return to the persons responsible for its existance. Without these two elements, every project, no matter how alluring, is doomed to failure. It follows as a matter of course, that no public utility can long unless it renders an adequate service to the public, and it is equally plain that it must soon go into the discard unless it is paid by the public in a fair profit for the service it renders to the public. This is a fair business proposition that is well recognized as between individuals, and it should be as distinctly recognized as between the public and the utilities that serve it.

Our next article will deal with the elements that enter into the production of electrical current which is the basis of the service we render to the public, and we shall attempt to make every statement as plain as it is frank. We have nothing to conceal rnd we surely want you to know the exact situation. We believe you are entitled to know.

SUMMER ANNUALS ARE MUCH ALIKE

Cowpeas, Soy Beans and Velvet Beans Have About Same Climatic Adaptations.

COMPARISON MADE OF CROPS

Among Important Points in Determining Value of Legume Are Its Value for Forage and Its Ability to Supply Nitrogen.

(Prepared by the United States Department of Agriculture.)

Cowpeas, velvet beans and soy beans are all summer annuals, agriculturally much alike, and for the best results are adapted to nearly the same regions. A comparison of these crops is not so much a matter of determining which is the best crop as it is a careful consideration of their climatic and soil adaptations and the special uses of each on the farm. Among the important points that determine the value of a leguminous crop are its value for forage, both in quantity and quality, either as hay or pasture; its ability to supply additional nitrogen; and the value of the seed as a cash crop or for its utilization on the farm.

The soy bean ha sabout the same climatic adaptations as corn, and therefore its culture is much more extended than that of either the cowpea

Cowpeas and Johnson Grass.

or velvet bean. The velvet bean is especially adapted to the well-drained portions of the Atlantic and gulf coastal plain areas, while the cowpea can be grown successfully not only there, but throughout the cotton belt and the lower half of the corn belt. The velvet bean and cowpea are quite sensitive to cold, whereas the soy bean withstands considerable frost in spring and fall. Cowpeas and velvet beans both succeed on poor soils better than the soy bean. For soil improvement the velvet bean is, in general, superior to either the cowpea or the soy bean, although the cowpea succeeds under a greater diversity of conditions.

The soy bean is to be preferred for forage purposes on account of its upright growth. The cowpea and velvet bean are viny plants and therefore more difficult to harvest and cure.

As a grazing crop for cattle and hogs in fall and winter the velvet bean cannot be excelled. However, the cowpea and soy bean can be grown over a more extended area, and some of their numerous varieties furnish earlier pasture.

For the production of seed, the soy bean has many advantages over the cowpea and velvet bean. The soy bean matures all its seed at one time and can easily be handled by machinery. Hand picking is most commonly practiced in gathering cowpea seed, although machinery can be used to advantage. It is necessary to pick velvet beans by hand because of the abundant, tangled mass of vines.

The seeds of velvet beans, cowpeas, and soy beans are all excellent feed for cattle and hogs. Cowpea seed, however, is rarely cheap enough for feed, but it is extensively used, especially in the Southern states, for human food. Soy-bean seed, in addition to its value for feed, is valuable for the production of oil and meal, and its use for human food is increasing.

The cowpea will undoubtedly continue to be one of the most important leguminous crops in the Southern states. No other crop sown under such a diversity of conditions or receiving so little attention in soil preparation and cultivation succeeds so well. Under the most varied conditions forage, soil improvement and human food are obtained.

ATTENTION TO WORK HORSES

High Prices Asked for Animals Make It Necessary for Famer to Get More Service.

The time has come when the life and the usefulness of the work horse must have more attention. The high prices asked for horses of good size and ample form make it necessary for farmers to get more and better service from their teams.

SEEDLING GROWTH IS RETARDED BY BRUSH

Close Spacing Desirable to Produce Best Timber.

When Tops of Trees Begin to Intermingle and Crowd Each Other Some of Them Should Be Cut Out for Best Results.

(Prepared by the United States Department of Agriculture.)

When cut-over land is planted in hard-wood seedlings, it may happen that a natural bushy growth will for a few years outgrow the planted trees, overtop them or crowd them, and thus interfere seriously with their development. To insure the proper development of the seedlings, forest specialists of the United States Department of Agriculture say in Farmers' Bulletin 1123, "Growing and Planting Hardwood Seedlings on the Farm," it is necessary to cut down the brush for two or three years. When old trees with wide-spreading crowns threaten to shade the seedlings so they will not develop properly, the bulletin suggests that such trees be cut out a few years after the new planting has been started.

To produce clean-bodied timber, close spacing is desirable. When the tops of the trees begin to intermingle and crowd each other, however, they become like overcrowded vegetables in a garden. Growth is stagnated. A good gardener will pull some of the vegetables in a garden that have reached this condition. When trees have reached a similar stage, some of them should be cut out. In both cases the result is the best development of the remaining part rather than a poor development of the original number. The best formed and most healthy trees should be permitted to remain, and the others that are likely to interfere with their growth should be removed.

Thinnings are usually necessary when a plantation becomes twenty years old, sometimes sooner. The openings in the crown-cover of the stand made by removing trees should not be too large to prevent the growth of the remaining tree tops from covering the gaps in from three to five years. When poles are cut for farm use, a crude form of thinning may be accomplished by care in the selection of trees with a view to the improvement of the stand.

Pruning of tree branches is usually unnecessary, and, because of the cost of labor, undesirable. If a tree is pruned too far up it may become top-heavy and easily broken by severe winds. The catalpa, ash and black cherry are known to have suffered from this, and it seems likely the same is true of many other species. If, because of wide spacing, pruning is necessary, it should be conducted in late winter or early spring, and should not be overdone.

DEVICE FOR CLEANING GRAIN

South Dakota Man Has Invention for Improving Grain Which Is Simple in Construction.

The Scientific American in illustrating and describing an invention of C. Mettler of Menno, S. D., says:

This invention relates to a device for cleaning, cooling and drying grains by air blasts. The object is to produce a device by which various grains

A Vertical Longitudinal Section of the Cleaner.

may be cleaned, cooled, dried and otherwise improved, which is simple in construction, easy to make and carries no mechanical parts to get out of order, or require lubricating.

SPRAYING KILLS HONEY BEES

Discovered That Solutions Applied to Apple Trees Are Destructive to Little Insects.

A series of tests to determine the effect of spray solutions on honey bees is to be undertaken by the California College of Agriculture, following the discovery that heavy spraying of apple trees when they are in bloom has resulted in great loss to bees seeking nectar. It is pointed out that bees are the orchardists' best friends, as they help pollenization.

SOIL IS IMPROVED BY LIME

In Caustic Form It Flocculates Land, Bringing About More Ganular Condition.

The tilth, or friable condition, of the soil is improved by the presence of lime. Lime, especially in the caustic form, flocculates the soil and thereby brings about a more granular and porous condition.

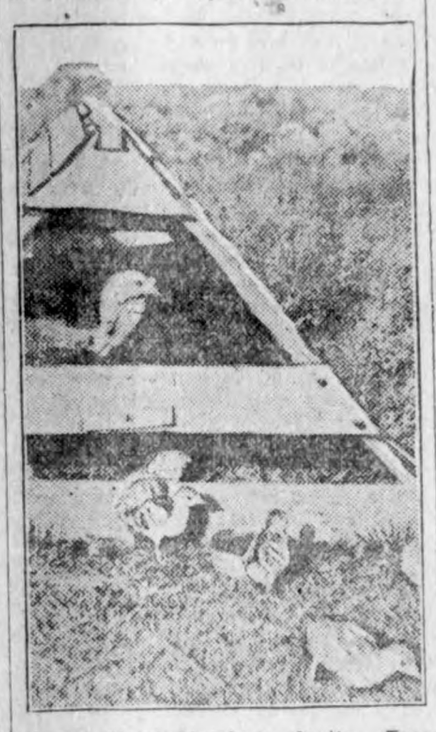
FARM POULTRY

LICE INJURE LITTLE POULTS

Supposedly Mysterious Trouble Often Proves to Be Nothing More or Less Than Vermin.

(Prepared by the United States Department of Agriculture.)

Lice are very destructive to turkey poults both when very small and when partly grown. Frequently turkey poults die off from some supposedly mysterious trouble, which when properly investigated proves to be nothing more nor less than lice. Keep the newly-hatched poults free from lice, if possible, by properly dusting the hen used to hatch the eggs. Then watch the poults for head lice. These will be found burrowing into the skin on top of the head above and in front of the eyes and under the



Keep Newly-Hatched Poults Free From Lice, If Possible.

throat. If any are discovered, grease these places carefully with plain lard, lard to which a few drops of kerosene have been added or by using a drop of olive oil. Too much grease may prove fatal to the poults.

As the poults grow, lice will sometimes be present in harmful numbers and yet escape the notice of the person who does not know where to look for them. If one looks in the hollows or creases on the upper side of the wing between the quills of the main wing feathers, they may find hiding places there literally swarming with lice. Grease applied to these places will prove effective in getting rid of the lice.

Lice may also occur on other parts of the body and must be combated.

If your young turkeys are droopy and unthrifty and you have examined them without finding any lice, do not be too sure that none are present until you have tried the following: Submerge the little turkey in warm water, holding it with just its bill sticking out, so that it can breathe, until the entire plumage is wet. Then remove it from the water and wrap in a light-colored cloth which has previously been warmed, and hold it in this manner for several minutes. Then take the cloth off. If there are no lice, on it, the turkey is free from them, and some other explanation than lice must be sought for its condition. Usually, however, a surprisingly large number of lice will be found on the cloth, even in cases where a cursory examination had convinced the owner that it was absolutely free.

HANDY DUST BOX FOR FOWLS

Confined Hens Should Be Given Opportunity for Bathing—It Discourages Vermin.

When the flock is confined in laying houses the hens miss the opportunity afforded when they are on range to pick out a likely spot and take a dust bath. It is just as important to a hen's well-being that she be able to take a dust bath when cooped up as well as when on range. Besides, it provides her with the sort of ammunition which nature intended she should use in combating vermin and natural parasites. Hens that have ample facilities for dust baths will not be "carried off" by lice.

FEEDING PIGEONS IN WINTER

Failure to Provide Proper Kind and Quantity of Grain in Winter Causes Falling Off.

Neglect in feeding the right kind and amount of grain to pigeons in cold weather is often the cause of the marked falling off in the production of squabs in winter. More time and effort is required to feed and manage pigeons at this time of the year, but the owner is well paid for the extra work.

DEFECTIVE TREES FOR FUEL

Specimens Not Suitable for Good Timber Should Be Removed and Used to Cut Fuel Bill.

It is just as possible to remove weed trees from the wood lot as it is to weed the garden; besides, the wood from the crooked, defective trees, and those that are not good timber species will make good fuel.

Kill That Cold With

HILL'S CASCARA BROMIDE QUININE

FOR Colds, Coughs AND La Grippe

Neglected Colds are Dangerous

Take no chances. Keep this standard remedy handy for the first sneeze.

EMPLOYED "NOM DE PHONE"

Few People Will Blame Mr. Kraemberlicht for Pressing John Henry Smith Into Use.

"Is Mr. Smith in?" inquired the visitor at the office of a Newark business man.

"Mr. Smith? Mr. Smith? I don't think we have any person by that name," replied the office boy.

"John Henry Smith was the name," said the caller. "He gave it to me over the telephone."

"Were you looking for John Henry Smith?," inquired a member of the firm who was passing by. "You want to see our Mr. Kraemberlicht. This is a new office boy, and he is not aware that John Henry Smith is the telephone name of Mr. Kraemberlicht. Mr. Kraemberlicht found that it was impossible to make any one understand his name over the telephone, so he simplified it to John Henry Smith. A nom de phone."

"I see," said the visitor. "You might also call it a phoney name."—Newark Sunday Call.

Canada's Fuel Resources.

The fuel resources of Canada are situated in the extreme east and west and the western part of Alberta; the lignite coals are situated in the provinces of Alberta and Saskatchewan, but lying between the limits of these deposits is a great stretch of territory devoid of coal measured by economic value. The 12,000 square miles of peat bogs are situated in this area.

NOT A TERM OF OPPROBRIUM

But Really It Seemed as Though Mother Had Some Strong Grounds for Complaint.

The following story is told of a certain school in central New York. Dr. L——, the health officer, had just made the customary physical examination and filled out the various health certificates.

One afternoon he received a visit from an irate mother.

"I should like to know," she said belligerently, "what you mean by calling my boy 'a poor nut'?"

"Madam," said the astonished physician, "I haven't an idea what you are talking about. To the best of my knowledge I have never applied the epithet you mention to any person."

"It's down in black and white," continued his visitor unappeased. "My Jim has just been transferred to D—— school, and it's on his health card as plain as can be, 'Poor Nut.'"

The light of comprehension dawned on the bewildered doctor. He smiled.

"Ah—I see! 'Poor Nut,' my dear madam, is merely an abbreviated way of saying 'poor nutrition.'"—Youth's Companion.

The Alibi.

"Prisoner at the bar, you are charged with vagrancy, having no visible means of support. Are you guilty or not guilty?"

"Not guilty, your honor. Nora, shake hands wid de judge; judge, meet me wife!"—Richmond Times-Dispatch.

OWNER

A BOUTONNIERE

By E. M. BANGS.

(©, 1920, by McClure Newspaper Syndicate.)

Madeline threw down her pencil and pushed away her block of paper.

"Truly, girls," she exclaimed, "my brain is a complete frazzle. Seems to me I can't think of another rhyme to save my life!"

Frances and Margaret laughed.

"I imagine ours are in about the same condition," said Frances. "We must have enough. Let's not write any more."

These three friends—who had been called the Blue Triangle, as all had noticeably blue eyes—were to have charge of the flower booth at a bazaar to take place the following week, for the benefit of a local charity. Somebody had conceived the pleasing idea of making a quantity of little boutonnieres, each one to contain a fortune-telling rhyme, either original or a quotation. So it was for the preparing of these that the three girls were racking their brains on this September evening.

Truth to tell, however, Madeline had not been thinking of rhymes for a good five minutes. Instead she had been asking herself over and over again, why it was that Donald Hunter had not called, or even telephoned, for three weeks, when up to that time few days had passed that she had neither seen nor heard from him. Whenever she had met him on the street either he or she had been with someone else, and he had passed on with a most formal lifting of his hat.

"Wait a moment," Margaret broke in on her thoughts a little later. "I've just evolved another rhyme, partly original. Listen:

" 'Happiness waits that you little expect,
Gold from vessels you thought were wrecked.' "

"That's fine," Frances commented. "It might mean most anything."

"Oh, Madeline," Margaret began, after a pause, "what do you think I heard the other day?"

"Madeline shook her head. "No idea."

"Well, I heard that you and Leon Brown were engaged."

"How absurd!"

"Well, you know you have been seen with him rather often lately."

Had she? Yes, and usually when she had come across Donald she had been with Leon.

"Guess that's what makes Don Hunter look so sober of late," suggested Frances.

"Does he?" Madeline assumed an indifference she was far from feeling. "I haven't seen him lately."

"I like that last rhyme of yours, Margaret," Frances approved. "We can put it with some boutonniere not as pretty as the others, if there is one, by the way of compensation."

On the evening of the opening of the bazaar Madeline put on a pale blue gown of which Donald has once expressed his unqualified approval. Her golden brown hair curled about her face, a faint color was in her cheeks and a sparkle in her eyes, and with Margaret's black hair and "eyes of Irish blue," and Frances' blond beauty, the Blue Triangle found a fitting background in the green of the flower booth. The boutonnieres with the fortune-telling rhymes were arranged in two lots, one for ladies and one for gentlemen.

Among the first to buy a boutonniere was Leon Brown. He stood a moment after making his purchase, and reading his fortune, then finding Madeline too busy to give him much attention, he wandered away, only to return a little later and repeat the process, and when for the third time he was seen approaching their booth, Margaret said in an aside to Frances: "Mr. Brown seems to visit us early and often."

"If Madeline doesn't want him," was the laughing response, "she might hand him over to one of us. He's not half bad."

Meantime Madeline had seen Donald across the room, but it was toward the end of the evening when he paused by the flower booth.

"What is this I hear about some magic button-hole bouquets?" he asked.

"They are wonderful," Madeline assured him. "You want one, of course."

She turned the bouquets a little till a certain pansy was conspicuous.

"Won't you select it for me?" the young man asked.

Madeline seemed to hesitate, as she looked over the flowers.

"I'm afraid most of our prettiest ones have been sold," she said, regretfully. "You should have been here earlier in the evening."

"But as I understand it, it is not their beauty, but the fortune they tell that makes them attractive in this case," he returned.

"Well—pansies for thoughts, you remember." The girl handed him two purple pansies as she spoke.

The young man took them, and a moment later drew out a tiny roll of paper.

"Happiness waits that you little expect,
Gold from vessels you thought were wrecked."

He read the lines and glanced quickly up at Madeline.

The tell-tale color flooded her face, and seeing it, Donald bent eagerly nearer, a new light in his eyes.

"Did you know?" he began. "Did you mean for me to get this?"

The girl's reply was scarcely audible above the hum of voices all about them, but it really didn't matter, for in her eyes he had read his answer.

Your Suit for Easter

Easter Sunday is generally the conceded time wear your new Spring Suit
We are showing some very nifty patterns in the ne models and at prices that are much lower than t past year.

(Reported by Earl E. Josten)

RONICLED SCHOOL EVENTS. K. H. S. NEWS

erdice Schwichtenberg has been nt for over a week.

ert Trumbell entered high school Monday as a member of the ior Class.

Irs. H. E. Wilson has been taking s McKahan's place during the lat- absence. We find her to be an substitute.

liss McKahan was absent Friday, day and Tuesday, and at the time his writing, she has not returned chool.

aseboll practice goes on daily— n it doesn't rain. The members of regular nine are anxious to scalp e other H. S. team. If a schedule ames is secured, it will be given his column.

Who saw the first robin? "I," said d Arnold. And if our memory s us not, it was on March 4th. He is all the honors until someone claims to have seen one prior to date.

ue to recent optical troubles on part of your humble servant, this mn is deficient in a number of s. Improvement will (probably) ience itself with the return of un- aired sight.

rthur Wellemeyer gave a most iring "Pep Talk" before the H. S. Tuesday morning. He was greeted h a chorus of K. H. S. yells, and with us, among other valuable t, a good definition for the newly ed word, "Pep."

tump speeches have been very ular lately. The subject Tuesday nig was, "What K. H. S. Needs t." The speakers, without having pared anything on the subject pre- sly, pointed out to us the things lack, and we are proceeding to edy the deficiencies. However, e are still a number of talented lents who have not favored us with r opinions.

Several pep meetings were held week. Fred Arnold was elected eral yell leader and Mildred John- leads the chorus of howls at cial times—during ball games, for ance. There has been a great deal nthusiasm stirred up. Let's not go sleep again or Prof. Wilson will ry out his threat and bring an rm clock to school.

The following members of the ior class were absent recently:— hur Johnson was absent Wednes- (March 3rd); Charles Gibbs and nald Stille journeyed to the village th of here on Wednesday after- n; and Mildred Johnson was ab- t all day Thursday. (A correction uld be made here. Donald Stille, hough included in the above list, ot a Senior, but a Sophomore. This dded to prevent a possible misun- standing.)

A new system hs been introduced o the grading methods of the high ool. The three pupils receiving the hest averages n each class for each riod of six weeks are awarded A, and C, respectively. Having been quested to do so, we announce winners in the Sophomore class the last six weeks period. Edwin nt a break-neck horseback ride had the highest average, and s awarded an A. Howard Wiles me of second with a B, and Esther ier carried off the honors for third ace by receiving a C. Next week e hope to announce the winners in e other classes and give other in- rmation.

Grammar Room Items

A new pupil, Homer Schaper, has en enrolled in the seventh grade.

Anna Keeper was absent from hool several days last week.

Those who have been perfect in ttendance during the past six weeks are Andrew Wellemeyer, Wayne Lemke, Ruth Johnson, Frank Gibbs, Mabel Schafer, Marvel Anderson and Elvira Stille.

The eighth graders have received their returns from the county examinations. Considering the difficult questions given this year, all pupils did very well. The pupils passing in all subjects were Adala Schroeder, Leona Lau, Albert Priebe and Andrew Wellemeyer.

Avery Township News

Geo. Stokesbary and Wm. Bell, shelled corn last Friday.

Albert Fuller was in Ventura on business one day this week.

Mrs. C. V. Marshall and children visited at the home of Hank Wades Saturday night.

Edgar Buss and Jeffie Bell were Sunday visitors at the home of Wm. Bell.

Miss Jennie Albers is assisting Mrs. L. Albers with her work this week.

W. R. Bloom is erecting a machine shed 40x60 feet on the farm occupied by Martin Jensen.

Bill Marshall accompanied C. V. Marshall with his car of household goods to North Dakota.

Clint Dutton returned from his trip at Dows and Williams, Iowa, last Friday.

Hank Wesenberg of Dows, came Friday night to attend the party at the home of his sister, Mrs. Burt Dutton.

Mr. and Mrs. Will Johnson and daughter Clarice, and Mrs. R. F. Hoffman, were Belmond callers last Saturday afternoon.

Peter Trampel moved here Tuesday and is now located on the farm where Walter Reed lived. Walter Reed has moved to a farm west of town.

A party was held at the home of Mr. and Mrs. Burt Dutton last Friday night. Owing to the good roads and the nice evening about fifty were present. All enjoyed a real good time

Mrs. Walter Hersom and children and Ila Dutton left by Ford last Wednesday for Williams, Iowa, where Mr. Hersom has rented a farm . Ila Dutton returned Friday evening.

A couple of young boys of this vicinity made a flying trip to Goodell last Friday night for their girls, but when they arrived they wouldn't come so they made the return trip alone.

Quite a few gathered at the home of Will Johnson to celebrate Mrs. Johnson's birthday last Tuesday. All enjoyed a good time wishing Mrs. Johnson many more birthdays to follow.

Liberty Township News

Lloyd, Nettie and Fern Ulrich Forded to Mason City last Wednesday

Ridder Bros. have purchased a new Ford.

Herman Paul has a new hired man by the name of Sam Brendell.

The W. F. M. S. met at the home of Mrs. Roy Schaefer on Tuesday afternoon.

Bertha Miller is helping her sister Mrs. John Woods with her house work this week.

John Spitler Jr., is the owner of a new Ford. Now girls, don't all swarm around the tin Lizzie at once.

Miss Millie Anderson, who assisted Miss Roxanna Schaper during moving returned to her home in Liberty township Sunday.

E. J., C. C. and Roy Schaefer autoed to Marble Rock last Sunday to attend the funeral services of the former's cousin, Charley Schaefer.

Will Suckow has been serving on the jury the last couple of weeks at the county seat. His brother Louie is atending to his work at home.

Mr. and Mrs. August Ridder have been helping their children get moved and settled in their new home in Liberty township and from there they went to Wesley to assist their daughter, Mrs. Frank Ward.

We wish to correct a couple of the items which appeared in this column last week, one which stated that Elmer Beier left for Sioux City to attend an auto school and the other that Fern Ulrich and Faye Bridges were leaving for Ames. Both items were falsely reported by two certain young ladies. It is not our intention however to publish untruthful news.

The roads have been pretty good of late and a person could go most anywhere with a car with the exception of about an eighty rod stretch past the Suckow place which has been almost impassable, the mud being a foot deep in places. Now this is a county road. What has become of our county supervisors? If they want to hold their job they had better see to it that this road is fixed.

The monthly meeting of the American Alliance was held last week on Wednesday evening at the center school house. There was a full house consisting of men, women and children. A lively debate was staged after which Mr. Shaw gave a talk. Near the midnight hour a bountiful supper was served of which all took part in. Many ate twice as much as they cared for and still there was enough grub left to feed an army. If you believe in farmer organization, a good time and a big feed, come to the next meeting.

We glean the following from the Garner Democrat which is of interest to Klemme people. A baby boy is reported at the home of Mr. and Mrs. C. H. Tompkins. The youngster arrived Tuesday night, and has been labeled as child number three of the household.. It is the second boy.

A few weeks ago we told of how Marlin Croner had baked a fine angel food cake. He has improved considerably since then and brought us another hunk of the heavenly grub the other day. We pronounced it O. K. and proceeded to tuck it away under our Editorial belt. Any body else wishing us to sample their cake, just please bring it to the office—we are great on cake.

ELECTION NOTICE

NOTICE IS HEREBY GIVEN THAT there will be an Election of the Qualified Voters of the Town of Klemme, Iowa, at the Town Hall on the 28th day of March, 1921.

At this time a Mayr, Five Councilmen, a Treasurer and an Assessor will be elected. Polls will open at 8:00 o'clock A. M. and will close at 7:00 P. M.

Everyone cordially welcome at all our services. Come and worship with us.

A. E. Buriff, minister

THE METHODIST CONFERENCE

The Algona District Methodist Conference closed at Garner last Wednesday with an address by Dr. F. E. Mossman, president of Morningside College. About forty ministers were in atendance, including Dr. Buriff of this city. who took part in the program. Quite a number of Klemme people were in attendance during the conference. All of the meetings were full of interest and good and were well attended

Hugo Neff was up from Goodell Monday visiting Klemme friends.

Miss Gretchen Blank was brought back from the Des Moines Hospital Saturday. Her condition is very serious at this time.

Mr. and Mrs. Cliff Swartz invited in a number of their friends last Saturday evening for a party. All report a fine time.

L. W. Wesenberg, of Goodell, was a business caller in Klemme Monday between trains. His main object was to arrange with the Times to advertise a big sale which he is pulling off at Goodell next week. You will find his add elsewhere in this issue.

First Hancock County Women On Jury, One A Klemme Lady

The first two women in Hancock County to be called to serve on the jury are Mrs. C. W. Wiles of Klemme and Miss Alma Schmidt, of Garner. These two ladies have the honor and distinction of being the first women to enjoy the full rights which suffrage ha extended to the women of the United States. And from all reports they are going about their work like veterans.

ELECTIONS

Don't forget that there are two elections in Klemme this month. The school election will be held Monday, March 14th at which time two directors will be chosen for a three year term. The names on the ballot are R. W. Elder, A. D. Gimer and F. Gruetzmacher. John Gruetzmacher is on for treasurer.

The Town Election will be held on Monday, March 21st. At that time a mayor, five councilmen, a treasurer and an assessor will be chosen for the next two years. The Citizens' party held their caucus Monday night and re-nominated the old council headed by F. J. Wenck as Mayor. Treasurer Waterman and Assessor Sampson were also put back on the ticket. The Peoples' party held their caucus Tuesday night and headed their ticket with F. A. Arnold for Mayor, and Geo. Kluckhohn, Art Gimer, C. M. Bredbenner, Ed Ell and Wm. Bachman for the Council. They endorsed Waterman as Treasurer and Sampsor for Assessor.

The two elections promise to stir up the town in great shape, especially the election for town officers. There are good men on the tickets but it looks like that at election time they will be mixed up considerably and men will be chosen from both tickets. Women have a chance to show who they want this time and they should turn out strong. Here is a chance for some fun and no one will have a "walk away" with an office this year.

GOODELL

(Too Late for Last Week)

Mr. and Mrs. Click of Steele, N. D., were visitors at the Jay Griggs home last week.

A party was held at the Charlie Smith home last Friday night. Everyone present reports a good time.

Clifton Busick was a visitor at the Ed Rhodes home last week.

Mr. and Mrs. E. A. Strasburg and daughter Mae Elizabeth, were visitors at the Jay Griggs home Sunday.

Delorys Cook has been on the sick list this week.

Mr. Franson, superintendent of the Goodell high school, was a Garner caller Monday.

Much moving is being done this week. We extend a hearty welcome to the new comers of this vicinity.

ACTORS RISK NECKS IN MAKING SCENES FOR "IN MIZZOURA"

No Fakes By Robert Warwick And Associates in Paramount-Artcraft Picture

Frequently when a scene on the screen is pictured where an actor takes hazardous chances, the wise ones will tell you a "dummy" or "double" is being used. As a matter of fact, the better actors never fake and consider it a point of honor to go through the dangerous scenes themselves. This was illustrated forcibly during the screening of 'In Mizzoura' the new Paramount-Artcraft picture starring Robert Warwick, which is coming to the Idle Hour Theatre Saturday night.

Hugh Ford, the director, went to Robert Cain, the "heavy" and told was scheduled, in which Cain was to be pursued by Major Warwick and knocked from the saddle. Mr. Ford offered to have an "extra" double for Cain in the scene.

"Not by a jug full" said the actor.

Tht ride was undertaken and came out successfully, except that Major Warwick gave the plucky Cain a beautiful black eye and knocked him into a clump of prickly shrub. But Cain was satisfied, if not exactly happy.

CLOVER SEED—We are now taking orders for Clover Seed at $14.00 cash. 99½ per-cent pure, 96 germination. Orders must be in before March 10th. W. F. Lau.

FEED—The Farmers Co-Operative Grain Co.. is ready to handle Oil Meal, Cotton Meal and Middlings. Letve your orders with Val. Josten. M4tf.

BASKET SOCIAL

There will be a basket social at the Swan school house, 8 miles east and 2 miles north of Klemme, Friday night, March 11th. A program will be given. Everyone invited. Leoda Smith, teacher. 1w.

NOTICE TO NEWS WRITERS

This is a very busy time of the year at the Times Office and in order to handle all the news we must insist that the items be sent in so that they will be in the office here not later than four o'clock on Tuesday to insure publication in the week's issue. We must just a time limit on all items in order to get the paper out on time during the rush. We thank you. Editor.

Watch for the "Klemme Koon Komedians". They will appear in Klemme soon. This will be the biggest fun show ever seen in this town. Watch for dates.

Needed an Excuse.

Bobby, a Columbus boy four years old, dislikes overshoes, saying that big boys need not wear them. During the recent slush and snow, Bobby had to don his rubbers every time he ventured into the street to play. Recently his mother saw him walking toward his home, deliberately selecting places on the sidewalk where the slush was thickest, although the other side of the walk was perfectly dry. She remonstrated with him, telling him to walk where the path was dry. "Well, mother," complained Bobby, "don't you see I've got to have a 'scuse for wearing these overshoes?" —Indianapolis News.

Sanitarium in Far North.

It has been discovered that the northern climates have some healing qualities for the lungs of tubercular patients, and a company has been recently organized for the purpose of operating a large sanitarium at Spitzbergen, which has heretofore been known as the starting point for northern expeditions of discovery, and for its mineral deposits, which have not been developed to any extent because of the remoteness of its location. In the matter of climate it is quite mild, its shores being tempered by a very warm ocean current.

His Preference.

"Do you ever feel that you would like to go back to Africa?"

"No, sah; not me, sah," replied Brother Baggy. "I druther stay yuh in de Newnited States, whuh a culled man isn't got no social standin' and dey cusses yo' and kicks yo' round and calls yo' 'nigger,' and den slips yo' a 'casional haffer dollah to saturate yo' feelin's, dan to go over dar to Africa, whuh everybody is free and ekil and dey cuts off yo' head wid a kyahvin' knife."—Kansas City Star.

Males Outnumber Females.

The latest available compilation shows the United States to be one of the four leading countries in the world where the male population outnumbers the female. The proportion of females to each thousand males is as follows: United States, 934; England, 1,068; Germany, 1,026; France, 1,033.

A Bit Mixed.

Husband—Who are those newcomers in the house opposite; they seem wealthy.

Mrs. Putton-Ayres—Oh, they don't amount to anything socially; just mauvay reesh, as the French say.—Boston Transcript.

America's Medical Advisers.

There is one doctor to every 518 persons in towns of more than 2,500 persons, while in the country districts there is only one to every 991.

When Is a Joke Not a Joke?

"I don't see anything funny in that story?"

"You would have if your boss had told it to you!"

"Every college James visited put LL. D. after his name."

"Every officer Bill had put A. W. O. L. after his."

TAKES OATH AS CHIEF EXECUTIVE

Warren Gamaliel Harding Now 29th President of the United States.

SIMPLICITY MARKS CEREMONY

Authorities Bow to the Wishes of the Incoming President in That Respect—Wilson in Carriage With His Successor.

One Short Sentence in Oath of Office.

Washington, March 4.—The oath of office of President as administered today by the chief justice of the United States, Edward Douglass White, follows: "I, Warren Gamaliel Harding, do solemnly swear that I will faithfully execute the office of President of the United States and will, to the best of my ability, preserve, protect and defend the Constitution of the United States."

Washington, March 4.—Warren G. Harding was inaugurated as the twenty-ninth President of the United States today in record time.

The inaugural ceremonies were the shortest in history, and but few inaugurals have been more simple.

Before a standing crowd of thousands, which completely filled the broad plaza and eddied for blocks around the capitol itself, the new President accepted the supreme gift of the republic in a short inaugural address—an address in which he did not attempt to outline in other than general terms the program of international and domestic problems to be followed by his administration.

Inauguration day dawned clear and cold. The temperature was not far from freezing, and there was a stiff breeze whipping the flags that decorated Pennsylvania avenue and the government buildings.

In other days crowds moved restlessly up and down the street all night long and dawn found many of them camping sleepily in points of vantage along historic Pennsylvania avenue to view the great cavalcade of dignitaries. This morning a machine gun could have swept the length and breadth of the avenue with but few casualties.

No Pomp or Ceremony.

There was something coldly and distinctly businesslike about today's inaugural. Gone were the pomp and panoply and display of other years with their extravagant decorations, crashing bands, marching military, and horse-drawn carriages of state proudly bearing silk-hatted and frock-coated dignitaries in great parade.

In their stead came today the swift motor car, little music and an apparent desire to get things over with in the shortest possible time and settle down to the momentous labors that confront the new administration.

The lack of military display was particularly noticeable. Three troops of the Third United States cavalry form the nearby post of Fort Meyer were the only regulars on inaugural duty, and their services were utilized more as an auxiliary police army than for display.

Today's events began to march with swift efficiency shortly after 10 o'clock, when half a dozen automobiles drew smartly up before the Willard hotel. They formed the entire parade of the Harding inaugural. Only the first four cars were really in it, the others being occupied by secret service men and reporters. Here all the members of the inaugural party were picked up with the exception of the President and Mrs. Wilson.

Committee Meets Harding.

Shortly after 11 o'clock a half-dozen motors drew up in front of the United States capitol, threading their way through the throngs which had gathered there, and the members of the congressional committee appointed to conduct the inauguration clambered in and whirled downtown.

Headed by Senator Knox of Pennsylvania, the congressional committee went to the hotel room where Mr. Harding had spent the morning at work. The committee with due formality announced that they had arrived to conduct the President-elect to the capitol to be inaugurated, and the former Senator, with absolute lack of formality, addressed them familiarly, folded a small manuscript into his pocket and joined the committee.

A great crowd assembled before the hotel cheered as the new executive made his way to a powerful motor and was whirled away to his future home—the White House.

As the cars drew up before the White House gates, the police on duty there saluted their new "boss," and he waved his hand at them.

Greets President Wilson.

At the White House doors the congressional committee was met by the chief usher and shown into the east room, where President Wilson was seated. After an exchange of greetings the outgoing President rose, and while attendants wrapped him carefully in a cape, made his way to the car where his successor awaited him.

President Wilson and President-elect Harding then drove together down Pennsylvania avenue, through a lane which police and secret service men had swept clear. Both the retiring and the incoming Presidents acknowledged the wild applause of the throngs.

Those in Procession.

In the first car were President-elect Harding, President Wilson, Senator Philander C. Knox of Pennsylvania and Joseph G. Cannon of Illinois.

In the second automobile—Mrs. Wilson, Mrs. Harding, Senator Nelson of Minnesota and Representative Rucker of Missouri.

Third automobile—Vice President Marshall, Mrs. Coolidge and Senator Overman of North Carolina.

Fourth automobile—Vice President-elect Coolidge, Mrs. Marshall and Representative Reavis of Nebraska.

Arrive at Capitol.

Arriving at the capitol the party made their way to the senate floor. President Wilson went to the President's room, just off the senate chamber, where he seated himself at a desk and began the signature of bills passed in the closing minutes of congress.

A few minutes before the hands of the senate clock turned to twelve the President-elect and the Vice-President-elect went into the senate chamber. There Mr. Harding was greeted by his old friends and some of his old political enemies, and he was apparently at complete ease, for he felt at home there—it was the scene of his first big public service.

Vice President Takes Oath.

Vice President Marshall called for order. Twitching his gray mustache he made a characteristically brief speech, thanking the senators for the courtesies they had shown him and then called Calvin Coolidge to be sworn in as Vice President. Newly-elected members of the senate were sworn in and the senate was adjourned sine die.

As the new President made his appearance on the steps of the Capitol building the crowds gathered in Capitol park went wild with cheering.

Mounts Inaugural Platform.

Preceded by Chief Justice White, the President-elect mounted to a small platform which had been erected at the foot of the Capitol steps.

With his flowing black robes swishing in the breeze the elderly chief justice stood erect and, facing the bronzed, stalwart new President, administered the oath of office.

The hand of Warren G. Harding was respectfully placed on the Bible, the oath of office given, and the United States had a new chief executive.

Delivers Inaugural Address.

Halting for a few minutes—perhaps for a silent prayer—President Harding stepped to the front of the platform, placing his manuscript on a little table which has been used by every President since Abraham Lincoln, and delivered his inaugural address.

The inaugural address completed, President Harding, still the object of the throng's admiration, took his seat in his automobile, leaned over and instructed the chauffeur to "go as fast as the traffic laws will allow" and was whirled back to the White House.

At the White House a little group awaited—a group of those dearest to the President. There was the tall, gray-haired woman that the President affectionately addressed as "the duchess"—the first lady of the land—and there was an upright standing, bearded old gentleman, the President's father, and his brother and a few other members of his immediate family. They joined in a simple luncheon together.

Starts Work Immediately.

At the White House executive offices there was the bustle and stir of business. The machinery of the government was set for business, for from the White House came the word:

"President Harding will work this afternoon."

It was but a matter of an hour. The crowds were great. The spectacular features of other inaugurations were missing. The whole proceeding was dignified, impressive—a matter of business.

Political Leaders on Hand.

Political leaders from all parts of the country were here today for the inauguration. The veteran of them all was Former Senator Chauncey M. Depew of New York, who has attended every inauguration since Abraham Lincoln.

Among the governors who had arrived were: Albert O. Brown of New Hampshire, Harry L. Davis of Ohio, Thomas E. Campbell of Arizona, Warren T. McCray of Indiana, Channing H. Cox of Massachusetts, Henry J. Allen of Kansas, Edwin P. Morrow of Kentucky and Percival P. Baxter of Maine.

Theodore Roosevelt of New York, who will be the assistant secretary of the navy, also had arrived and was the guest last night of Representative and Mrs. Longworth of Ohio.

Wilson's Last Night in White House.

Woodrow Wilson passed his last evening in the White House studying bills and resolutions which had reached him from the capitol during the day. He retired later than usually.

Many messages were received congratulating him on his administration of the nation's affairs and carrying good wishes in his return to private life. The names of those sending the messages were not made public, but it was said that several were from abroad.

The President late in the day took his customary automobile ride. He was not accompanied by Mrs. Wilson, who remained behind to superintend the winding up of household affairs. It was on the President's return that President-elect and Mrs. Harding called at the White House.

NEWS REVIEW OF CURRENT EVENTS

Allies, Rejecting the Counter-Proposal of the Germans, Issue an Ultimatum

WILL OCCUPY RHINE CITIES

Armed Force Will Be Applied Immediately—French Troops Ready to Move—President Harding's Inaugural Address Indicates His Attitude Toward League of Nations.

By EDWARD W. PICKARD.

"Kolossal," which used to be the favorite adjective of the Germans, may well be applied to their nerve as displayed in the counter proposals on reparations, submitted to the supreme council in London by Foreign Minister Simons and his colleagues. The world had expected from them something inadequate in the way of an offer, but the insolence of the proposal was amazing, even to unofficial Germany. Lloyd George and Briand heard it with ill-concealed derision, and the formal statement of the allies was that "it does not merit either examination or discussion."

This was followed by an ultimatum in which the German delegates were informed that if Germany did not accept the fundamental conditions laid down by the supreme council in Paris the allies would take immediate steps. First of these steps will be the occupation by allied troops of the cities of Duisburg, Dusseldorf and Ruhrort; second, each allied country will place on German merchandise such a tax as it may deem proper; third, a customs boundary will be established along the Rhine under allied control. Germany, said Premier Lloyd George in his reply to the German proposal, would be permitted to suggest no modifications of the Paris decisions except as to conditions of payment.

Doctor Simons answered that the German position had been misunderstood, and that he would reply on Monday to the ultimatum.

Briefly stated, Simons proposed that Germany pay the allies as war reparations about 30,000,000,000 gold marks—approximately $7,500,000,000—which is about one-seventh of the sum demanded by the allies. Also, the offer was conditioned on two provisions, that Germany be accorded free commercial privileges throughout the world, and that Upper Silesia, where a plebiscite soon is to be held, shall remain German.

Especially impudent was the suggestion to capitalize Germany's reparation payments through an international loan to be divided among allied countries and held free from taxation in all countries. This meant that the Germans want the allies to furnish them the money to pay their debts by allowing the Germans to offer so attractive an investment that it would outshine other securities and be made still more attractive through the surrender of tax revenues by the allied governments.

Meanwhile the French, anticipating the outcome of the conference, were getting ready to enforce payment by Germany. Their plans for military action were prepared and submitted by Marshal Foch, and after prolonged discussion Lloyd George was persuaded to agree to Great Britain's participation in the use of armed force. A French officer in London said French long-range guns had already been moved forward to a position from which they commanded Essen where the Krupp works are located. Field artillery, cavalry and tank and armored car formations were held in readiness for the advance, and the air squadrons were awaiting the word to "take off." At Coblenz it was stated that the American troops, in the event of an allied advance, would merely continue to occupy the actual lines now held by them.

Belgium is ready to act with France and Britain in the Essen-Dusseldorf district. She had 13,000 troops on the Rhine and has sent two more divisions there. The French have 150,000 men in the occupation zone and 200,000 in reserve close by.

Among the interesting side-lights on the "poor mouth" presented by the Germans is the information afforded by a reliable American officer who has recently made a thousand-mile motor car trip through the chief agricultural and industrial districts of Germany. He says that Germany can pay the sums demanded; that he saw everywhere amazing evidence of productive labor and growing wealth.

All American eyes were turned toward Washington on Friday when Warren G. Harding was inaugurated President, and all American ears were open to hear what he had to say of the policies that shall control his administration. The ceremonies were simple and dignified, in conformity with the wishes of Mr. Harding. The new President, in his address, left no one in doubt as to his attitude toward the League of Nations as now constituted. Much of what he said was devoted to the general subject of international relations. He asserted that America had proved the wisdom of its inherited policy of non-involvement in old world affairs; that it can be a party to no permanent military alliance; that it can enter into no political commitments nor assume any economic obligations "which will subject our decisions to any other than our own authority." At the same time, he said, America is ready to associate itself with all other nations for conference and counsel; to seek ways to bring about approximate disarmament; to promote mediation, conciliation and arbitration, and to establish a world court for the disposition of justiciable questions submitted by agreement.

To his fellow citizens President Harding made an eloquent plea for "the resumption of our onward, normal way," for sane reconstruction after the devastation of war, for readjustment with care and courage without any wild experiments. Said he: "We must face a condition of grim reality, charge off our losses and start afresh." For his part, he promised administrative efficiency and economy, lightened tax burdens, adequate credit facilities, sympathetic concern for all agricultural problems, omission of unnecessary interference of government in business, and an end to government's experiment in business.

Among the interesting things which Mr. Harding hopes to bring about, according to unofficial announcement, is the creation of a "ministry of defense" under a cabinet officer, to control the national defenses on land, on sea and in the air. This, of course, would mean the consolidation of the War and Navy departments. It is said the plan meets the approval of both Secretary of War Weeks and Secretary of the Navy Denby, and that both of them have agreed to give way if the plan is adopted.

In the last hours of its life the congress reached agreement on the army appropriation bill and it went through with provisions fixing the strength of the army for the next year at 156,000. The house had put the figure at 150,000 and the senate wanted 175,000, so the result is a compromise in which the upper house yielded most. The bitterest struggle was over the naval appropriation bill in the senate, the controversy being over the $100,000,000 added to it by the naval committee. This fight prevented the passage of a number of measures, among them the soldiers' bonus bill, against which Senator Thomas of Colorado threatened to filibuster.

Contrary to predictions, the house judiciary committee took the charges against Judge Landis in all seriousness, and presented a report recommending that they be fully investigated by the next congress. The report said that if it were true that Judge Landis had accepted the position of baseball arbiter while holding his judicial position—and of course that is true—his action was "at least inconsistent with the full and adequate performance of the duty of United States District Judge, and that said act would constitute a serious impropriety on the part of the judge."

Jude Landis' reply to this was to refer to his statement of last December, when he said: "They will never impeach me. If both houses of congress by a majority vote pass a resolution expressing disappointment at my attempt to benefit 10,000,000 persons who have a whole-hearted interest in baseball, I will send my resignation as a federal judge to Washington by telegram."

John Skelton Williams retired Wednesday as comptroller of the currency, and in accepting his resignation President Wilson took occasion to comment on the "gross injustice" done Mr. Williams by the senate banking committee, which had prevented his confirmation. One of Mr. Williams' last official acts was to charge the United States Steel corporation with exacting excessive and unjustified prices for its iron and steel products. The accusation was vigorously denied by E. H. Gary, chairman of the corporation.

The house committee which investigated the doings of the shipping board made a report recommending the transfer of the functions of the board to an executive department because what is needed is more centralization of administrative authority than can be had with a large board. The committee found there had been waste, inefficiency and lack of coordination in the work of the board, but found no evidence "to prove that dishonest or fraudulent motives actuated any member of the shipping board of trustees of the Emergency Fleet corporation." Specifically, Charles M. Schwab and R. W. Bolling, brother-in-law of Mr. Wilson, were exonerated from charges of interested action. In general, the board was praised for "the most remarkable achievement in shipbuilding the world has ever seen."

A small side door in the temple of Janus has been thrown open in honor of Panama and Costa Rica, which small republics seem determined to go to war over Coto, a piece of territory which contains valuable oil deposits and which is claimed by both. Indeed, hostilities already have broken out, a "battle" has been fought and several soldiers have been killed. A small detachment of Costa Ricans that had occupied the disputed territory was attacked by a Panaman force and defeated. The excitement in both countries is intense, and in the city of Panama a war-mad mob even attacked the presidential mansion because President Porras had declared himself in favor of a diplomatic settlement of the quarrel. At latest reports Costa Rican forces were being rushed to the Coto district. It was believed some of them would be landed on the eastern shore of Burica point to cut off the Panamans from their supplies. As this shore was given to Panama under the arbitration ruling of Chief Justice White in 1914, it was feared the United States might be involved, under the assumption that it is obligated to protect the territorial integrity of Panama.

Many stories, more or less detailed, of widespread revolt in Russia against the soviet rule have been coming to the outer world, usually by way of Finland. Hundreds of thousands of workmen, hungry, cold and without employment, were said to have opened war on the Bolshevik armies and rulers, and, especially in Petrograd, there were heavy casualties. These reports lacked confirmation, and were declared false by the soviet authorities. Recent dispatches from Helsingfors said the soviet government had not lost control and that Lenin was promising the workmen all the relief in his power.

In the death of Champ Clark of Missouri, former speaker, the country lost a distinguished citizen and the Democratic party one of its strongest members. He never entirely recovered from his defeat for the presidential nomination in the Baltimore convention and of late years had been comparatively inactive, but his life record is one of earnest and at times eminent labor for his country.

Rich Forsake Fifth Avenue

Tradesmen Steadily Break Exclusiveness of Noted Residence District of New York.

MRS. VANDERBILT LEADS WAY

New Exclusive District Expected to Spring Up in Section Where Near-Slums Existed Before—Long Fight for District.

New York.—Stealthy but steady advances by tradesmen, covering a period of more than twenty years, have virtually broken the residential exclusiveness of Fifth avenue, known the world over as the home precinct of the Vanderbilts, Carnegies, Harrimans, Plants, Fricks and other wealthy families.

One by one mansions which housed international personages and gave to Fifth avenue much of its glitter and fame are surrendering to commercial enterprise, and the rich are seeking homes in new "exclusive" parts of the city. Real estate men, who have watched with interest this aggression of trade, say that another decade will have wiped out the last bit of residential exclusiveness in the avenue.

Mrs. Vanderbilt Moves.

The change in Fifth avenue was reflected in the recent purchase of property bordering the East river at Fifty-eighth street by Mrs. William K. Vanderbilt, Sr., where she intends to build a home in a section known as Sutton square. This bit of property is directly across from Blackwell's island, where a city prison is located, and is almost underneath the Manhattan approach to the Queensborough bridge. Real estate men expect that Mrs. Vanderbilt's migration to the East river will mean a new exclusive district in a part of the city where near-slums existed before.

Mrs. Vanderbilt, who a few years back helped to make Fifth avenue history with her brilliant social activities, said when she purchased the East river property that Fifth avenue had "lost its residential atmosphere, which was its most valuable charm." Traffic and crowds, resulting from the trade invasion, she said, had taken away its exclusiveness.

Wage Fight for District.

The fight to "save" Fifth avenue has been waged since the late nineties, when real estate men began to get options on property near the magnificent mansions. Members of the Vanderbilt family and others owning homes there expended millions of dollars in buying up property in an effort to stem the tide.

Much of this property was purchased at exorbitant figures, and after a lapse of years has fallen back for business use. Hotels, banking houses, jewelry stores, millinery and fine tailoring establishments have gradually crept northward along the thoroughfare.

The home which Mrs. Vanderbilt is forsaking at Fifth avenue and Fifty-second street will become the site of a trust company. Its sale was made possible as the result of the death of Mr. Vanderbilt in Paris, when the house, owned by his estate, was sold to the highest bidder. The first actual break in the Vanderbilt holdings came when Gen. Cornelius Vanderbilt leased his home at Fifth avenue and Fifty-fourth street to a shoe firm.

The residence of the late Henry C. Frick, steel magnate, will eventually go to the city for use as a museum.

FALLS 130 FEET AND LIVES

Man Drops Into Six Feet of Water; Breaks Nothing but High Diving Record.

San Francisco.—Instead of being center of funeral services, John Warren, timekeeper at the Hetch Hetchy dam building site, is trying to learn if he holds a new diving record. He did a drop of 130 feet into only six feet of water and broke nothing other than the record, if that.

There is a bucket swung on a fall that carries out of the Hetch Hetchy dam pit to the cliff side, and in which it has been the practice of workmen to make the trip down from cliff to pit, as the empty is returning. John was making this ride.

The bucket got tangled in a guy wire and, of course, tilted. Before it could clear and right itself, John was spilled and sliding down an air current.

He hit the water either head first or feet first. No one knows, John least of all. When the mourners gathered to pick up the remains John blinked, shook his head and told the boys to get back to work or he'd mark them up for time lost.

Father Eloped Same Day Two Daughters Ran Away

A triple elopement involving three members of one household, none of whom knew of the other's intentions, was disclosed with the announcement that William M. Chase of Atlantic City, N. J., retired New York city manufacturer, and his daughters, Edith and Evelyn, had married their respective mates within 24 hours. Each of the three was surprised to find that the habit had spread throughout the family.

Hooch Blamed for Theft.

San Antonio, Tex.—"Too much hooch!" said Judge Buckley as he levied a $50 fine on George Harrison for having stolen a forty-two-year-old monkey from a carnival show and then disturbing residents near the show grounds by ringing their door bells and trying to sell the monkey.

"Ocean of Air" Needs Watching

Navigation Lanes May Differ From Day to Day, Says Government Meteorologist.

DATA MUST BE GATHERED

Meteorologists Should Decide, After Study of Air Conditions, What Route and Altitude a Plane Should Take.

Washington, D. C.—The "ocean of air" which followers of aviation believe some day will be filled with great air liners, plying their way on regular schedules, must be studied from a meteorological standpoint and the whims and fancies of the element must be reduced to easily understood data before the dream of world-wide commercial aviation can become a reality, according to C. LeRoy Meisinger, government meteorologist here.

Mr. Meisinger in a paper discussing the effect of air conditions on commercial aviation says that meteorology is the mainstay of aviation, regardless of the confidence a pilot may have in his motor and in his plane.

The "ocean of air," he says, constantly is changing and does not contain steadfast currents, such as the Gulf stream and the Japan current, which are found in oceans of water.

Must Gather Data.

Because of the constantly changing condition of the aerial routes through which the air liners of the future would travel Mr. Meisinger declares before big commercial aviation companies can operate on a large scale, great masses of data on air conditions at all times of the year, in all places and all circumstances must be gathered. He suggests placing consulting meteorologists on the staffs of all aviation companies to study the air as it affects aviation and to decide daily what altitude and what route a plane should take from one city to another.

Air conditions are so changeable, Mr. Meisinger says, that a plane traveling between the same two points might have to take a different route almost every day in order to make the trip with the least danger. Also, a plane flying from New York to Chicago might find a certain route the best, while one traveling from Chicago to New York on the same day might find an entirely different route more favorable.

Things to Consider.

Some of the things which airplane dispatchers will have to consider, he says, are the speed and direction of the wind in the area to be traversed, the frequency of low clouds and fog, the frequency and intensity of thunderstorms, the vertical temperature distribution, the normal values of precipitation at flying fields and the effect of atmospheric pressure on aerial instruments, particularly the altimeter.

The changing conditions in the air make it impossible to gather the necessary information in a single path-finding flight over an area, he continues, but by gathering data in numerous flights at all times of the year and in all circumstances a system of averages could be devised which would aid greatly in dispatching planes.

Starving Chinese Sell Children

This Chinese peasant, starving with his family in the great famine sweeping China, is taking two of his children to market to try to sell them for enough to keep life in himself and the rest of his family.

CARRY 115,163 BY AIR

No Lives Lost in the Commercial Service.

Records Show a Total of 3,136,550 Mileage—Many Minor Accidents and Forced Landings.

New York.—A total of 115,163 passengers flew 3,136,550 miles in commercial airplanes during the last twelve months without the loss of a single life, the Manufacturers Aircraft association announced here. These figures are based on the performance of 425 planes, and it is believed that the number of passengers and the mileage would be doubled if the figures of the 1,000 commercial airplanes operating in this country were obtainable.

"In the absence of any federal system of registration, air laws and government methods for tabulating the ownership and performance of aircraft, it has been found difficult to trace the total number," the association stated.

"The totals are based on questionnaires distributed by the association, but, due to the itinerant nature of much of the flying, it has been difficult to trace and record more than half of these. This one half, by eighty-seven companies, or individuals, are permanently located in all parts of the United States.

"Much of the mileage was made on short flights of ten to fifteen miles, for which an average fee of $12.50 was charged. An increasing demand for aerial transportation between the cities has been noted, the average charge for this service being 65 cents a mile. On practically all intercity flights baggage or freight was carried, the quantity limited only by the capacity of the craft. This business aggregated 41,390 pounds.

"There were accidents and forced landings, but according to the signed reports from the eighty-seven companies, in the 3,136,550 miles flown, not a single life was lost. There were 222 forced landings and thirty-eight accidents. There have been fatal accidents in other instances, but they occurred in the course of stunt or exhibition performances or under circumstances indicating that undue risk had been taken."

Boy Given Life Sentence.

Wheeling, W. Va.—Life imprisonment was the sentence passed upon sixteen-year-old Samuel Blevens, formerly of Little Rock, Ark., in court here, after the boy had pleaded guilty to a charge of murder. The lad was accused of having killed C. F. Grandstaff, a car inspector, in a shack near Wheeling last October.

Arm Venice Court Attaches.

Vienna.—Swords are now worn by court officers for protection at the order of the president of the Vienna criminal court, because of the many attacks upon judges and witnesses recently in court rooms.

DAIRY

HANDY GATE FOR DEHORNING

Holder Rigged Up Leaving Sufficient Space for Animal's Head Is Easily Constructed.

A lock gate for catching and holding cows while they are being dehorned and marked, is simple in construction.

First make a gateway in the lot fence, using not less than 4-inch material for the gateposts. Now nail a 6-inch board on each side of these posts, across the gate at the ground, and also two others across at the top of the posts. Close up half of the opening by nailing boards diagonally to the boards at top and bottom of the posts, as illustrated. Get a strong pole, about 4 inches in diameter and 12 feet long. Bore a hole through its large end with a 1-inch auger; also bore through the bottom boards, about 8 or 10 inches from the post at the open side of the gate. Let the pole down between the top boards and the bottom ones, and insert a 1 inch rod through the bottom boards and the pole. Then tie a 1-inch rope to the top end of the pole.

When ready to dehorn or mark a large strong animal, drive her toward the gate. Just as she passes her head by the pole, pull it over against her neck, and she is easily held. There

A Gate, Rigged Up So as to Leave Only an Opening Big Enough for the Animal's Head, Is Useful When the Animal Is to Be Marked or Dehorned.

is no danger of her doing damage with her horns, for she cannot move her head.—Popular Mechanics Magazine.

AVERAGE WEIGHT OF CALVES

Figures Secured From Dairy Herds of University of Illinois—Factors That Influence.

A very well-bred Holstein bull calf weighing 112 pounds was recently dropped at the Kansas state agricultural college farm at Manhattan. Most of the dairy infants, however, weigh considerably less than this Kansas heavyweight.

In the dairy herds of the University of Illinois the average weights of the calves of the various breeds at birth have been as follows: Holstein male, 90 lbs.; female, 88 lbs.; Ayrshire male, 77.7; female, 71.4; Guernsey male, 70; female, 68.8; Jersey male, 62.4; female, 59.7 lbs.

It is a good practice to note and record the approximate weights of calves at birth, because this information is valuable in apportioning milk to the young animals. The 112-pound Kansas giant, for instance, could handle a feeding of milk that would put a Jersey calf of average weight in line for castor oil.

Besides breed and sire, heredity and the age, size and physical condition of the dam influence birth weights.

WATER FOR COWS IN WINTER

Good Plan on Very Cold Days to Heat It Just Enough to Take Disagreeable Chill Off.

The dry cow must have plenty of good water and on very cold days in winter it is a good plan to warm it just enough to take the chill off. When cows are forced to drink ice cold water in zero weather they will turn away from it before they have consumed enough to meet their requirements. If salt is sprinkled over the fodder portion of the cow's ration or otherwise supplied at intervals of two or three times a week it will assist in keeping her system in good tone.

FOR WASHING MILK BOTTLES

Fill Receptacles With Water When Emptied to Prevent Albumen and Casein Hardening.

The milk bottle, if not washed as soon as emptied, should be filled with cold or lukewarm water till it is washed. The albumen and casein harden and stick fast when they dry as well as when heated. So that if hot water is poured in the bottle or can that has had milk in it the albumen and casein will harden and stick. After washing with lukewarm water use hot water, which removes the fat, and rinse in boiling water or steam to kill the bacteria.

YOUNG GIRL FINDS RELIEF

Wants to Tell Other Girls All About It

Evansville, Ind.—"I am eighteen years old and have been bothered for several months with irregular periods. Every month my back would ache and I always had a cold and felt drowsy and sleepy. I work in a millinery shop and I went to work every day, but felt stupid and would have such cramps. I had seen Lydia E. Pinkham's Vegetable Compound advertised and had heard several women talk of it, so mother got me some. This Vegetable Compound is wonderful and it helped me very much, so that during my periods I am not now sick or drowsy. I have told many girls about your medicine and would be glad to help anyone who is troubled with similar ailments. You may use my testimonial as you like."—STELLA LINXWILER, 6 Second St., Evansville, Indiana.

Some girls lead lives of luxury, while others toil for their livelihood, but all are subject to the same physical laws and suffer in proportion to their violation. When such symptoms develop as irregularities, headaches, backaches, bearing-down sensations and "the blues," girls should profit by Miss Linxwiler's experience and give Lydia E. Pinkham's Vegetable Compound a trial.

HOW FAME SPREADS

H. H. Von Schlick of 210 Third avenue, Pittsburgh, Pa., has received thousands of letters telling him how he has done so much good with his wonderful preparation—one letter tells how his Bulgarian Blood Tea broke up a bad cold quickly; another tells how it saved them from the "FLU" or pneumonia; another tells how it helped to knock out rheumatism; another tells how it relieved constipation; another tells how it helped the stomach and bowels.

No wonder it is being used by millions of people praising its great worth as a reliable first-aid family medicine. It will pay every reader of this item to apply at once to their druggist or grocer for a box of Bulgarian Blood Tea—then they will be able to tell the good news to others.

It's as easy to talk as it is difficult to say something.

Coated tongue, vertigo and constipation are relieved by Garfield Tea.—Adv.

A boil on the neck will humble most any man.

GROWING OLD TOO SOON?

Is backache wearing you out—making you feel years older than you are? It's you find it hard to keep going? It's time, then, you looked to your kidneys. A cold, or overwork may have weakened the kidneys and brought on that nagging backache and sharp, piercing pains. Don't wait! Strengthen the weakened kidneys with *Doan's Kidney Pills*. Doan's have helped thousands. They should help you. *Ask your neighbor!*

An Iowa Case

Fred Wickstrom, bricklayer, City Hotel, Boone, Ia., says: "My kidneys were very frequent in action causing me to lose my rest at night. I had a dull pain in the small of my back and if I bent over, it was hard for me to straighten. Mornings I was tired and worn out. Doan's Kidney Pills never failed to help me. They rid me of the trouble."

Klemme and Vicinity

Mrs. Wes Lenz has been on the sick list the past week.

Mrs. Ed. Hughes of Goodell, was a Klemme caller last week one day.

Philip Bock made a journey to the county seat town Saturday.

Lester Ell, of Mason City, came Monday for a few days visit with his brother Ed and family.

Ernest (Stub) Lewis returned from his visit with his brothers at Hayfield, Minn., last Friday.

Wm. H. Trafford was a passenger to Belmond Monday, being called there on business.

Miss Esther Yante, our popular "hello girl" spent the week end visiting friends at Garner.

Chris Gram was a business caller at Mason City last Friday and Saturdy.

Mr. and Mrs. Chris Gram drove to Belmond Saturday afternoon for a visit.

Mrs. Clyde Marshall spent Sunday out in Liberty Township with Mrs. Henry Wade.

Mr. and Mrs. Homer Butcher went to Forest City Friday to attend the funeral of a relative.

Mrs. Will Beier was up from Goodell to visit at the Otto Lemke home Thursday last.

Mr. and Mrs. Elmer Fuller and Mr. and Mrs. Martin Barr autoed to Mason City Saturday afternoon.

Mrs. J. Jorgenson, of Garner, was a visitor at the home of the Editor Saturday between trains.

Attorney "Bill" Ramsay of Garner was a business caller here Saturday.

John Baker and daughter Blanche, were up from Belmond one day last week shopping in Klemme.

Hollis McCulliugh came over from Garner Saturday for a visit with his brother, G. P., the barber.

May Rosendahl went to Belmond Friday to visit her aunt, Mrs. Davenport, for a few days.

The W. F. M. S. held their meeting at the home of Mrs. Chas. Steihl last Thursday afternoon.

Mrs. Henry Lewis went to Clear Lake last Thursday for a visit until Sunday with her sister when Henry drove over after her.

A fine baby girl was born to Dr. and Mrs. Thomas last week Wednesday. They now have two fine girls in the family.

Mr. Henry Krous of Elkport, Iowa, came last week Wednesday for a visit at the homes of Chas. Krous and Mrs. John Schwichtenberg, relatives.

Mrs. Harry Bonwell, of Renwich, Iowa, is visiting at the Dr. R. M. Thomas home the past week and this week.

R. R. Kester, of Garner, was a business caller here last Thursday. Mr. Kester has the Dan Miller sale near Goodell for the 15th.

Albert Schmidt accompanied a shipment of live stock to Chicago Saturday night and returned to Klemme Tuesday morning.

The concrete bases are in for the big Standard Oil Co. tanks and the two large tanks will be rolled into position one of these days now.

John J. Stille shipped out two cars of stock Saturday night, one a load of hogs and the other cattle. John raised every bit of this stuff himself on his farm, which will make the check look pretty good to him. He accompanied the shipment to Chicago and returned Tuesday.

Power and Light
---with The Quiet Knight

The Better Farm Lighting System

WILLYS Light will furnish electric light and power from the battery when the engine is not running- When the engine is running electricity is furnished from the generator direct or from the generator and battery combined. Twenty-four-hour service is assured.

THE engine is air-cooled, burns kerosene, gasolene, gas, distillate or alcohol.

THERE are no belts, no chains, no magneto, no radiator, no geared fan, no water pipes, no switchboard, no exposed terminals, no carburator, no grease cups, no springs, no poppet valves-

WILLYS Light is self-cranking and self-stopping. Has one place to oil, requires no adjustment and can be operated by anyone.

BRIGHT, safe, steady electric light from 63 twenty-watt. sixteen candle power lamps may be used continously; 95 may be used for eight hours and 100 or more for shorter periods of time. One cent will light a lamp for ten hours.

AN electric iron, warming pad, toaster, grill or water heater can be heated by Willys Light electricity. Five cents will heat an iron for two hours and one cent will toast 15 slices of bread.

ONE cent will pump 185 gallons of water, or grind three bushels of feed, or milk 8 cows, or separate 900 pounds of milk, or wash 4 tubs of clothes, or churn 40 pounds of butter, or run a vacuum sweeper for one hour, or run a fan $3\frac{1}{2}$ hours.

The function of the engine is to generate or produce power from fuel. The generator is used to generate electricity from the power of the engine. The battery is used to store up electrical energy and give it back upon demand. The function of the control unit is to connect and disconnect the battery from the generator and to measure the amount of electricity that is stored up in the battery.

PE-RU-NA

A Great Medicine

Mrs. M. J. Riley, R. R. No. 1, Box 101, Calvert, Texas, writes:

"I have used Pe-ru-na and know it is good for colds, coughs and catarrh. It cured my catarrh and I do not take cold when I use Pe-ru-na. It is a great medicine."

During the last fifty years, Pe-ru-na has been looked upon as the reliable medicine for catarrh of every description, whether it be of the nose and throat, stomach, bowels or other organs.

By keeping Pe-ru-na in the house for emergencies, serious sickness may frequently be prevented. Use it after the grip or Spanish Flu.

Sold Everywhere

A Nervous Wreck Following LaGrippe

Kirksville, Mo.:—"I had a severe case of the la grippe and did not get along well afterward; it left me weak and a nervous wreck. I could not do anything. I went on this way for some time, just could not get back my health. I took many medicines but without results. At last I began taking Dr. Pierce's Favorite Prescription and it soon built me up and gave me strength and I felt like a different person. Women who want a good medicine will find it in 'Favorite Prescription.'"—MRS. A. SHAIN, 402 W. Illinois St.

Dr. Pierce's Favorite Prescription contains no alcohol or narcotic, and is sold by all good druggists in both fluid and tablet form. Send ten cents to Dr. Pierce's Invalids' Hotel in Buffalo, N. Y., for a trial package of tablets.

Mrs. Hicks Relieved By Four Eatonics

"I have taken four Eatonic tablets and they relieved me of sour stomach. I recommend it to everybody," says Mrs. G. P. Hicks.

If stomach is not digesting your food; if you have sourness, bloating, food repeating, indigestion or acid stomach, Eatonic will remove the cause by taking up and carrying out the acidity and gases, bringing quick relief and healthy digestion. Why suffer stomach trouble? Why not keep your digestion normal and enjoy good health? An Eatonic taken after each meal will prevent discomfort and pain.

Make the test today and see how quickly this wonderful remedy acts. It comes in handy tablet form. Carry it with you. A big box costs only a trifle with your druggist's guarantee.

Some people seem to be afflicted with selfish generosity.

A Feeling of Security

You naturally feel secure when you know that the medicine you are about to take is absolutely pure and contains no harmful or habit producing drugs.

Such a medicine is Dr. Kilmer's Swamp-Root, kidney, liver and bladder remedy.

The same standard of purity, strength and excellence is maintained in every bottle of Swamp-Root.

It is scientifically compounded from vegetable herbs.

It is not a stimulant and is taken in teaspoonful doses.

It is not recommended for everything.

It is nature's great helper in relieving and overcoming kidney, liver and bladder troubles.

A sworn statement of purity is with every bottle of Dr. Kilmer's Swamp-Root.

If you need a medicine, you should have the best. On sale at all drug stores in bottles of two sizes, medium and large.

However, if you wish first to try this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Adv.

Many good examples are set, but few of them are ever hatched.

Cuticura Soap for the Complexion.

Nothing better than Cuticura Soap daily and Ointment now and then as needed to make the complexion clear, scalp clean and hands soft and white. Add to this the fascinating, fragrant Cuticura Talcum and you have the Cuticura Toilet Trio.—Adv.

Much bad luck is softened by "it might have been worse."

Whenever there is a tendency to constipation, sick-headache or biliousness, take a cup of Garfield Tea. All druggists.—Adv.

Habits are hard to break, so it is best to form good ones.

An Adventure Romance

By George Agnew Chamberlain

Copyright, The Bobbs-Merrill Company

"MY! WHAT A BUMP!"

"You generous, careless, adorable little fool!" he growled. "Why you're the most desirable and precious bundle of lovable charm that robber man ever trembled to hold in sacrilegious arms!"

She stared at him amazed. "Why don't you kiss the way you talk?" she demanded.

Another delightful story by George Agnew Chamberlain. He's the man who wrote "White Man." What more can anyone say? It's romance, comedy and adventure—with just enough real heart throbs thrown in to make the right combination.

PART I.

—1—

Moral Emblems.

Please don't skip this description of Robert Hervey Randolph—six feet straight up and down, broad of shoulder and narrow of hip, sandy-haired, blue-eyed, nose slightly up-ended and wearing a saddle of faint freckles, clean shaven, well groomed, very correctly dressed, and twenty-six years old. Let it be added that his eyes were placed just far enough apart to stamp him forever honest; he had an open and most prepossessing countenance.

At the moment of the start of this rapid yarn, he was standing in the Van Telliers' library, looking down in pained and flushed surprise at Miss Madge Van T., who was sitting in a huge leathern chair half facing the fire in the open grate, one leg very much under her, the other waving a satin-and-silk combination of foot and ankle in distracting accompaniment to her disturbing speech.

"Bobby," said Miss Van T., "you are darned good-looking; you're strong, straight, and a gentleman; there are times when you are wholly adorable, but, nevertheless, I'm not going to the show with you tonight, or to the opera tomorrow, or anywhere any more. There, there, dear boy; you don't have to say anything. You have one of those faces that is absolutely beyond the aid of a vocal organ. It says everything that is in your heart of gold before your brain has time to tinkle a bell."

"Look here, Madge," said the pained Mr. Randolph: "are you making fun of my face or of my brain or of both?"

"My dear," said Miss Van T. quite gravely, "I'm not making fun of you in any way whatsoever. I'm merely telling you how lovable you are, so that you will understand how serious it is when I say that I've decided not to love you any more."

"B-but how can you help it?" stammered Mr. Randolph, his tongue for once saying the same thing as his face at the same time.

Miss Van T.'s breast fluttered as though rising against its mistress to the defense of this disingenuous young man, and she was obliged to swerve her eyes from his and draw a long breath before she answered.

"I can, because I will," she said, her face paling. "Oh, Bobby, can't you wake up? Look round you and come to earth! You are born and bred on Manhattan, yet you've never seen New York."

"I guess you're right," said Bobby thoughtfully. "Look here, Madge: why should I try to see New York, and why should we be talking ash-cans when I've got you to look at in one of the most bewitching and abbreviated bits of dress goods that ever revealed a completely adorable person? Tell me that."

"Well," said Madge, her face hardening, "I will. It's a long story, not in words but in generations. The Van Telliers have lived in East Ninth street since the year one of the island. That is, they used to live here; now they hardly exist. They are merely an assorted lot of animated corpses that crawl out of their tomb periodically to take a strange air, leaning on a rotten stave called the 'Old Order.' Listen to this, Bobby: The new New York is a fever, and I've caught it. I want a rainy-day car, a calling-car, and a touring car; I want dresses that will stab with envy the heart of every woman that looks at them; I want my jewels to run to size and quality, and I want a yacht just for the papers to talk about, because I hate to ride in the smelly things."

Bobby's eyes had grown rounder and wider as the list progressed.

"Do you think you could get along on a hundred thousand a year?" he asked very softly.

"I don't know," she said slowly. "I've been going into the subject rather thoroughly, and a hundred thousand would be running it on a pretty close margin. By the way, just what is your allowance under that crazy will?"

"Ten thousand," said Bobby.

"Well," said Miss Van T., "there you are! Just enough to keep you comfortably in debt, and you want to marry me on it! It wouldn't be quite so out of the question if you knew you were going to have it forever, but you don't. It may be cut off—"

"Any day," said Bobby promptly. "It isn't likely, after all these years, but it may."

"Well, there you are!" Miss Van T. repeated herself. "I'm not altogether a pig, Bobby. Ten thousand with you thrown in is enough to make any woman think three times, but the truth is you have been killed by too little and too much kindness. If you had never gone on as super for a disappearing heiress, you might have amounted to something by now. Instead of making you, that money has buried you."

"You don't know me altogether, Madge," said Bobby. "Do you think I've never thought things out? When I need to make money, I'll do it. The great thing nowadays, it seems to me, is not to have too much."

"Not to have too much!" exclaimed Miss Van T., a puzzled frown on her forehead. "Bobby, do you know that you've said something original? No; I won't put it quite as strong as that, but I will say that you've given birth to an exotic idea.

"But it doesn't alter things as far as I am concerned," she continued, almost without a pause. "In fact, it only simplifies matters. You've signed the warrant. I want loads of money; you're afraid of having too much. So we'd better turn our backs on each other and march."

Mr. Randolph looked at her through narrowed eyes.

"I suppose," he said, "you have picked out the man with a hundred thousand a year?"

"Not finally," said Miss Van T., "though they are not so scarce in this hurly-burly world as your question implies. After all, it isn't the cash I'm keen on, but what it will bring. If necessary, I'll earn my own living."

"Earn your own living!" exclaimed Mr. Randolph. "Will you please tell me how you could earn anything?"

"Well," said Miss Van T., "I've had a couple of offers without even asking. When I tried to jew Simon Simon down on this very frock on the grounds that I was hard up, he said, in the nicest way, that he would take me on at sixty a week any day during the next five years."

"It Would Take Me Years to Learn to Kiss You Again."

"And the other?" asked Mr. Randolph.

"The other," said Miss Van T., dropping her eyes, "was Beacher Tremont. He wasn't quite so nice, but he offered more. He said he was looking for a private secretary, who could name her own price."

"During the next five years—at your own price," repeated Bobby, his mind dazed but nevertheless going straight to the kernel of each proposition. "Madge, do you know what you're saying? Do you know the horrible things you infer?"

She moved one hand impatiently.

"Bobby," she said, "don't get theatrical. I tell you New York is a fever. I've caught it, and I'm not a bit sorry. The choice between being a Van Tellier corpse and a fastish woman is easy. The semi-declassees of New York, if they play for high enough stakes, have a world of their own that is worth moving in. Money is merely an adjunct to it—nothing but the bridge across which clever men come to show themselves off at their untrammeled best."

"Madge," said Bobby, at once frightened and earnest, "you only half know what you're talking about. There is such a world as you speak of—it's the world of insatiably hungry women. It's brilliant and fascinating for a while, but it breathes a poisoned air, and all its roads lead down. Every woman that goes into it with her eyes open has an idea that, with her beauty and her brains, she can buck the tiger and get away with it. She won't look over her shoulder and read the record of an endless losing run on the black."

Miss Van T. smiled.

"I'm already beginning on my reward," she said. "You've never talked so well before in your life."

"It's more than talk," said Bobby, flushing angrily. "And the ways of access that you have imagined!" he continued. "You read happy stories to the public taste of midinettes, showroom girls, and dress-models, and perhaps you think they mirror the life. Why, Madge, the taunts that those girls fling indifferently at virtue and at vice are so vile that they couldn't be repeated even among half-decent men. And the other way, the private door for the private secretary. That's a road of burned bridges. Every man, decent or indecent, feels a queer sinking of the heart when he hears of a woman taking it." He looked at her shrewdly. "And yet you may do it," he said, half to himself. "If you are one of the hungry women, God help you, for they all walk blindfolded."

"They don't walk," said Madge, flushing, and her eyes gleaming strangely. "That's just the point: they rush, whirl, and—"

"And crash," finished Bobby.

"That's the very word," said Madge. "If you'll only keep on the way you've started, I'd love to talk to you all night."

"No chance of that," said Bobby, straight-lipped. "I'm through, and I'm going." He turned toward the door.

"Not without kissing me good-by, Bobby!" cried Madge.

He looked over his shoulder with a polite but impersonal smile.

"I'm not much on kissing strange women," he said lightly. "It would take me years to learn to kiss you again."

He left the room and the house.

With his top-hat pushed back on his head, the ends of his muffler flying loose, his overcoat half unbuttoned, he swung up the deserted lower reaches of the Avenue, punctuating his thoughts with the solid rap of his stick on the pavement. It might be supposed that he was thinking and mourning over the sudden demise of the Miss Van Tellier he had thought he had known for many years, but such was not the case.

Mr. Randolph was not built on mourning lines; at the moment under review, he was thinking about himself and the strange fate that had made him a foster-child of fortune. He proceeded to look back ten years. Just a decade ago he had had his one meeting with the young lady whose disappearance had brought him an unstable affluence. It had taken place on this very avenue and less than forty short blocks away. He had reason to remember the encounter, for it had brought into sudden conjunction a lovely Persian cat, a lovely wire-haired terrier, a lovely child, and himself. The cat had dashed from a proud front door to cross Forty-something street under the nose of a taxi-cab; the dog had flown in yapping pursuit and, in the act, yanked his young mistress off her pins. He, Mr. Randolph, had seized one of her flying feet, hauled her and the terrier back to safety, and no sooner placed her upright and smoothed down her absurdly short skirts than he, she, and especially it, the dog, became the center and circumference of an animated pinwheel.

Her unshaken determination to hold to the leash, whatever happened, brought disaster. The said leash wound three times round her ankles and those of Mr. Randolph, bringing them both down kerplunk and facing each other. "My, what a bump!" she had cried, in startled tones, and then thrown back her curly head and laughed.

It was so that he remembered her—a child of ten or eleven summers and no winters, merry as a sunny day, dark-haired, dark-eyed, pink-cheeked, pampered but unspoiled. She had risen and taken his hand, told him her name, thanked him, ordered a flurried nurse to thank him, shaken her finger at the terrier, and said, "Good-by" and "Come on, Maggie," all while he was still rubbing the seat of his first long trousers.

"Do you—would you trust me?"

(TO BE CONTINUED.)

No Return on Investment.

"Gentlemen," said the speaker, "I can't sit still without saying a word, and so I rise. I will speak what lies close to my heart. Everybody debates the future of the country. Buildings are erected for posterity. Everything that is done, built, planted, is simply for the benefit of posterity. Now what in heaven's name has posterity done for us?"

No Time for Work.

"The trouble with a smart man," said Jud Tunkins, "is that he's liable to spend more time showin' off than he does workin'."—Washington Star.

USE OF HOG-CHOLERA SERUM

Work of County Agent in Alabama Community Results in Material Decrease in Losses.

(Prepared by the United States Department of Agriculture.)

Losses by hog cholera have been materially reduced in Bullock County, Ala., as a result of the work of the county agent in training farmers in various centers throughout the county to use the serum and apparatus developed by the department. Forty-nine cars of hogs, 3,928 head, have been marketed from the county through co-operative work, with an estimated saving of $6,000. In Houston County the department's representatives taught 18 men to vaccinate hogs. Six sets of instruments owned by the D-

Injecting the Serum.

than Rotary club were supplied to the demonstrators and a serum-distributing point was established in charge of a reliable veterinarian. More than 9,000 head of hogs were treated. In many cases it was found that sickness, other than cholera, was due to some incidental cause, such as bad peanut meal, and balanced rations were advised. The county agent's work resulted in 32 farmers establishing pastures to keep their hogs off the open range, the land thus pastured being freed of many noxious weeds by the rooting of the animals, and prepared for future cultivation. Forty-four farmers in the county were interested in stump removing, and about 2,000 acres of land was cleared in this movement. About five tons of dynamite was bought for the purpose, largely on the co-operative plan.

BREEDERS FAVOR PUREBREDS

South Dakota Association Inaugurates Campaign to Discard Scrubs Now in Use.

"You have the bulls and they are needed, needed badly. Let's get them working for the breed."

This appeal, made by M. J. Flanagan, president of the South Dakota Shorthorn Breeders' association, has been sent to all Shorthorn breeders in the state, preparatory to putting on a purebred-sire campaign. According to the plan, selling expenses will be kept down to the lowest possible figure. "But we will put out a lot of bulls," the letter of notification states, "that will do good and create a demand for better cattle. It is constructive work of the best kind."

In a letter to the United States Department of Agriculture, Mr. Flanagan, who also is president of the South Dakota Federation of Livestock Breeders' associations, states: "With the co-operation of the various departments we shall be able to do a good work in getting purebred bulls in us where scrubs are now used."

PUREBRED RAMS HELP SHEEP

Lambs at Six Months of Age Outweigh Dams and Yield More Than Twice as Much Wool.

Native ewes bred to purebred rams at the Mississippi coastal plain experiment station resulted in lambs which at the age of six months outweighed their dams and yielded more than twice as much wool. This result of the use of good purbred sires is announced by the United States Department of Agriculture, through the bureau of animal industry, in a report covering the last fiscal year.

GOOD FEED TO FATTEN HORSE

Linseed or Flaxseed May Be Used to Advantage for Supplementing Animal's Ration.

Linseed of flaxseed is very good feed for supplementing the fattening horse ration. If used with soft feed, it may be boiled to advantage. Otherwise it should be ground and fed in limited quantities up to half a pound after being accustomed to it. Oil-cake meal, which is the by-product without the oil, may be fed up to one pound per day.

PRINCIPAL CAUSES OF ILLS

Pigs Are Too Often Compelled to Work Over and Live Upon Same Soil Too Intensely.

Experience teaches us that the most serious diseases of swine are those of an infectious or contagious character, and the parasites that get onto or into the pig. Now most of this is caused primarily by the fact that the pigs are all too often forced to work over and live upon the same soil too intensely, without any intervening renovation of that soil.

Growing Children Thrive on Baker's Cocoa

Healthy children everything strenuous they play hard, study hard, and need nourishment and a lot of it, not one of the popular beverages meet their requirements so well as good well made cocoa

"And this is the end!"

Something glittered in the hand as he uttered the words. A beautiful girl before him looked into his face and a doubtful look into her eyes.

"The end?" She echoed his words wistfully, standing there in the path of sunlight which caused the glittering thing in the man's hand positively dance with fire. "You are quite sure?"

A smile flickered across the man's face.

"Quite sure! This is the end!"

The fair creature shrugged her shoulders resignedly. "Then—" she breathed, tensely, "I—I will take a piece!" and with a smile she dropped the scissors and parcel to the short length of calico.

UNWILLING TO TAKE CHANCE

Colored Man Evidently Had Little Confidence in His Own Judgment in Important Matter.

A visitor in Kentucky came across that rare specimen, an unmarried colored man.

The negro was a quiet, elderly person, not shiftless, but quite industrious, so the northern man felt curious and determined to find out why he had remained single.

"Uncle Jim, how does it happen that you are so opposed to matrimony?" The old fellow looked up with a grave face, but there was a twinkle in his eye, as he replied: "Me suh! I ain't erposed to matrimony."

"Well, why is it you have never married?" his inquisitor continued. "Haven't you seen anyone you liked?"

"Lawdy! yessah—but you see it's thisaway; I couldn't resk my judgment."

Many Claim Columbus as Native.

Italy, Spain, possibly Portugal, and now Corsica (and therefore France) claim Christopher Columbus as their own. An increasing number of his torians and scholars in Galicia believe that he was a Galician. The origin of the belief was that one of his ships was called La Gallega (the Galician), and sailed from Pontevedra.

A Difference.

"Does yo' still refuse, sah, to pay me dem two dollahs I done loaned yo' de Lawd on'y knows when?"

"Nussah!" dignifiedly replied Brother Bogus. "I doesnt refuse; I dess refrains."—Kansas City Star.

It All Depended.

Mrs. Benham—"What do you think of this 'ship by truck' idea?" Benham—"Is your mother ready to go home?"

RUB OUT SORENESS, SPRAINS, BACKACHE WITH OLD ST. JACOBS OIL

Back hurt you? Can't straighten up without feeling sudden pains, sharp aches and twinges? Now, listen! That's lumbago, sciatica, or maybe from a strain, and you'll get blessed relief the moment you rub your back with soothing, penetrating "St. Jacobs Oil!" Nothing else takes out soreness, lameness and stiffness so quickly. You simply rub it on and out comes the pain. It is perfectly harmless and doesn't burn or discolor the skin.

Limber up! Don't suffer! Get a small trial bottle from any drug store, and after using it just once you'll forget that you ever had backache, lumbago or sciatica, because your back will never hurt or cause any more misery. It never disappoints and has been recommended for 60 years. Stop drugging kidneys! They don't cause backache, because they have no nerves, therefore can not cause pain.—Adv.

WOULD GET RID OF "JUNK"

Writer Protests Against Custom, All Too Common, of Keeping Useless Old Household Goods.

Articles which owe their value to their utility may become unserviceable, but the owners, instead of getting rid of them, find some niche in the home in which to store them, or, worse still, keep the old goods in a place of honor with modern furnishings and make their homes ugly as well as comfortless.

Where families have lived in one house for years, miscellaneous articles of useless furniture will be found lumbering up the place. If the more sensible and practical members of the family ask for their disposal, and comment on their uselessness they get a lecture entitled sentimental value.

The amazing part of the sentimental value plea is the little regard these misers of rubbish place on the tastes and desires of other members of the family. The worshipers of household goods are likely to become exacting, and unhappily these failings increase as they grow older.—San Francisco Chronicle.

Willing to Make Sacrifice.

"Well, daughter, Robert has asked your hand in marriage."

"But, papa, I don't want to leave mother."

"Oh, don't worry about that. Take her along with you."—Boston Transcript.

PAIR OF SCALES MOST ESSENTIAL

Selling Various Farm Products by Guess Is Seldom Profitable to Farmer.

PRACTICE PLEASING TO DEALER

Experienced Buyer Has Advantage of Skill in Estimating Not Possessed by Seller—Small Platform Device Is Best.

(Prepared by the United States Department of Agriculture.)

"Guessed weights and measures" are seldom profitable for the farmer. This practice is unbusinesslike. It indicates a carelessness of the value of the thing he is selling, and the buyer would be more than human if he did not take some advantage. A "guessed bushel" of potatoes is more likely to measure 4½ pecks than 3½.

Where sales are based on weight the grower is paid for what he delivers. When the bar balances at 100 pounds both parties know that full value has been given and received.

An Argument for Scales.

The best argument for the installation of a good set of scales in a convenient place on the farm is that, while the produce dealer is nearly always willing to buy "by guess," he is seldom willing to sell that way. The most conspicuous piece of equipment in the vegetable stall, the market, or the grocery is an accurate pair of scales. The produce that is bought "by guess" is sold by ounces. The dealer is a practical buyer and attains some degree of accuracy in making his estimates. Thus he has the advantage of skill not possessed by the farmer, who lacks experience in making his estimates.

The dealer has another advantage not held by the farmer. As he sells by weight, he has a means of checking the accuracy of his guess. If he finds that the weight of a steer, for instance, was less than he estimated it to be when he purchased it, he may recover his loss by charging the customer more or by taking out the loss on the next "guessed" purchase he makes. The loss is likely to fall not on the dealer, who incurred it, but upon innocent parties.

The bureau of markets, by publishing the prevailing market prices for meat and farm produce, offers free information to the farmer that will

Accurate Weights More Profitable Than "Guessed Weights."

place him on the level with the dealer so far as knowledge of prices is concerned, but unless the farmer has a set of scales available he cannot use this knowledge.

An accurate set of small platform scales should be a part of the farm equipment, and every farm sale should be referred to them. If mounted upon rollers they can be moved from place to place as their services are required. If without rollers, they can be moved in a wheelbarrow. They should be kept in a building that is as free from dust and moisture as possible, and should be tested with standard weights at least once a year. In some states the tests are made by law by an official who makes the adjustment necessary to restore the scale to balance, or, if this cannot be done, condemns the apparatus and seals it so that it cannot be used again until repaired.

Answers Most Purposes.

Such equipment will answer most farm purposes, but a larger set of scales is occasionally required to weigh cattle, hogs, hay, or other materials too heavy or bulky to lift upon the small platform. Very often a merchant whose place of business is centrally located, or a farmer who lives on a main road leading into town finds it a profitable investment to put in a set of pit scales for the use of farmers and others who are bringing bulky material to market. When a farmer knows that he can drive his cattle or his loaded wagon upon the platform of pit scales without going out of his way, he will be less inclined to lump off a barnful of hay or sell his stock by the head. The owner of the scales receives a small fee for his services and the farmer a signed statement of weight which is the basis of payment when he delivers his load at the market or shipping yard.

PUREBRED SIRES ARE INCREASING RAPIDLY

Have Proved Worth for Improving Range Herds.

Scrub Bull Has Been Blacklisted on Big National Forest Pastures—Great Improvement Seen in Grade of Steers.

(Prepared by the United States Department of Agriculture.)

Purebred bulls have proved their value for improving range herds, and the number being bought in the cow country of the West is rapidly increasing each year, according to reports to the United States Department of Agriculture. The scrub bull is now blacklisted on the big national forest pastures.

During the season of 1919 three local live stock associations, the members of which use the ranges of the Sierra National Forest in California, adopted rules for the purchase of purebred bulls. Under a special rule each association was required to place on the range a sufficient number of purebred Hereford, Shorthorn, or Aberdeen-Angus bulls. A committee to

Cattle on Western Forest Range.

purchase and pass upon the credentials of each animal to be turned loose on the ranges was appointed.

Under this plan, during the grazing season of 1920, 105 Herefords, 97 Shorthorns, and six Aberdeen-Angus bulls were purchased by the stockmen through their associations and placed upon the range. It is estimated that at the end of the season of 1920 the stockmen had not less than 200 registered bulls on their ranges, resulting in a great improvement in the grade of steers turned out.

The Forest Service of the United States Department of Agriculture assists these local associations in enforcing the rules which require that the same kind and grade of bulls be placed on the same range. Permits to graze on the national forest pastures are refused those who do not conform to the association's ruling and who have not paid their share toward the purchase of the association bulls.

POOR EGGS INCREASE PRICES

Percentage of Spoiled Product Shipped to Markets Is Very High and Discourages Trade.

In a shipment of three cases, or 90 dozen eggs, recently received by a Washington (D. C.) commission firm, 18¾ dozen were condemned by the local health department as unfit for food. The percentage of bad eggs shipped into the markets is very high, reducing trade and discouraging consumption, say specialists of the bureau of markets of the United States Department of Agriculture.

If a few eggs in the dozen are bad the housewife pays exorbitant prices for the sound ones. The dealer always prefers to handle good eggs, for spoiled ones injure his business reputation. A deduction for spoiled eggs also makes the shipper feel that he is not being treated in good faith by the commission merchant.

Bad eggs then are a loss to everyone who handles them. Every egg marketed should be of unquestionable quality.

SUITABLE FEED FOR HORSES

Timothy Hay, Oats and Corn Are Recommended for Animals Doing Average Work on Farm.

Rations recommended for average horses doing average work are, fifteen pounds of mixed hay, ten pounds oats, four pounds wheat bran. If you would rather feed your timothy hay to the horses and save the clover for cows the following ration might have use on your farm: twelve pounds timothy hay, seven pounds oats, seven pounds corn. These are for one day's feeding.

SECOND CUTTING OF COWPEAS

Under Favorable Circumstances Plant Will Sprout Again After Being Cut for Hay or Seed.

Under favorable conditions cowpeas after being cut for hay will sprout again from the base. Considerable pasturage or even a second crop of hay or seed is sometimes produced, especially in the Gulf coast region, if good moisture conditions follow the first cutting. Ordinarily, however, but a single cutting can be obtained.

MRS. BARRETTE TELLS OF SPLENDID RESULTS

Prominent New Hampshire Woman Says Tanlac Brought About a Wonderful Change in Her Condition.

MRS. AURORE BARRETTE of Manchester, New Hampshire

"Tanlac is a grand medicine, and I think every suffering woman ought to know about it," was the statement made recently by Mrs. Aurore Barrette, at her residence, 133 Second Street, Manchester, New Hampshire. Mrs. Barrette is a well known and highly respected resident of that city.

"I have not felt at all well for the past year or more," she continued. "I haven't been sick enough to be in bed, but I was far from being a well woman. At times I thought I had kidney trouble, for I suffered almost constantly from severe pains across my back, just over the kidneys. Whenever I tried to do any housework at all that dull pain would be there, and if I attempted to stoop over it just felt as though my back would break. I would get so weak and worn out I would have to sit down and rest several times a day, and I felt tired all the time.

"This condition made me awfully nervous, so that I rarely ever slept well at night, and every now and then I would jump in my sleep, as if in a fright, and my condition was really becoming serious.

"Only two bottles of Tanlac have brought about a wonderful change in my condition. In fact, the results I have received from this medicine have really surprised me. Those terrible pains in my back which used to trouble me every day have almost disappeared, and I am going to keep on taking Tanlac until they leave me entirely. I have lots of energy now, and am not only able to do my housework, but I get through the day without feeling the least bit tired. I am no longer nervous like I was, and I sleep well at night.

"I shall always be thankful for what Tanlac has done for me."

Tanlac is sold by leading druggists everywhere.—Adv.

HORSES COUGHING? USE

Spohn's Distemper Compound

to break it up and get them back in condition. Twenty-six years' use has made "Spohn's" indispensable in treating Coughs and Colds, Influenza and Distemper, with their resulting complications, and all diseases of the throat, nose and lungs. Acts marvelously as a preventive, acts equally well as a cure. 60 cents and $1.15 per bottle at drug stores.

SPOHN MEDICAL COMPANY. Goshen, Ind.

Will Rheumatism Again Bind You Hand and Foot?

If you had Rheumatism last year and treated only the pains of the disease by rubbing with liniments and lotions, you can be sure that soon again you will be in the shackles of this relentless foe. You may get some slight temporary relief from the pains of the disease by the use of these local remedies, but Rheumatism is too real and relentless a disease to be rubbed away.

So many cases of Rheumatism come from a tiny germ in the blood, that you should try a remedy that has proven so thoroughly satisfactory in these cases. S.S.S., the fine old blood remedy cleanses the blood of all impurities, and removes all disease germs that may creep into the blood. Begin taking S.S.S. today, and if you will write a complete history of your case, our medical director will give you expert advice, without charge. Address Chief Medical Adviser, 157 Swift Laboratory, Atlanta, Ga.

LE MOUSQUETAIRE

By ARISTA E. FISHER.

(©, 1920, by McClure Newspaper Syndicate.)

It was very evident that the three people who had just entered the corridor of the Stafford hotel were not of the ordinary wealthy class usually seen there. The only thing which distinguished them from the frequenters of that most fashionable of Chicago's fashionable hotels was that they appeared to be just a little more fashionable and just a little more richly dressed. "An unusually pretty girl, with her father and mother," would have been the thought of a casual observer.

Casual observers were scarce in that hotel corridor, however. There was a tall figure in a gray uniform standing near the door, presumably an attendant. The girl's father handed the light wraps of the ladies to the man in uniform and the three passed into the reception room.

He who was "presumably an attendant" murmured a surprised "Thank you" to the man just disappearing through the door, and then regarded the armful of wraps with a delighted smile. Curious actions on the part of an attendant! But if the gentleman who had so trustingly donated two expensive wraps to a presumable attendant had been a trifle less nearsighted, or his companions a trifle more observant, a medal of the Legion of Honor which the attendant wore might have established the identity of his calling a little differently. Further investigation would have proved him to be a colonel in the French army and of a very pleasing appearance. This colonel, after entertaining himself with many broad grins, observed to the large marble clock over the door:

"Jean, my son, you have an adventure! My boy, you will guard these pretty things very carefully, and when the generous Americans return, perhaps, if you are very polite, you will receive a tip." And a smile being insufficient, the young Frenchman gave vent to a hearty laugh. He stopped suddenly and muttered to himself:

"That girl was very much like I wonder!"

He was turning the gentleman's hat in his hand, and his eyes, chancing to light upon the name of the owner printed on the band, he uttered an exclamation.

The real attendant appeared a moment later. He was made acquainted with the situation, which delighted him as much as it had his companion.

"I was called to the office for a few minutes," explained that grinning official. "We've had no guests for the last hour and I thought I could risk a moment or two."

"Merci, mon ami," responded the young Frenchman. "You have done me a great service!"

For the next half-hour he lounged about the corridor.

When Eleanor Howard and her parents entered the corridor preparatory to leaving, they were assisted in putting on their wraps by the same person who had taken them from Mr. Howard. Then they left the hotel, entered their car, and returned home.

The next day, when Eleanor was searching for a slip of paper she had mislaid, she discovered a card in one of the pockets of her wrap, on one side of which was printed:

"M. le Colonel Jean Reillard, Rue Nationale, Paris, at present the Stafford hotel."

On the other, written in pencil:

"I thank you for trusting me with your valuable property," and in very fine writing:

"Do you remember a certain colonel who used to sing 'Le Mousquetaire'?"

Eleanor, at first dumfounded, then struck with the humor of the situation, laughed hysterically. Then she grew thoughtful, and drawing some paper toward her she wrote:

"I assure you there is no one more worthy of our trust. The singer of 'La Mousquetaire' is not forgotten."

She addressed it to Col. Jean Reillard, the Stafford hotel, and mailed it thoughtfully.

That afternoon Colonel Reillard entertained Miss Eleanor Howard with stories of bravery, of death, of courageous men's deeds in the great war. But the one that interested them both the most was something like this:

"Mademoiselle, don't you remember the French officer that was nursed back to health by one whose image has lived in his memory ever since, whose memory has never left his heart? Do you not recall how that officer used to refuse to be attended by anyone but yourself, and that when you did come, with your soft voice, to dull his sufferings, do you remember that he used to tell you how beautiful were your eyes? This officer has carried a great love for you in his heart from that time. He came to America a week ago, to seek you out and ask you to become his wife. Will you not tell him that he does not hope in vain?"

The story ended there, one reason being that the story teller had an extremely sympathetic listener who had just answered a very small word and the other being that when a beautiful girl has said that very small word to a handsome young man there are things much more interesting than stories.

Public Utilities and the public

Elements of Cost

We are going on the theory that the public we serve is just as anxious that we get a fair profit on our production as we are ourselves. Without a fair profit it would be imposible to render the public an efficient service, and it is hardly necessary to say that we could not remain long in business without it. It is therefore to our mutual interest that the public utilities business should be fairly profitable, and only fairly profitable.

It is not hard to arrive at what will be a fair price of any commodity if the cost of everything that enters into it is known. The elements of cost of the commodity that a public utility produces are so numerous, and often so little understood by the general public, that it not frequently happens that very wrong conclusion are arrived at with reference to what cost really are. Owners of public utilities themselves are often mistaken in this respect. We can therefore hardly blame the public if they sometimes charge utilities with sins of which they are entirely innocent. If the people know the facts, it is our experience they are usually fair.

To arrive at the cost of the product of any utilities, it is not only necessary to take into consideration the physical cost of the plant and the cost of its operation and a provision for replacement when the plant is worn out, but every cent that the owners of the utilities found it necessary to pay out in order to get the plant in shape to serve the public must be taken into consideratiou. To get at the facts, one must start at the very beginning--take the community before anything has been done to supply it with the product of the utilities company--and then count every dollar that the company pays out in order to put its product on the market as a part of the cost of that product. The dollar paid out by the company to make a servey, to hire a man to work up the business in order to have enough of it so the project will pay, or to advertise for business, is just as much a part of the cost of the product as the dollar paid for coal, or the dollar that is paid the stoker for heaving the coal under the boiler We would have the people visualize their community before it had a pudlic utility, and then proceed with us step by step till they are served when they will have a good working knowledge of the cost.

Next week we shall name and discuss some of the the elements of cost.

Iowa Falls Electric Company

(A. Huntington, Engineer, Dept. of Public Relations.)

Make a Note of This---

Our $40.00 suits are having a constantly increasing sale.

Men who have been paying more find these $40.00 suits come up to their requirements in style, fabric, tailoring and fit.

And those who have been looking at lower priced suits find it's wise to pay a few dollars more for this outfit.

This week we are making a special showing in our window and store of these desirable garments.

News Reported By The K. H. School

(Reported by Earl E. Josten)

CHRONICLED SCHOOL EVENTS. K. H. S. NEWS

The recent rainy weather has put a top to the regular base ball practice. We are anxious to get on the diamond again.

Berdice Schwichtenberg and Miss McKahan returned to school Wednesday after prolonged absences. They were heartily welcomed by the whole K. H. S.

Did any of you notice the error in one of the items in this column last week? It referred to Edwin Bock and an apology is due him. However, the appearance of that exra line surprised the writer more than anyone else.

Mildred Johnson, Arthur Johnson, Charles Gibbs and Donald Stille were absent for brief periods recently. Marie Blank has also been absent a great deal lately. The attendance has not been as good as it was some weeks ago. Let's try to improve the record.

Last week the winners of the high averages in the Sophomore class for the past six weeks period were announced. To complete the report, the three winners in each of the other classes will be given. In the Freshman class, the highest honors fell to the following, in the order they are named: Fred Schlichting, Clarence Geier, Bertha Johnson. In the Senior class: Earl Josten, Fred Arnold, and Charles Gibbs. Fred Schlichting received the highest honors in high school, his average being 96 and a fraction. Tere will be a good deal of competition for highest place during the present period, so watch for results.

Miss McKahan is now conducting rehearsals of the Sophomore class play, and a great deal of progress seems to be the result. She is also coaching the contestants who will declaim for you before very long.

Grammar Room Items Of Interest

Janette Smid was absent from school Monday.

"Buddy" Trafford visited school with Helen Maitland last Thursday.

The eighth grade has planted corn, alfa, sweet clover, alsyke clover and timothy as experiments in connection with the regular agricultural course. They are all doing nicely.

The eighth grade and tenth grade enjoyed an agricultural experiment given by Prof. Wilson. He showed the pupils how to make a rag-doll seed germ tester. It was a very interesting experiment.

Noe: We are sorry to report that the above mentioned "experiment" terminated in ignominious failure. During the last week-end, the tester was sadly neglected and the corn became too dry to continue to sprout. The unfortunate rag doll will probably be interred with all due ceremonies.)

ELECTION NOTICE

NOTICE IS HEREBY GIVEN That there will be an Election of the Qualified Voters of the Town of Klemme, Iowa, at the Town Hall on the 28th day of March, 1921.

At this time a Mayr, Five Councilmen, a Treasurer and an Assessor will be elected. Polls will open at 8:00 o'clock A. M. and will close at 7:00 P. M.

FRANK GRUETZMACHER,
(1fc) Mayor

NOTICE TO NEWS WRITERS

This is a very busy time of the year at the Times Office and in order to handle all the news we must insist that the items be sent in so that they will be in the office here not later than four o'clock on Tuesday to insure publication in the week's issue. We must just a time limit on all items in order to get the paper out on time during the rush. We thank you. Editor.

Avery Township News

A kitchen shower was given Mr. and Mrs. Garland Hoffman last Tuesday night at the home of Mr. and Mrs. R. F. Hoffman. They received many nice and useful gifts. About a hundred and twenty were present.

Mrs. Don Turner of Dows, visited at the home of her parents, Mr. and Mrs. Burt Dutton, the past week.

Wm. Bell and son shelled corn for U. G. Smid last Friday.

Miss Dena Grieman of Garner, visited at the home of G. A. Goll a few days last week.

A party was held at the home of Wm. Bell last Friday night. All present report a good time. About forty were present.

Mr. and Mrs. Augus Trampel and Henry Helps, were business callers at Garner last Wednesday and Thursday

Fred Bell was a Garner caller last Wednesday.

Mr. and Mrs. Will Johnson and daughter Clarice, and Mr. and Mrs. Sylvan Johnson were Sunday visitors at the H. Hobart home at Goodell.

Wava Bachman was a visitor at the Avery Dist. No. 2 school Saturday, March 12th.

Russell Bell was absent from school Friday, March 11th.

Mr. and Mrs. Fred Bachman and children visited at the home of D. A. Marshal, Sunday.

Effie Johnson, who is attending school in Belmond, was here to attend the kitchen shower given Mr. and Mrs. Garland Hoffman. Ruth Miner came up from Belmond with her.

Liberty Township News

Arthur Wade returned home after spending a couple of weeks in North Dakota. He says that some of the country here is as good as Iowa.

Otto Pringlitz and son Fred left for Colfax, Iowa, last Friday where the latter will stay to take treatments as he has been bothered with rheumatism.

"Cap" Panoff has joined the "Tin Lizzie Squadron" having purchased a new Ford. The girls need not stand back on his account.

Mrs. Herman Paul has been on the sick list the past week.

A League social was given at the Liberty Twp. church Tuesday evening

Carl Beier of Klemme spent his usual over Sunday visit at the home of his parents. No doubt Carl likes to put his feet under dad's table occasionally.

Many of the young people of this community met at the home of Herman Bridges last Friday evening for a good time, which most of them to their own minds had beyond a doubt.

The Churches

FIRST METHODIST EPISCOPAL CHURCH

Epworth League Sunday evening at 7:30.

Preaching service at 8 o'clcok.

Liberty Twp. Sunday School meets at 10:15.

Preaching service in the morning at 11:30.

Epworth League Sunday night at 7:30.

Midweek prayer service each Thursday night at 7:30.

A. H. Meyer, Pastor

Goodell News

Leona Sorenson of Buffalo Center, wasa visitor at the L. H. Wilson home last week.

Miss Quinn spent the week end with her parents at Britt.

Mrs. Ed Hughes was a Klemme caller one day last week.

Don't fail to attend the St. Patrick's supper and dance given March 17th.

Adrian Bielefeld was seriously injured when kicked by a horse last Friday.

Mr. and Mrs. Hemingway returned to their home in Mason City Saturday after a weeks visit with relatives near Goodell.

Hugo Neff spen a week visiting at the homes of Jay Griggs, J. J. Cook and W. L. Sherwood.

The pupils of the high school are planning on giving a program and box supper March 23rd.

Mrs. Minterz is visiting at the home of her daughter, Mrs. Andrew Nelson near Goodell.

Presley Griggs is working for his brother-in-law Walter Neuberger at Ventura.

SCHOOL ELECTION PANNED OUT BIG

Last year the school election brot out eight voters and one of the ballots was spoiled. This year there were only two names on the ticket for two directors. It look like a quiet election but at the "eleventh hour" things took a turn. A. D. Gimer and R. W. Elder were the two names on the ticket, and both excellent men for school directors. But to make the election snappy someone would have to be the "goat" and run against them. It fell to the lot of A. G. Koerner and Ye Editor to furnish the amusement—and competition—we did. At any rate the "black horse" stirred out the voers and there were 168 ballots cast. The smoke of battle cleared away with Gimer and Elder rather far in the lead and so we hale them as our new directors and wish them a lot of good luck and hope they make things hum on the school board.

COUNCILMEN—HERE'S A TIP

There are a few ordinances needed in Klemme, some more than others, but here is one in particular which we call your attention to. We believe you should pass an ordinance prohibiting roller skating on the side walks in the business section of the town. Likewise baseball playing on Main Street should be prohibited and for the following reasons. Just the other day a large plate glass window was broken in one of the store fronts and it is thought that someone skated against it. This is an expensive accident and the merchant is the one who will undoubtedly foot the bill unless the person is known who broke it. Last summer a large plate glass was cracked and practically ruined by a baseball bouncing against it. Why not pass an ordinance against these unnecessary amusements and protect the business houses from further loss? There are plenty of side walks off Main Street for roller skating and plenty of room on side streets or vacant lots to "play catch." Not only pass the ordinance bu see to it that it is obeyed. Yours truly, "DAD KLEMME."

DRAY LINE CHANGES HANDS

The other day Sam Harvey sold out his dray line business to Clark Bredbenner and that gentleman took charge of affairs Monday with Geo. Hoppe as man on the wagon. Clark has a hankering for dray lines and just can't keep out of the business, however we dont' kick for he always delivers the goods. Sam was a good drayman and enjoyed a good trade while in the business. He is at present counting railroad spikes with Tom Blank's crew on the railroad.

MARRIAGES

NEWBERGER-HOFFMAN

Married Tuesday, March 8th

A quiet wedding occured at the Methodist parsonage in Klemme on Tuesday evening, March 8th, when Miss Lula Newberger, daughter of Mr. and Mrs. Lewis Newberger, became the bride of Mr. Garland Hoffman. Rev. Buriff officiated. They were attended by Claude Hoffman, a brother of the groom.

Both of these young people are very popular with their many young Klemme friends. The bride is a graduate of the Klemme schools and later finished her course at the Garner High School. She has been teaching since and has been very successful in her work. The groom is son of Mr. and Mrs. R. F. Hoffman of this vicinity and is a young man of high ambition and industrious. He has been following the business of farming.

They will go to housekeeping on a farm near here.

The Times joins with the many friends of the happy couple in wishing them a happy and prosperous marrier life.

The following clipping is from the Clear Lake Reporter and will be of unusual interest to Klemme friends of the couple:

HOLMES-NEUBERGER

Married At Mason City Saturday—Will Live at Klemme, Iowa

A very pretty wedding took place at the Methodist parsonage in Mason City, Saturday, March 5th, when Christena Caroline Holmes, daughter fo Mr. and Mrs. Robert Holmes of Clear Lake, became the bride of Mr. Clarence Frederick Neuberger of Klemme, Rev. Wilkinson officiating.

The young couple was accompanied by Mr. Arno Tietgen of Mason City and the bride's sister, Miss Mary Holmes.

The bride wore a dress of white Chiffon, with a veil to match and she carried a beautiful bouquet of American roses. The groom wore a suit of blue serge.

The bride is a graduate of the Clear Lake High School and has proven an efficient teacher the past three years. The groom is a graduate of Hamilton's University of Commerce at Mason City and is a young man of sterling qualities.

A bountious 5 o'clock dinner was served at the home of the bride's brother. Only their closest relatives being present.

The young couple will make their home on a farm east of Klemme. Their many friends extend the best wishes to this young couple and Mr. Neuberger's friends are still congratulatng him on the excellence of his choice.

WRESTLERS TO GO TO THE MAT AT GARNER

The American Legion Post at Garner have requested us to announce that on the evening of April 1st they will stage two big wrestling bouts at the opera house at Garner. The preliminary match will be between our friends Ben Greiman and Wm. Ziesemer of Garner. This event alone should draw a crowd of enthusiasts from here who would like to see Ben in action and show the Garner man where t get off at. The other big event fills the sport page of the dailies and will be a match between Paracut and Schober. A number from here have seen Schober in action and will be anxious to see him on the mat again with the fast Parcaut. Don't forget the date is Friday, April 1st.

TOWN ELECTION

Don't forget that the town election will be held on Monday, March 28th. This promises to be SOME election and a real old fashioned election. We advise you not to bet more than a hundred (cents) on anybody because it looks like a riddle as to who will be on top when the ballots are counted. Ladies, come out and vote like you did at the school election.

WANTED—Men to sell our Silos and Corn Cribs. Farmers Sales Co., Clear Lake, Iowa. 3vp

HANCOCK COUNTY FARMERS TO DONATE CORN TO EUROPEAN RELIEF

The dates of March 25th and 26th have been set for the farmers of Hancock county to donate corn for the relief of the starving children of Europe. The plans of the campaign have been finally perfected and put under the direct supervision of the American Farm Bureau Federation. The corn will be sent to the nearest mills and will be made into products of all kinds to be sent to Europe. The farmers are sure that their donations will go where they should and go as farm products, and not be turned into money to buy something that has no connection with he farm.

Mr. Knadler of Garner is acting as Chairman of this county, and he will appoint a committee-man to be at each town to handle the corn as it comes in on the above stated dates.

It is hoped that every farmer will help his work along, and give what corn he feels that he can as it is going for a good cause, and he can feel assured that it will be corn products that are going to Europe. Any amount of corn will be accepted and appreciated from a bushell up.

KLEMME ODD FELLOW LODGE MAKES RAPID STRIDES IN WAY OF MEMBERSHIP

The local lodge of Odd Fellows are more than making their organization hum along this winter. They can now boast of about fifty members and still have a list of new members to take in. Monday night they gave a large class of men the Initiatory Degree. Those who took the work were C. G. Waterman, W. F. Missman, Wm. J. Bell, A. D Gimer, R. W. Elder Walter Johnson, Sam Harvey, Levi Klotzbach and J. E. Baumgartner. After the ceremonies were over the order enjoyed a fine feed. The Odd Fellows are making a big drive for new members and they have a lively bunch back of the movement who say they will have a hundred members before long.

HAS ANY ONE

Died?
Eloped?
Divorced?
Left town?
Embezzled?
Had a fire?
Had a baby?
Had a party?
Sold a farm?
Been arrested?
Come to town?
Had twins or colic?
Fallen into a well?
Fallen into a legacy?
Fallen from an aeroplane?
Sold a cow or lost an auto?
Committed suicide—or murder?
Stolen a dog—or his friend's Ford?

Well, then—

THAT'S NEWS!

Phone 12 or bring it to the Times

Watch for the "Klemme Koon Komedians". They will appear in Klemme soon. This will be the biggest fun show ever seen in this town. Watch for dates.

STOCK SHIPMENTS CONTINUE LIVELY

Stock shipments from Klemme continue to break all records. Saturday night a total of eighteen cars left Klemme for the Chicago market. Fourteen cars were cattle and four cars were hogs. The same night there were two cars shipped from Garner and one from Goodell. Klemme still holds a big lead over all neighboring towns in live stock shipments.

The band boys tell us that they have secured a band director who will take charge of the band beginning April first. The band boys have made rapid strides of late under the direction of Mr. Anderson who has volunteered to direct them until they could get a leader.

ST. PATRICK'S BANQUET AT GOODELL TONIGHT

Tonight will be a big night in Goodell. This being St. Patrick's Day they will celebrate the event by putting on a big banquet and the proceeds will be used towards buying furniture and fixtures for the proposed new church to replace the one which was recently destroyed by fire. A number of the business men of Klemme received invitations to attend and will help our neighbors celebrate.

BIG MINSTREL SHOW FRIDAY NIGHT, THIS WEEK

The Klemme Koon Komedians

That Big Fun Show you have all been looking for, the Klemme Koon Komedians will be at the Idle Hour Theatre tomorrow night, Friday, March 18th. This si a benefit show for the Fire Co. See the big ad elsewhere in the Times.

WOE TURNED TO REJOICING

Lucky Man Feared He Had Lost Papers Which Meant So Much to His Happiness.

The man was walking along the street jauntily. He had not a care in the world.

Suddenly he put his hand to his heart, as a dire thought entered his brain. Those papers!

He stopped walking and quickly searched his vest pocket. Then he looked in his two lower pockets.

They weren't there.

Frantically he fumbled in his trousers pockets. Nothing doing.

Then he rushed through his coat pockets. Not there.

Great heavens! The papers! What did he do with those papers?

"Oh, what shall I do—what shall I do?" he muttered incoherently.

The clock in the steeple struck 12.

Hurriedly he retraced his steps back to the restaurant, two blocks away. It was closed.

Like a maniac, he searched every corner of the street—everywhere. But nowhere was the valuable little packet to be seen.

Nervously, he searched his pockets again. The papers—the papers! He must have them—at once—now!

He looked in his shoe tops.

Nope; they weren't there.

And then—he put two fingers in his watch pocket. Oh, joy! There they were. At last he was saved!

Opening up the little pack, he pulled out a tissue paper, and the happy, lucky man rolled a cigarette with joy in his eye and a dance in his feet.—Detroit Free Press.

Wanted a Little Too Much.

Mary was the only girl and took an active part in all the rough games of her brothers. The fact that she was a girl was a handicap which often spoiled her fun. One evening Aunt Tillie was amusing Mary's mother by telling fortunes from cards. Mary showed such keen interest that Aunt Tillie asked her to make a wish while she cut cards for her. Of course, the right card came up and the wish had to become true. But Mary would not believe.

"Now, please, dearie, won't you tell us what you wished for?" her aunt asked.

After some hesitation Mary replied: "I wished I was a boy."

At the Jungle Hop.

Mrs. Chimp (excitedly)—Did you hear about George Giraffe? Got a knot in his neck!

Mrs. Rhino (a late comer)—Gracious! How did it happen?

Mrs. Chimp—He was dancing with Heloise Hippo and tried to pull some cheek to cheek stuff!—Buffalo Express.

Always Growing.

Interest is the only thing that grows and flourishes all the year round without attention. Thrift and intelligence are guaranteed to destroy the pest.

From Seed to Seed in Eight Days.

Cress is one of the quickest growing of plants. Under perfect conditions it has been known to flower and seed within eight days of planting.

Jud Tunkins.

Jud Tunkins says the only objection he has to jazz dancing is that it's liable to spoil a man's technique for following a plow.

Gift of Historic Textbooks.

The Holland Holton collection of textbooks, numbering more than 1,000 volumes, has been given to Trinity college in North Carolina, on behalf of the grandchildren of Martin Rowan Chaffin, who taught school in Davie and Yadkin counties, North Carolina, beginning in 1850. Fifty of the volumes were used in the schools of the state from 1820 to the Civil war. The Holton collection, is intended primarily for the use of the department of education at Trinity college, but the books will be readily accessible to the public and private school teachers of Durham and Durham county.

New Seeds Being Tested.

Seeds of a number of unusual plants have been recently received at the quarantine station of the United States Department of Agriculture, Washington, from J. F. Rock, one of the department's explorers in Siam. Among these are a black-kerneled rice which is said to be extensively eaten by the natives of Siam, and another is a brown-tinted cotton, not hitherto known in this country. The seeds will be propagated in the plant-detention station to guard against spreading any lurking plant disease which may have clung to them, and the second-generation seed will be tested out in various parts of the United States.

WHY DRUGGISTS RECOMMEND SWAMP-ROOT

For many years druggists have watched with much interest the remarkable record maintained by Dr. Kilmer's Swamp-Root, the great kidney, liver and bladder medicine.

It is a physician's prescription.

Swamp-Root is a strengthening medicine. It helps the kidneys, liver and bladder do the work nature intended they should do.

Swamp-Root has stood the test of years. It is sold by all druggists on its merit and it should help you. No other kidney medicine has so many friends.

Be sure to get Swamp-Root and start treatment at once.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Adv.

Sympathy's Cheaper.

"It's all right to sympathize with the under dog in a fight," remarked the Observer of Events and Things, "but a fellow would be a fool to bet on him."

When to Use It.

Knicker—What is the secret of wealth?

Bocker—Save something for a brainy day.—New York Sun.

HEAD STUFFED FROM CATARRH OR A COLD

Says Cream Applied in Nostrils Opens Air Passages Right Up.

Instant relief—no waiting. Your clogged nostrils open right up; the air passages of your head clear and you can breathe freely. No more hawking, snuffling, blowing, headache, dryness. No struggling for breath at night; your cold or catarrh disappears.

Get a small bottle of Ely's Cream Balm from your druggist now. Apply a little of this fragrant, antiseptic, healing cream in your nostrils. It penetrates through every air passage of the head, soothes the inflamed or swollen mucous membrane and relief comes instantly.

It's just fine. Don't stay stuffed-up with a cold or nasty catarrh.—Adv.

Their High Ideals.

Don't jeer at the imaginings of young people. When they dream of what they would like to be and do, they have a vision of what they may be and do.

Frequent Result.

"What was the outcome of your quarrel with the boss?"

"A stopping of my income."

Freshen a Heavy Skin

With the antiseptic, fascinating Cuticura Talcum Powder, an exquisitely scented convenient, economical face, skin, baby and dusting powder and perfume. Renders other perfumes superfluous. One of the Cuticura Toilet Trio (Soap, Ointment, Talcum).—Adv.

Not Entirely Lost.

Flatbush—When your wife loses her temper, where does it go?

Bensonhurst—Oh, I usually get it.

There is no excuse for the dyspeptic with Garfield Tea accessible at every drug store. —Adv.

The girl who can't afford a riding habit should get into the habit of walking.

TAXI

An Adventure Romance

By

GEORGE AGNEW CHAMBERLAIN

COPYRIGHT THE BOBBS-MERRILL COMPANY

ANIMATED SLIME.

Synopsis.—Robert Hervey Randolph, young New York man-about-town, leaves the home of his sweetheart, Madge Van Tellier, chagrined because of her refusal of his proposal of marriage. His income, $10,000 a year, which he must surrender if a certain Miss Imogen Pamela Thornton (whom he has seen only as a small girl ten years before) is found, is not considered by the girl of his heart adequate to modern needs. "I'm through and I'm going," said Bobby. Madge suggested a farewell kiss. Nothing doing. Bobby didn't approve of her views of life and told her so.

PART I—Continued.

—2—

On that day she had been Miss Imogene Pamela Thornton, petted darling of the gods and Mr. Brewster Thornton, banker and widower; two months later had come Thornton's financial smash and, immediately afterward, his spiritual, moral and bodily collapse. Everything that had made for life in him having been swept away, he died as a matter of course, and was buried. For sole inheritance, little Genie Thornton found herself possessor and possessed of one Maggie O'Rourke, a nurse of long standing, of earnest and faithful face, and a monster heart imprisoned in a pitifully thin chest.

It had taken Genie's great-uncle, Asa Thornton, six more months to forget a quarrel of sixteen years' standing with his nephew, and by that time child and nurse had been seeped into that lower world which can't afford morning and afternoon editions and is too busy praying for daily bread to look for a rain of manna in the daily press.

In short, Maggie and her charge, traced down the ladder of reputable, disreputable and impossible lodgings, had slipped ultimately from sight and the ken of people with addresses, and, as a result, Mr. Robert Hervey Randolph, whose relationship to Mr. Asa Thornton is of no import whatever to this tale of cause and effect, came into ten thousand a year and a string—the string being the possible reappearance of Miss Imogene Pamela.

"Bob," had said old Asa, on the verge of a tardy demise, "I'm not introducing you to a war between conscience and self-interest. There's no silly story-book jest about my money; you are under no obligation to look for Imogene or to shout if you step on her by any twist of chance. My lawyers have all the instructions necessary along those lines; they are to make every reasonable effort, and if they succeed, why, you're man enough to look out for yourself. It—it isn't going to make a devil of a lot of difference to me where the cash goes so long as I die with—die with the credit."

With that last sentence, his mind had stumbled and wandered off to memories of his nephew Brewster. Looking back from the vantage of twenty-six years, Randolph caught, for the first time, the full import of Asa Thornton's farewell words to him and to life: "Die with the credit." They held the kernel of the old man's carefully measured amend.

"Great old top!" murmured Mr. Randolph aloud, and half unconsciously turned to the left at Forty-second street. Five minutes later he was caught in the maelstrom of the Thanksgiving crowd milling around Times square.

Presently he found himself on the edge of a human sea, banked up to give passage to a honking empty taxicab. Here was another question for a suddenly inquiring mind. Where did taxi-cabs, empty ones, go to in such a hurry? The door of this one was swinging open, and the proof of how intent the crowd was on its myriad individual goals is evidenced by the fact that a dozen voices did not inform the driver that the season was off for fans on wheels.

The cab was moving more slowly than Mr. Randolph's subconscious mind, which led him to step into it and quietly close the inviting door. Upon seating himself, he tried to analyze the impulse that had lifted him from the curb. He decided that it was not so much the curiosity as to the destination of empty cabs as a natural and ancient dislike for being pushed and elbowed by people.

It was not long before the cab, unwittingly loaded for bear, drew up with a final honk at the stage-door of the Crocodile. Immediately came a rasping voice that was vaguely familiar to Mr. Randolph.

"Well," it said, "you sure took your own time getting here." The driver, expert in aggravating repartee without words, pressed the bulb of his atrocious horn three times. "Cut it out!" said the rasping voice. "There isn't any hurry now."

It was incredible, reasoned Mr. Randolph with himself, that anyone should forget that voice once heard, and he was right. He remembered it. It was the voice of Mr. Duke Beamer, whom he had had the distinct pleasure of blackballing for one club in college and three in town. Mr. Beamer, to his honest mind, was the best living example of animated slime in tailor-made clothes.

Mr. B. was not alone; Mr. Randolph could just see his companion through the slant of the half-raised window-glass, and even that distorted glimpse was very close to a vision. The girl was young, beautiful, and troubled. Her cheeks were thin and pale, her parted lips aquiver; her chin was atremble. Of course she was very cheaply but neatly clothed.

"Make up your mind," said the rasping voice. "Ride with me or walk the streets by yourself, and don't forget that there's no job behind you. You've said good-by to that door for good."

The girl's wan face went through that contortion which says, "I won't cry," and doesn't, thereby achieving a pity beyond the meed of tears. The quivering of her lips, the trembling of her chin grew more pronounced—only to steady down as she swept up stricken and imploring eyes to the face of the unseen man.

"Oh, Duke," she begged, "promise—promise you'll be always good to me."

"Of course, little one," said the rasping voice, promptly and much relieved, promising lightly to pay on demand, in full for a soul delivered in advance. "You'll never regret it, believe me."

The girl tore her doubting eyes from his face and stepped toward the cab. Mr. Randolph made himself exceeding small in the corner nearest the curb. An unseen agent opened the door; the girl slipped in and turned to seat herself; her escort made to follow. Then did Mr. Randolph suddenly lean forward and proceed to push in the

"My, What a Bump!"

face of Mr. Beamer with his open hand and the full weight of his shoulder. That astonished scion of a once gentlemanly house reeled backward and sat down on the pavement kerplunk.

"My, what a bump!" spoke a keen young voice over Mr. Randolph's shoulder, but he was too occupied to take note of it at the time. He leaned far out so that the driver could get the full effect of his modish top-hat and spoke cryptic words.

"Ten dollars' worth of the park," is what he said.

The driver welcomed the sudden apparition with a friendly grin, honked defiantly three times, and threw in the clutch. They were off, and trailing after them came such a string of blasphemous utterances as made Mr. Randolph wince.

The girl was laughing. No longer did her eyes search for a gleam they thought they had lost forever. It was there within them, come back to rollick in her pupils and spill itself in reckless spending.

"Oh! Oh! What a bump!" she gasped.

"Funny, wasn't it?" said Mr. Randolph weakly.

"Awfully," said the girl.

Thereupon fell a long silence. The cab cut across the traffic, reached the Avenue, and eventually the dark park before Mr. Randolph found anything further to say.

"Funny, wasn't it?" he remarked.

The girl cast him a startled look.

"Why," she gurgled, "that's what you said before."

"So I did," said Mr. Randolph, frowning thoughtfully. "So I did. By the way, what's your name?"

The girl caught her breath and swallowed her laughter.

"Vivienne Vivierre," she said, after a pause.

"How awful!" commented Mr. Randolph. "One of those deliberate alliterations that go with the back row of the chorus."

"Front row," Vivienne defended promptly, but unsmiling. Her lips twitched down at the corners. "At least, it was front row."

"I know," said Mr. Randolph. "You've been fired. I heard what Beamer said to you. How long have you known that snake?"

"Not very long," she answered. "He got me on, and I suppose he got me off." She drew a long breath and turned appealing eyes to Randolph. "Please," she said, "don't let's talk about him. I want so to be happy for a few minutes. I love the park at night with its border of lights. Let's play a game."

"'A game?'" said Randolph doubtfully.

"Yes. We'll guess which is Central Park West and which is One Hundred and Tenth street and which is the avenue. It is not as easy as you think after you've been going round a while. I'm feeling d-dizzy a-already."

"You are!" exclaimed Mr. Randolph. "Well, let me tell you it isn't from buzzing round a two-mile circuit. What did you have for dinner?"

Miss Vivienne shut her lips tight.

"Won't you please play my game?" she asked faintly.

Mr. Randolph frowned as though considering the subject very seriously, but the matter that held his attention was not the proposed guessing-match. That would not have been fair nor amusing, as the deadlights of his own very comfortable apartment blinked at him every time they came to Fifty-ninth street. He was justifying to himself a very questionable move. He wished to feed this stray damsel and, at the same time, talk to her with a purpose. He could not see himself doing it in a cabaret, and every hotel supper room had already become one of those things. He came to a decision and spoke.

"I'll take a hand in your game, all right, but not just as you think. Do you—would you trust me?"

Immediately the girl was on her guard. She looked into his face and read it.

"I would never have thought of not trusting you if you hadn't asked that old, old trap question," she said gravely.

"Forget that I asked it," said Mr. Randolph promptly, and leaned out to give the driver his address. A thin-lipped and weary scorn was still on that individual's face when he drew up before Mr. Randolph's abode and honked three times derisively to the world in general as seen from the front of a taxi.

"Wait," said Mr. Randolph to the jehu, as he handed out the girl. She paused with one foot half-way to the curb, but that single word directing anything as expensive as a taxi to stand by reassured her.

Randolph preceded her to show the way and turn on lights. He never looked back to see if she followed, and this implied trust in herself seemed to drag her after him up the single flight of stairs that led to his rooms.

"Old-fashioned but cozy," he said, as he applied a latch-key and opened a door that gave directly on a large square sitting room. "I hate elevators in a place you call home."

In an open grate was a dying wood fire. He proceeded to poke and feed it at once, saying over his shoulder:

"Sit down anywhere, will you?"

Facing the fire was a deep and much worn leathern couch, with a pedestal at each end carrying shaded lamps. They were the only ones he had lighted and their glow was so subdued that it blended with that of the fire without fighting it. The girl chose to seat herself stiffly in a corner of this couch.

Mr. Randolph looked at her rigid pose with marked disapproval, but said nothing. Having rejuvenated the fire till it leaped merrily to an attack on the fresh backlog, he left the room and was absent for a considerable time. When he returned, it was to place a small table before his guest, and then he fetched a tray well loaded with those things which grace in perpetuity a healthy bachelor's larder.

He drew up a chair for himself and, with an inviting nod, started to eat a great deal and very rapidly.

"Get in on the lunch while there's time," he admonished. "I warn you there's nothing more in the house."

The girl gave him a grateful look and proceeded to fill herself with the most sustaining food within reach. She did not fail to note that there was nothing to drink but water. When they could eat no more, Mr. Randolph removed the table, and then seated himself in the opposite corner of the couch.

"You don't seem to be at ease here," he said presently. "If you think you'll be more comfortable, we can go down and sit in the cab. I want to talk to you."

"My dear Imogene Pamela Thornton."

(TO BE CONTINUED.)

Grapeshot and Canister.

Grapeshot was a bunch of pellets about the size of grapes, held together in a canvas bag, or by an iron pin and a series of iron plates containing holes in which the shot rested. Canister consisted of a number of cast iron balls, a half to one inch in diameter, which were contained in one shell. Both were used in the Civil war.

In Writing.

The one rule is to be infinitely various.—Robert Louis Stevenson.

DARLING BABY BRIGHTENS HOME

Children's Laughter a Pleasing Sound

Altoona, Pa.—"I am writing to tell you what Lydia E. Pinkham's Vegetable Compound has done for me. We had six children die almost at birth. From one hour to nineteen days is all they have lived. Before my next one was born I took a dozen bottles of your Vegetable Compound, and I can say that it is the greatest medicine on earth, for this baby is now four months old, and a healthier baby you would not want. I am sending you a picture of her. Everybody says 'That is a very healthy looking baby.' You have my consent to show these few lines to anybody."—Mrs. C. W. BENZ, 131 3rd Avenue, Altoona, Pa.

Mrs. Janssen's experience of interest to childless wives.

Millston, Wis.—"I want to give you a word of praise for your wonderful medicine. We are fond of children, and for a considerable time after we were married I feared I would not have any. I began taking Lydia E. Pinkham's Vegetable Compound, and it strengthened me so I now have a nice, strong, healthy baby girl. I suffered very little at childbirth, and I give all the credit to your medicine, and shall always recommend it highly."—Mrs. H. H. JANSSEN, Millston, Wis.

Mrs. Held of Marinette, Wis., adds her testimonial for Lydia E. Pinkham's Vegetable Compound. She says:

Marinette, Wis.—"I was in a nervous condition and very irregular. My doctor advised an operation. My husband brought me one of your booklets and asked me to try Lydia E. Pinkham's Vegetable Compound. It overcame my weakness so that I now have a healthy baby girl after having been married nine years. I am glad to recommend your medicine, and you may use my letter as a testimonial."—Mrs. H. B. HELD, 330 Jefferson St., Marinette, Wis.

There are many, many such homes that were once childless, and are now blessed with healthy, happy children because Lydia E. Pinkham's Vegetable Compound has restored the mother to a strong and healthy condition, as it acts as a natural restorative for ailments as indicated by backache, irregularities, displacements, weakness and nervousness.

Women everywhere should remember that most of the commoner ailments of women are not the surgical ones—they are not caused by serious displacements or growths, although the symptoms may be the same, and that is why so many apparently serious ailments readily yield to Lydia E. Pinkham's Vegetable Compound, as it acts as a natural restorative. It can be taken with perfect safety and often prevents serious troubles.

Therefore if you know of any woman who is suffering and has been unable to secure relief and is regretfully looking forward to a childless old age, ask her to try Lydia E. Pinkham's Vegetable Compound, as it has brought health and happiness into so many homes once darkened by illness and despair.

Lydia E. Pinkham's Private Text-Book upon "Ailments Peculiar to Women" will be sent to you free upon request. Write to The Lydia E. Pinkham Medicine Co., Lynn, Massachusetts. This book contains valuable information.

WISHED THE LADY HAD ACTED

Probably Youngster's Comment Found Echo in the Minds of Others in the Audience.

A politician was making a speech at one of the town's school houses.

Naturally, he was teliing of all the accomplishments of his administration.

And always after he had told one he turned toward his wife, who was in the audience, and said:

"My wife will bear me out in what I have just told."

Over and over he repeated his rather long-drawn-out boasts, despite his yawning audience, always bringing the lady in at the finish.

But at last he stopped.

Then an irrepressible high-school youngster turned to his companion and said in a tone loud enough to be heard by those in his vicinity.

"I'm so tired that I wish his wife had borne him out the first time he suggested it."

New Alloy Promises Much.

A metal lighter than any yet known and as strong or stronger than steel has for years been the dream of many, and every now and then rumors are circulated to the effect that at last it has been discovered. The latest report relates to a new magnesium alloy said to have been discovered by a metal company in Montreal. The new alloy, it is stated, is only two-thirds the weight of aluminum, and is "as strong as steel." It is said to be especially suitable for pistons and connecting rods of aero and motor car engines, where strength and lightness are desirable.

The Brute.

She—Do you remember, dear, how before we were married you used to tell me I was worth my weight in gold?

He—Yes; and do you remember how terribly skinny you were in those days?—Boston Transcript.

Satire is a good-natured joke that is always half "ire."

LOOKED LIKE PROMISED MA

Victim of Carelessness Came Back With Pointed Remark Concerning Companion's Immediate Future.

Two negroes were working in a coal bin in a Mississippi town, one down in the bin throwing out the coal and the other wielding a shovel. The one inside picked up a large lump and heaved it carelessly into the air, striking the other a resounding blow on the head.

As soon as the victim had recovered from his momentary daze he walked over to the edge of the bin and, peering down at his mate, said:

"Nigger, how come you don't watch where you throws dat coal? You done hit me smack on the haid."

The other looked surprised.

"Did I hit you, nigger?"

"You sho' did," came the answer. "And I jes want to tell you, I'se been promising the debil a man a long time, and you certainly does resemble my promise."—New York Evening Post.

The Perpetual Smile.

"Do you disapprove of pink tea diplomacy?"

"I don't know anything much about diplomacy," replied Uncle Bill Botts, "except that it depends on a man's suavity and his ability to conceal his feelings. I should say that a body who could drink pink tea and go on pretendin' he was havin' a perfectly pleasant time ought to be in the makin' of a good diplomat."

As Friend to Friend.

"Marry my daughter!" cried the angry merchant. "I should hope not! Be off with you, sir! Go to the devil, sir."

The young man was not a bit upset by these definite instructions.

"Very well," he replied. "Can I take any message for you?"

Hard to Understand.

Patience—"Peggy says she speaks some French." Patrice—"Well, I'd really like to know what French it is."

Youngsters grow husky on

Grape-Nuts

The great body-building values which Nature stores in wheat and barley, are retained in this easily digestible food.

The unique, sweet flavor of Grape-Nuts makes it a big favorite with both children and adults.

MADE FAMOUS BY BRAVERY

Organization Now Known as Royal Canadian Mounted Police Has Made Glorious Reputation.

Wearers of the "scarlet and gold" of the Northwest mounted police, renamed the Royal Canadian mounted police on February 1, are now charged with the enforcement of federal laws in all provinces of Canada. It is, for instance, as though the New York police force had its "beat" extended from the metropolis to San Francisco. Many of these intrepid officers are sons of aristocratic British families and are veterans of the great war.

The metamorphosis of the great organization known as the Northwest mounted police, organized in 1873, when the Canadian northwest was a sort of "No Man's Land," recalls some of the heroic exploits of its members. One of the earliest of these was the nervy action of the late Gen. Sir Sam Steele, then a sergeant. A camp of hostile Cree Indians were obstructing the building of the Canadian Pacific railway. Sergeant Steele, accompanied by a constable, rode into the midst of the camp, and while the redskins indulged in promiscuous shooting and war whoops, calmly ordered Chief Pie-A-Pot to get out within ten minutes.

The chief ignoring his order, Steele, garbed in a striking red coat, dismounted, leaped over Pie-A-Pot's squatting figure, through the tepee door and kicked out the center pole, bringing down the tent on Pie-A-Pot and his squaws.

The audacity of Steele's act in thus manhandling the head of the tribe overawed the Indians and they at once started to obey his orders.

The Bathurst Inlet patrol made a two-and-a-half year journey into the Arctic circle, covering 5,000 miles in sledges, on snowshoes and afoot to arrest two Eskimos for the killing of Redford and Street, two white men slain in 1912. They found the Eskimos and brought them to court.

Held to All Superstitions.

When the first missionaries visited Marsovan, Turkey, the old Armenian church members were Christians in little more than name. Their beliefs were a mixture of superstitions with a suggestion of a Christian origin. They feared the evil eye, and wore charms to break its power. They put branches of a thorny plant over their chimneys in the form of a cross to prevent witches from coming down and strangling their little children. They visited the graves of saints and offered prayers for relief from sickness, tying a rag on a bush nearby with the hope of returning home leaving their disease tied to the holy spot.

The Wise Father.

Ex-Secretary Robert Lansing at a dinner was praising a French diplomat.

"A marvelous man!" he said. "He's got five sons, too, though they were inclined to sow their wild oats in their lycee days."

A father whose sons had also done some wild oat sowing sighed and said:

"What did he do, Mr. Lansing, when his sons started to sow their wild oats?"

"Why," said Mr. Lansing, with a smile, "he started thrashing, of course."

Prosperous Martinique.

The number of manufacturing industries in Martinique has been increasing, although most of the plants are small. The factories in operation are 15 sugar factories, 114 rum distilleries, eight lime kilns, one factory for canning pineapples, one factory where chocolate powder and coco butter are made, one factory for alimentary pastes, two ice factories, two forges and foundries, one copper shop, one tile, terra cotta and brick factory, 11 gaseous water factories and four printing houses.

Craze for Tattooing.

Tattoo artists in London have been busy since the armistice. One soldier has had the names of all the battles in which he participated indelibly written on his arm. It was a rather long job, for he had been through the war from the start in 1914. In Thames court recently a man appeared with his hand, quite barren of hair, covered with tattooed butterflies, stars, etc.

Retaliation.

"Agnes is fifty if she's a day, but she gives her age as only thirty." "Well, you can't blame her in a way. time has told on her and she's getting even by wiping off an old score."—Boston Transcript.

MINSTREL

That

BIG FUN SHOW

YOU HAVE ALL BEEN WAITING FOR

At The Idle Hour Theatre

FRIDAY, MARCH 18

Curtain Rises Promptly at 8;00 P. M.

Klemme, Iowa

13 Komical Koons 13
In Songs Jokes Music and Wit

This Minstrel is given as Benefit and the proceeds will go to the Klemme Fire Dept. for the purchase of a Chemical Fire Fighting Apparatus--for the protection of Your Own Home. COME and BRING the FAMILY.

Admission, including tax Children 28c Adults 55c

Thirteen Original GLOOM Chasers!

We are now standing our

STALLION

Our Registered Percheron Stallion, DICK ROGER, his recorded number is 103422 foaled April 7, 1913, color dapple grey, white mane and tail, weighs in medium flesh about 1800. We will stand him on our farm only during the season of 1921 for public service before 8:00 A. M., also noon hour, and any time after 6:00 P. M, except Sundays. Service Fees—$15 for one, $27 for two, $36 for three, $45 for four, due when colt stands and sucks. Second plan—If you prefer to settle after you are satisfied your mare is in foal will give cheaper rate—$12 for one, $22 for two, $30 for three $36 for four. So in either plan you will see that you have the fourth colt free.

Horses Will Be In Demand

We all begin to see the signs for better horse prices by the time a crop of colts can be produced to maturity, that you will be well paid for the little time it may require to bring your mare to be bred and tried the third and fourth week after. Anyone you may trust to lead the mare over will be sarisfactory to us, or how late you ever want come at night because we have a well lighted yard for that purpose.

Public Utilities and the public

COSTS

In arriving to what is the actual cost to a utility company of delivering its product to the consumer, every necessary outlay, as we have already suggested, must be included, and that every item may be set out it is necessary to begin at the very beginniug and trace the development and operation of the plant and organization that renders the service.

To illustrate: Take a Community that is without utilities service. Such a service being desired, the first step to secure it would be to get in touch with the representative of a public service corporation, and it would then be up to the company to make a survey of the situation to asertain whether it would be feasible to furnish the service asked. If the decision were favorable, it would be then necessary to secure a franchise and work up the necessary amount of business to make the venture profitable. There would of necessity be numerous items included in this preliminary work, a high necessary work for which the utilities company must pay, and the payments are made in order to be able to deliver service to the customer. Must this expense be taken into consideration in arriving at the cost of production? Manifestly, it must. It had to be paid out or the plan of production would have been halted at its very beginning. This is only to illustrate that every dollar a utilities company finds it necessary to expend in the promotion of its business is a legitimate part of the cost of production. It is easy to see that interest on the investment in physical property, or labor or fuel. is each a part of the cost, but the more remote expenses, that are just as necessary. are quite often entirely lost sight of by the general public, and failure to recognize these expenses makes the determination of cost impossible.

The cost of producing electrical current is divided into two main items:

1. ***Cost of production***
2. ***Cost of maintaining the investments.***

These two are made up of many subdivisions. In normal times experience has shown that each of these items represents about 50 per cent of the entire cost of delivering the current to the consumer. The same thing is true of all public utilities, such as gas, water, street railways, and etc.

Take the first division, "Cost of Production" and trace it. The Compauy buys its coal at the mines; pays the freight, including war tax, pays interest on the money that is used transaction; pays storage, demurrage, and losses in transact and storage; pays for labor to handle the coal and to dispose of the ashes; pays for the mainte..ance of property, labor, damages, and many other items--all of this is a part of the cost of production and must be charged accordingly or it will be only a matter of a short time when the service must be discontinued. This phase of the subject will be further discussed in our next installment.

Iowa Falls Electric Company

PIGEONS AS RUM CARRIERS

Customs Officials on the Border on Guard Against New Scheme of Liquor Smugglers.

Low, reeling flight of a homing pigeon from the north is likely to cause comment among customs officials in Toledo, O., these days. Here is the reason:

Booze smugglers are training birds to carry tiny flasks of whisky from Canada into border cities of the United States. The plan was detected at Rochester, N. Y., several days ago and at once the word was sent broadcast to federal agents to be on the lookout.

The deputy customs collector hasn't caught any pigeons yet, but he is wary. Let the whirr of pigeons in flight break on the trained ear and instantly he attempts to determine where the birds take the ground. Nor does a pigeon's naive walk deceive him; he looks until the bird shows it has nothing to conceal, thus proving its innocence.—Toledo Blade.

The Times and the Customs.

He was one of the few surviving cab drivers of an older day who had succumbed to the lure of the automobile and had become a taxi driver. But in his heart he longs for horses, the buckled high hats that he wore when driving for funerals, the caroling of the quartets being taken home from late-at-night stag parties, and all the things that made life worth while to him in the happier years.

And this night he was particularly unhappy because while starting on a hurry-up call his motor had stalled.

"It used to be I'd say, 'Giddap, dern ye,' and crack my whip and away we'd go," he lamented. "Now I say, 'Turn over, d——d ye!' and crack my elbow a-crankin' her, and we don't go at all."

Destroyed Husband's Literary Work.

It is not often a wife—or, rather, widow—acts as the destroyer of her late husband's work, yet this is what Lady Burton did. Her husband was a great traveler, explorer, diplomat and linguist, the master of 35 languages, who often moved about the East for months together as an Arab, so complete was his knowledge of Arabic. He left several translations of eastern books in manuscript, and a story was told of Burton's spirit appearing to his wife, after his death, beseeching her to burn these unpublished books. Certain it is that Lady Burton did destroy them.

Seventy to a House.

Warsaw is probably one of the most densely populated cities in the world. Its growth in area has been retarded by the fact that under the Russian regime certain fixed city limits were drawn many years ago, and for military reasons no houses were to be built outside of these limits. In a recent census it was found that the number of inhabitants to a building in Warsaw was about 70, as compared with only seven or eight in London.

Almond Worth Cultivating.

The almond is a delicate nut, cultivated on a commercial scale in central California during the past thirty years, although not so largely as the English walnut. The brown hull is tough and the nut should always be blanched. Almond meal may be purchased, also butter. This, by diluting, may be made into a cream, to take the place of cow's milk. It is, however, expensive.

"Set" in His Ways.

Postmaster-General Burleson carries an umbrella wherever he goes, rain or shine, never changes the style of his hat—an old style cloth in the form of a derby, a style he has worn since he first put on long trousers and which is sold by a dealer in San Antonio, Tex., and has his shoes made by a cobbler in Austin, who has done the work for him for forty years.—Exchange.

Some Wag.

Redd—Black took his dog over to France with him when he left with his regiment, didn't he?

Greene—Oh, yes.

"And they have returned, I hear."

"Yes."

"Both of their old jobs back?"

"Well, the dog has. I saw him chasing his tail today."—Yonkers Statesman.

Club Amenities.

"When our club met at Mrs. Waggs' she wanted to do all the talking. I got up to say a few words, but she insisted that she had possession of the floor."

"What did you say?"

"I told her anybody would know that from the shop-worn carpet she had on it."

Billions of Tons of New Fuel.

For the production of cheap electric power, briquettes and certain by-products the government of Victoria is planning to develop immense deposits of brown coal, estimated to exceed 20,000,000,000 tons.

Its Fitting Kind.

"Jim said when he went outdoors this morning, he saw a snake coiled around the garden hose."

"Of course, it was hardly necessary for him to state it was a garter snake."

Rat Overcoats.

In cold temperatures rats are found to develop a sort of "overcoat" or additional outer covering, which grows very quickly.

The ZERO HOUR

This means prices have dropped to rock bottom

Good Suits

$35.00 *to* **$45.00**

Dress Shirts

$1.50 *and up*

Cravats

$1.00

Prices will not go any lower and the indications are (now that the manufactures have cleaned up their accumulation of merchantdise) that prices will soon stiffin a bit as things get around to normal.

Now is the time to buy--Remember Easter is March 27th

16 STORES ***GARNER, IOWA***

Klemme and Vicinity

Miss Laura Maitland, of Belmond, was a Klemme visitor Saturday.

Mr. Bates of Garner, was rtansacting business in Klemme Saturday.

M. E. Peck, of Garner, was transacting business here last Friday.

SEWING wanted. Mrs. Gilbert Schafer. tf.

We are having little spasms of March weather now and then.

The town council met on Monday evening in regular session.

Glenn Mitchell of Garner, was a business visitor here Monday.

NOTICE—I would like to take some cattle in to feed. Walter Reed tf

Mrs. Henry Suckow was a passenger to Garner Saturday.

Mr. and Mrs. Will Heginger, of Goodell, were Klemme visitors Saturday.

Mrs. Clara Moasad, of Belmond, was in Klemme Saturday visiting friends.

Sam Larsen accompanied by August Baack and family, autoed to New Elm, Minn., returning Tuesday.

C. H. Tompkins of Garner was transacting business here between trains Tuesday.

C. W. Wiles was transacting business in Goodell Tuesday between trains.

Chris Back and Albert Hippen drove to Benton County Saturday night for a few days visit.

Mrs. Harry Brooks and Mrs. Joe Starnes went to Belmond on Friday evening for an over Sunday visit.

Mrs. Walters came from Belmond Saturday for an over Sunday stay at the C. W. Wiles home.

Mr. and Mrs. A. C. Anderson are the happy parents of a fine baby girl since Saturday. These people live on the Zinn farm. Congratulations.

NOTICE—I wish to thank each and every voter who gave me their support at the School Election Monday.
Respectfully, A. D. GIMER

Mr. and Mrs. Hod Lawhorn came from Garner Saturday for an over Sunday visit with their daughter, Mrs. Cliff Swartz and family.

NOTICE—The party who stole rings off my harness on Daniel's sale will please return them to H. Reuben. adv. 1wp.

FOR SALE—One horse coming 5 years old, weight 1300; set of new breeching harness; ten heavy 1½ yr. old cattle. H. Beek. 2wp.

Marlin Croner has the contract for the erection of the Standard Oil Co. staion building and has the work about completed.

E. G. Ell our local Ford man, received a car load of seven Fordson tractors Monday and he has them all sld but one.

Henry Maitland, Sr., moved a load of goods Monday to a farm about six or seven miles east of Klemme. They will farm this year.

The Royal Neighbors met at the home of Mrs. Lew Lewis Friday evening and all report a good time and a dandy lunch.

The dance at the Idle Hour Theatre last Wednesday evening was well attended and there were quite a few dancing fans here from nearby towns.

Henry Lewis returned from Des Moines Saturday where he had been attending a poultry dealers convention. He reports an interesting meeting.

Mrs. A. H. Meyers enjoyed a visit from her sister and husband, Mr. and Mrs. Wentland, of Charles City, who came the latter part of the week for an over Sunday stay.

Ed. G. Ell and Elmer Fuller drove to Des Moines bright and early last Thursday morning to attend a big Ford Dealers' Banquet there that afternoon. They report a fine meeting and a good time.

The following men rode the stock train into Chicago Saturday night with the live stock which went out from here. We do not mean the men rode in the cars with the cattle and hogs—they occupied the freight pullman a the tail end of the train, Joe Johnson, Geo. Johnson, Art Schoenwetter, Wm. F. Stille and W. F. Neuhring.

UNDER THE GOLDEN DOME

Des Moines,—The Iowa legislature is on the last lap of its session following a ten day adjournment, and the next six weeks will be busy ones for the boys on the hill.

None of the big appropriation or revenue bills have as yet been approved, and these will occupy a great deal of the attention of the members for the balance of the session.

For the first time in the history of the state it appears likely that the requests of the state educational institutions will be materially pared, particularly those relating to new construction.

A special levy for a ten mill period requested for the carrying out of an extensive program of building improvements is not likely to pass.

Adjourn About April 20.

Final adjournment of the present session is predicated for about April 20. The volume of routine work remaining is no longer than is ordinarily the case.

New Kind of Bank.

Senator Brookhart has presented a bill to permit the chartering of cooperative banks, which is meeting with considerable opposition from financial interests. It would permit the establishing of rural banks along much the same lines as farmer's cooperative elevators.

May Name Arney.

The appointment of a new state superintendent of banking to succeed M. B. Henderson, present incumbent, is one of the matters upon which the senate will pass.

The name of Former Senator Wallace Arney of Marshalltown has been frequently mentioned in this connection. There is also a possibility that Henderson will be reappointed.

Likely to Pass.

The present situation of the soldier bonus bill is attracting considerable attention from its friends. The bill has no open enemies, but the probability of federal action along bonus lines is giving some of the lukewarm members an opportunity for delay.

There is litle doubt, however, that the bill will be reported favorably for passage and acted upon within the next two weeks.

Two For Des Moines.

On a basis of population the city of Des Moines would be entitled to at least two senators. There are fifty senators in the body, and on a strict division of population one senator should be elected from each 45,000 population. Several counties now have a senator to themselves which have a population far less than this amount, while on the other hand several districts have a population which would entitle them to two senators.

Only one change is proposed in the representation in the house, this giving to Lee county two representatives and taking one from Wapello.

Under an amendment offered by Representative Arthur Springer state revenue derived from the licensing of boxing matches will be devoted to the purchase of apparatus for physical training in the public schools. A bill has been presented providing for the adoption of physical training as a part of the curriculum in the Iowa public school system, and has an excellent chance of passage.

That the present session will do little actual work on code revision is now certain, and Governor Kendall has announced that he will leave to the legislature itself the date of the special session to do the work.

Accordingly a joint resolution will be introduced soon setting a date for the calling of the special session. Sentiment of rural members is strongly in favor of postponing action until next fall at least, and the compiled code of 1919, prepared by the code revision, will probably be sanctioned as the official code in Iowa until the work of revision is completed.

Legislation increasing the compensation for public printing is likely to be enacted. There is little possibility of any bill being passed to establish a state printing plant at this session.

Printers are now refusing to bid upon state work because of the alleged fact thut the legal rate is too low to permit a profit on any contract which the state may legally let.

As a result practically none of the departmental reports for the last two years are available in printed form.

Laws Already Passed.

Among the more important measures enacted are laws providing for the licensing of chiropractors, authorizing the sale of the grounds and buildings of the former state inebriate hospital at Knoxville, extending the present law relating to salaries of public officials and granting them the same salaries as are now being paid for another two years, providing for the licensing of dogs by county auditors, requiring land owners to keep up partition fences and hedges, extending the closed season on prairie chicken for five years, authorizing the use of the primary road fund for the building of bridges and culverts, permitting contractors to file personal bonds up to 75 per cent of the amount of the contract, permitting county treasurers to retain auto license fees in their home banks subject to call of state treasurer when the state fund is depleted, authorizing purchase of a prison farm near Anamosa, permitting the charging of six per cent interest on school bonds, and a law permitting graduated license fees on automobiles purchased according to the number of months remaining in the year.

The above list includes all of the realy important bills passed by both houses up to the beginning of the second period of the session. Most of the more important bills are still in the hands of committees, and the bigger share have not been acted upon by either house or senate.

Moving picture censorship is having hard sledding so far in the house and senate, and the Olson-Greenell bill will be radically amended if it is passed at all.

The bill provides for a very drastic censorship and licensing of all moving picture films displayed in Iowa.

Action is anticipated soon on the Russell Sage foundation bill regulating loan sharks in the state, passage of which is expected without material opposition. The Bill provides for the licensing and state supervision of loan companies making loans in smaller amounts than $300.

Whether or not professional boxing will be legalized in Iowa now depends upon the action of the senate upon the Lake boxing bill, which has passed the house, and which will go to the senate for action within the next two weeks. Favorable action is anticipated in the senate.

Legislation of direct importance in rural communities is still conspicuous by its absence. Relatively few bills relating to agriculture have been presented. Road legislation also is quiet. Such measures as are presented tend to reduce to some extent the powers of the state highway commission, but there is no considerable strength evident to make drastic changes in the laws.

Salary increase measures are receiving very litttle favorable consideration, and few, if any, bills along these lines will be enacted. District judges are asking an increase of their salaries from $4,500 to $6,500 per annum, and may succeed in getting a portion of this amount. This is one of the few bills along similar lines which has even a moderate chance of success.

Failure of the present congress to pass the congressional reapportionment act means that no action will be taken to redistrict the state at this session so far as congress is concerned. Bills are being prepared, however, to revise the state senatorial districts on a basis of population which would result in several changes from the present plan. Passage of this bill will be attended with many difficulties.

Blue sky legislation has not yet been reported out of committee. A new bill introduced by Senator Frailey would confer additional powers upon the attorney general to regulate promotion of new corporations.

The bill recommended by Walter Ramsay, secretary of state, is being considerably amended in committee. So far blue sky legislation has not attracted the interest of the members to the extent that was anticipated when the session commenced.

Only two important bits of sumptuary legislation are attracting any particular amount of attention. One of these is a bill backed by the W. C. T. U. providing for a commission to pass upon patent medicines and similar preparations sold ostensibly for medicinal purposes, but which in fact serve the same purposes as and old fashioned shot of licker.

The other is legislation relating to the sale of cigarettes, and bills will be introduced in both house and senate providing for the repeal of the present law making the sale of cigarettes illegal, and providing for a heavy license fee upon firms handling the "Pills".

The present fee system is abolished, it having given rise to many abuses.

A bill by Hauge, Ontjes and Santee provides for the creation of a state rural credits corporation based upon the use as capital of the endowment fund of the state college at Ames. It provides for the loaning of the funds to Iowa farmers for farm purchase and improvement, and the issuing of bonds based upon the original loans as security to permit the creation of a revolving fund.

PRESIDENT DELIVERS INAUGURAL ADDRESS AFTER TAKING OATH

Speech Chiefly Devoted to Necessity for World's Reconstruction.

UNITED STATES MUST ASSUME LEAD IN TASK

Chief Executive Says He Considers Electoral Vote a Mandate From the People Upholding Policy of Aloofness From Foreign Entanglements—As to Tariff Readjustments.

Washington, March 4.—President Harding, in his inaugural address, spoke substantially as follows:

My Countrymen—When one surveys the world about him after the great storm, noting the marks of destruction and yet rejoicing in the ruggedness of the things which withstood it, if he is an American he breathes the clarified atmosphere with a strange mingling of regret and new hope. We have seen a world of passion spend its fury, but we contemplate our republic unshaken, and hold our civilization secure. Liberty—liberty within the law—and civilization are inseparable, and though both were threatened, we find them now secure and threre comes to Americans the profound assurance that our representative government is the highest expression and surest guaranty of both.

Standing in this presence, mindful of the solemnity of this occasion, feeling the emotions which no one may know until he senses the great weight of responsibility for himself, I must utter my belief in the divine inspiration of the founding fathers. Surely there must have been God's intent in the making of this new world republic. Ours is an organic law which had but one ambiguity and we saw that effaced in a baptism of sacrifice and blood, with union maintained, the nation supreme and its concord inspiring. We have seen the world rivet its hopeful gaze on the great truths on which the founders wrought. We have seen civil, human and religious liberty verified and glorified. In the beginning, the world scoffed at our experiment, today our foundations of political and social belief stand unshaken, a precious inheritance to ourselves, an inspiring example of freedom and civilization to all mankind. Let us express renewed and strengthened devotion, in grateful reverence for the immortal beginning, and utter our confidence in the supreme fulfillment.

No Entanglement With Old World.

The recorded progress of our republic, materially and spiritually, in itself proves the wisdom of the inherited policy of noninvolvement in old world affairs. Confident of our ability to work out our own destiny, and jealously guarding our right to do so, we seek no part in directing the destinies of the old world. We do not mean to be entangled. We will accept no responsibility except as our own conscience and judgment, in each instance, may determine.

Our eyes never will be blind to a developing menace, our ears never deaf to the call of civilization. We recognize the new order of the world, with the closer contacts which progress has wrought. We sense the call of the human heart for fellowship, fraternity and co-operation. We crave fellowship, and harbor no hate. But America, our America, the America builded on the foundation laid by the inspired fathers, can be a party to no permanent military alliance. It can enter into no political commitments nor assume any economic obligations which will subject our devisions to any other than our own authority.

Will Associate in Counsel.

We are ready to associate ourselves with the nations of the world, great and small, for conference, for counsel, to seek the expressed views of world opinion, to recommend a way to approximate a disarmament and relieve the crushing burdens of military and naval establishments. We elect to participate in suggesting plans for mediation, conciliation and arbitration, and would gladly join in that expressed conscience of progress which seeks to clarify and write the laws of international relationship, and establish a world court, for the disposition of such justiciable questions as nations are agreed to submit thereto, but every commitment must be made in the exercise of our national sovereingty. Since freedom impelled, and independence inspired, and nationality exalted, a world super-government is contrary to everything we cherish, and can have no sanction by our republic. This is not selfishness, it is sanctity. It is not aloofness, it is security.

We have come to a new realization of our place in the world and a new appraisal of our nation by the world. The unselfishness of these United States is a thing proven. Our devotion to peace for ourselves and for the world is well established. Our concern for preserved civilization has had its impassioned and heroic expression. There was no American failure to resist the attempted reversion of civilization. There will be no failure today or tomorrow.

Declares Nation Has Spoken.

The success of our popular government rests wholly upon the correct interpretation of the deliberate, intelligent, dependable popular will of America. In a deliberate questioning of a suggested change of national policy, where internationality was to supersede nationality, we turned to a referendum of the American people. There was ample discussion, and there is a republic mandate in manifest understanding.

America is ready to encourage, eager to initiate, anxious to participate in any seemly program likely to lessen the probability of war and promote that brotherhood of mankind which must be God's highest conception of human relationship. We aspire to a high place in the moral leadership of civilization; and we hold a maintained America, the proven republic, the unshaken temple of representative democracy, to be not only an inspiration and example, but the highest agency of strengthening good will and promoting accord on both continents.

Mankind needs a world-wide benediction of understanding. It is needed among individuals, among peoples, among governments, and it will inaugurate an era of good feeling to mark the birth of a new order.

United States as an Object Lesson.

We must understand the ties of trade bind nations in closest intimacy, and none may receive except as he gives. In the new order of finance and trade we mean to promote enlarged activities and seek expanded confidence.

Perhaps we can make no more helpful contribution by example than a republic's capacity to emerge from the wreckage of war. While the world's embittered travail did not leave us devastated lands nor desolated cities, left no gaping wounds, no breast filled with hate, it did involve us in the delirium of expenditures, in expanded currency and credits, in unbalanced industry, in unspeakable waste and disturbed relationships. While it uncovered our portion of hateful selfishness at home, it also revealed the heart of America as sound and fearless and beating in confidence unfailing.

Supreme Task Before Nation.

Our supreme task is the resumption of our onward, normal way. Reconstruction, readjustment, restoration—all these must follow. I would like to hasten them, to lighten the spirit and add to the resolution with which we take up the task. Let me repeat for our nation, we shall give no people just cause to make war upon us, we hold no national prejudices, we entertain no spirit of revenge, we do not hate, we do not covet, we dream of no conquest nor boast of armed prowess.

If, despite this attitude, war is again forced upon us, I earnestly hope a way may be found which will unify our individual and collective strength and consecrate all America, materially and spiritually, body and soul, to national defense. There is something inherently wrong, something out of accord with the ideals of representative democracy, when one portion of our citizenship turns its activities to private gain amid defensive war while another is fighting, sacrificing or dying for national preservation.

A regret for the mistakes of yesterday must not, however, blind us to the tasks of today. War never left such an aftermath. Discouraging indebtedness confronts us like all the wartorn nations, and these obligations must be provided for. No civilization can survive repudiation. We can reduce the abnormal expenditures, and we will. We can strike at war taxation, and we must. Our most dangerous tendency is to expect too much of government, and at the same time do for it too little. We need a rigid and yet sane economy, combined with fiscal justice, and it must be attended by individual prudence and thrift, which are so essential to this trying hour, and reassuring for the future.

Task of Readjustment.

The business world reflects the disturbance of war's reaction. The economic mechanism is intricate and its parts interdependent, and it has suffered the shocks and jars incident to abnormal demands, credit inflations and price upheavals. We must seek the readjustment with care and courage. Perhaps we never shall know the old levels of wage again, because war invariably readjusts compensations and the necessaries of life will show their inseparable relationship, but we must strike for normalcy to reach stability. All the penalties will not be light, nor evenly distributed. There is no instant step from disorder to order. No altered system will work a miracle.

Outlines Party's Program.

The call is for productive America to go on. I speak for administrative efficiency, for lightening tax burdens, for sound commercial practices, for adequate credit facilities, for sympathetic concern for all agricultural problems, for the omission of unnecessary interference of government with business, for an end to government's experiment in business, and for more efficient business in government administration.

Duty Before Women Voters.

With the nation-wide induction of womanhood into our political life we may count upon her intuitions, her refinement, her intelligence and her influence to exalt the social order. We count upon her exercise of the full privileges and the performance of the duties of citizenship to speed the attainment of the highest state.

Revolutionists Warned.

If revolution insists upon overturning established order, let other peoples make the tragic experiment. There is no place for it in America. When world war threatened civilization we pledged our resources and our lives to its preservation, and when revolution threatens we unfurl the flag of law and order and renew our consecration. Ours is a constitutional freedom where the popular will is the law supreme and minorities are sacredly protected. Our revisions, reformations and evolutions reflect a deliberate judgment and an orderly progress, and we mean to cure our ills, but never destroy or permit destruction by force.

Tariff Readjustment.

It has been proved again and again that we cannot, while throwing our markets open to the world, maintain American standards of living and opportunity, and hold our industrial eminence in such unequal competition. Today, as never before, when peoples are seeking trade restoration and expansion, we must adjust our tariffs to the new order. We seek participation in the world's exchanges, because therein lies our way to widened influence and the triumphs of peace. We know full well we cannot sell where we do not buy, and we cannot sell successfully where we do not carry. Opportunity is calling not alone for the restoration, but for a new era in production, transportation and trade. We shall answer it best by meeting the demand of a surpassing home market, by promoting self-reliance in production and by bidding enterprise, genius and efficiency to carry our cargoes in American bottoms to the marts of the world.

America's Highest Ideals.

We should not have an America living within and for herself alone, but we would have her self-reliant, independent and ever nobler, stronger and richer. Believing in our higher standards, reared through constitutional liberty and maintained opportunity, we invite the world to the same height. But pride in things wrought is no reflex of a completed task. Common welfare is the goal of our national endeavor. Wealth is not inimical to welfare. It ought to be its friendliest agency. There never can be equality of rewards or possessions so long as the human plan contains varied talents and differing degrees of industry and thrift, but ours ought to be a country free from great blotches of distressed poverty. We ought to find a way to guard against the perils and penalties of unemployment. We want an America of homes, illumined with hope and happiness, where mothers, freed from the necessity for long hours of toil beyond their own doors, may preside as befits the hearthstone of American citizenship.

Solemn Pledge to the People.

Service is the supreme commitment of life. I would rejoice to acclaim the era of the Golden Rule and crown it with the autocracy of service. I pledge an administration wherein all the agencies of government are called to serve, and ever promote an understanding of government purely as an expression of the popular will.

One cannot stand in this presence and be unmindful of the tremendous responsibility. The world upheaval has added heavily to our tasks, but with the realization comes the surge of high resolve, and there is reassurance in belief in the God-given destiny of our republic. If I felt that there is to be sole responsibility in the executive for the America of tomorrow, I should shrink from the burden. But here are a hundred millions, with common concern and shared responsibility, answerable to God and country. The republic summons them to their duty and I invite co-operation.

I accept my part with single mindedness of purpose and humility of spirit and implore the favor and guidance of God in His Heaven. With these I am unafraid, and confidently face the future.

I have taken the solemn oath of office on that passage of holy writ wherein it is asked: "What doth the Lord require of thee but to do justly, and to love mercy, and to walk humbly with thy God." This I pledge to God and country.

TO COMBINE THREE SERVICES

Department of National Defense, It Is Believed, Will Meet With General Approval.

Washington.—President Harding's determination to amalgamate war, navy and air services of the government into a single department of national defense, with one chief and subsecretaries for each division, one purchasing agency for all and with joint boards of each service responsible for the proper defense of the country at all times, it is believed, will meet with the hearty approval of men who have given this subject much disinterested thought in recent years.

Mr. Harding must get consent of congress to merge the departments mentioned and, prior to asking its permission, John W. Weeks, new secretary of war, and Edwin Denby, new secretary of the navy, must work out the plan of action.

The amalgamation might easily reduce expenditures at least a third.

HELP THAT ACHING BACK!

Is your back giving out? Are you tortured with backache and stabbing pains? Does any exertion leave you "all played out?" Feel you just can't keep going? Likely your kidneys are to blame. Overwork, colds, hurry and worry tend to weaken the kidneys. Backache is often the first warning. Headache and dizziness may come, too, and annoying kidney irregularities. Help the kidneys with *Doan's Kidney Pills*—the remedy recommended by thousands. *Ask your neighbor!*

An Iowa Case

Mrs. A. D. Pruitt, Walnut Ave., Ames, Iowa, says: "My kidneys were out of order. My back ached with a slow, dull, aching pain, and it was hard to do my housework. My kidneys acted frequently and mornings I felt tired and dull. I used Doan's Kidney Pills and they benefited me so I haven't been bothered of late years."

DOAN'S KIDNEY PILLS

FOSTER-MILBURN CO., BUFFALO, N. Y.

Dismal Forebodings.

Arbuthnot Browne, the Boston millionaire, was talking about masterful wives.

"Masterful wives," he said, "were in the minority heretofore, but with the coming of universal suffrage the majority of wives are getting pretty masterful.

"Believe me," Mr. Brown concluded, "it won't be only in his office that the husband of the future, when he starts to dictate, will be taken down."

Souvenir of the Occasion.

A woman was discussing a house party she had given. "You know," she said, "Mrs. H. came, but she was a great nuisance. She has such a passion for souvenirs. She's mad on collecting."

"My dear," said her friend, "no need to tell me that; she stayed with me once."

"I suppose you missed your china, or something when she left."

"No, I missed my husband."

Getting Anxious.

"Maud wants a finger in everything." "Yes, but in an engagement ring for preference."

Evil-minded folk measure others by their own standard.

Too many dollars in a man's pocket have been known to crowd the sense from under his hat.

Sure Relief

BELL-ANS FOR INDIGESTION

A Kansas Woman Testifies

Mulberry, Kans.—"My son, at the age of 10 years, was taken with pneumonia. We had three doctors. Then he took chicken-pox and measles and last typhoid fever. He got through them all in one winter, but it left him with such a cough I feared he could not get well. I got Dr. Pierce's Golden Medical Discovery and gave it to him; it cured him entirely. I lived near Monroe City, Mo., when my son was sick." MRS. JANE S. CARROLL.

COUSIN OF HERMAN STROMER MURDERED AT FT. DODGE

Berthold Halfpap, a cousin of Herman Stromer, was held up, robbed and killed in his store in Fort Dodge last Saturday evening. He was shot by one of the bandits and died Sunday night. Herman and wife left for Fort Dodge Tuesday to attend the funeral which was held yesterday.

The Misses Mabel Beier, Ruth Lenz and Mary Dexter returned from Cedar Falls, Iowa, last Wednesday. The girls have completed their Normal Course at the State Teachers College and are now ready to fill a position as a full fledged school "marm."

Henry Johnson left about three weeks ago for a short trip back to health via the St. Lukes hospital at Mason City. After a short stop over at Appendicitis, a touch of pneumonia and pleuresy, he returned to Klemme Tuesday morning feelng good as new again.

A number of Klemme families assembled at the Idle Hour Theatre on Friday evening and enjoyed a party. Games of all kinds were enjoyed and after a nice lunch served by the ladies all departed at a late hour for their homes.

Articles of Incorporation of the Klemme Co-Operative Grain Company, Klemme Iowa

---

ARTICLES OF INCORPORATION

We, whose names are hereto subscribed, hereby associate ourselves into a body corporate under the provisions of ChapterI, Title IX, of the Code of Iowa, and acts amendatory thereof, particularly Section 1641-rl 1641-20, inclusive; assuming all the powers, rights, and privileges granted bodies corporate, and all the duties and obligations imposed by said statutes, and being bound thereby, adopting the following articles of incorporation, to-wit:

ARTICLE I. The name of this corporation shall be THE KLEMME CO-OPERATIVE GRAIN COMPANY

ARTICLE II. The principal place of business of this corporation shall be at Klemme.

ARTICLE III. The general nature of the business of this corporation shall be buying, selling and handling of grain, coal, lumber, live-stock, and all other farm produce and supplies; also, the operation of flour and feed mills and the purchase and sale of products thereof; also to act in the capacity of a general commission house to purchase, erect, operate, maintain, and control warehouses, elevators, mills and buildings of every description, and to retain, sell, convey, lease, mortgage, encumber, and improve such real estate, buildings, and personal property as the business of the company may require; also, to prepare and publish such statements, bulletins, or periodicals, and do all other acts, not contrary to the statutes of the state, as shall be necessary to the proper carrying out of the purposes herein stated, on the co-operative plan as provided by law.

ARTICLE IV. The authorized capital stock of this corporation shall be $60,000, divided into 600 shares of the par value of $100, of which not less than $20,000 shall be subscribed and paid for at the time of commencement of business of the corporation, the remainder of said capital stock to be issued as paid for, at such times as the board of directors may hereafter provide. Said shares of stock are transferable on the books of the corporation. The stock of this corporation shall be non-assessable. No shareholder in conducting the affairs of this corporation shall have more than one vote.

ARTICLE V. The corporate period of this corporation shall begin on the date the Secretary of State issues a certificate of incorporation and shall continue for a period of twenty years from said date, with the right of renewal, unless sooner dissolved by a two-thirds majority vote of the stockholders at any annual meeting, or at a special meeting called for that purpose, provided the corporation shall not be dissolved by less than a majority of the stockholders of the corporation; or by unanimous consent as provided by law.

ARTICLE VI. The affairs of this corporation shall be conducted by a board of directors, as provided in the by-laws, elected by the stockholders from their own number at each annual meeting, and who shall hold office, have such powers and perform such duties as may be provided in the by-laws.

Until the annual election on the first Monday in July, the following shall be the directors of this corporation:

NAME	ADDRESS
H. J. Stille	Garner, Iowa
Valentine Josten	Klemme, Iowa
Herman Stromer	Klemme, Iowa
C. A. Arnold	Klemme, Iowa
E. J. Arnold	Klemme, Iowa
John Larson	Klemme, Iowa
Geo. Zinn	Klemme, Iowa

ARTICLE VII. The private property of the stockholders of this corporation shall be exempt from the corporate liability except to the extent and in the manner provided by he laws of the State of Iowa.

ARTICLE VIII. This corporation shall have power to borrow money from time to time, on a vote of a majority of all the directors at any regular or special meeting, and the property, real and personal, of the corporation may be mortgaged to secure such sums borrowed, provided that the corporation shall at no time, have, or subject itself to indebtedness exceeding two-thirds of the paid-up capital stock.

ARTICLE IX. There shall be an annual meeting of the stockholders of this corporation which shall be held on the first Monday in July in each year.

ARTICLE X. The corporate seal shall be a circular disc containing the name and address of the company in the outer circle, and in the center the words, "Incorporated and Co-Operative," with the year of organization.

ARTICLE XI. The corporation may make and alter by-laws at pleasure, and may authorize the board of directors to do so, subject to such restrictions as may be deemed advisable

ARTICLE XII. Amendments to these articles of incorporation may be made at any regular stockholders' meeting, or at any special meeting of stockholders present, provided the proposed amendment shall have been submitted in writing to each of the stockholders at least thirty days previous to said stockholders' meeting, or shall have been submitted to a previous stockholders' meeting.

SIGNED:

NAME	ADDRESS

Valentine Josten	Klemme, Iowa

said persons being personally known to me as the identical persons whose names are subscribed to the foregoing Articles of Incorporation, and each for himself acknowledged the same to be his free and voluntary act and deed for the uses and purposes therein expressed.

Witness my hand and notorial seal at Klemme in the county of Hancock, State of Iowa, the day and year last written above.

(SEAL) Fred A. Arnold, Notary Public

BY-LAWS

ARTICLE I. Directors—Number —How Elected—To Elect Officers—Must be stockholder—Removal—Vacancies—Compensation.

Section 1—The affairs of this corporation shall be managed and controlled by a board of seven directors, elected from the stockholders from their own number at each annual meeting, who shall hold office until their successors are elected and qualified.

Section 2—Directors shall be elected by ballot. They shall be elected at the first annual meeting as follows: Three for three years, two for two years, and two for one year, thereafter each director shall be elected for a three year period.

Section 3—The directors shall, within ten days from the time of their election, meet and choose by ballot from their own number a President, a Vice-President, and a Secretary-Treasurer, who shall hold office for one year, or until the election and qualification of their successors.

Section 4—If any director shall cease to be a stockholder, he shall cease to be a director.

Section 5—A majority of the share holders present at any annual meeting or at any special meeting called for that purpose, provided thirty days notice thereof has been given, shall have power to remove any director or officer for cause, and thereupon such director or officer shall cease to be a director or officer of this corporation.

Section 6—The board of directors may remove any officer for cause, by a vote of two-thirds of all the members of the board, and shall fill any vacancy caused by such removal.

Section 7—The absence of a director from three successive meetings of the board shall be deemed a resignation as director, unless such absence is decided to be unavoidable by a majority of the board. Whenever any vacancy shall occur in the membership of the board by death, resignation, or otherwise, the remaining directors shall fill office until the next annual meeting of the stockholders.

Section 8—The directors shall receive as compensation for their services $2.50 per meeting for each meeting attended, payable at the end of each fiscal year, with the exception of the Secretary-Treasurer, whose salary shall be fixed by the board of directors.

ARTICLE II. Board of Directors — Duties — Powers — Meetings — Quorum.

Section 1—The board of directors shall employ a manager of the company who shall have supervision and management of the business of the corporation, under their direction and control.

Section 2—The board of directors shall have and exercise full supervision and control over the affairs of this company. It may, in addition to hiring its regular manager and fixing his salary, employ such other persons as it finds necessary, fix their compensation and prescribe their duties; shall require any person who receives or has control of the property of the company to furnish suitable bond; shall provide such books as are necessary for the accounts of its business; shall provide suitable fire-proof protection for said books; and generally, may do any and all things necessary and convenient in the exercise of such supervision, control and powers, not contrary to these articles of incorporation, by-laws, and the statutes of the State of Iowa.

Section 3—The general method of doing business by this company shall be a profit basis. The purpose shall be to secure the highest reasonable price for produce and the lowest reasonable retail price for merchandise in keeping with business conditions. But it shall be the duty of the board of directors and of the manager to conduct the business of this company on a margin of profit that shall be large enough to insure at least a fair rate of interest on the invested capital and to provide further funds as outlined hereinafter in Article VI, Section 1, with reference to earnings.

Section 4—It shall be the duty of the board of directors to keep in close touch with the financial condition of this company, to appoint a committee from their own number to examine the books, records, documents, and correspondence of the corporation, either monthly or quarterly at the discretion of the board; but they shall at least once a year, procure a reliable accountant to audit the books and accounts of the company. They shall also take, or cause to be taken, an annual invoice of all property and merchandise belonging to the company, and shall render to the stockholders at the annual meeting, a report of the year's business, together with the financial standing of the company. In preparing these yearly statements, depreciation of property shall be preserved and filed, one copy with the President, one at the office of the company, and one with the Secretary-Treasurer.

Section 5—The board of directors shall hold regular monthly meetings on the last Saturday of each month.

Section 6—Special meetings of the board of directors may be called by the president at his discretion, or shall be called by him upon the written request of a majority of the members of the board.

Section 7—At all meetings of the board, regular or special, a majority of the directors shall constitute a quorum, and a majority vote of those present shall decide all questions. Voting by proxy at any directors' meeting shall not be allowed.

Section 8—It shall be the duty of each director to attend all meetings of the board of directors and of the stockholders.

ARTICLE III. Duties of Officers and Managers.

Section 1—The president shall preside at all meetings of the shareholders and at all directors' meetings. He may call special meetings of the board at his discretion, and on the request of a majority of the directors, he shall call special directors' meetings. He may, with the consent of a majority of the board, call a special stockholders' meeting, and shall do so upon the request of a majority of the board or the request of twenty stockholders. He shall sign all certificates of stock, sign all bonds, contracts, or other instruments in behalf of this society when so directed by the directors. He shall be the custodian of all bonds given to the company, and shall be the proper person to bring suit thereon.

Section 2—The vice-president shall perform all duties of the president in his absence or inability to act.

Section 3—The duties of the secretary-treasurer shall be to keep a true and complete record of all the meetings of the directors and of the stockholders; to sign all certificates of stock and affix the seal thereto; to sign all orders and other papers of the corporation when ordered by the directors; to keep a true record of all stock issued or transferred; to notify each officer or stockholder of all meetings as provided in these by-laws; to receive and hold all moneys or notes belonging to the board of directors, and keep the same on deposit in such bank or banks as the board may designate and pay out said moneys only upon the order of the board. When ordered by the board of directors, he shall give bond in some reliable surety or bonding company to be paid by the corporation. He shall render to the directors whenever required by them a correct report of the business of the company and shall make a complete report at each annual meeting of the shareholders.

Section 4—It shall be the duty of the manager to have general oversight and control of the business of the company, subject, however, to the action of the board of directors. He shall attend to the buying and selling of all commodities the company may see fit to handle. He shall collect all accounts due the company and sign all receipts. The manager shall give his whole time and attention to the business of the company. He shall have charge of its property and shall at all times keep same in good repair, and well and fully insured. He shall faithfully account, when requested to do so by either the directors or the stockholders, for all money and property given into his control. He shall keep accurate records and books of all transactions, dealings, and business of this company, and a copy of all correspondence, and preserve all books, contracts, papers, statements, and documents pertaining to the business of said company and exhibit same to the directors whenever and as often as they may call for them. He shall turn over all books, papers, moneys, documents, correspondence, etc., and affects of this company to the directors whenever called for, or to any person whom the directors may designate. It shall be the duty of the manager to file with the board of directors at their monthly meeting, a full and complete record of all business transactions of the company during the preceding month, it being the purpose of this report to show in so far as possible, the exact financial condition of the company. He shall give good and sufficient bond, as may be required by the board of directors, for the faithful performance of his duties as contained herein, cost of such bond, if with a surety company, to be paid by this corporation. He shall do business with such depositories or banks as the board shall choose.

During the time of his employment by this corporation, he shall not trade or deal in futures in grain or other commodities on any board of trade, whether in his own name or the name of any other person, or in the name of this corporation. The manager may, however, when in his judgment the best interests of this company demand it, deal in grain futures on any regular board of trade in what is known as "Hedging." That is to say, he may, when grain is bought or contracted for future delivery, sell futures against the same on any regular board of trade, when he considers it a better transaction than selling the cash grain to arrive; or, in case grain is being stored by the company, same having been delivered at the elevator but not yet sold to the company and the needs of the business require that this grain be shipped out to provide bin room, he may buy a future on any regular board of trade to the extent of the stored grain shipments, as an insurance or protection against loss; provided, however, that all such hedges shall not be done by the manager without the knowledge and consent of a majority of the board of directors.

ARTICLE IV. Stockholders.

Section 1—The fiscal year of this society shall end on the last Monday in June, beginning with the last Monday in June, 1921.

Section 2—The annual meeting of the shareholders shall be held on the first Monday in July of each year. Each shareholder shall be notified of the time and place of said meeting by the secretary, who shall mail a written or printed notice to the last known address of each shareholder at least ten days prior to the date of the annual meeting.

Section 3—Special meetings of the stockholders may be held as provided in Article III, Section 1, of these by-laws.

Section 4—Twenty-five shareholders personally present, shall constitute a quorum at all meetings of the stockholders, but a less number may adjourn from time to time.

Section 5—Absent members may be permitted to vote by mail in cases where it is desired to consider some specific question, provided said tion is submitted in writing thirty days prior to the date said meeting. In such cases properly signed, written vote to the secretary, or presented other person to him, shall be exactly the same as if they went in person, but they shall sign their voting power to member by proxy.

Section 6—Roberts Rules of shall govern the proceedings meetings of shareholders or

Section 7—The order of at all shareholders' meetings as follows:

1. Call to order. 2. Roll stockholders. 3. Reading of of last meeting. 4. Report mittees. 5. Reports of Treasurer. 6. Report of 7. New business. 8. Elect officers. 9. Adjournment.

ARTICLE V. Stock.

Section 1—Any person so that his membership will be beneficial to himself and to pany, may become a member chasing one or more shares

Section 2—Upon the assign transfer of any share of purchaser or assignee shall ately present the same to the tary-treasurer, who snall rep transaction at the next meeting board of directors, and when ed by the board, the secretary urer shall make the proper on the books. The assignee chaser then becomes a member corporation. No transfer of this corporation shall be valid as between the parties until tered upon the books of this ion. The purchaser or assignee surrender the old certificate shall be pasted in the stock book on its respective stub, and certificate issued therefor in the of the purchaser, who, by acceptance thereof, agrees to all the rules laws of the company.

Section 3—No shares of stock be transferred until all claims company against the owner shall have been paid.

Section 4—No stock in this ation shall be issued until the ation has received payment therefor at par, in cash or provided, however, that when is to be issued for anything than money, it must be subject approval of the Executive Council of Iowa, as provided in section of the supplement to the Code and any amendments thereto.

Section 5—Any person desiring dispose of his stock in this company shall first deposit same with the retary-treasurer of the company be sold under the direction of board of directors for such period the same is not sold within thirty (30) days after the date of such posit, it shall be returned to the er thereof who may dispose of same without restriction or limit by the Company.

Section 6—No stockholder sign any bond, or sign, endorse guarantee any note, bill, draft, tract, or in any way assume any bility, written or verbal, for the efit of this corporation, without written consent of a majority of directors.

Section 7—The acceptance of stock certificate shall constitute assent of the shareholder to the laws, and each member agrees to bide by them and all future amendments legally enacted by the pany.

ARTICLE VI. Apportionment Earnings.

Section 1—Annually, immediately after the end of the business year board of directors, subject to the ions by the association, at any general or special meeting, shall apportion earnings of the company for the as follows:

First. There shall be set aside less than ten per cent of the net its for a reserve fund, until the mount has accumulated in said serve fund equal to 50 per cent of paid up capital stock.

Second. Five per cent of the its shall be set aside for an educational fund, to be used in teaching operation.

Third. Dividends shall be upon the paid up capital stock determined by the board of directors not to exceed 10 per cent.

Fourth. The remainder of said profits shall be apportioned by form division upon the amount purchases and sales of the shareholders, and upon the wages and salaries of the employees.

Section 2—The uniform division above referred to shall be determined upon grain upon the bushel basis, upon merchandise upon the dollar basis.

ARTICLE VII. Miscellaneous

Section 1—Corporation Funds. funds belonging to this corporation shall not be loaned.

Section 2—Credit. Credit to chasers shall not be extended for longer period than sixty (60) days. All accounts unpaid at the expiration of said period of time shall draw per cent interest until paid.

Section 3—Shipping Clause. When any member or group of members the corporation has grain which wishes to ship through the corporation, he may do so, the corporation charge a reasonable amount as commission for handling, said commission to be determined by the board of directors; provided, said member or group of members delivers the grain to the elevator in car load lots so as not to interfere with the general elevator business.

ARTICLE VIII. By-Laws.

Section 1.—Invalidity. The invalidity of any portion of these by-laws shall in no way affect any other portion thereof which can be given effect without such invalid part.

Section 2—To be Posted. A copy of the by-laws of this company with the names of all its officers shall be posted in its principal place of business subject to inspection, as is provided by law.

Section 3—Amendments. These by-laws may be amended at any regular meetng of the stockholders, or at any special meeting called for that purpose, by a majority affirmative vote of the shareholders present, providing a ten days notice in writing be sent to each shareholder.

RETCHEN BLANK PASSED AWAY

community was saddened heard of the death of Miss n Blank. After a long period ring and agony Miss Gretchen away Monday afternoon at She was unconscious since morning. Her father and and her brothers and sisters her bedside when she passed his world. Funeral services ld this afternoon. We wlil the obituary in the next issue Times.

Avery Township News

Elko Buss and family were Sunday viistors at the home of Sylvan Johnson.

Fred Bell took dinner at the home of Burt Dutton last Sunday. After dinner Clair Dutton and Fred rode their horses over to D. A. Marshall's and spent the afternoon.

Frank Roths purchased a few pure bred hogs of J. E. Johnson last Saturday.

Quite a few from this vicinity attended the Klemme Koon Show last Friday night.

Fred Bell is now the owner of a nice black driving horse which he purchased last week.

Wm. Bell and son and Henry Helps and son were Goodell callers last

I. L. Dutton left last Wednesday for Williams, Iowa, where he will work for a few days..

Mrs. Ranke Buss and children visited at the home of Mrs. Robert Roths last Sunday.

Miss Leafy Wilson visited at the home of Wm. Bell last Sunday.

Effie Johnson visited at the home of her parents over Sunday.

Liberty Township News

Miss Mildred Anderson entertained ten of her girl friends at her home last Sunday, it being her birthday anniversary.

Milton Schaper commenced working for Elmer Schaefer last Monday.

A number of the young people of the community met at the home of Otto Klinge last Thursday evening for a jubilee.

Miss Mildred Anderson assisted Mrs Will Suckow with her work a couple of days last week.

Elmer Schmidt is helping August Lau with his spring work.

The social which was held at the church last Tuesday evening proved to furnish a bit of excitement. Some time before the supper was served, one of the ice cream freezers disappeared from the kitchen in the basement. Later it was found in a neighbor's barnyard and nobody seemed to kno whow it got there. Very little of the contents of the freezer was missing however. After the crisis of the episode had passed the rest of the vening was fairly well enjoyed by all playing games and partaking of the supper which was served before the parting hour.

Mr. and Mrs. August Lau and sons and Mr. and Mrs. Will Suckow and son were callers at the John Woods home last Sunday.

For some reason or other Clarence Tanner has been holding his head quite high of late. It has been especially noticeable on Sunday evenings.

LIBERTY TOWNSHIP FARMERS HAVE SOME GOOD TIMES

A number of people are not aware of the fact that the farmers of Liberty Township, and their families, have a sort of good time get-together club. The first Thursdy in each month is the date set for their gathering when the meeing will be held at the Center School house in the township. A regular program is carried out after which a big lunch is served. Farm and home problems are also talked over and everybody invited to discuss a topic. Next Thursday, that is the first Thursday in the month they will hold a meeting and will have a debate the subject under discussion will be: "Resolved that Consolidated Schools are better than Rural Districts."

Lost-Continent Theory.

Dr. William Alanson Bryan, professor of zoology and geology in the college of Hawaii, claims to have discovered traces of a 6,000-mile prehistoric bridge of land between South America and Hawaii.

Finale, Full Chorus.

Personnell: Sopranos, Mrs. W. H. Trafford, Mrs. Howard Doyle, Mrs. S. A. Harvey Mrs. S. A. Anderson, Mrs. C. G. Waterman. Altos, Mrs. Homer Butcher, Mrs. Emma Gibbs, Miss Mable Smith, Miss Mildred Johnson. Tenors, W. H. Trafford, C. G. Waterman. Basses, Bert Methews, E. G. Ell. Mrs. George Gruetzmacher, director and accompanist.

CAN LEVY TAX FOR BAND SUPPORT

The Municipal Band Bill was passed by both houses and is now a law. The bill provides a petition signed by 10 per cent of the legal voters of the town (last general municipal election) to be presented to the city council. They then submit the proposition to the people. The bill provides that a two mill levy can be made for the support of a band. This is a mighty good bill and we are glad that it has been passed. This will relieve the business men of the town from shouldering the band fund burden each year and will spread it out so that all the people in a community will share in the expenses of keeping up a band. That looks to be a fair and square bill.

THOSE KLEMME KOONS

The Klemme Koons had their show at the Idle Hour last Friday night as advertised and drew the largest crowd that has been at the Theatre for a long time. The house was packed and standing room was at a premium. The curtain went up with few southern songs by the coons. Dr. Thomas and Sam Harvey as end men with R. A. Jorgenson as Interlocutor played their parts well. All the song numbers by the other members of the company were very pleasing to the crowd who were liberal with their encores. During the intermission the end men sold sacks of candy which realized quite a sum of money. The second part of the program was a short comedy sketch entitled "The Thirteen Club, or the Suicide Club." This brought a roar from the audience. The entire program went with a snap and a bang and all in the cast were up on their toes, so to speak, and kept the program a full speed so that there was not an idle moment in the whole play. The boys raised about a hundred dollars for the fire department to help buy the new chemicl apparatus.

PRESERVING CHILDREN

Take one large grassy field, one-half dozen children, all sizes, three small dogs, one long narrow strip of brook, pebbly if possible, mix the children with the dogs and empty them into the field, stiring continually, sprinkle with field flowers, pour brook gently over pebbles; cover all with a deep blue sky and bake in a hot sun. When the children are well browned they may be removed. Will be found right and ready for setting away to cool in the bath tub.

Hod Lawhorn and Bill Zeiesmer, of Garner, were in town last Friday. They were here boosting the wrestling match which is to be held at Garner on Friday evening, April 1st. They had a lot of tickets with them and succeded in disposing of nearly all they had to enthusiastic Klemme fans who are going to see the match. The preliminary match is especially interesting as Ben Grieman is to go to the mat with Bill Zeisemer. The big affair will be the match following between Billie Schober and Ralph Parcaut for the middle weight title.

Generous.

"Why, Willie, I'm ashamed of you. You should have shared your apple with your little cousin." "Well, I let him chew my chewing gum while I was eating the apple."

HAS ANY ONE

Died?
Eloped?
Divorced?
Left town?
Embezzled?
Had a fire?
Had a baby?
Had a party?
Sold a farm?
Been arrested?
Come to town?
Had twins or colic?
Fallen into a well?
Fallen into a legacy?
Fallen from an aeroplane?
Sold a cow or lost an auto?
Committed suicide—or murder?
Stolen a dog—or his friend's Ford?

Well, then—

THAT'S NEWS!

Phone 12 or bring it to the Times

Watch for the "Klemme Koon Komedians". They will appear in Klemme soon. This will be the biggest fun show ever seen in this town. Watch for dates.

KLEMME BUTTER WINS HIGHEST PLACE

Buttermaker A. D. Gimer of the Klemme Creamery tucked a couple pounds of butter under his arm last week Wednesday and hied himself to Forest City where a number of creamery men of this part of the state were holding a pow-pow. Art carried away highest honors with his butter which further showed his great skill and knowledge of the great art of making butter. The Klemme Creamery, under his management, is rapidly coming to the front and this last instance will add another feather to the Creamery's hat, and also Art's. The butter scored 93 points and was way ahead of the other samples submitted.

Louie Katter had a real runaway last week one day. He was loading on tile and had a full load when the team took into their noodles to have a race. They succeeded in ditching the wagon when they went around the lumber yard corner and came up main street like a circus team in a chariot race. They endeavored to turn the corner at Wellmeyer's store but as they didn't have on chains they skidded here and one horse landed on his right ear and the other put on his brakes. Nobody hurt except the wagon and a heap of tile and the team gave the crowd the horse laugh when they were caught.

SUBSCRIBERS NOTICE

There are a lot of subscribers who have not paid up their subscriptions for February and March, all who are back please settle at once of course we need the money. Those who have paid and their date has not been changed on the tag need not worry as we have not yet gotten our mailing list in shape but will have it fixed up in a few weeks, when the name and date on your paper will appear correct.

Bill Zeisemer was here Friday from Garner scouting around to see how the Klemme folks thought his chance would be in the coming wrestling match with Ben Grieman. Well we are all stronger than horse radish for Ben and we hope he shows the Garner man just how easy he can throw if he wants to. Bill is bucking up against a real man when he tackles Ben and he will probably find that out before the match is very far along. Remember you Klemme fans that the match is to be held at Garner on Friday evening, April 1st.

Believe.

Believe with all your heart that you will do what you were made to do. Never for an instant harbor a doubt of this. Drive it out of your mind if it seeks entrance. Entertain only the friend thoughts or ideals of the things you are bound to achieve. Reject all thought enemies, all discouraging moods—everything which would even suggest failure or unhappiness.—Success.

The First Sauce.

Who made the first sauce? Were the Chinese the pioneers in this as in so many other things? At one of the many Celestial restaurants now springing up in London I was given a card with my dinner, in which the brown and mysterious but not unappetizing condiment—served in small saucers—was described as "the oldest sauce in the world." Is it in truth the ancestor of Worcester, Yorkshire and all those other liquid inseparables of the beefsteaks and chops of old England?—Correspondence of London Chronicle.

Mesmerism and Hypnotism.

You may say that "mesmerism is a form of hypnotism," or you may, with equal propriety, say that "hypnotism is a form of mesmerism." It is as broad as it is long. Mesmerism is so-called from the fact that it first sprang into prominence through one F. A. Mesmer, a German physician of Merseburg, about 1760. The name mesmerism has in these days been eclipsed by the more familiar hypnotism.

Feeding the Sea.

The rivers of the earth carry 6,500 cubic miles of water into the sea each year. This means a column ten miles square and sixty-five miles high.

Gulf Stream.

The gulf stream is more rapid than the Amazon, more impetuous than the Mississippi, and its volume more than 1,000 times greater. The waters are blue, and the line of junction can be easily marked by the eye.

As She Saw It.

She (as pitcher for the home team strikes out a man)—I don't see anything to cheer about. Why, the man didn't even hit the ball.—Boston Transcript.

UNDER THE GOLDEN DOME

Des Moines.—Iowa's Thirty-ninth general assembly members are now enjoying a breathing spell until March 7, the usual spring recess having been opened on Feb. 25.

The recess is generally regarded as the half way period of the session, and found the legislature working with considerable speed, after a very slow start.

However, very little completed legislation is on the statute books up to date.

The senate defeated a bill of considerable interest to agricultural communities when it voted down the Campbell bill, backed by the farm bureau, and requiring thirty days notice on the part of a mortgage holder before foreclosure for non payment of interest.

The bill was pressed strongly by the farm bureau, and was intended to give temporary relief to farm owners and purchasers during the March 1 settlement period. The final vote on the bill was 27 to 18. Opponents declared that the measure was unconstitutional.

Chiropractors Win.

A long fight was brought to a successful finish by the chiropractors of Iowa when they finally obtained passage of their bill giving this branch of the healing art a legal standing in Iowa. The bill passed the senate some time ago, and the house put it through by a top heavy vote. The measure gives the chiropractors a state examination board, and provides for the licensing of members of the professsion now in practice and to be admitted in the future.

Bond Rate Boosted.

The bill permitting the sale of schoool bonds at six per cent maximum interest has passed the house, after already having been adopted by the senate, and will be effective upon publication.

The senate voted to permit the levying of a sufficient school millage tax to raise an amount equal to $80 per pupil in independent districts, and $100 per pupil in consolidated districts, and if the bill passes the house the revenue which may be raised for school purposes will be materially increased. Considerable opposition developed to the bill. It was urged that many school districts of the state were unable to meet expenses under the present limitations.

After passing the house, a bill calculated to extend the operations of the teachers pension law, now applicable only to the city of Des Moines and to Sioux City, to other cities of the state, was defeated in the senate.

The senate, by unanimous vote, passed the Darting bill permitting the use of primary road funds for the construction of bridges on primary roads, where deeemed necessary.

Hinshaw In Denial.

Former State Game Warden E. C. Hinshaw is the latest individual to come in for attention by the departmental affairs committee, and appeared upon request of the committee and the senate to explain the alleged sale of soft fish seined from the lakes of the state to the benefit of his own personal pocketbook. Mr. Hinshaw states that no law was violated in these sales, and that the transactions were with the approval of the state executive council.

So far the investigations so widely heralded have brought out very little of a really important nature. The most important charges so far are those against P. E. McLeneahan, state superintendent of public instruction, who admits the accepting of lecture fees for appearing before teachers institutions, although he had been informed by the state department of justice that such fees were illegal.

Although several rumors had been in circulation in regard to the state insurance department, no witness appeared to make any accusations against commissioner Savage, and so far as his department is concerned the probe is regarded as a flivver.

For the first time in the history of the state a bill legalizing boxing passed one of the branches of the legislature when the house voted to accept the Lake boxing bill, endorsed by the American legion. If the bill passes the senate ten round bouts, under supervision of a state commission of three members to be appointed by the governor, will be permitted. Strict supervision and the turning over of a percentage of the receipts to the state are provided. Passage of the bill in the senate is deemed likely.

Manufacturer on Defensive.

More than 150 manufacturers from all over the state appeared before a joint hearing of the labor committee to protest against the enactment of the proposed minimum wage law and minimum hour law for women. The manufacturers declared that they did not oppose the general principle of the law, but said its details would make it very difficult for the concerns to operate.

For State Tax Commission.

A State tax commission, to take over the present taxation powers of the state executive commission, and to exercise certain other powers, is provided in a bill introduced by Senator Pitt. The commission would include three members, named by the governor, but confirmed by the senate. The law would give the county assessors charge of equalization of taxation in their counties, and provides for the action of the board in equalization of assessments on property of corporations, railroads, and other organizations of a state wide or more than local nature.

Kendall Bills Lose.

Efforts of supporters of Governor Kendall to obtain passage of a law requiring the appointment of a woman as a member of the board of control ran into a snag when the senators snowed under a bill presented by Senator Whitmore requiring the naming of at least one woman on the board. Only a handful of senators supported the bill. Another bill directed at the governor was smothered in committee, this being one by Whitmore requiring that executive sessions of the senate be abandoned.

The governor, however, has had very little trouble with the present legislature, the refusal to confirm Mrs. Snider being the only example. Whether he will submit a new name, or insist that Mrs. Snider be confirmed is not yet a matter of public knowledge.

So far there have been no extremely bitter fights on any pending legislation, although there is evidence of a well defined division with a conservative minority of about one-third in both house and senate.

Ten days recess by the legislature is expected to bring the members back ready for the grand rush of the final six weeks of the sesssion. There is now no discusssion of any attempt to do much upon code revision at this session. Final adjournment is expected about April 20, and the date of the special session to revise the code will then be up to Governor Kendall.

Senator H. S. Van Alstine has introduced a bill requiring the board of supervisors in every county to employ a public health nurse for work in the public schools. The bill also provides for a state director of public health nursing. It has the endorsement of a large number of organizations interested in public health work, and has a good chance of passage.

A bill repealing the present law prohibiting the sale of cigarets in Iowa and providing for the licensing of their sale will be presented immediately after the recesss by Representative Horace Dodd of Delaware county. The present law forbidding the sale of cigarets is regarded as more or less of a dead letter, and many of the members feel that the sale should net the state substantial revenue.

The probable report of the committee on departmental affairs is being awaited with great interest. It is expected that this committee will recommend the consolidation of several departments of the state government, as suggested by Governor Kendall in his inauguration address. So far no bills of importance along this line have been presented, and the assembly has shown no great inclination for any radical upheaval in the state administration affairs.

Blue sky legislation is still marking time in committee. A drastic bill recommended by Walter Ramsay, secretary of state, has been materially amended in committee. A short bill giving to the attorney general's office more power in the prosecutions of companies and individuals dealing in suprious stocks or backing wrongful promotion enterprises.

This bill is intended to remedy the evil without attempting a large volume of legislation.

The senate passed the Whitmore bill for a reduction in the amount paid for an annual automobile license corresponding to the period of a year for which the car is purchased. That is, if a car is purchased three months after the first of January, the license is reduced one-fourth, six months, one-half, and so on. The bill of course does not affect the transfer of cars upon which the year's license has already been paid, or which have been in use during the entire year without payment of the license fee.

A novel bit of legislation along this line is being studied by Representative Springer, Senator Newberry, and others. This is a uniform per capita tax, to be levied upon every individual of legal age. The amount suggested is from $2 to $5. No one would be exempt, and foreign citizenship would not be an excuse. There would also be no exemption on the ground of sex, and employers would be required to collect the tax. Senator Newberry believes that as high as two million dollars annually could be collected by such a tax.

NEWS REVIEW OF CURRENT EVENTS

Organized Labor Defies United States Government in Matter of Injunctions.

IS READY FOR BIG FIGHT

"Bill of Rights" and Legislative Demands Issued—Harding Completes His Cabinet—America Protests Japanese Rule Over Yap—Near East Conference in London.

By EDWARD W. PICKARD.

Organized labor of America has thrown down before its "enemies" the gauntlet of challenge to a fight to a finish. The United States government is apparently included among those "enemies" and is boldly defied to enforce judicial injunctions in industrial disputes.

Under the leadership of Samuel Gompers the representatives of the national and international unions affiliated with the American Federation of Labor met last week in Washington and formulated their "bill of rights" and their demands on the government and the people. In these there is much besides the injunction matter, but that is perhaps the most important. A statement prepared by Mr. Gompers was issued in which the injunction as now used is denounced as unconstitutional and a pure usurpation of power and authority. The only remedy in the hands of the workers, continues the statement, "lies in a flat refusal on the part of labor to recognize or abide by the terms of injunctions which seek to prohibit the doing of acts which the workers have a lawful and guaranteed right to do or which seek to compel workers to do those things which they have a lawful and guaranteed right to refuse to do.

"This is the only immediate course through which labor can find relief, and this course it purposes to pursue. Labor realizes fully the consequences of such a course, but in the defense of American freedom and of American institutions it is compelled to adopt this course, be the consequences what they may."

Of course if this threat is carried out the result will be the arrest of great numbers of working men for violations of injunctions; and, presuming that the courts and government do not yield and that union labor brings into action all its resources, something little short of a state of rebellion will follow. Union labor thinks that its very existence as such is threatened by present tendencies and conditions. Other citizens must see that the threat is directed against the peace of the nation and all that that involves. Nor will the informed and thinking American accept as the truth the statement of Gompers, that only the Federation of Labor is saving the country from Bolshevism. The Reds have done and can do much mischief in America, but there is no real danger of their gaining control here or upsetting our government.

Public support and recognition is asked by the labor leaders for these propositions, comprising their "bill of rights":

The right of the working people to organize into trade unions for the protection of their rights and interests.

The right to, and practice of, collective bargaining by trade unions, through representatives of their own choosing.

The right to work, and to cease work, collectively.

The right collectively to bestow or withhold patronage.

The right to the exercise of collective activities in furtherance of the welfare of labor.

Their legislative program is summarized thus:

"Enactment by congress of legislation to protect the workers in their organized capacity against the concept that there is a property right in human labor.

"No application of the use of injunctions in industrial disputes where they would not apply in the absence of such disputes.

"Prohibition of immigration for not less than two years.

"More general application of the initiative and referendum in the political affairs of the United States and of the states.

"Removal by congress of the usurped power of courts to declare unconstitutional laws enacted by congress.

"Election of judges.

"Immediate restoration of exemption from, or the repeal of, all anti-combination and so-called conspiracy laws.

"Restoration of an adequate federal employment service.

"Administration of credit as a public trust in the interest of all the people.

"Repeal by the states of all industrial court laws and all restrictive and coercive laws, including the so-called open port law of Texas, and freedom from decisions of courts holding trade unions, and individual members thereof, liable in damages for the unlawful acts of others.

"Enactment by congress of a law declaring that labor organizations are not co-partnerships and shall not be so treated in law or in equity.

"Investigation by congress of the activities of so-called private detective agencies in the field of industrial relations."

President-elect Harding's announcement of his completed cabinet may not have aroused any loud cheers of enthusiasm, but it was received with quiet satisfaction and confidence by a large part of the public. Though the list of ten names does not include those of many men of towering eminence, it is felt by most Republicans, at least, that all the members of the new cabinet are men with ideas and opinions and that they will be actually the advisers of the chief executive. The only real surprise among the appointments was that of Edwin Denby of Michigan to be secretary of the navy. Not that he is not well equipped to fill the position, but he was barely mentioned in advance. The selection of Mr. Hoover for the portfolio of commerce was gratifying to the public, and that of Mr. Davis for secretary of labor pleased most of the organized labor forces of the country, though he is no longer directly connected with their activities.

Frank Lowden, having declined appointment, Illinois received no place in the cabinet. But many persons are hoping that Mr. Harding will persuade Charles Dawes of Chicago to accept the chairmanship of the commission he will name to reorganize the executive machinery of the government. This position, Mr. Harding holds, will be almost if not quite as important as a place in the cabinet.

The two great agencies of the allies—the supreme council and the council of the League of Natiops—began sessions last week, the former in London and the latter in Paris. The league council first took up the matter of amendments to the covenant, and, because the attitude of the incoming administration in America was in doubt, the question was referred to a committee which will not report before April. This gives Mr. Harding time to define his position on the league. Then the mandates were brought up for consideration, and again the United States, though not officially represented, made its influence felt. Ambassador Wallace sent word that our State department wished to present its views, and action was halted until the note from Washington arrived. This note, in substance, called attention to the fact that the United States has never given its consent that the island of Yap be included in the territories subjected to the mandate of Japan, and declares the government cannot regard itself as bound by the terms of that mandate. It asked the council to submit the question to a new investigation.

Secretary Colby also claimed for the United States an equal concern and interest with the other principal allied and associated powers in the disposition of the overseas possessions of Germany.

The net result, at this writing, is a decision to delay all mandate action until the May meeting of the league.

The conference in London dealt with the problem of the Near East and the possibility of revising the Sevres treaty. Turkish delegations representing both the Constantinople and the Angora governments were present and the first part of the week was wasted in their efforts to get together and present a detailed statement of their desires. They finally agreed on demands that Thrace, Smyrna and the Dardanelles be restored to Turkey, and objections to the political, economic and financial control exercised by the allies. However, Rechad Pasha speaking for both groups, assured the conferees that both sections would accept the decision of the allies. The demand that the custody of the Dardanelles be resigned again to the Turks caused much surprise and unfavorable comment, even among the French delegates, who have been generally on the side of Turkey in the present controversy. The Greeks remain uncompromising in their demand that the treaty of Sevres stand virtually unaltered, and it was considered possible the great powers might permit them to try to hold their positions in Turkey, though without assistance from the allies.

According to advices from Constantinople, the Bolshevists in the Caucasus region have begun warfare against the republic of Georgia and already have occupied considerable territory. First dispatches said the Reds, under command of Budenny, had captured Tiflis, the capital, but later it was reported they had been driven back from the city by the hastily gathered Georgian troops. There is little doubt of the ability of the Bolshevists to overrun Georgia and reach Erzerum, there establishing contact with the forces of Mustapha Kemal Pasha.

Another Red drive took place in Persia and resulted in the capture of Teheran, the capital, and of the shah himself. This exploit was carried out by several thousands of Persian Cossacks under Reza Khan, who landed on the south shore of the Caspian sea and marched to Kasbin and thence to Teheran. Nothwithstanding these movements in the east, the great bulk of the Russian Bolshevist army is on the west border preparing for the big spring drive there.

From German news sources comes the information that Montenegro, which has never ceased to protest against the loss of her identity in the formation of the new Jugo-Slavian state, has declared a holy war against Serbia. The message said two Serbian regiments had occupied Cetinje, the Montenegrin capital, and that the situation was considered serious.

While the "war" in Ireland was being carried on with renewed vigor by both sides, the house of commons last week engaged in long and exciting debates on the Irish question. At one time, in rejecting an opposition amendment by a vote of 257 to 88 the house placed its seal of approval on the government's Irish policy. Lord Robert Cecil made his debut as whip of the opposition party in an effective speech in which he demanded that a parliamentary commission make an impartial investigation of the alleged atrocities in Ireland. Sir Hamar Greenwood warned the house that the conspiracy of the Sinn Fein was now directed against England; and he told of a captured document which showed an appropriation of £30,000 a month for the "republican army," most of which money, he asserted, came from Irish-Americans.

Justice Cohalan of the Supreme court of New York, one of the most obnoxious of the anti-English Irishmen in this country, made himself more ridiculous than usual last week by voicing, in a public address, the opinion that the United States should demand of Great Britain that she make Canada free and forever remove the British flag from this continent.

A notable achievement in aviation was the carrying of mail from San Francisco to Mineola, L. I., in 33 hours and 20 minutes. Four planes, two from each coast, started, but only one finished. It was driven by seven different pilots.

When Furniture Is Dented.

For a dent in furniture, first oi all wet the part with warm water. Double a piece of brown paper into six thicknesses, soak in warm water and lay it over the dent. Then apply a hot flatiron until the moisture has quite evaporated. If the bruise has not gone, repeat the process until the dent is raised level with the surface.

THAT LITTLE SLIP ENOUGH

All Physician's Well-Planned Efforts to Conceal His Profession Came to Naught.

Doctor Smith, a well-known physician and surgeon from central Ohio, complained that he had not had a satisfactory vacation for many years. No matter where he went, sooner or later he was called upon for professional services. "But I'll fool them this year," he said. "I'm going so far away that I'll forget where I am from."

He crossed the prairie and the mountains and finally alighted from the stage at a little hotel far from his native state.

The fishing was good, the woods abounded with game, and the doctor congratulated himself upon his good fortune. The guests at the hotel seemed to be a jolly lot of business and professional men; no questions were asked, and each went and came to suit himself, yet there was a fine spirit of good-fellowship.

It was the evening of the fourth day after the arrival of the doctor, who had registered as John Smith, Smithsonville, U. S. A., that he was met in the lobby by the old landlord. "We have been looking for you, Doctor Smith. A lady was thrown from a horse a few minutes ago, and I think she has dislocated her shoulder."

At the first words the doctor's fishing tackle rattled to the floor, and he threw up both hands in complete surrender. "How? Where? Who on earth told you I was a physician?" he exclaimed.

The landlord's eyes twinkled. "You told us, sir, before you had been here twenty-four hours; not only that you are a physician, but that you are a surgeon as well."

The doctor's face was blank.

"You seemed to enjoy our cakes," continued the hotel man, "and at breakfast you called for a second order."

"Well?" snorted the doctor. "Do only physicians and surgeons call for orders of cakes?"

"No, many of our guests give second orders for cakes. But when a guest persists in addressing the waitress as nurse, I suspect that he has spent more time in a hospital operating room than he has in a country hotel."—Youth's Companion.

Geological Problem.

The formation of "Loess," a fine, yellowish, sandy clay found in various parts of the world, and reaching to the thickness of over a thousand feet in China, has given rise to much discussion and controversy among geologists. The presence of the shells of snails that feed on plants indicates the former presence of plants. Accordingly it has recently been suggested that the genesis of these remarkable deposits may be fully accounted for by wind action, coupled with the growth of plants which have caught and compacted with the blown dust and sand in the way that sand-dune plants do at the present day on our seashores.

Not in a Religious Sense.

In the zone finance office a letter was received inquiring about a bond which the soldier had purchased. His letter was rather incoherent and the office was unable to identify the case. So a letter went back to the soldier asking for more information and incidentally inquired whether it was a converted bond.

"Naw, the bond wasn't converted," wrote back the soldier, "and I don't want it messed up in religion either. You just send it on to me like 'twas."

Doctors Perform Unusual Feat.

An unusual demonstration of medical skill was given at Palo Alto, Pa., when two Pottsville doctors set the hyoid or horseshoe bone in the neck of a railroad man. A heavy beam had fallen across the throat of the patient and fractured this very vital bone which is not connected with any other bone and is movable when swallowing. The man was almost strangled by the odd accident.

Brazil Takes Forward Step.

Arrangements have been made by the English commercial delegation in Brazil whereby a number of Brazilian technical students will be placed in British factories in order that they may get acquainted with the manufacturing methods and so become well trained for positions afterward as agents in their own country.

Boxes to Hold 8,000,000,000 Cans.

One hundred million wood boxes were required to pack last year's output of the canning industries in the United States, estimated at 8,000,000,000 cans.

Troubles of a Poet.

An alleged anarchist arrested in Munich was identified as a poet and found not guilty—not guilty, that is to say, of being an anarchist.—London Punch.

Billiard Parlors for Women.

London, Manchester, Leeds and other large cities of England now have billiard parlors exclusively for women devotees of the green table sport.

The Reason.

"Why was one contractor preferred to another?"

"Because, while one took up an abstract proposition, the other put down the concrete.

The Right Step.

"They say the government is going to stop profiteering in shoes."

"There ought to be some such movement put on foot."

Horse Chestnut.

It is said that the name horse chestnut was derived from the fact that when the leaves of the tree fall there is a scar left on the twig in the shape of a horse shoe that bears marks resembling the nails of a shoe.

Teutons Use Willow Herb as Hemp.

German manufacturers have discovered that the willow herb which grows wild in Germany and also in this country and is commonly regarded as a weed can be used satisfactorily as a substitute for jute and hemp. They are encouraging the cultivation of the plant. The wild willow herb plants have been gathered extensively by school children during their vacations.—The Pathfinder.

Lines to Be Remembered.

The world deals good-naturedly with good-natured people.—Thackeray.

Equity.

British courts of equity are those of the lord chancellor, the vice-chancellor and master of the rolls, their office being to correct the operation of the literal text of the law, supplying its defects by the reasonable construction not admissible in a court of law.

Excusable.

When the mercury is past 95, you have our permission to say sweat instead of perspiration. — Arkansaw Traveler Cat.

Useful.

"Do you take cordwood in payment of subscriptions?" asked the caller. "Yes," replied the editor of the country paper, "provided it is in convenient lengths to throw at bill collectors."

Public Utilities and the public

Costs

Last week we named the main items that go to make up the cost of production of electric current. The g neral public knows what the principal items of expense are, but there are a large number of smaller items that in the aggregate amount to a total that is not realized by any one who has not gone into the subject with some thoroughness. These small items, if not taken into consideration, would spell the failure of any public service corporation. Added to the items already mentioned is the cost of distribution. Cost of distribution is another way of saying cost of delivery. It is freight on electric current, if you want to put it that way, and its cost is just as real as the cost of freight on hogs from Iowa to Chicago, and it might be added that there is more shrinkage on electric current that is being transmitted that on hogs that are beinf shipped by freight. Thesé facts are easily demonstrated, aud they are taken into account by all public utilities in arriving at costs. We shall go into this phase of the subject more at lenght in a later article.

The second general item of cost we have named in the production of public utilities service is the "Cost of Maintaining the Investment," and it is entirely different nature from those already mentioned. We don't want the reader io confuse this with the cost of maintaining the plant, which is quite another matter, but it is equally vital. It takes large sums of money to operate a public utility, more than any one man possesses, and hence it is not only necessary to collect this money from sources, but it is necessary to borrow large amounts. Every dollar a public service corporation uses in it's business costs it a good rate of interest, sometimes a high rate of interest. Some of the money is borrowed on mortgage represented by bonds, some is secured by stock, and some is borrowed at the bank. To collect money in this way costs in both time and money, and in the rate of interest that must be paid the loaner, If every corporation had all the money necessary to carry on it's business, this expense would be eliminated, but no corporation has, and the "Cost of Maintenance of Investment," must be reckoned with as a part of production. This accounts for the item "Interest on Investment" that appears in every schedule of cost, and it is just as much a part of the cost as money paid out for material or labor.

We are aware that there are many business men who will claim that the charge of interest on the investment is not a fair one to be included in the cost of production, but we thiuk we have only to point out that the bondholders, representing men and women of all classes, capitalists, business men, teachers, widows, everyone who is looking for a safe investment for their savings, must be paid for the use of their money or it would not be forthcoming, and a public service corporation would not be possible. Interest on the investment is generally the first necessary item of cost.

We shall discuss the matter of "Cost of Maintaining the Investment" a little more at lenght in our next installment.

MONEY TALKS

The man who knows the value of money, puts it where he knows it is safe

The money you put in the bank is safe in two respects. It will not be spent just as the notion seizes you and it will not be lost or stolen.

And when you begin putting money in the bank, you realize really what a treasure and source of power it is' and desire to make the sum grow by addiug to it.

The money banked not only satisfies your just notion of thrift but intensifies your desire to be thrifty.

5 per cent interest paid on savings.

Vegetable Diet.

There is no doubt that human beings can get along very well on a vegetable diet. Some of the strongest men in the world (the Oriental porters) live almost wholly on rice and the various fruits. The horse and the ox, noted for their strength, are purely vegetarian. The old idea that in order to be strong one must devour great stores of meat is no longer considered scientifically orthodox.

Articles of Incorporation of the Klemme Co-Operative Grain Company, Klemme Iowa

---

ARTICLES OF INCORPORATION

We, whose names are hereto subscribed, hereby associate ourselves into a body corporate under the provisions of ChapterI, Title IX, of the Code of Iowa, and acts amendatory thereof, particularly Section 1641-rl 1641-20, inclusive; assuming all the powers, rights, and privileges granted bodies corporate, and all the duties and obligations imposed by said statutes, and being bound thereby, adopting the following articles of incorporation, to-wit:

ARTICLE I. The name of this corporation shall be THE KLEMME CO-OPERATIVE GRAIN COMPANY

ARTICLE II. The principal place of business of this corporation shall be at Klemme.

ARTICLE III. The general nature of the business of this corporation shall be buying, selling and handling of grain, coal, lumber, live-stock, and all other farm produce and supplies; also, the operation of flour and feed mills and the purchase and sale of products thereof; also to act in the capacity of a general commission house to purchase, erect, operate, maintain, and control warehouses, elevators, mills and buildings of every description, and to retain, sell, convey, lease, mortgage, encumber, and improve such real estate, buildings, and personal property as the business of the company may require; also, to prepare and publish such statements, bulletins, or periodicals, and do all other acts, not contrary to the statutes of the state, as shall be necessary to the proper carrying out of the purposes herein stated, on the co-operative plan as provided by law.

ARTICLE IV. The authorized capital stock of this corporation shall be $60,000, divided into 600 shares of the par value of $100, of which not less than $20,000 shall be subscribed and paid for at the time of commencement of business of the corporation, the remainder of said capital stock to be issued as paid for, at such times as the board of directors may hereafter provide. Said shares of stock are transferable on the books of the corporation. The stock of this corporation shall be non-assessable. No shareholder in conducting the affairs of this corporation shall have more than one vote.

ARTICLE V. The corporate period of this corporation shall begin on the date the Secretary of State issues a certificate of incorporation and shall continue for a period of twenty years from said date, with the right of renewal, unless sooner dissolved by a two-thirds majority vote of the stockholders at any annual meeting, or at a special meeting called for that purpose, provided the corporation shall not be dissolved by less than a majority of the stockholders of the corporation; or by unanimous consent as provided by law.

ARTICLE VI. The affairs of this corporation shall be conducted by a board of directors, as provided in the by-laws, elected by the stockholders from their own number at each annual meeting, and who shall hold office, have such powers and perform such duties as may be provided in the by-laws.

Until the annual election on the first Monday in July, the following shall be the directors of this corporation:

NAME	ADDRESS
H. J. Stille	Garner, Iowa
Valentine Josten	Klemme, Iowa
Herman Stromer	Klemme, Iowa
C. A. Arnold	Klemme, Iowa
E. J. Arnold	Klemme, Iowa
John Larson	Klemme, Iowa
Geo. Zinn	Klemme, Iowa

ARTICLE VII. The private property of the stockholders of this corporation shall be exempt from the corporate liability except to the extent and in the manner provided by he laws of the State of Iowa.

ARTICLE VIII. This corporation shall have power to borrow money from time to time, on a vote of a majority of all the directors at any regular or special meeting, and the property, real and personal, of the corporation may be mortgaged to secure such sums borrowed, provided that the corporation shall at no time, have, or subject itself to indebtedness exceeding two-thirds of the paid-up capital stock.

ARTICLE IX. There shall be an annual meeting of the stockholders of this corporation which shall be held on the first Monday in July in each year.

ARTICLE X. The corporate seal shall be a circular disc containing the name and address of the company in the outer circle, and in the center the words, "Incorporated and Co-Operative," with the year of organization.

ARTICLE XI. The corporation may make and alter by-laws at pleasure, and may authorize the board of directors to do so, subject to such restrictions as may be deemed advisable

ARTICLE XII. Amendments to these articles of incorporation may be made at any regular stockholders' meeting, or at any special meeting of stockholders present, provided the proposed amendment shall have been submitted in writing to each of the stockholders at least thirty days previous to said stockholders' meeting, or shall have been submitted to a previous stockholders' meeting.

SIGNED:

said persons being personally known to me as the identical persons whose names are subscribed to the foregoing Articles of Incorporation, and each for himself acknowledged the same to be his free and voluntary act and deed for the uses and purposes therein expressed.

Witness my hand and notorial seal at Klemme in the county of Hancock, State of Iowa, the day and year last written above.

(SEAL) Fred A. Arnold, Notary Public

BY-LAWS

ARTICLE I. Directors—Number —How Elected—To Elect Officers—Must be stockholder—Removal—Vacancies—Compensation.

Section 1—The affairs of this corporation shall be managed and controlled by a board of seven directors, elected from the stockholders from their own number at each annual meeting, who shall hold office until their successors are elected and qualified.

Section 2—Directors shall be elected by ballot. They shall be elected at the first annual meeting as follows: Three for three years, two for two years, and two for one year, thereafter each director shall be elected for a three year period.

Section 3—The directors shall, within ten days from the time of their election, meet and choose by ballot from their own number a President, a Vice-President, and a Secretary-Treasurer, who shall hold office for one year, or until the election and qualification of their successors.

Section 4—If any director shall cease to be a stockholder, he shall cease to be a director.

Section 5—A majority of the share holders present at any annual meeting or at any special meeting called for that purpose, provided thirty days notice thereof has been given, shall have power to remove any director or officer for cause, and thereupon such director or officer shall cease to be a director or officer of this corporation.

Section 6—The board of directors may remove any officer for cause, by a vote of two-thirds of all the members of the board, and shall fill any vacancy caused by such removal.

Section 7—The absence of a director from three successive meetings of the board shall be deemed a resignation as director, unless such absence is decided to be unavoidable by a majority of the board. Whenever any vacancy shall occur in the membership of the board by death, resignation, or otherwise, the remaining directors shall fill office until the next annual meeting of the stockholders.

Section 8—The directors shall receive as compensation for their services $2.50 per meeting for each meeting attended, payable at the end of each fiscal year, with the exception of the Secretary-Treasurer, whose salary shall be fixed by the board of directors.

ARTICLE II. Board of Directors — Duties — Powers — Meetings — Quorum.

Section 1—The board of directors shall employ a manager of the company who shall have supervision and management of the business of the corporation, under their direction and control.

Section 2—The board of directors shall have and exercise full supervision and control over the affairs of this company. It may, in addition to hiring its regular manager and fixing his salary, employ such other persons as it finds necessary, fix their compensation and prescribe their duties; shall require any person who receives or has control of the property of the company to furnish suitable bond; shall provide such books as are necessary for the accounts of its business; shall provide suitable fire-proof protection for said books; and generally, may do any and all things necessary and convenient in the exercise of such supervision, control and powers, not contrary to these articles of incorporation, by-laws, and the statutes of the State of Iowa.

Section 3—The general method of doing business by this company shall be a profit basis. The purpose shall be to secure the highest reasonable price for produce and the lowest reasonable retail price for merchandise in keeping with business conditions. But it shall be the duty of the board of directors and of the manager to conduct the business of this company on a margin of profit that shall be large enough to insure at least a fair rate of interest on the invested capital and to provide further funds as outlined hereinafter in Article VI, Section 1, with reference to earnings.

Section 4—It shall be the duty of the board of directors to keep in close touch with the financial condition of this company, to appoint a committee from their own number to examine the books, records, documents, and correspondence of the corporation, either monthly or quarterly at the discretion of the board; but they shall at least once a year, procure a reliable accountant to audit the books and accounts of the company. They shall also take, or cause to be taken, an annual invoice of all property and merchandise belonging to the company, and shall render to the stockholders at the annual meeting, a report of the year's business, together with the financial standing of the company. In preparing these yearly statements, depreciation of property shall be preserved and filed, one copy with the President, one at the office of the company, and one with the Secretary-Treasurer.

Section 5—The board of directors shall hold regular monthly meetings on the last Saturday of each month.

Section 6—Special meetings of the board of directors may be called by the president at his discretion, or shall be called by him upon the written request of a majority of the members of the board.

Section 7—At all meetings of the board, regular or special, a majority of the directors shall constitute a quorum, and a majority vote of those present shall decide all questions. Voting by proxy at any directors' meeting shall not be allowed.

Section 8—It shall be the duty of each director to attend all meetings of the board of directors and of the stockholders.

ARTICLE III. Duties of Officers and Managers.

Section 1—The president shall preside at all meetings of the shareholders and at all directors' meetings. He may call special meetings of the board at his discretion, and on the request of a majority of the directors, he shall call special directors' meetings. He may, with the consent of a majority of the board, call a special stockholders' meeting, and shall do so upon the request of a majority of the board or the request of twenty stockholders. He shall sign all certificates of stock, sign all bonds, contracts, or other instruments in behalf of this society when so directed by the directors. He shall be the custodian of all bonds given to the company, and shall be the proper person to bring suit thereon.

Section 2—The vice-president shall perform all duties of the president in his absence or inability to act.

Section 3—The duties of the secretary-treasurer shall be to keep a true and complete record of all the meetings of the directors and of the stockholders; to sign all certificates of stock and affix the seal thereto; to sign all orders and other papers of the corporation when ordered by the directors; to keep a true record of all stock issued or transferred; to notify each officer or stockholder of all meetings as provided in these by-laws; to receive and hold all moneys or notes belonging to the board of directors, and keep the same on deposit in such bank or banks as the board may designate and pay out said moneys only upon the order of the board. When ordered by the board of directors, he shall give bond in some reliable surety or bonding company to be paid by the corporation. He shall render to the directors whenever required by them a correct report of the business of the company and shall make a complete report at each annual meeting of the shareholders.

Section 4—It shall be the duty of the manager to have general oversight and control of the business of the company, subject, however, to the action of the board of directors. He shall attend to the buying and selling of all commodities the company may see fit to handle. He shall collect all accounts due the company and sign all receipts. The manager shall give his whole time and attention to the business of the company. He shall have charge of its property and shall at all times keep same in good repair, and well and fully insured. He shall faithfully account, when requested to do so by either the directors or the stockholders, for all money and property given into his control. He shall keep accurate records and books of all transactions, dealings, and business of this company, and a copy of all correspondence, and preserve all books, contracts, papers, statements, and documents pertaining to the business of said company and exhibit same to the directors whenever and as often as they may call for them. He shall turn over all books, papers, moneys, documents, correspondence, etc., and affects of this company to the directors whenever called for, or to any person whom the directors may designate. It shall be the duty of the manager to file with the board of directors at their monthly meeting, a full and complete record of all business transactions of the company during the preceding month, it being the purpose of this report to show in so far as possible, the exact financial condition of the company. He shall give good and sufficient bond, as may be required by the board of directors, for the faithful performance of his duties as contained herein, cost of such bond, if with a surety company, to be paid by this corporation. He shall do business with such depositories or banks as the board shall choose.

During the time of his employment by this corporation, he shall not trade or deal in futures in grain or other commodities on any board of trade, whether in his own name or the name of any other person, or in the name of this corporation. The manager may, however, when in his judgment the best interests of this company demand it, deal in grain futures on any regular board of trade in what is known as "Hedging." That is to say, he may, when grain is bought or contracted for future delivery, sell futures against the same on any regular board of trade, when he considers it a better transaction than selling the cash grain to arrive; or, in case grain is being stored by the company, same having been delivered at the elevator but not yet sold to the company and the needs of the business require that this grain be shipped out to provide bin room, he may buy a future on any regular board of trade to the extent of the stored grain shipments, as an insurance or protection against loss; provided, however, that all such hedges shall not be done by the manager without the knowledge and consent of a majority of the board of directors.

ARTICLE IV. Stockholders.

Section 1—The fiscal year of this society shall end on the last Monday in June, beginning with the last Monday in June, 1921.

Section 2—The annual meeting of the shareholders shall be held on the first Monday in July of each year. Each shareholder shall be notified of the time and place of said meeting by the secretary, who shall mail a written or printed notice to the last known address of each shareholder at least ten days prior to the date of the annual meeting.

Section 3—Special meetings of the stockholders may be held as provided in Article III, Section 1, of these by-laws.

Section 4—Twenty-five shareholders personally present, shall constitute a quorum at all meetings of the stockholders, but a less number may adjourn from time to time.

Section 5—Absent members may be permitted to vote by mail in cases where it is desired to consider some specific question, provided said question is submitted in writing at least thirty days prior to the date set for said meeting. In such cases, the properly signed, written vote, mailed to the secretary, or presented by some other person to him, shall be counted exactly the same as if they were present in person, but they shall not assign their voting power to another member by proxy.

Section 6—Roberts Rules of Order shall govern the proceedings at all meetings of shareholders or directors.

Section 7—The order of business at all shareholders' meetings shall be as follows:

1. Call to order. 2. Roll call of stockholders. 3. Reading of minutes of last meeting. 4. Report of committees. 5. Reports of Secretary-Treasurer. 6. Report of manager. 7. New business. 8. Election of officers. 9. Adjournment.

ARTICLE V. Stock.

Section 1—Any person so situated that his membership will be mutually beneficial to himself and to the company, may become a member by purchasing one or more shares of stock.

Section 2—Upon the assignment or transfer of any share of stock, the purchaser or assignee shall immediately present the same to the secretary-treasurer, who shall report the transaction at the next meeting of the board of directors, and when approved by the board, the secretary-treasurer shall make the proper transfer on the books. The assignees or purchaser then becomes a member of the corporation. No transfer of stock in this corporation shall be valid except as between the parties until it is entered upon the books of this corporation. The purchaser or assignee must surrender the old certificate which shall be pasted in the stock certificate book on its respective stub, and a new certificate issued therefor in the name of the purchaser, who, by accepting thereof, agrees to all the rules and laws of the company.

Section 3—No shares of stock shall be transferred until all claims of the company against the owner thereof shall have been paid.

Section 4—No stock in this corporation shall be issued until the corporation has received payment in full therefor at par, in cash or property, provided, however, that when stock is to be issued for anything other than money, it must be subject to the approval of the Executive Committee of Iowa, as provided in section 1643 of the supplement to the Code, 1913, and any amendments thereto.

Section 5—Any person desiring to dispose of his stock in this company shall first deposit same with the secretary-treasurer of the company to be sold under the direction of the board of directors for such person, if the same is not sold within thirty (30) days after the date of such deposit, it shall be returned to the owner thereof who may dispose or sell the same without restriction or limitation by the Company.

Section 6—No stockholder shall sign any bond, or sign, endorse, or guarantee any note, bill, draft, contract, or in any way assume any liability, written or verbal, for the benefit of this corporation, without the written consent of a majority of the directors.

Section 7—The acceptance of a stock certificate shall constitute the assent of the shareholder to these by-laws, and each member agreed to abide by them and all future amendments legally enacted by the Company.

ARTICLE VI. Apportionment of Earnings.

Section 1—Annually, immediately after the end of the business year, the board of directors, subject to revisions by the association, at any general or special meeting, shall apportion the earnings of the company for the year as follows:

First. There shall be set aside not less than ten per cent of the net profits for a reserve fund, until an amount has accumulated in said reserve fund equal to 50 per cent of the paid up capital stock.

Second. Five per cent of the profits shall be set aside for an educational fund, to be used in teaching co-operation.

Third. Dividends shall be made upon the paid up capital stock to be determined by the board of directors not to exceed 10 per cent.

Fourth. The remainder of said net profits shall be apportioned by uniform division upon the amount of purchases and sales of the shareholders, and upon the wages and salaries of the employees.

Section 2—The uniform dividend above referred to shall be determined upon grain upon the bushel basis, and upon merchandise upon the dollar basis.

ARTICLE VII. Miscellaneous.

Section 1—Corporation Funds. The funds belonging to this corporation shall not be loaned.

Section 2—Credit. Credit to purchasers shall not be extended for a longer period than sixty (60) days. All accounts unpaid at the expiration of said period of time shall draw six per cent interest until paid.

Section 3—Shipping Clause. When any member or group of members of the corporation has grain which he wishes to ship through the corporation, he may do so, the corporation to charge a reasonable amount as commission for handling, said commission to be determined by the board of directors; provided, said member or group of members delivers the grain to the elevator in car load lots so as not to interfere with the general elevator business.

ARTICLE VIII. By-Laws.

Section 1.—Invalidity. The invalidity of any portion of these by-laws shall in no way affect any other portion thereof which can be given effect without such invalid part.

Section 2—To be Posted. A copy of the by-laws of this company with the names of all its officers shall be posted in its principal place of business subject to inspection, as is provided by law.

Section 3—Amendments. These by-laws may be amended at any regular meetng of the stockholders, or at any special meeting called for that purpose, by a majority affirmative vote of the shareholders present, providing a ten days notice in writing is sent to each shareholder.

Titan Tractor
Back to the Old Price
$1,000

WE have reduced the price of the Titan 10-20 to its former low price of $1,000 f. o. b. Chicago. This is the same Titan tractor which 75,000 farmers have put into remarkably successful service — the same tractor, *plus 1921 improvements and additions.*

A full set of removable extension angle lugs sold as extra equipment under the former $1,000 price is now included without extra cost. Fenders, Platform, Angle Lugs, Throttle Governor, Friction Clutch Pulley, Wide Range Adjustable Drawbar, Water Air Cleaner—all are included in the $1,000 price.

International 8-16 and 15-30 Tractors Also Reduced in Price

Farmers wno want a lighter tractor, built like a high-grade automobile but with the same sturdiness and reliability of the Titan, can now get the International 8-16 at $1,000 f.o.b. Chicago. We have long restricted the sale of this model to a limited territory, but increased production enables us to release it to all sections of the United States.

The International 15-30 tractor has been reduced to $1,950 f. o. b. Chicago.

Bear in mind that we give unequalled service, made possible through 92 branch houses and thousands of local dealers, to every International tractor owner, no matter where located.

Prices of Other Lines Reduced

Prices have also been reduced on chilled plows, tractor plows, cream separators, kerosene engines, seeding machines, International threshers, harvester-threshers, wagons, hay presses, and a number of other lines on which your dealer can give you full information.

1. All tile to be delivered at the ditch side subject to inspection and to be delivered only as ordered by the Construction Engineer.

2 All tile must pass the specifications for drain tile of the American Society for Testing Materials. Tile in sizes 6" to 10" inclusive must pass the specifications for Farm Drain Tile.

Tile in sizes 12" to 26" must pass the specifications for Standard Drain Tile. Concrete tile will be allowed only in sizes 20" to 26".

3. Whenever the tile improvement is layed in existing ditches the average depth will be computed from the natural surface of the ground and the contractor will be required to backfill the trenches to the height of the natural surface of the ground so that the existing ditch will be completely filled.

4. Complete specifications are on file with the county auditor.

5. Work to be commenced thirty days from date of letting of Contract or as soon as an outlet is furnished. Contract will be completed by June 1, 1922.

All ditches and drains to be constructed in all respects in accordance with the plat, profile, and specifications of the District filed by the Engineer in the Auditor's Office subject only to such changes and alterations as may be made as provided by law.

Sealed bids will be received at the office of the County Auditor of Hancock County, Iowa, up to 1 o'clock P. M. of the 14th day of April, 1921.

The price must be stated in the bid in figures, and permission will not be granted for the withdrawal or amendment of any bid after once presented.

All bids must be made at a fixed price per station of 100 feet for each size tile and also a fixed price for section complete in all respects including intakes and headwall and must also include the schedule of overdepth adopted by the Board of Supervisors of Hancock County and on file in the Auditor's Office for possible overdepth or underdepth beyond the average depth specified.

Bids will be received on any one or all sections, for tile alone, for construction work alone, or for both tile and construction.

The Board will, at their decision, let the work as a whole or in sections to the lowest responsible bidder, reserving the right to reject any or all bids and also the right to adjourn time of awarding contract is reserved.

Each bid must be accompanied by a cash deposit or certified check in a sum equal to ten per cent of the total amount of the bid, as a guarantee of the good faith of the bidder.

ALL BIDS NOT MADE IN CONFORMITY TO THE ABOVE REQUIREMENT WILL BE REJECTED.

The party to whom any contract is awarded will be required to attend at the office of the Auditor of Hancock County, Iowa, within ten days after said award and execute a contract thereby agreeing to all the provisions, terms and conditions thereof and shall also file with the County Auditor a bond subject to his approval for a sum equal to twenty-five per cent of the amount of his bid, and in case the party to whom any work is awarded fails to enter into this contract and furnish bond within ten days as herein required the deposit of such party shall thereupon become forfeited to Hancock County Drainage District No. 7, together with all rights under said award.

The deposit of the unsuccessful bidders will be returned to them within twenty-four hours after demand, and the deposit of the successful bidder will be retuned to them upon their executing the contract and filing with the County Auditor the bond as herein required.

By order of the Board of Supervisors.

Dated at Garner, Iowa, this 17th day of March, 1921.

Chris Jacobs,
County Auditor.

(SEAL)

Notice is hereby given that at a Special Meeting of the Stockholders of the State Savings Bank, Klemme, Iowa the following proceedings were had and duly and legally taken, viz:

WHY ONE'S TEETH "CHATTER"

Certain Set of Muscles, Affected by the Cold, Get to Work, Irrespective of Will.

The little muscles which close the jaw are acted upon by the cold in such a way that they pull the jaw up and then let it fall by its own weight. This, repeated many times, causes the teeth to click together and produce what we know as "chattering."

We think of it in connection with our teeth because it is the teeth which make the sound, but the cause lies in the muscles which we use in chewing and in opening our mouth when we speak.

The chattering occurs in spite of the will or brain. We have little control over it, and can stop it only by clenching the teeth. It is really a mild variety of spasm caused by the cold, which acts on the jaw muscles in much the same way that some poisons produce muscular spasms which cannot be controlled.

Spoiling the Metaphor.

Mr. Oldsport—Do you doubt my love? Look in my eyes and read it there. The eyes are the windows of the soul.

Miss Goldentide—Windows of the soul! That's so. Your eyes do look awfully glassy.

In "getting even" the chief requisite is to wait; and then it isn't worth while.

HOW ONION AFFECTS EYES

"Gass" Given Off Causes Smarting and the Organ Hastens to Take Relief Measures.

The "gas" given off by a freshly peeled onion makes itself apparent in two ways—by a strong aroma which is at once apparent to the sense of smell, and by a smarting of the eyeballs, which, being very sensitive, are hurt by this substance to which they are not accustomed.

The nerves of the eye immediately signal the brain to turn on the tears or liquid which is secreted by the body as a natural eye-wash. This, flowing over the eyeball, forms a curtain which prevents the onion "gas" from coming in direct contact with the nerves and thus injuring them.

Tears are present in the eye at all times. When we wink, a tiny drop of the tear-liquid is smeared across the ball of the eye and washes off particles of dust which may have accumulated. But when this liquid is produced so rapidly that it cannot be carried off by the trough at the lower part of the eye, the tears overflow and run down the face.

Excellent Reason.

"Have you any reason for doubting what I say?"

"I have."

"What is it?"

"I don't believe you."—Boston Transcript.

INSTANT POSTUM

This pure cereal beverage is made of prime wheat, bran and molasses.

Satisfying, pleasing, and nothing in it to do harm.

Instant Postum has a rich coffee-like flavor.

It is economical and convenient

Postum comes in two forms—

Postum Cereal (in packages) is made by boiling a full twenty minutes.

Instant Postum (in tins) made instantly in the cup by the addition of hot water.

"There's a Reason"

Sold by grocers everywhere

Made by Postum Cereal Co., Inc., Battle Creek, Mich.

CARE OF EWES IN LAMBING SEASON

Success of Flock Depends Greatly on Protection Given to Mothers and Lambs.

PROPER FEED IS ESSENTIAL

Separate Pens Should Be Provided With Openings to Permit Ewe to See Other Sheep, Thus Preventing Nervousness.

(Prepared by the United States Department of Agriculture.)

The lambing season is the time for particular care of the mothers of the flock, and precautions against any illness or injury either to ewes or lambs.

The ewe should have a quiet, dry, sufficiently warm place in which to bring forth her young, should be insured against molestation by other sheep, and should be guarded against possible mishap.

Avoid Heavy Feeding.

Care should be taken before lambing time, specialists of the United States Department of Agriculture advise, to see that the ewe is not fed too heavily, as heavy feeding is likely to cause udder trouble. The wool should be clipped from around the teats, to enable the lamb to find them readily.

Just before lambing time, the ewe will become restless and show sunken places in front of the hips. She should be placed in a separate pen, which can be made of two panels of board fencing about four feet high, hinged together at right angle and hooked or otherwise fastened to the walls of the sheep shed. These panels permit the ewe to see the other sheep, thus preventing her from getting excited and nervous. At the same time, they protect the lamb from trampling, give the ewe opportunity to get acquainted with her offspring and reduce the danger of disowning later.

The lamb that is born strong and vigorous will need little care. If conditions are not so favorable, first-aid measures will be necessary. In cold weather lambs become chilled and die, unless prompt remedies are used. Wrapping the lamb in hot flannel cloths, which are renewed as often as necessary, is an excellent method of warming it. Another method is to place the lamb for a few minutes in water as hot as the hand will bear; then dry with cloths and wrap for an hour or two in fresh cloths or a sheepskin. Milk should be given freely and the lamb returned to the ewe and allowed to suckle as quickly as possible.

Well-Nourished Lambs Give Little Trouble in Rearing.

Little trouble is experienced with disowned lambs when lambing pens are used. With a ewe that refuses to own her lamb it is sometimes sufficient to draw some milk and rub it upon her nose and also upon the rump of the lamb. A heavy milking ewe with only one lamb sometimes can be persuaded to adopt an orphan or a disowned lamb of a lighter milking ewe.

After lambing, the ewes should be watched to see that their udders are in good condition. Ewes should be kept in lambing pens for about three days after lambing and then turned into a pen by themselves, where they can have special feed and care. After lambing they should be fed lightly at first, being put on full feed about the third or fourth day.

Troublesome Ailments.

Well-nourished lambs from properly fed ewes have little difficulty, but some troublesome conditions are to be expected in any flock. Constipation is one of the most frequent ailments. It is indicated by straining and distress, and can be remedied by a teaspoonful of castor oil. Indigestion is shown by distress and frothing at the mouth. This also usually can be relieved with castor oil. Scours can best be cured by giving one-fourth ounce of cooking soda, one ounce of sulphate of magnesia and a pinch of ginger in flaxseed tea or gruel, following the dose in four hours with two ounces of linseed oil. Sore eyes are common and can be relieved with a few drops of silver nitrate solution known to all druggists as "eye wash," or 15 per cent argyrol, or even a very small drop of pure sheep dip.

GOOD CLOVER SEED IS PLUMP

Color of Individual Seeds Ranges From Violet to Light Yellow and Fairly Uniform.

Good red clover seed is plump or well filled, bright with a slight luster, the color of individual seeds ranging from violet to light yellow. The individual seeds should be at least medium sized and fairly uniform, free of adulterants of any kind and from seeds of noxious weeds.

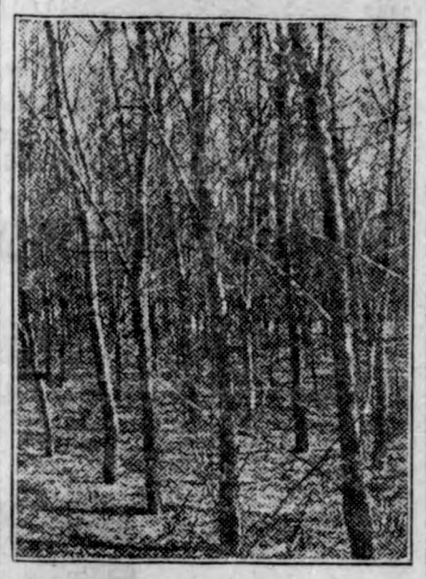
FARM WOODLOTS ARE EASILY OVERLOOKED

Firewood Ranks Sixth in Value as Farm Crop.

Power-Driven Log Saw Supplants Crosscut and Buck, Making Task of Cutting Easy and Pleasant —Easy to Move About.

While farmers have watched the prices of corn, wheat, live stock and other farm products go down, down, down, many of them may have overlooked the one farm commodity that has not only held up in price, but which is in great demand and which offers splendid cash profits right now when they are needed most. This crop is firewood and it is just ripe for "picking." Right now is the time for farmers to harvest their firewood! Although neglected by many, statistics show firewood to be the sixth farm crop in value, being headed only by corn, wheat, cotton, hay and oats.

If this were still the age of the crosscut and the bucksaw, this suggestion of sawing wood for profit would be rejected as too suggestive of backache and blistered hands. But in these modern times the power-driven log saw—a machine light in weight, easily moved and dependable—has come to supplant the crosscut and bucksaw forever and to make the once hardest of all farm jobs an easy and pleasant task. With such a machine as is now on the market, the farmer can earn the ready cash he must have to keep things going while congress, bankers and others debate over his and the nation's problems.



Black Locust Plantation—Recommended for Farm Woodlots.

In a utilitarian sense, timber unused is timber useless to mankind. Trees are a vegetable crop, and like others of their kind, they grow to maturity, decay and die—a total loss unless they are harvested and converted to the uses for which they are best adapted.

On nearly every farm in most sections of the country there is timber in more than sufficient quantities for home use. There are live trees that need to be taken out to give room for younger ones to grow, or to clear the land for cultivation; there are dead trees that are allowed to fall and decay, and on thousands of farms the banks of rivers and creeks are lined with logs and other driftwood.

The old way of hauling logs to a saw rig made timber work impracticable as well as unprofitable. But now that there are log saws that can be wheeled like a barrow almost anywhere and can be operated on rough, marshy, brush-covered ground, wood can be cut by machinery into easily handled lengths and sold at the high prices that such fuel is now bringing. The present situation, with wheat, corn and other crop products at an unprofitable level, has caused many farmers to go after these timber profits they have been overlooking.

SOIL PREPARATION FOR RAPE

Early Planting Will Generally Give Best Results, as It Is Adapted to Cool Weather.

Rape can be planted just as soon as the ground can be prepared for it in the spring; usually the early planting will give the best results. It is naturally adapted to a cool season and is hardy enough to withstand pretty hard frosts. Usually it may be planted as early as the middle of April and successive plantings may be made all through the summer and early fall.

GROWING COWPEAS FOR SEED

Highly Profitable in Localities Suited to Production of Crop, Say Federal Specialists.

Localities well suited to the production of cowpeas will find it highly profitable to grow seed on a large scale, especially if the best machinery for handling the crop is used, say specialists of the United States Department of Agriculture.

SUGAR BEETS YIELD PROFIT

No Other Crop on Commercial Scale in Temperate Zone Furnishes as Much Human Food Per Acre.

An average acre of sugar beets yielding ten tons produces besides the by-products, 2,500 pounds of granulated sugar. No other crop in the temperate zone raised on a commercial scale furnishes as much human food per acre.

WRIGLEY'S

"After Every Meal"

Get thrice-daily benefit from this low-cost aid to appetite and digestion

It keeps teeth white breath sweet and throat clear

Makes your smokes taste better

The Flavor Lasts

Teaching a calf to drink from a pail requires all the religion a man can have.

The surest way to get rich is to keep up business and keep down expenses.

Ask Your Dealer

ASK your local dealer to recommend a practical decorator. If you are unable to secure one you can do the work yourself, tinting and stenciling your walls to give beautiful results.

Alabastine

Instead of Kalsomine or Wall Paper

Alabastine is a dry powder; mixes with cold water; directions on each package. Used on plaster, wall board and all wall surfaces. White and artistic, durable tints. Cross and circle printed in red on each package.

SPECIAL STENCIL OFFER

We will supply cut stencils to any user of Alabastine—one stencil for each room requiring not less than two packages, if you will send the large words ALABASTINE cut from the face of the packages over the cross and circle, accompanied by 15c in stamps or silver for each stencil desired, covering postage and packing. Write for free booklet, "Nature's Beautiful Tints."

Neglected Colds are Dangerous

Take no chances. Keep this standard remedy handy for the first sneeze.

Breaks up a cold in 24 hours—Relieves Grippe in 3 days—Excellent for Headache

Quinine in this form does not affect the head—Cascara is best Tonic Laxative—No Opiate in Hill's.

ALL DRUGGISTS SELL IT

Pure, Rich Blood Will Keep Your Body Vigorous and Healthy

When impurities creep into your blood the first symptoms are usually a loss of appetite, followed by a gradual lessening of energy, the system becomes weaker day by day, until you feel yourself on the verge of a breakdown.

Nearly everybody needs a few bottles of S. S. S., the great vegetable blood remedy, to cleanse out all impurities about twice a year. It is an excellent idea to take this precaution to keep the system in a vigorous condition so as to more easily resist disease to which every one is subject. S. S. S. is without an equal as a general tonic and system builder. It improves the appetite and gives new strength and vitality to both old and young.

Crystal cafe Meals to tramps 1.10

C. W. Wiles, T. Blank, and F. H. Ridder were appointed judges and N. L. Palmer and A. G Koerner were appointed as clerks of election to be held March 28th, 1921

SEWING wanted. Mrs. Gilbert Schafer. tf.

FOR SALE—One horse coming 5 years old, weight 1300; set of new breeching harness; ten heavy 1½ yr. old cattle. H. Beek. 2wp.

Parents' Problem.

Should boys be allowed to play practical jokes. "Boys will be boys!" Teach them not to go too far; not to give pain; make clear that a joke is funny—something at which every one concerned can laugh. Further than this do not go in the way of restraint. —Exchange.

But It Pays "Anyhow."

"De man dat 'tends strictly to his own business," said Uncle Eben, "sometimes don't git no credit 'cep' foh bein' unsociable."

Good Example.

Aunt Polly was milking in the cow lot, and her politically excited son found her there. "Maw, you're a Democrat, ain't you?" he asked. She made no answer, but he persisted: "Say, maw, ain't you a good Democrat?" Finally she said, emphatically: "I hain't nothin'. I'm a woman milkin' a cow. You go in the house and shut up!"

What Makes a Book.

If a book come from the heart, it will contrive to reach other hearts all art and authorcraft are of smal amount to that.—Carlyle.

Dates Served in Forty Ways.

The date is the staple article of food in Persia, and a good cook there can prepare more than 40 dishes in each of which dates figure in an entirely different way.

OBITUARY GRETCHEN BLANK

Gretchen Blank, daughter of Mr. and Mrs. T. Blank was born the 21st of April 1899 in Klemme, Hancock county, Iowa, and died at the parental home in Klemme, Iowa, the 21st day of March, 1921, at the age of 22 years and eleven months. Her death being caused by that dreaded disease call Sarcoma.

Gretchen was endowed with a very strong constitution which she displayed in such a remarkable way during her lingering illness. No one who knew her ever surmised that this dreadful disease was fastening its grip upon her life. She had been clerking in Kluckhohn Bros. store and apparently seemed to be enjoying the best of health. Shortly after the holidays, about the second week in January she complained about pain in her side and upon request on the part of the family went to Belmond for an examination. The examination revealed that an immediate operation was necessary to which she submitted. The operation revealed the true nature of her ailment that she was suffering from Sarcoma for which there is no cure. From Belmond Gretchen was taken to Rochester, Minnesota, and again examined with the same announcement that there was no help for her. After returning from Rochester she was taken to the Methodist Hospial in Des Moines and after being examined was again operated on with the result that what had been so dreadfully feared were the real facts in her case, no hope and no help as far as medical skill was concerned.

After her two weeks' stay in the hospital she was brought back to the family home where loving hands could care for her and every effort was to ease her sufferings until the Angle of Death came and took her home on Monday afternoon at 5:15 to be forever with her Lord. She was ready and waiting for her Lords coming. During her illness she never murmured always cheerful stating that she was in the Lord's hands and his way would be best for her. Even in her sickness she was more considerate about others than herself which was one of her noble characteristics through her entire life. She was always afraid she was becoming a burden to her loved ones and often remarked that they were doing to much for her. She tried in every way to cheer her loved ones and often stated that their loss would be her gain, asking them not to mourn for her, as she was only passing on a day ahead and ere long some of them would follow and meet her again on yonder shores where death and separation are unknown.

She leaves to mourn her death her father and mother, five sisters, three brothers, her two grandmothers, nine uncles and aunts, three brother-nephews, two nieces, besides other in-laws, one sister-in-law, seven relatives and her many friends.

Funeral services were conducted on Thursday afternoon at the First Methodist Church.

(By Rev. A. H. Meyers)

CARD OF THANKS

We wish to thank our many friends for their kind words and help during our recent trial in the sickness and death of our beloved daughter and sister, Gretchen. We also wish to thank those who contributed floral offerings and to all who furnished cars at the funeral services.

T. Blank and family.

NOTICE

The Farmers Co-op. Grain Co. will soon be ready to begin active business. The Board of Directors request that the money subscribed will be available by Apr. 15th. Leave the funds at etiher Klemme Bank and receive receipt. The Stock Certificates will be signed up and delivered later.

Signed

H. J. Stille, President
E. J. Arnold, Secretary.

Mrs. E. S. D. Kahrs returned last Thursday afternoon from Nevada, Iowa, where she had been visiting her people for several days.

Three young men came from Missouri last week to work on farms here. They hired out to Herman Ax, Herman Stille and Jack Woods.

MARRIAGES

LOUDEN-OVERLEEF WEDDING

Last week Tuesday a quiet wedding took place at Mason City when Miss Esther Louden of this place, was united in marriage to Mr. Charles Overleef, of Edgely, North Dakota. The event was a complete surprise to their many friends.

The Bride is the daughter of Mrs. Alma Louden who resides in the country a short distance from Klemme. She is a very accomplished young lady and one who knows all the secrets of good home making.

The Groom comes from North Dakota where he has been engaged in the farming business. He is a young man of sterling worth and is thrifty and we can say he used good judgment in making this fine Iowa girl his wife.

The couple are as yet undecided as to where to make their future home, but we hope they will decide on this place for their future residence.

Their many Klemme friends join us in extnnding congratulations and best wishes.

ULRICH-WADE NUPTIALS

On Thursday afternoon of last week, Arthur Wade, only son of Henry, and Miss Nettie Ulrich, second oldest daughter of Geo. Ulrich were married at the parsonage of the First Methodist Episcopal church. The bride was attired in a gown of pink satin and was attended by Miss Jennie Meinderts of Meservey. The groom was attended by the bride's brother, Lloyd Ulrich. The immediate relatives of both parties were present at the ceremony which was performed by Rev. A. H. Meyer. In the evening relatives and friends gathered at the home of the bride's parents where a reception was given for the bridal couple and bounteous refreshments were served.

The bride and groom are well known in this community and we all wish them much joy and success in life.

(By Rev. Meyer)

Goodell News

Miss Marvel Chase returned from Hampton Saturday.

Miss Hallye Kitz was a Belmond caller Thursday.

Mr. and Mrs. Elmer Kienenberger and sister "Ted" were Sunday visitors at the F. R. Chase home.

Mr. and Mrs. Ed. Hemenway drove to Wiliiams Wednesday.

The many friends and relatives of Mrs. Avery were very sorry to hear of her death. She was one of the pioneer settlers.

Carl Sandberg was absent from school Thursday and Friday.

Ethel McNutt was absent from school Tuesday and Wednesday.

Burt Green and Ralph Strasburg of Meserveywere Goodell callers Tuesday.

Halye Kitz was absent from school Thursday.

Hugo Niff visited at the J. J. Cook home last week.

Carl Engeseth is displaying a fine lot of ladies' spring and summer hats.

Orick Rhodes is the proud owner of a Ford touring car.

Every one enjoyed themselves at the party held at the Duetrich home last week.

Avery Township News

Henry Helps and family were Sunday visitors at the home of Martin Jensen.

Mr. and Mrs. Frank Roths, Mr. and Mrs. Robert Roths, and Mr. and Mrs. Fred Bachman and family attended the funeral of Grandma Avery at Goodell Sunday.

Mr. and Mrs. Frank Roth were Garner callers last Friday night.

Dorothy Hoffman was absent from school Monday.

Mr. and Mrs. E. J. Arnold were visitors at the Henry Law home last Sunday.

Mr. and Mrs. Wm. Bell and two children were Garner callers last Monday.

Myrtle Bell, Verner Nelson and Ben Coobs visited with Leafy Wilson and Chas. Braden last Sunday at the E. J. Arnold home.

Mrs. Fred Bachman and little girl spent Wednesday with Mrs. Tom Nelson.

Herb Bailey and family and Walter Reed and son Johnny were Wednesday evening callers at the Tom Nelson home.

Paul Goll is reported on the sick list this week.

Fred Bell was a Garner caller between trains Monday.

Liberty Township News

Mr. Tony Vastliff is working for Herman Paul.

Mr. Harold Ridder has been on the sick list of late.

Miss Mildred Anderson is assisting Mrs. H. G. Stille with her housework.

L. W. Suckow contracted with the W. T. Raleigh Co. a couple of weeks ago and took over the outfit and territory formerly operated and occupied by Mrs. Patterson of Corwith.

We presume everybody has heard of the marriage of Mr. Arthur Wade to Miss Nette Ulrich, two of Liberty township's most popular young people, which occured last Thursday. Some of the boys of the community gave them a charivari the same night. The boys were not quite satisfied with one battle so they went over to the Ben Reimer home with their noisy instruments and wound up at Ben Ridder's home.

Mr. Art Brouwer from east of Garner is working for Otto Schlawin.

Three young gentlement from Missouri drifted into this locality a week or so ago. One, Armin Tieman is working for H. J. Stille, another, Roma Eurish is working for John Woods, and the third, Joe Myrtle is working for Herman Ax.

A few of the farmers around here commenced seeding last week. We understand that A. Caroline had one field disced and harrowed in last week.

Howard Terhufen is working for J. J. Stille.

A MILK CAN DEVELOPED LEGS AND WALKED AWAY

G. A. Goll has a pet milk can which he had trained to carry cream to town in and he could leave it at the creamery and it would always wait for him on the platform until he came after it. But the sad part of the tale is that he left his pet milk can at the creamery about six weeks ago and when he came to get it in the evening the poor thing was not there. Gotlieb thinks somebody enticed the innocent can away and he would like to have the farmers look among their herd of milk cans and see if they can find his in the gang. Of course the can would not walk away itself because it was trained to stay where ti was set. Gotlieb is sure the can will recognize him if he should ever see it again.

A. D. Gimer was stepping around real important like Saturday morning and on inquiring why the high steps we were informed that a fine baby girl arived at his home Saturday morning. Art thinks the new arrival is a mighty fine lady.

Daily Thought.

The world belongs to the energetic man. His will gives him new eyes. He sees expedients and means where we saw none.—R. W. Emerson.

The Churches

THE EASTER PROGRAMS AT THE LOCAL CHURCHES WERE THE BEST EVER

Both of the Methodist Churches of Klemme had an elaborate Easter program Sunday evening in the way of a Cantata.

At both places music and singing was carried out better than at any program ever held before. Weeks of hard practice showed good results in the final program.

At the First Methodist Church the Cantata was staged with special Easter scenery, lighting effects and musical scores as accompaniment for the various tableaux.

Both programs were so good that some arrangement should have been made so that a person would have had the opportunity of attending both programs.

FIRST METHODIST EPISCOPAL CHURCH

Preaching service next Sunday morning at 10 o'clock.

Sunday School at the close of preaching service, 11 o'clock.

Epworth League, Sunday night at 7:30.

Sunday School meets in Liberty township at 10:15.

Preaching service Sunday morning at 11:30.

Midweek prayer service Thursday evening at 7:30.

You are invited to all of our services.

RESULT OF THE TOWN ELECTION

The Town Election Monday brought out the voters in good shape and the contest looked to be a hot one all day long. At seven o'clock in the evening the ballot box was unlocked and the vote counting began. At about 8:45 the results were announced as follows

On the Citizens Ticket for Mayor, F. J. Wenck 141, For Councilmen, Ridder received 106, Wiles 157, Blank 138, Johnson 135 and Koerner 91 votes. On the Peoples Ticket E. G. Ell received 86 votes for Mayor, and for Councilmen Kluckhohn received 94, Bredbenner 78, Gimer 130, Bachman 118, and Pavey 46 votes.

The result of the election was that Wenck was elected Mayor by 55 votes ahead of Ell. For the Council Wiles lead the field with his 157 votes, and Blank followed with 138, Johnson with 135, Gimer with 130 and Bachman with 118. So the new council will consist of the three old members, Wiles, Blank and Johnson, with Gimer and Bachman to take the places formerly occupied by Ridder and Koerner.

The above lineu p looks very satisfactory indeed and the above men are all capable of running the business of the town for the next two years.

In addition to the above ticket C. G. Waterman was put back on to serve another term as Treasurer and Louis Sampson will again be our assessor.

THIS MAN ALMOST FORGOT HIS WIFE

We were up at Garner last Wednesday afternoon on business and ran across "Bill" Hempel who seemed to be in an awful rush. We asked Bill what was the trouble and he said he drove out of town and when out south of Garner a ways happened to think he forgot his wife in Garner, and came back to find her. We bet she reminded him of it good and plenty so Bill will keep his spouse foremost in his noodle when she takes an auto ride with him again.

ATTENTION, BANDMEN!

It seems that some of you are not aware of the fact that we hold a rehersal every Monday night. The attendance has ben very poor, of late. We have some new music, but remember that nothing can be accomplished without a good deal of practice—therefore, **please be present** hereafter. There are some faithful ones who are always present. If the rest of you would make the same effort, we would have a perfect attendance. Are you with us? Then show your spirit! Let's go.

Secretary-Treasurer, K. C. B.

ALEX KIRKWOOD DIED TUESDAY A. M.

After an ilness of several months death finally came to relieve the sufferings of Alex Kirkwood, who passed away at his home Tuesday morning at 8:45 o'clock. Mrs. A. Kirkwood, his son Wlil and wife were at his bedside when the end came. His daughter, Mrs. A. F. Hubbard of Foreston, Minn., is the other member of the family whom he leaves.

Mr. and Mrs. Kirkwood are old residents of Klemme and Mr. Kirkwood is widely known throughout this part of the county and has many friends who mourn his death. The Kirkwoods have been in the hotel, restaurant and boarding house business in Klemme for quite a number of years and are still in business here.

At the time of this writing we are unable to learn of the funeral arrangements and the time to be held. We will publish the particulars of Mr. Kirkwood's obituary in next week's issue of the Times.

The community extends words of sympathy to the bereaved members of the family.

PIONEER AND FIRST WHITE WOMAN SETTLER PASSES AWAY AT GARNER

Mrs. A. Avery, the first white woman to settle in Hancock County, quietly passed away at the home of her daughter, Mrs. A. W. Schmalle, last Thursday morning at 6:40. Mrs. Avery was ninety years old on her last birthday and one of the oldest persons in the county perhaps.

She had been sick only a few days but not seriously it was thought, and her death came quietly and she passed from a peaceful sleep into that eternal sleep from which one never wakes

Mrs. Avery figures prominently in Hancock County pioneer days and many are the tales she could tell of the Indians, who in those days were none too friendly toward some of the whites.

BELMOND EDITOR SPENDS HOLIDAY HERE

Editor Wallace Ramsay, wife and daughter Ruth, were on their way from Belmond to Garner Monday to spend the day with relatives there. They were on "that slow train thru Klemme" which left the rails Monday morning. Wallace, wife and daughter hoofed it to Ye Editor's home here and thus took the opportunity to make a call between trains. However we feel sorry for our brother Penpusher for it is very seldom an editor can take a day off and here Wallace spent his "vacation" viewing the scenery long our track and reading the signs in the depot. He took the next train for home and the Missus and Ruth journeyed on farther north.

The Sunday School of the First Methodist Church will have an "April Fool" party at the Idle Hour Thea re tomorrow evening, Friday, April 1st. It is expected that a lot of fool stunts will be pulled off. All are invited to attend.

Miss Sullivan, Klemme school teacher, spent Easter with home folks.

Miss Nine Johnson came home from Iowa Falls where she is attending school to spend Easter with home folks.

Prediction.

Scotland has a well-developed shale oil industry giving employment to 4,000 men, this industry being 50 years old. Yet Scotland shale is much lower in oil than that found in the mountain state deposits of this country. The United States department of commerce predicts that sooner or later this great source of supply will be utilized to supplant the decreasing production of the oil fields.

Thimble Inventor a Benefactor.

At first thimbles were rather costly and only well-to-do people could afford them, but afterward when made of lead and other common metals by machinery they became cheap. Their use was a great relief to all who had much sewing to do, and blessings were invoked on the inventor. The Italian finger-hat (finger-hood) became in England the "thumb-bell," from its bell-like shape. It was originally worn on the thumb to parry the thrust of the needle pointing through the material, and not, as at present, to push it.

Due to a Drawing Out.

A bank run that the women would like to have stopped is the too frequent "run" in the lisle bank.—Boston Transcript.

WOMEN WHO CANNOT WORK

Read Mrs. Corley's Letter and Benefit by Her Experience

Edmund, S.C.—"I was run down with nervousness and female trouble and suffered every month. I was not able to do any work and tried a lot of medicine, but got no relief. I saw your medicine advertised in a little book that was thrown in my door, and I had not taken two bottles of Lydia E. Pinkham's Vegetable Compound before I could see it was helping me. I am keeping house now and am able to do all of my work. I cannot say enough for your medicine. It has done more for me than any doctor. I have not paper enough to tell you how much it has done for me and for my friends. You may print this letter if you wish."—ELIZABETH C. CORLEY, care of A. P. Corley, Edmund, S. C.

Ability to stand the strain of work is the privilege of the strong and healthy, but how our hearts ache for the weak and sickly women struggling with their daily rounds of household duties, with backaches, headaches, nervousness and almost every movement brings a new pain. Why will not the mass of letters from women all over this country, which we have been publishing, convince such women that Lydia E. Pinkham's Vegetable Compound will help them just as surely as it did Mrs. Corley?

MADE HIM SOMEWHAT TIRED

And Others Besides This Precocious Youth Have Had Much the Same Feeling.

It is, perhaps, unnecessary to give the name of the New England city which is the residence of the lad who figures in this story.

There had been a visitor, and to this lad she said: "And so this is little Walter? My, my! What a big boy you've grown to be! I wouldn't have believed it possible."

"Mother," said Walter, when the visitor had gone, "doesn't it pass your comprehension how persons in whom one would naturally expect an ordinary degree of intelligence appear to believe, all history and nature to the contrary, that the children of their acquaintance will always remain infants and persist in expressing surprise when they observe the perfectly natural increase in one's stature?"—Rehoboth Sunday Herald.

Water Power Put to Good Use.

An interesting example of the development of water power is reported from Cashmere. There the Jhelum river has been made to generate electrical power to deepen its own channel, and so prevent the overflowing of 200,000 acres of land, which are thus made available for agriculture. The fact that no coal was available, and that the site was 200 miles from the nearest railway station, made the use of water power imperative in this case.

No Cart Along.

The girl walked briskly into the store and dropped her bag on the counter. "Give me a chicken," she said.

"Do you want a pullet?" the storekeeper asked.

"No," the girl replied. "I wanta carry it."—Brown Bull.

When they do "fancy work" in Persia it sells for $100 a yard and is called a rug.

Talk isn't cheap when you hire a lawyer to do it for you.

Feel All Worn Out?

Has a cold, grip, or other infectious disease sapped your strength? Do you suffer backache, lack ambition, feel dull and depressed? Look to your kidneys! Physicians agree that kidney trouble often results from infectious disease. Too often the kidneys are neglected because the sufferer doesn't realize they have broken down under the strain of filtering disease—created poisons from the blood. If your back is bad, your kidneys act irregularly, and you feel all run down, use *Doan's Kidney Pills. Doan's* have helped thousands. *Ask your neighbor!*

An Iowa Case

Samuel Neiswanger, 300 E. Briggs St., Fairfield, Iowa, says: "When I caught cold, it settled in my kidneys, weakening them. My back was lame and sore. I had sharp pains in the small of my back and kidneys. The kidney secretions were highly colored and passed too often. I read about Doan's Kidney Pills and used them. Three boxes drove the kidney trouble away."

Invents New Flyer in Jail

Barcelona Engineer Claims His Machine Will Rise Vertically From the Ground.

CAN DIP IN ANY DIRECTION

French Government Is Interested in Invention and Will Send Technical Commission to Barcelona to Witness the Trials.

London.—Paris, according to the London Daily Telegraph correspondent, is talking about a new flying machine and the romantic story of its invention.

It is called the "helicoptere," and the inventor, M. Pateras-Pescara, a Barcelona engineer, made his discovery in the Sante prison at two o'clock in the morning. It is claimed for this new flying vehicle, in which the French government is interested, for it will send a technical mission to Barcelona to witness the trials, that passengers can descend from the air with the same comfort as though they were sitting in armchairs.

How It Works.

The invention consists of an axle fixed to a motor which is placed in the vehicle. The axle sets in motion sets of propellers, one set turning one way, one another. The vehicle rises vertically from the ground; it can dip in every direction, remain immobile in space, and decend like an airplane with engine stopped.

M. Pateras-Pescara, a nationalized Argentine, who married an Austrian princess, had to leave Italy when that country entered the war. He came to France, where he was employed in the ministry of inventions. In 1916 he was at work on a bombing machine which was intended to fly between Paris and Berlin with a cargo of explosives at a speed of 130 miles an hour. He had had trouble with the diplomatists and was watched by the international police.

Arrested, he was taken to the Saute prison, and it was in his cell on December 18, 1916, that he solved the problem of the "helicoptere." The expulsion proceedings against him were dropped, and after his release he applied himself to his invention.

Proves Successful.

In August, 1919, a mission from the French air department went to Barcelona to witness the trials of his parachute "helicoptere," and as a result of its report a contract was signed with the inventor. Compelled to reside outside France, M. Pescara built a definite model of his machine at Barcelona. It was tried recently, and it is said that the propellers worked admirably.

With reference to this claim of the Barcelona inventor, it may be pointed out that there is nothing whatever new about the idea of a "helicoptere," i. e., a machine capable of rising from the ground by the action of horizontally-placed propellers. The plan, in fact, is one of the oldest in the history of aeronautical theory and experiment, and has been put forward more than once during the past quarter of a century. Whether M. Pescara has succeeded in surmounting the difficulties heretofore encountered remains to be seen.

INDIAN WOMEN SEEK VOTE

Penobscot Squaws Demand Share in Tribal Elections and Conduct of Affairs.

Old Town, Me.—Indian women of the Penobscot tribe started on the warpath to obtain the right to vote in the tribal elections and share in the conduct of reservation affairs. Already some forward-looking squaws have nailed the suffrage colors to the figurative totem pole, with the assertion that a grand lady Sachem would make a wiser chief than any brave that ever wove a basket or built a canoe.

The new women of an ancient people began rejoicing recently when they received a ruling from Attorney General Shaw that they could go as far as the tribe allowed, for the state would remain neutral. He said the tribal suffrage was entirely a matter for domestic adjustment. The ruling was in answer to a letter received by the governor from Mrs. Peter Nicolar of Old Town.

"PHYSICALLY PERFECT"

Miss Marie Kuhn of New York city, a student in the graduating class of the Bryant high school, has been picked by the experts of the Life Extension institute as "perfect." She is seventeen years old, and is a musician as well as an athlete.

Not Turned by Large Legacy

Indiana Second-Hand Furniture Dealer Is Happy Without Immense Fortune.

HEIR TO SLICE OF "PHILLY"

Through Death of Grandfather He Never Heard of J. S. Polk Inherits Share of $6,500,000 Estate—Long-Term Lease Expires.

Chicago.—J. S. Polk, a second-hand furniture dealer at 4716 Olcott avenue, East Chicago, is figuring out what he will do with his share of a $6,500,000 Philadelphia estate which he has been informed has come to him through the death of a grandfather he never heard of.

His first conclusion concerning the disposition of this wealth is that he will give most of it away. He expects his share will be $722,222. He has no scruples against accepting the money and no particular theories about reforming the world with it.

"We couldn't be any happier, friend, but we will be able to make others happier," he said, as he dusted off the old furniture and listened to the voices of four children in play.

Wife and Four Children.

Polk is nearly 60 years old and has Mrs. Polk and the four children to consider, so there is no telling what will happen to the money, if it comes. His story is that recently he received a telegram as follows:

"Sir: You have come into property in Philadelphia through the will of Thomas Bennett of New York. I am empowered to offer you $20,000.

"T. A. Ross, Attorney, Philadelphia."

Polk wired Ross to call on him. Ross came. He offered to settle for $88,000 finally, after Polk had refused other offers. The $88,000 offer also was refused.

"The real estate left by my grandfather is located in the heart of Philadelphia," said Mr. Polk. "I understand I am one of nine heirs. The others, most of them, live in Milwaukee. We met up there about two weeks ago and decided the best thing we can do will be to await developments.

Ninety-Nine Year Lease Expires.

"As I understand it, my grandfather holds the land, which was leased to the city of Philadelphia for 99 years. The lease expires July 30, 1924. We have been unable to locate Mr. Ross lately, but I suppose he is somewhere in Philadelphia."

Mr. Polk added that he will be patient until the "lease expires," then "see what's what."

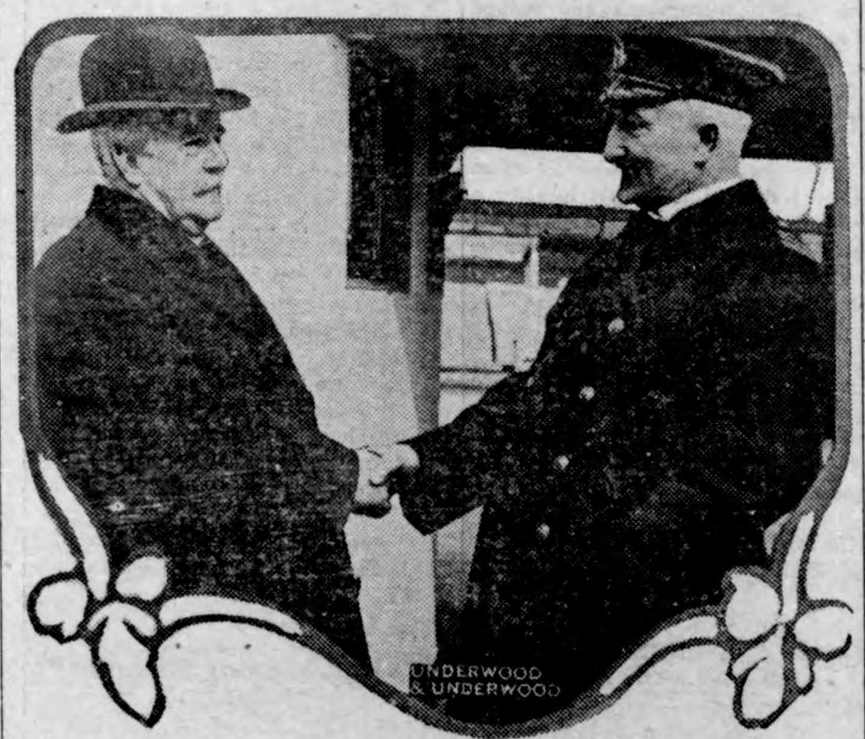
"And I didn't even know I had a grandfather," ruminated Mr. Polk. "What'll I do with the money when I get it? Well, I'll give away about $100,000 to the Salvation Army. Then Mary and the kids and I will have a good time. We're going to play Andy and Min Gump, and call this money Uncle Bim."

Inquiry in Philadelphia failed to discover Attorney T. A. Ross. Other attorneys of the name of Ross are in practice there, but none knew about the legacy to Polk in the heart of Philadelphia's business district.

Cuts Down Old Tree.

Morganville, Kan.—A catalpa tree planted by John H. Merten of Morganville in 1881 was cut down one day recently by him and he obtained 68 good fence posts from it. The tree was 2 feet in diameter.

E. F. Wright "Sails" His Last Ship



Edward F. Wright, general marine superintendent of the International Mercantile Marine company, "sailed" his last ship the other day, and formally retired from the service, ending 54 years of active work in the shipping industry. The photograph shows Mr. Wright shaking hands with Commander R. O. Jones of the Celtic on the liner's bridge just before it left New York for Liverpool.

CROWD MONTE CARLO

Women Gamblers Outnumber Men at Famous Palace.

Many of Them Do Not Know When They Win or Lose, But That Does Not Deter Them.

London.—This is the women's year at the Monte Carlo casino, writes A. E. Manning Foster to the London Daily Mail. There have never before been so many women gamblers.

Just now English women predominate. There is a fair sprinkling of French, Italians and Spanish, and a few Russians. But it is essentially the season of English women.

Some of them, it is easy to see, have never been here before. They do not know their way about or understand the games.

But that does not deter them in the least. They plank their money down and wait to see what happens, and they keep sharp eyes upon it, too. A man may have his winnings snatched, but a woman—never!

There is novices' luck—who can doubt it?

These newcomers who win at the start are the stanchest and most regular attendants.

Morning, noon and night they come to the rooms, drawn by an irresistible lure. For them the many other delights that are to be found in Monte Carlo and the neighborhood exist in vain.

Their lives are centered on the hectic pleasures of the tables. You can tell them at a glance. Their eyes are bright, their cheeks flushed and as the days go on a strained, anxious look comes into their faces and little hard lines develop at the corner of their mouths

They have gambling fever badly. It must run its course. Most of them will get over it. A few will become chronic cases and will join that pathetic little band of women who cannot help it, women who must gamble as others must take drink or drugs.

Not that the majority of women who throng the rooms are of this kind. There are many sweet and lovely women who have their little flutters just for fun and as an occasional diversion.

Boy 14 Eats 150 Olives in Ten Minutes for $10

Long Beach.—A fourteen-year-old boy from Los Angeles defeated nine other contestants representing almost as many races, at an olive-eating contest in the Municipal Auditorium. The lad bolted down 150 in ten minutes. Edward Hadover of Long Beach came in second with 142 to his credit. The prize was $10.

PROVED EFFECTIVE BY A FIFTY YEARS TRIAL

The most widely used remedy in the world to overcome the stagnating effects of catarrh. Catarrh is silent and insidious in its ravages, invades nearly every household and hovers like a pestilence everywhere.

PE-RU-NA

FOR CATARRH AND CATARRHAL CONDITIONS

It strikes at the root of catarrhal troubles by stimulating the digestion, enriching the blood, toning up the nervous system and soothing the raw and inflamed mucous membranes. Pe-ru-na sets every organ to working properly and gives strength, vigor and pep to the whole body. Try it, and like thousands of others, learn what it means to be well.

SOLD EVERYWHERE TABLETS OR LIQUID

SPOHN'S DISTEMPER COMPOUND

Early spring brings with it Coughs, Colds, Distemper. Be prepared. Give your horse

Spohn's Distemper Compound

at the first sign of a cough. Better still, give it as a preventive before he shows signs of sickness. "SPOHN'S" acts equally well as preventive or cure. By reason of its germicidal qualities, it expels the disease germs, abates fever, restores appetite and condition. 60 cents and $1.15 per bottle. Buy of your druggist.

SPOHN MEDICAL COMPANY, GOSHEN, IND.

Rich Yukon Silver Deposits.

Authoritative reports from the Yukon territory, Canada, indicate the location of marvelously rich silver deposits in the Mayo district, about 150 miles east of Dawson, says Popular Mechanics Magazine. A few veins, eight feet in thickness, assaying 5,000 to 14,000 ounces of the metal to the ton, are being worked. Five-foot veins are common, and smaller lodes with an assay of 200 ounces, are said to be plentiful. At present transportation and living conditions in the district are very bad. These will be bettered if a proposed motor road into the territory is built.

ASPIRIN

Name "Bayer" on Genuine

BAYER

Beware! Unless you see the name "Bayer" on package or on tablets you are not getting genuine Aspirin prescribed by physicians for twenty-one years and proved safe by millions. Take Aspirin only as told in the Bayer package for Colds, Headache, Neuralgia, Rheumatism, Earache, Toothache, Lumbago, and for Pain. Handy tin boxes of twelve Bayer Tablets of Aspirin cost few cents. Druggists also sell larger packages. Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid. —Adv.

Fuel From Wheat Straw.

A ton of sun-dried wheat straw has been found from the Canadian experiments to have a fuel value about equal to that of 32 gallons of gasoline. It yields about 10,000 cubic feet of purified gas, 600 to 650 pounds of carbon residue, and about 10 gallons of tarry liquid. The gas, which has a caloric value of about 400 British thermal units per cubic foot, burns with a blue flame, and has a slight odor. Its combustible constituents are carbon monoxide, methane and hydrogen. The carbon residue is capable of being reduced to a very fine powder.

Important to all Women Readers of this Paper

Thousands upon thousands of women have kidney or bladder trouble and never suspect it.

Women's complaints often prove to be nothing else but kidney trouble, or the *result* of kidney or bladder disease.

If the kidneys are not in a healthy condition, they may cause the other organs to become diseased.

You may suffer pain in the back, headache and loss of ambition.

Poor health makes you nervous, irritable and may be despondent; it makes any one so.

But hundreds of women claim that Dr. Kilmer's Swamp-Root, by restoring health to the kidneys, proved to be just the remedy needed to overcome such conditions.

Many send for a sample bottle to see what Swamp-Root, the great kidney, liver and bladder medicine, will do for them. By enclosing ten cents to Dr. Kilmer & Co., Binghamton, N. Y., you may receive sample size bottle by Parcel Post. You can purchase medium and large size bottles at all drug stores.—Adv.

What He Meant.

"You told me," complained the purchaser, "that parrot I bought was the most intelligent bird in your shop, while the fact is he doesn't talk at all."

"That's what I meant," replied the dealer, "when I spoke of his intelligence, madam."

WOMEN! USE "DIAMOND DYES"

Dye Old Skirts, Dresses, Waists, Coats, Stockings, Draperies—Everything.

Each package of "Diamond Dyes" contains easy directions for dyeing any article of wool, silk, cotton, linen, or mixed goods. Beware! Poor dye streaks, spots, fades, and ruins material by giving it a "dyed-look." Buy "Diamond Dyes" only. Druggist has Color Card.—Adv.

One Against Many.

Solomon was plainly dejected.

"Think of all those wives planning Easter gowns!" he cried.

Insects Worse Than Fire.

Of the 10,700,000 feet of yellow pine in Klamath and Lake counties, Oregon, fully 8 per cent has been killed during the past five or six years, or is now infested by beetles, says a report to the American Forestry association of Washington. The average annual loss has been about 150,000,000 board feet, worth at least $250,000, or 300 times as much as the average annual fire loss in the two counties.

Watch Cuticura Improve Your Skin

On rising and retiring gently smear the face with Cuticura Ointment. Wash off Ointment in five minutes with Cuticura Soap and hot water. It is wonderful sometimes what Cuticura will do for poor complexions, dandruff, itching and red rough hands.—Adv.

Bad Form.

"Judge, I wasn't trying to flirt with this young lady."

"She says you called her 'Precious.'"

"I was talking to myself."

"Then you ought not to call yourself pet names. Ten dollars and cost."—Birmingham Age-Herald.

KILL RATS TODAY

By Using the Genuine
STEARNS' ELECTRIC PASTE

The guaranteed "killer" for Rats, Mice, Cockroaches, Ants and Waterbugs—the greatest known carrier of disease. They destroy both food and property. Stearns' Electric Paste forces these pests to run from the building for water and fresh air.
READY FOR USE—BETTER THAN TRAPS
Directions in 15 languages in every box.
Two sizes, 35c and $1.60. Enough to kill 50 to 400 rats.
U. S. Government buys it.

MISSOURI FOLKS TESTIFY

Tina, Mo.:— "I think that there are no medicines on the market to equal Dr. Pierce's. After our baby girl came my wife was in a weakened condition and could not regain her strength. She took seven bottles of Dr. Pierce's Favorite Prescription and got well and strong. She says that she just could not get along without it.

"I have used the 'Pleasant Pellets' for constipation for years—am never without them.

"I always recommend Dr. Pierce's remedies."—WM. E. REYNOLDS, Route L.

Dr. Pierce's medicines contain no alcohol and are sold by all good druggists.

Send 10 cents to Dr. Pierce's Invalids' Hotel in Buffalo, N. Y., for a trial package of any of his remedies or write for free confidential medical advice.

Beier Auto Company

Public Utilities and the public

Costs

We are dwelling somewhat at lenght on costs for the reason as one writer recently put it, the public utility business is the public's busiuess, and the public has a right to know the vital facts about its business. It should not be shrouded in mystery in any way, for its problems are primarily the same as other business enterprises, with the exception that its elements of cost are not so well understood by the general public. The public utility company in its relation to the public stands as a servaut that charges its employer a certain per cent above the cost of the service it renders. The employer is naturally interested in knowing whether the price paid for the service is a fair one as determined by the cost of the service to the employe. The employe quite naturally does know what the cost is, because he pays for the production himself, but the employer, the public, doesn't know unless he looks into the matter and finds out just what the items of expense are that the employe must meet in order to deliver to him the service he desires. That means the cost we have been talking about.

Interest on the investment is a part of the cost of delivering the service because it is an expense the utility company must meet in order that it may deliver the service to the cousumer. This fact is in no way changed even though a part of the capital required to operate the property is provided by the men who actually promote it and are responsible for its operation. Their money is put up with that of the business man, the capitalist, the teacher, the widow, and the small investor generally, and while these latter are assured a certain rate of interest, the promoters themselves might see all their labor go for nothing if the money they invest in the enterprise were not considered as a part of the cost the same as the money of the other investors. The money used performs the essential of services and whoever furnishes it is entitled to receive compensation for its use-

When the electric current is generated and delivered to the switchboard the cost to the consumer per measure knit is complete, for the current must be taken to the consumer before he can use it and this entails the cost of wires, and insulators, and poles, and switches, the cost of installing them, the cost of maintaining them, and an allowence for their replacement when they are worn out. All must be taken into consideration before the cost of delivering the current to the consumer be actually arrived at, as well as the loss of current during the course of transmission. All of these items mentioned are present of a necessity in the delivering of electric service to the consumer, and the price to him must represent a fair profit above their total, otherwise the service conld uot long continue.

There is one more item of cost that is not generally understood, and we shall take it up in our next article. We refer to "Readiness to Serve."

Iowa Falls Electric Company

(A. Huntington, Engineer, Dept. of Public Relations.)

GEN. LEONARD WOOD MAKES APPEAL FOR NEAR EAST RELIEF

Says Two and a Half Million Starving Armenians Need Help at Once.

Ft. Sheridan, Ill.—Major General Leonard Wood, commanding the Sixth Corps Area, has issued a Lenten sacrifice appeal for funds to save the Armenians from annihilation by starvation and disease. "I feel that however many and however worthy the other appeals which are being made to the great heart of America these days may be," he says, "this cry from the little children cannot remain unanswered."

The Near East Relief, 1 Madison avenue, New York City, which has been charged by Congress with the American relief work in the whole Near East, has formed a special "Lenten Sacrifice Appeal Committee," of which Major General Wood is chairman, Charles V. Vickery secretary and Cleveland H. Dodge treasurer, to put before the American people the desperate need of the Christian populations of the Near East, who have suffered and are still suffering the horrors of war.

MAJ. GEN. LEONARD WOOD

Among the prominent members of General Wood's Committee are Secretary of the Treasury Andrew W. Mellon, Mrs. Corinne Roosevelt Robinson, sister of the late President Roosevelt; ex-President W. H. Taft, Mary Garden, President John Grier Hibben of Princeton University, Bishop-Elect William T. Manning of New York, Dr. Henry van Dyke, David Belasco, Samuel Gompers, Frank A. Munsey, Mrs. Carrie Chapman Catt, Mrs. Henry Morgenthau, John G. Milburn of the American Bar Association, Miss Elizabeth Marbury and Mrs. Medill McCormick of Chicago.

General Wood's Appeal

As Chairman of a Special Committee of representative men and women of the country, charged with placing before the American people the desperate need of two and a half million Armenians, the remnant of the oldest Christian nation, whose sufferings through sixteen centuries seem to have brought them no nearer peace, liberty or security, I beg your personal co-operation and influence to forward an appeal for a Lenten Sacrifice Offering to enable the Near East Relief to go on with its work of mercy.

Over one hundred thousand little children who have been kept alive by American generosity for the past three years are absolutely dependent upon the support which America gives them through the Near East Relief.

I feel that however many and however worthy the other appeals which are being made to the great heart of America these days may be, this cry from the little children of the land where Christ gave his life for mankind cannot remain unanswered.

Will you help to save this martyred people?

Leonard Wood

Leonard Wood,
Major General,
U.S.Army.

PRESIDENT ENDORSES THE NEAR EAST RELIEF APPEAL

Washington.—President Harding has given his hearty endorsement to the appeal being made by Maj. Gen. Leonard Wood on behalf of the Near East Relief, 1 Madison Avenue, New York City, for a nation-wide Lenten Sacrifice Offering to save the starving Christians of the Near East.

The President's letter reads:

"There ought to be no cessation or relaxation of our sympathetic American efforts to be of service to these stricken people. One can well believe that they will not survive if we withdraw the relief which has heretofore been so generous from the private American purse. It has seemed to me that all we have done has borne dividends tenfold in the consciousness that we have done an humane thing for a people well deserving our generous sympathy.

"I wish you the very greatest success in furthering the great relief movement to which you are now giving your attention.

"WARREN G. HARDING."

1. All tile to be delivered at the ditch side subject to inspection and to be delivered only as ordered by the Construction Engineer.

2 All tile must pass the specifications for drain tile of the American Society for Testing Materials. Tile in sizes 6" to 10" inclusive must pass the specifications for Farm Drain Tile.

Tile in sizes 12" to 26" must pass the specifications for Standard Drain Tile. Concrete tile will be allowed only in sizes 20" to 26".

3. Whenever the tile improvement is layed in existing ditches the average depth will be computed from the natural surface of the ground and the contractor will be required to backfill the trenches to the height of the natural surface of the ground so that the existing ditch will be completely filled.

4. Complete specifications are on file with the county auditor.

5. Work to be commenced thirty days from date of letting of Contract or as soon as an outlet is furnished. Contract will be completed by June 1, 1922.

All ditches and drains to be constructed in all respects in accordance with the plat, profile, and specifications of the District filed by the Engineer in the Auditor's Office subject only to such changes and alterations as may be made as provided by law.

Sealed bids will be received at the office of the County Auditor of Hancock County, Iowa, up to 1 o'clock P. M. of the 14th day of April, 1921.

The price must be stated in the bid in figures, and permission will not be granted for the withdrawal or amendment of any bid after once presented.

All bids must be made at a fixed price per station of 100 feet for each size tile and also a fixed price for section complete in all respects including intakes and headwall and must also include the schedule of overdepth adopted by the Board of Supervisors of Hancock County and on file in the Auditor's Office for possible overdepth or underdepth beyond the average depth specified.

Bids will be received on any one or all sections, for tile alone, for construction work alone, or for both tile and construction.

The Board will, at their decision, let the work as a whole or in sections to the lowest responsible bidder, reserving the right to reject any or all bids and also the right to adjourn time of awarding contract is reserved.

Each bid must be accompanied by a cash deposit or certified check in a sum equal to ten per cent of the total amount of the bid, as a guarantee of the good faith of the bidder.

ALL BIDS NOT MADE IN CONFORMITY TO THE ABOVE REQUIREMENT WILL BE REJECTED.

The party to whom any contract is awarded will be required to attend at the office of the Auditor of Hancock County, Iowa, within ten days after said award and execute a contract thereby agreeing to all the provisions, terms and conditions thereof and shall also file with the County Auditor a bond subject to his approval for a sum equal to twenty-five per cent of the amount of his bid, and in case the party to whom any work is awarded fails to enter into this contract and furnish bond within ten days as herein required the deposit of such party shall thereupon become forfeited to Hancock County Drainage District No. 7, together with all rights under said award.

The deposit of the unsuccessful bidders will be returned to them within twenty-four hours after demand, and the deposit of the successful bidder will be returned to them upon their executing the contract and filing with the County Auditor the bond as herein required.

By order of the Board of Supervisors.

Dated at Garner, Iowa, this 17th day of March, 1921.

(SEAL)

Chris Jacobs,
County Auditor.

Notice is hereby given that at a Special Meeting of the Stockholders of the State Savings Bank, Klemme, Iowa the following proceedings were had and duly and legally taken, viz:

"Resolved that the Capital Stock of the Corporation be increased from Fifteen Thousand to Thirty Thousand Dollars and Article VI of the Articles of Incorporation be amended so as to read as follows.

ARTICLE VI

The amount of the Capital Stock of this Corporation shall be Thirty Thousand Dollars ($30,000.00) divided into shares of One Hundred Dollars each and the capital may be increased by the stockholders at any regular or special meeting called for that purpose and as provided by law".

Paper Umbrella Out Soon.

An unusual novelty will be placed on the market soon in the form of a paper umbrella, the New York Sun states. It is said that this newfangled rain shelter will be a very satisfactory substitute for the traditional alpaca or silk. It will retail for 50 cents, thereby cutting the cost of umbrellas down to a sum that should be considered distinctly nominal these days of the $8 and $10 variety.

The color of the new umbrella will be black and the paper of a composition absolutely waterproof and crackless. It will have a steel frame, wooden knob handle and a ring at the lower end of the "stick." Those in charge of the manufacture of the novelty say it will be durable and that it will roll as small as a silk one.

Nothing on Her.

An aristocratic lady gave a dinner party during the waiters' strike in New York. A young girl of the type known as buxom waited on the table. She seemed quiet and unobtrusive, and was efficient. After the dinner was over, the hostess said she would sign the check. When she had written her name she turned to the waitress and said: "Perhaps I should tell you that I am Mrs. Blank, so there will be no mistake. My handwriting is rather illegible."

The waitress picked up the check, glanced at the signature, and said: "Well, dearie, you ain't got nothing on me!"

Public Benefactor Dead.

Adam Duncan, fellow of the Royal Horticultural society, who has just died in England at the age of 80, is said to have been largely responsible for the introduction of the tomato as an edible fruit. The tomato had long been grown for decorative purposes, but Mr. Duncan, by means of hybridization, evolved it from its crinkled, woolly state to the smooth-skinned fruit.

Promote the Work.

Keep this thought on the masthead: It is the work, and not the worker, that is to be promoted.—W. T. Lathrop.

Articles of Incorporation of the Klemme Co-Operative Grain Company, Klemme Iowa

ARTICLES OF INCORPORATION

We, whose names are hereto subscribed, hereby associate ourselves into a body corporate under the provisions of ChapterI, Title IX, of the Code of Iowa, and acts amendatory thereof, particularly Section 1641-rl 1641-20, inclusive; assuming all the powers, rights, and privileges granted bodies corporate, and all the duties and obligations imposed by said statutes, and being bound thereby, adopting the following articles of incorporation, to-wit:

ARTICLE I. The name of this corporation shall be THE KLEMME CO-OPERATIVE GRAIN COMPANY

ARTICLE II. The principal place of business of this corporation shall be at Klemme.

ARTICLE III. The general nature of the business of this corporation shall be buying, selling and handling of grain, coal, lumber, live-stock, and all other farm produce and supplies; also, the operation of flour and feed mills and the purchase and sale of products thereof; also to act in the capacity of a general commission house to purchase, erect, operate, maintain, and control warehouses, elevators, mills and buildings of every description, and to retain, sell, convey, lease, mortgage, encumber, and improve such real estate, buildings, and personal property as the business of the company may require; also, to prepare and publish such statements, bulletins, or periodicals, and do all other acts, not contrary to the statutes of the state, as shall be necessary to the proper carrying out of the purposes herein stated, on the co-operative plan as provided by law.

ARTICLE IV. The authorized capital stock of this corporation shall be $60,000, divided into 600 shares of the par value of $100, of which not less than $20,000 shall be subscribed and paid for at the time of commencement of business of the corporation, the remainder of said capital stock to be issued as paid for, at such times as the board of directors may hereafter provide. Said shares of stock are transferable on the books of the corporation. The stock of this corporation shall be non-assessable. No shareholder in conducting the affairs of this corporation shall have more than one vote.

ARTICLE V. The corporate period of this corporation shall begin on the date the Secretary of State issues a certificate of incorporation and shall continue for a period of twenty years from said date, with the right of renewal, unless sooner dissolved by a two-thirds majority vote of the stockholders at any annual meeting, or at a special meeting called for that purpose, provided the corporation shall not be dissolved by less than a majority of the stockholders of the corporation; or by unanimous consent as provided by law.

ARTICLE VI. The affairs of this corporation shall be conducted by a board of directors, as provided in the by-laws, elected by the stockholders from their own number at each annual meeting, and who shall hold office, have such powers and perform such duties as may be provided in the by-laws.

Until the annual election on the first Monday in July, the following shall be the directors of this corporation:

NAME	ADDRESS
H. J. Stille	Garner, Iowa
Valentine Josten	Klemme, Iowa
Herman Stromer	Klemme, Iowa
C. A. Arnold	Klemme, Iowa
E. J. Arnold	Klemme, Iowa
John Larson	Klemme, Iowa
Geo. Zinn	Klemme, Iowa

ARTICLE VII. The private property of the stockholders of this corporation shall be exempt from the corporate liability except to the extent and in the manner provided by he laws of the State of Iowa.

ARTICLE VIII. This corporation shall have power to borrow money from time to time, on a vote of a majority of all the directors at any regular or special meeting, and the property, real and personal, of the corporation may be mortgaged to secure such sums borrowed, provided that the corporation shall at no time, have, or subject itself to indebtedness exceeding two-thirds of the paid-up capital stock.

ARTICLE IX. There shall be an annual meeting of the stockholders of this corporation which shall be held on the first Monday in July in each year.

ARTICLE X. The corporate seal shall be a circular disc containing the name and address of the company in the outer circle, and in the center the words, "Incorporated and Co-Operative." with the year of organization.

ARTICLE XI. The corporation may make and alter by-laws at pleasure, and may authorize the board of directors to do so, subject to such restrictions as may be deemed advisable

ARTICLE XII. Amendments to these articles of incorporation may be made at any regular stockholders' meeting, or at any special meeting of stockholders present, provided the proposed amendment shall have been submitted in writing to each of the stockholders at least thirty days previous to said stockholders' meeting, or shall have been submitted to a previous stockholders' meeting.

SIGNED:

Notary Public

BY-LAWS

ARTICLE I. Directors—Number—How Elected—To Elect Officers—Must be stockholder—Removal—Vacancies—Compensation.

Section 1—The affairs of this corporation shall be managed and controlled by a board of seven directors, elected from the stockholders from their own number at each annual meeting, who shall hold office until their successors are elected and qualified.

Section 2—Directors shall be elected by ballot. They shall be elected at the first annual meeting as follows: Three for three years, two for two years, and two for one year, thereafter each director shall be elected for a three year period.

Section 3—The directors shall, within ten days from the time of their election, meet and choose by ballot from their own number a President, a Vice-President, and a Secretary-Treasurer, who shall hold office for one year, or until the election and qualification of their successors.

Section 4—If any director shall cease to be a stockholder, he shall cease to be a director.

Section 5—A majority of the share holders present at any annual meeting or at any special meeting called for that purpose, provided thirty days notice thereof has been given, shall have power to remove any director or officer for cause, and thereupon such director or officer shall cease to be a director or officer of this corporation.

Section 6—The board of directors may remove any officer for cause, by a vote of two-thirds of all the members of the board, and shall fill any vacancy caused by such removal.

Section 7—The absence of a director from three successive meetings of the board shall be deemed a resignation as director, unless such absence is decided to be unavoidable by a majority of the board. Whenever any vacancy shall occur in the membership of the board by death, resignation, or otherwise, the remaining directors shall fill office until the next annual meeting of the stockholders.

Section 8—The directors shall receive as compensation for their services $2.50 per meeting for each meeting attended, payable at the end of each fiscal year, with the exception of the Secretary-Treasurer, whose salary shall be fixed by the board of directors.

ARTICLE II. Board of Directors — Duties — Powers — Meetings — Quorum.

Section 1—The board of directors shall employ a manager of the company who shall have supervision and management of the business of the corporation, under their direction and control.

Section 2—The board of directors shall have and exercise full supervision and control over the affairs of this company. It may, in addition to hiring its regular manager and fixing his salary, employ such other persons as it finds necessary, fix their compensation and prescribe their duties; shall require any person who receives or has control of the property of the company to furnish suitable bond; shall provide such books as are necessary for the accounts of its business; shall provide suitable fire-proof protection for said books; and generally, may do any and all things necessary and convenient in the exercise of such supervision, control and powers, not contrary to these articles of incorporation, by-laws, and the statutes of the State of Iowa.

Section 3—The general method of doing business by this company shall be a profit basis. The purpose shall be to secure the highest reasonable price for produce and the lowest reasonable retail price for merchandise in keeping with business conditions. But it shall be the duty of the board of directors and of the manager to conduct the business of this company on a margin of profit that shall be large enough to insure at least a fair rate of interest on the invested capital and to provide further funds as outlined hereinafter in Article VI, Section 1, with reference to earnings.

Section 4—It shall be the duty of the board of directors to keep in close touch with the financial condition of this company, to appoint a committee from their own number to examine the books, records, documents, and correspondence of the corporation, either monthly or quarterly at the discretion of the board; but they shall at least once a year, procure a reliable accountant to audit the books and accounts of the company. They shall also take, or cause to be taken, an annual invoice of all property and merchandise belonging to the company, and shall render to the stockholders at the annual meeting, a report of the year's business, together with the financial standing of the company. In preparing these yearly statements, depreciation of property shall be preserved and filed, one copy with the President, one at the office of the company, and one with the Secretary-Treasurer.

Section 5—The board of directors shall hold regular monthly meetings on the last Saturday of each month.

Section 6—Special meetings of the board of directors may be called by the president at his discretion, or shall be called by him upon the written request of a majority of the members of the board.

Section 7—At all meetings of the board, regular or special, a majority of the directors shall constitute a quorum, and a majority vote of those present shall decide all questions. Voting by proxy at any directors' meeting shall not be allowed.

Section 8—It shall be the duty of each director to attend all meetings of the board of directors and of the stockholders.

ARTICLE III. Duties of Officers and Managers.

Section 1—The president shall preside at all meetings of the shareholders and at all directors' meetings. He may call special meetings of the board at his discretion, and on the request of a majority of the directors, he shall call special directors' meetings. He may, with the consent of a majority of the board, call a special stockholders' meeting, and shall do so upon the request of a majority of the board or the request of twenty stockholders. He shall sign all certificates of stock, sign all bonds, contracts, or other instruments in behalf of this society when so directed by the directors. He shall be the custodian of all bonds given to the company, and shall be the proper person to bring suit thereon.

Section 2—The vice-president shall perform all duties of the president in his absence or inability to act.

Section 3—The duties of the secretary-treasurer shall be to keep a true and complete record of all the meetings of the directors and of the stockholders; to sign all certificates of stock and affix the seal thereto; to sign all orders and other papers of the corporation when ordered by the directors; to keep a true record of all stock issued or transferred; to notify each officer or stockholder of all meetings as provided in these by-laws; to receive and hold all moneys or notes belonging to the board of directors, and keep the same on deposit in such bank or banks as the board may designate and pay out said moneys only upon the order of the board. When ordered by the board of directors, he shall give bond in some reliable surety or bonding company to be paid by the corporation. He shall render to the directors whenever required by them a correct report of the business of the company and shall make a complete report at each annual meeting of the shareholders.

Section 4—It shall be the duty of the manager to have general oversight and control of the business of the company, subject, however, to the action of the board of directors. He shall attend to the buying and selling of all commodities the company may see fit to handle. He shall collect all accounts due the company and sign all receipts. The manager shall give his whole time and attention to the business of the company. He shall have charge of its property and shall at all times keep same in good repair, and well and fully insured. He shall faithfully account, when requested to do so by either the directors or the stockholders, for all money and property given into his control. He shall keep accurate records and books of all transactions, dealings, and business of this company, and a copy of all correspondence, and preserve all books, contracts, papers, statements, and documents pertaining to the business of said company and exhibit same to the directors whenever and as often as they may call for them. He shall turn over all books, papers, moneys, documents, correspondence, etc., and affects of this company to the directors whenever called for, or to any person whom the directors may designate. It shall be the duty of the manager to file with the board of directors at their monthly meeting, a full and complete record of all business transactions of the company during the preceding month, it being the purpose of this report to show in so far as possible, the exact financial condition of the company. He shall give good and sufficient bond, as may be required by the board of directors, for the faithful performance of his duties as contained herein, cost of such bond, if with a surety company, to be paid by this corporation. He shall do business with such depositories or banks as the board shall choose.

During the time of his employment by this corporation, he shall not trade or deal in futures in grain or other commodities on any board of trade, whether in his own name or the name of any other person, or in the name of this corporation. The manager may, however, when in his judgment the best interests of this company demand it, deal in grain futures on any regular board of trade in what is known as "Hedging." That is to say, he may, when grain is bought or contracted for future delivery, sell futures against the same on any regular board of trade, when he considers it a better transaction than selling the cash grain to arrive; or, in case grain is being stored by the company, same having been delivered at the elevator but not yet sold to the company and the needs of the business require that this grain be shipped out to provide bin room, he may buy a future on any regular board of trade to the extent of the stored grain shipments, as an insurance or protection against loss; provided, however, that all such hedges shall not be done by the manager without the knowledge and consent of a majority of the board of directors.

ARTICLE IV. Stockholders.

Section 1—The fiscal year of this society shall end on the last Monday in June, beginning with the last Monday in June, 1921.

Section 2—The annual meeting of the shareholders shall be held on the first Monday in July of each year. Each shareholder shall be notified of the time and place of said meeting by the secretary, who shall mail a written or printed notice to the last known address of each shareholder at least ten days prior to the date of the annual meeting.

Section 3—Special meetings of the stockholders may be held as provided in Article III, Section 1, of these by-laws.

Section 4—Twenty-five shareholders personally present, shall constitute a quorum at all meetings of the stockholders, but a less number may adjourn from time to time.

Section 5—Absent members may be permitted to vote by mail in cases where it is desired to consider some specific question, provided such question is submitted in writing thirty days prior to the date of said meeting. In such case, properly signed, written vote to the secretary, or presented by other person to him, shall be exactly the same as if they were present in person, but they shall not assign their voting power to another member by proxy.

Section 6—Roberts Rules of Order shall govern the proceedings at meetings of shareholders or directors.

Section 7—The order of business at all shareholders' meetings shall be as follows:

1. Call to order. 2. Roll call of stockholders. 3. Reading of minutes of last meeting. 4. Reports of committees. 5. Reports of Secretary-Treasurer. 6. Report of Manager. 7. New business. 8. Election of officers. 9. Adjournment.

ARTICLE V. Stock.

Section 1—Any person satisfied that his membership will be of benefit and beneficial to himself and to the company, may become a member by purchasing one or more shares of stock.

Section 2—Upon the assignment and transfer of any share of stock, the purchaser or assignee shall immediately present the same to the secretary-treasurer, who shall register the transaction at the next meeting of the board of directors, and when approved by the board, the secretary-treasurer shall make the proper entries on the books. The assignee or purchaser then becomes a member of the corporation. No transfer of stock in this corporation shall be valid as between the parties until it is entered upon the books of this association. The purchaser or assignee shall surrender the old certificate which shall be pasted in the stock certificate book on its respective stub, and a new certificate issued therefor in the name of the purchaser, who, by accepting thereof, agrees to all the rules and laws of the company.

Section 3—No shares of stock shall be transferred until all claims of the company against the owner thereof shall have been paid.

Section 4—No stock in this association shall be issued until the association has received payment therefor at par, in cash or property, provided, however, that when stock is to be issued for anything other than money, it must be subject to the approval of the Executive Council of Iowa, as provided in section 1 of the supplement to the Code, and any amendments thereto.

Section 5—Any person desiring to dispose of his stock in this company shall first deposit same with the secretary-treasurer of the company to be sold under the direction of the board of directors for such person, and if the same is not sold within thirty (30) days after the date of such deposit, it shall be returned to the owner thereof who may dispose of same without restriction or limit by the Company.

Section 6—No stockholder shall sign any bond, or sign, endorse or guarantee any note, bill, draft, contract, or in any way assume any liability, written or verbal, for the benefit of this corporation, without the written consent of a majority of the directors.

Section 7—The acceptance of a stock certificate shall constitute the assent of the shareholder to these by-laws, and each member agrees to abide by them and all future amendments legally enacted by the company.

ARTICLE VI. Apportionment of Earnings.

Section 1—Annually, immediately after the end of the business year, the board of directors, subject to instructions by the association, at any general or special meeting, shall apportion the earnings of the company for the year as follows:

First. There shall be set aside not less than ten per cent of the net profits for a reserve fund, until such amount has accumulated in said reserve fund equal to 50 per cent of the paid up capital stock.

Second. Five per cent of the profits shall be set aside for an educational fund, to be used in teaching co-operation.

Third. Dividends shall be made upon the paid up capital stock to be determined by the board of directors not to exceed 10 per cent.

Fourth. The remainder of said profits shall be apportioned by uniform division upon the amount of purchases and sales of the shareholders, and upon the wages and salaries of the employees.

Section 2—The uniform division above referred to shall be determined upon grain upon the bushel basis, and upon merchandise upon the dollar basis.

ARTICLE VII. Miscellaneous.

Section 1—Corporation Funds. The funds belonging to this corporation shall not be loaned.

Section 2—Credit. Credit to purchasers shall not be extended for a longer period than sixty (60) days. All accounts unpaid at the expiration of said period of time shall draw six per cent interest until paid.

Section 3—Shipping Clause. When any member or group of members of the corporation has grain which he wishes to ship through the corporation, he may do so, the corporation to charge a reasonable amount as commission for handling, said commission to be determined by the board of directors; provided, said member or group of members delivers the grain to the elevator in car load lots so as not to interfere with the general elevator business.

ARTICLE VIII. By-Laws.

Section 1.—Invalidity. The invalidity of any portion of these by-laws shall in no way affect any other portion thereof which can be given effect without such invalid part.

Section 2—To be Posted. A copy of the by-laws of this company with the names of all its officers shall be posted in its principal place of business subject to inspection, as is provided by law.

Section 3—Amendments. These by-laws may be amended at any regular meetng of the stockholders, or at any special meeting called for that purpose, by a majority affirmative vote of the shareholders present, providing a ten days notice in writing is sent to each shareholder.

"The lowest reason of all was for cold cash," she went on, as though he had not spoken. "Then came the glitter of precious stones, and, after that, silk underwear."

"Silk underwear!" exclaimed Mr. Randolph, mystified and interested in spite of himself.

"Of course you couldn't understand that," she said, "not unless you had seen some poor girl bury her face in crepe de chine and lace, tremble to try them on, and then sob because she had to wear clothes over them."

"Look here," said Mr. Randolph, shuddering at the pity of it: "we'll pass on to the next, if you don't mind."

"Curiosity comes next," resumed the girl obediently. "A woman is weak until she knows everything. Then comes a funny one that you won't understand at all. It's called 'Because.' 'Because he had on a coat that reminded her of an old coat that a man she had loved used to wear.'"

"My dear girl—" protested Mr. Randolph.

"I said they weren't interesting," she reminded him dispassionately. Her eyes widened. "And now," she continued, "we go up and up—spite that stabs its own heart; the lonely soul; consuming fire, and, last and greatest reason of all, just love." Her eyes glowed to some distant focus. "If all myself, my honor, my past, and my future dissolve to the single drop of a present moment in the crystal cup of

"Now Talk," She Said.

love, then let me give myself to a lover's lips for, once drained, nothing will be left upon which to hang the badge of shame—nothing remain in all the world but the spirit and—and the sacrifice."

"Girl," said Mr. Randolph, crushing her to him as though he snatched her back from just beyond his clasp, "where is your mind wandering? What have you been thinking? That I was asking you to—to give yourself to me?"

Her eyes came suddenly to his face.

"Yes," she said; "I thought that."

He stared at her for a long silent moment, his lips wavering nervously between pity and severity. A flush swept over her face, and into her eyes crept a look of fear. "You don't want me?" she whispered; then, as he did not speak: "Kiss me. I wish you to kiss me."

There was something in her insistence that clutched at his heart and bent him forward. He drew her head up slowly to meet his lips and kissed her as lightly, as impersonally as brother ever saluted sister, but far more fearfully. Immediately her body went limp in his arms, turned to a dead weight of uninspired flesh.

"It is true," she murmured, desperately. "You don't really want me and I can never love you now."

Randolph awoke to that still cry. He shook her, seized her head in both his hands, and forced her eyes to meet the blaze in his.

"You generous, careless, adorable little fool!" he growled. "Why, you're the most desirable and precious bundle of lovable charm that robber man ever trembled to hold in sacrilegious arms!"

She stared at him amazed.

"Why don't you kiss the way you talk?" she demanded.

"Because there's no reason for your desperate barter, my dear Imogene Pamela Thornton."

In one lithe motion she was out of his arms, on her feet, back to the fire, head upthrown.

"How dare you—how dare you call me by that name?" She was transformed; her eyes flashed with such a light as made the blaze in his own a paltry thing. "Do you think she would lie in your arms?" She asked, gulping out the words. "Vivienne Vivierre"—her lips curled in distaste at the name—"ah, yes; poor despairing thing! But I—Pamela Thornton! Oh, who are you? Why did you?" She dropped her face in her hands and sobbed as though her heart had broken.

Randolph did not leap to comfort her this time; he did not even watch her. With his eyes on the edges of fire that peeped from between and round her ankles, he began to talk.

"I knew you; I knew Sport; I knew Maggie. Just once I met you all, and I've never forgotten. I couldn't." He smiled crookedly. "You and I sat down so hard together and you cried out, 'My, what a bump!' and laughed and laughed—just like tonight, back there at the stage-door of the Crocodile."

Pamela stopped crying.

"So you were that awfully nice boy," she said, disclosing tear-stained cheeks and looking him over as though she were inventorying a long list of points of deterioration.

Robert Hervey Randolph, six feet tall, freckled-nosed, open-faced, blue-eyed and broad-shouldered, looked up at her almost appealingly as if his whole sum and substance were crying out to be appraised at face value but no less.

"That's me," he said vapidly. "My name is Robert Hervey Randolph. Some people call me 'Bob,' some 'Herv,' and the sidey ones say 'Randy.'"

"And I shall call you 'Mr. Randolph,'" said Miss Thornton bravely, and then broke into: "After—after I've th—thanked you again and—and again from my heart. I'm going now."

"That's a wrong guess," said Robert, smiling happily—he didn't know exactly why. "I'm the one that's going, after you promise me that you'll stay here until ten o'clock tomorrow. But before we come to that, please don't thank me ever. It's selfish, but I'd simply love to have you remember me as Bob or Herv or, at the very worst, Randy. Won't you?"

She looked this way and that before she let her face ripple to its wondrous smile.

"I'll go as far as Randy," she conceded mischievously; then the smile went and the shadow came. "But I really can't stay here, you know."

Mr. Randolph leaped to his feet, reached her in a single stride and caught her by both wrists. "Look at me!" he said. "If you won't promise to stay here without a break till ten o'clock tomorrow and thereafter at your pleasure, I'll stay myself and hold you. Now, do you or don't you? One—two—"

"I do."

"Do what?" inquired Robert.

"I promise."

"Make yourself absolutely at home, then," he said, as he dropped her hands and turned toward the door.

"I feel like Christmas eve," said Miss Thornton meekly. "Won't you please tell me what's going to happen?"

"You've guessed it—Christmas," he answered enigmatically, tossed the latch-key on the table, and left her.

She can be excused for spying upon him from the curtained window. She saw him awake the cabman, and then watched the pantomime of a long colloquy.

"Oh!" she moaned. "No wonder! The awful, awful price of those horrid clock things! Why did I let him tell it to wait?"

Presently she was amazed to see both the driver and Mr. Randolph disappear into the dark recesses of the cab and close after them its door. For twenty breathless minutes she watched, tormented by the thought that they had retired to have it out where they wouldn't be disturbed by the police. But at last they issued—both of them. Mr. Randolph proceeded to crank the car and then, walking rather strangely, went off, headed west; the driver mounted his box, threw in the clutch, and scurried to the east as though he were off to meet the morning.

"Strange doings!" thought Miss Imogene Pamela Thornton, as she turned from the window to start on a privately conducted voyage of discovery.

Strange doings, indeed, and stranger still could Imogene Pamela have heard as well as seen. This is what really happened: Mr. Randolph awoke the cabman gently but thoroughly; then he said:

"Look here: I want to buy your wagon."

"Gowan, boss; wot d'yer take me for? Here I been freezin' most to det' fer two mortal hours an' a gent like you starts right in kickin' on the clock widout even readin' it."

"Shucks!" said Mr. Randolph. "What's biting you? Never mind the meter-reading; here's twenty for you to forget that. Now tell me: Who owns your buzz-wagon? You?"

"Naw; the Village Cab company," replied the saturnine cabman as he stuffed the twenty-dollar bill into his trousers pocket.

"Well," said Mr. Randolph, "you and I are about the same build and I've got a proposition for you. Change clothes, hand me over your cab, and take two hundred dollars to see yourself to another job."

The driver showed no surprise; he contemplated the offer with half-closed eyes and dubiously working lips.

"Slim Hervey," taxi-driver.

Rank Shown by High Heels.

When high heels were introduced in Venice they were highly decorated. The height of the heels proclaimed the rank of the men and women wearing them.

GARDENS REDUCE LIVING EXPENSE

Just as Important for Food Supply Now as Any Time During Past Few Years.

ONE-TENTH ACRE IS ENOUGH

According to Agricultural Specialists Space Will Supply Enough Vegetables for Average Family in Many Large Cities.

(Prepared by the United States Department of Agriculture.)

Home vegetable gardens will be just as important in stabilizing the food supply in 1921 as they have been at any time during the past few years, say garden specialists of the United States Department of Agriculture. Urgent need for increased production of food during the war caused thousands of rural and urban residents to plant gardens, which resulted in establishing the gardening habit. This year, specialists say, home gardens will play an important part in thrift and economy. Thousands of acres of uncultivated land in and about many large cities will be utilized this year to furnish employment and recreation to home gardeners who know that by raising their own supply of vegetables they can materially reduce their living costs.

Enough for Average Family.

One-tenth of an acre of fairly good ground—a square about 65 feet each way—will supply the greater part of the vegetables needed by the average family, say garden specialists of the department. The cost of all seeds and fertilizers for a garden of this size should not exceed $15 to $18, and may not cost more than $5 or $10.

Experience has shown that not more than 100 hours should be required for planting and caring for a tenth-acre garden. This time is so distributed throughout the season that the work can be easily done by most persons working in factories, stores, or offices. It means an average of about five or six hours a week for a period of 20 weeks or merely enough time for proper outdoor recreation and exercise necessary for good health. More time will be required early in the season while the garden is being prepared and planted than during the summer, when not more than two or three hours a week will be necessary to keep the garden in good condition.

A little time during mornings, evenings, and on holidays spent in the garden is a good investment. A garden is like a farm, however, in that it

Garders Furnish Recreation as Well as Food.

produces according to the attention given it. A well-cared-for garden will produce much higher yields than one which is neglected. The average return in money value from a tenth-acre plot of ground usually is about $85 for a season.

Fresh Vegetable Supply.

Plenty of fresh vegetables direct from the garden to the table is of vastly greater importance than the money value, the cutting out of middleman's profits or transportation problems. The question of saving and cost, however, may prove a very important factor before the close of another year. Already there is much unemployment of labor and the local or home production of foods in the garden is the surest way of safeguarding the family food supply. It is said that the farmers of the country could cut themselves off from the rest of the people and live comfortably for an indefinite period, because they can produce practically everything that they need. Gardens furnish an important part of the living of families on farms and the same principle will apply to people who live in cities, towns, and villages who have access to a small tract of land on which to grow a garden.

There is nothing connected with the work of cultivating a garden that has a tendency to injure the health unless overexertion is indulged in. Persons who habitually work indoors should be rather careful when they first begin working in the direct sunshine. When the work is first started the muscles are stiff and weakened from inactivity and it is necessary to go slowly until they get into play.

PRIMARY OBJECT OF PARCEL POST TRADE

Difficult to Solve Problem of Fair Prices.

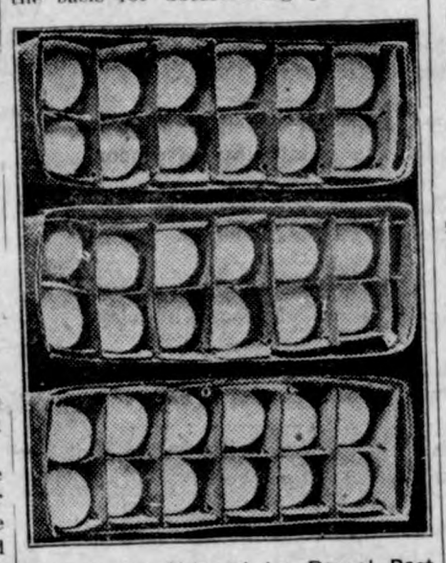
Producer Seeks to Secure Increased Prices and Consumer Wants Better Products—Agreement Should Be Fair to Both.

(Prepared by the United States Department of Agriculture.)

As the object of parcel post dealing is to obtain slightly increased prices for the producer and better products at the same price, or the same class of products at lower prices, for the consumer, the question of arriving at prices fair to both is important, and also difficult, say marketing specialists of the United States Department of Agriculture.

It is not likely, at least not for some time to come, that eggs will be marketed so largely by parcel post that the ordinary market quotations can not be depended upon in arriving at prices.

It should be comparatively easy for a producer and a consumer to agree upon stipulated market quotations as the basis for determining prices. A



Eggs to Be Shipped by Parcel Post Should Be Packed so They Will Not Touch Each Other and Break.

consumer may desire 5 dozen eggs a week, the price to be an agreed-upon figure above the wholesale quotation for the best grade of eggs on the market that week. The necessary relations in this matter can be maintained only by scrupulous honesty and mutual trust.

The nature of the agreement between the producer and the consumer, whether reduced to writing or not, should be made to suit the circumstances and be fair to both. Perhaps the first agreement should be in writing; but later, if mutual confidence and trust have been thoroughly established, the contract may be verbal.

The matter of frequency and method of payment can be arranged in various ways. For the first agreement term, which may be a year or less, cash in advance might be satisfactory, until a definite system of orders and payments is established.

For the reason that eggs are abundant in the spring and scarce in the autumn and early winter, the contract should specify the quantities to be supplied each week throughout the year. The producer making an agreement with a consumer should undertake to replace or allow rebates for eggs lost by breakage in shipping.

BEST VEGETABLES TO PLANT

Many Beginners Make Mistake of Planting Everything in Catalogue—Pulverize Soil.

Some beginners in gardening become very enthusiastic in early spring when they look through seed catalogues. They have a desire to plant every kind of vegetable elaborately described and favorably illustrated. As a rule not more than 15 or 20 kinds of vegetables should be planted in the average home garden, say specialists of the United States Department of Agriculture. Few beginners also realize the importance of well-prepared seed beds. Pulverize the soil as deeply as it is plowed. If the soil is coarse and lumpy, even though its surface is well broken up, the plants will not thrive. Large air spaces in the soil are injurious, but a great number of small ones are beneficial.

BUY EGGS ON QUALITY BASIS

Uniform Color, Size, Clean and Fresh Product Will Command High Figure on Market.

Nearly all market poultry and egg buyers are now buying on a quality basis. A case of good eggs of uniform color, averaging two ounces to the egg, clean, sound and fresh, produced by a flock of standard-bred hens, is worth more than a case of mixed white and brown eggs of odd sizes and qualities, laid by odd chickens in a scrub flock.

GOOD TREES FOR WINDBREAK

Black Hill Spruce or White Spruce Are Fine Evergreens—Willow and Poplar Grow Quickly.

Send in an order for enough trees for a good windbreak. Black Hill spruce or White spruce are good evergreens to use. Willow, Norway poplar and even Box elder are quick growing but not lasting trees.

NEEDN'T BOTHER ABOUT THAT

Church Official Evidently Had His Own Idea of Ultimate Destination of Mausoleum Owner.

A colored man of some means built a handsome mausoleum for himself in the churchyard. It was a massive piece of masonry and presented an aspect of unusual strength.

One day he met one of the church officers coming out of the churchyard.

"Well," said the owner of the mausoleum, with an air of pride, "you have been up seein' that mausoleum of mine?"

"I have," was the response.

"What do you think about my rising out of it on the day of judgment?"

"Oh, well," said the other. "I wouldn't bother about that. When that day comes, they'll just take the bottom out of your concern and let you fall down."—Harper's Magazine.

The Fashions.

Lady Duff-Gordon said at a luncheon:

"The fashions are gradually becoming more modest. They are nothing like so shocking as they were last year.

"A young woman went into a very smart shop one day last year and said to the saleswoman:

"'I want to buy an afternoon gown of the very latest fashion.'

"'Yes, madam,' said the saleswoman. 'And does madam prefer a gown that is altogether too short or one that is altogether too transparent? We stock both kinds.'"

Nothing Like That!

There came into a church a man who informed the parson that he wished to be married on a certain day.

The parson inquired the man's name, and it was given him.

Then he said: "And your fiancee?"

The man shook his head.

"We are not going to have any of that," he replied. "It will only be a quiet affair."

Pa Ought to Know.

Mother—"We must get a nurse for the baby." New Pop—"A nurse? What you need is a night watchman."

Hot Springs Waters Wonderfully Successful in the Treatment of Rheumatism

THE peculiar properties of the waters of the Hot Springs of Arkansas are due to radio activity, found in them to an exceptionally marked degree, and their equal has never been known in the treatment of rheumatism and all uric acid troubles. These springs are owned and controlled by the U. S. Government.

The cost of living at Hot Springs may be regulated to suit any purse, accommodations varying from moderate priced boarding houses, up to the most fashionable hostelries.

SUNDAY HALF A CENTURY AGO

Spirit and Letter of Commandment Both Thoroughly Obeyed In Western New York.

My mother was born and reared in a little country village in western New York. On the farm where my grandmother lived it was the custom to begin Sunday on Saturday night at sundown. The "hired man" came in from the chores, grandmother put away all her work in the kitchen, and then the entire family gathered in the "best room" and studied the Sunday-school lesson, or had a reading from the Bible, led by grandfather, and all the family retired not later than 9 o'clock.

In the morning, after doing none but the absolutely necessary chores on the farm, the team that had not been used the day before was hitched up to the big four-seated wagon and the entire family including the "hired" help, went to church. There was preaching service in the forenoon, and then we adjourned to a lunch for ourselves and the team. Then we went in to a Sunday-school service, and after an interval there was another preaching service, after which we hitched up and drove slowly back to the farm.

That was the way Sunday was kept in western New York a little more than 50 years ago. I can remember hearing my mother say that when she was a girl in this same New York state village, she was not allowed to walk except to the cemetery and back, on Sunday, and was not allowed to read any books except the Bible and "Fox's Book of Martyrs."—Christian Herald.

ROYAL PERSON WELL GARBED

Augustus of Poland Had Clothes Sufficient for Regiment—Also Had Other Idiosyncrasies.

Gentlemen of fashion today are mere paupers when it comes to attire, as compared to what King Augustus III of Poland deemed necessary to his comfort. He filled two great halls with clothes and had a special watch, snuff box, sword and cane for every one of his hundreds of suits. To go with them he also had 1,500 wigs. Five artists were kept busy painting miniatures of the clothing and keeping these paintings in a catalog that the king might select from each day as he rose.

He took the lovely countess of Cozelle as his wife, and the mere fact that she had a husband already mattered little. He appeared at her door one day with a horseshoe in one hand and a bag of 100,000 crowns in the other. The gold he tossed at her feet to demonstrate his wealth and generous instincts, and the horseshoe he broke with his bare hands to demonstrate his strength and determination. The lady, impressed, got rid of her husband at once, obtaining a divorce of the sort that allowed of remarriage. Suspicious historians have hinted that the horseshoe might have been filed a bit before the kingly hand tore it apart.

Carnegie's Hardest Bargain.

Andrew Carnegie, in his autobiography, which Houghton Mifflin company is publishing, tells of his first financial bargain. One of his chief enjoyments was the keeping of rabbits, and the pets naturally attracted the small boys of the neighborhood. "My first business venture was securing my companions' services for a season as an employer, the compensation being that the young rabbits, when such came, should be named after them. The Saturday holiday was generally spent by my flock in gathering food for the rabbits. My conscience reproves me today, looking back, when I think of the hard bargain I drove with my young playmates, many of whom were content to gather dandelions and clover for a whole season with me, conditioned upon this unique reward—the poorest return ever made to labor."

Old American Glass.

The Pennsylvania museum announces a find of old American glass. One thousand specimens have been dug up near Alloway, N. J. The field where the specimens were found was once the site of the old Wistar Glass works, founded nearly two hundred years ago by Caspar Wistar, who was of Austrian extraction and titled.

The specimens found were for the most part fragments of bottle and window glass, of which there have not been many specimens until now. The museum is now making a study of the types of glass that were produced in the early days of Pennsylvania and New Jersey. The first glass to be manufactured in this country was that of a Virginia company located at Jamestown, but the first produced successfully was that of Alloway, then known as Wistarburg.

Girls Traveled Far in Wilderness.

Down the wild and ragged east shoreline of Lake Winnipeg, Manitoba, where not a farm nor a settlement breaks the desolation, two young women of eastern Canada recently rowed 200 miles in an open boat, taking a month for the trip and making their own camp every night. The collection of fossils, in which the region is rich, was the object of the remarkable journey. A lone Indian was the only human being sighted in the entire distance. The daring voyagers were deposited by a steamer at the mouth of the Berens river, about midway of the lake, and from that point were wholly dependent upon their own resources. — Popular Mechanics Magazine.

Avery Township News

Roy Swanson visited with Russell Bell Sunday afternoon.

Mrs. D. A. Marshall and son were callers at the Herb Marshall and Hans Willer homes Monday morning.

Quite a number of friends and neighbors gathered at the home of Martin Jensen last Wednesday night to celebrate a few birthdays which occurred last week. The evening was spent in music and dancing. At a late hour refreshments of cake, coffee and sandwiches were served. All departed later wishing those who had birthdays many more to follow.

Goldie Moberely visited at the home of Hazel Dutton last Sunday afternoon.

Mr. and Mrs. E. J. Arnold were Mason City callers last Saturday.

Liberty Township News

Miss Faye Bridges entertained a number of young people at her home last Sunday, it being her birthday anniversary.

The Rhubes house in the west-central part of the township burned to the ground last Friday at 1 p. m. The fire started from a leaky flue. Some of the furniture was saved.

An orchard and poultry demonstration conducted by county agent Nutty was held at the J. F. Miller home last Friday afternoon.

School No. 6 visited school No. 8 last Friday and in the afternoon both schools took in the demonstration at Miller's.

Quite a number frm here attended the wrestling match at Garner last Friday evening.

The W. F. M. S. me on Tuesday of this week in the basement of the church.

A farmers' meeting is scheduled for this Thursday evening to be held at the Liberty Twp. center school house.

Seeding started in full blast the fore part of the week.

A basket social was held at the Liberty Twp. church last week Tuesday evening by the ladies of the W. F. M. S. An exceptionally large crowd was present. Rev. McConnel of Garner gave an address.

"Buzz' Carlson has been on the sick list of late.

We have often wondered why Lu-Verne Smith walks to Belmond nearly every Sunday. At first we thought he went there to hold down a chair in some young ladies home but we have adandoned that idea, Vern is too bashful. At last we have discovered that he is official "spike counter" for the Rock Island Railroad between Klemme and Belmond. That is why he walks between Klemme and Belmond so often. Vern reports that there are 36,960 rail ties between here and Belmond, 31,335 spikes in the ties and that on each trip he takes 38,269 steps He miscounted a few times and had to go back the next Sunday to verify the report. However the above is official and if you don't believe it, walk to Belmond some Sunday with Vern and take an adding machine with you.

BASEBALL LEAGUE

Three Belmond men met a number of our citizens this Wednesday afternoon in the interest of organizing a baseball league. The gentlemen had vsited Garner, Klemme and Thornton before coming here and from here went to Britt for the same purpose. The idea is to form a club of teams from six or eight neighborly towns, play only the home boys and have a regular schedule. A meeting of the baseball fans will be called in the near future to consider the proposition.—Kanawha Reporter.

WANTED—One roomer. Also three rooms to rent for light housekeeping—Mrs Leo Wilkins

Schools Are Making Filipinos An English Speaking Race

This is the type of schoolroom that is rapidly making an English speaking nation out of the 10,500,000 inhabitants of the Philippines.

If a teacher in a public school in the Philippines desires to punish a child, she doesn't have to apply the ruler. She simply sentences the offending pupil to remain away from school a few days!

This is the most severe punishment she can inflict, for Filipino children take an almost abnormal pleasure in going to school and acquiring an education. The all-Filipino legislature, in response to the popular demand for "schools, and still more schools," is constantly increasing its appropriations for education, but the schools can scarcely be constructed fast enough to care for the ever-increasing enrollment. The school enrollment is now 892,000 without any compulsory attendence laws. When Dewey sailed into Manila Bay there were 2,100 private schools in the islands. Today there are 6,500 schools and colleges, with 17,000 Filipino teachers and about 1,000 other teachers, 341 of whom are Americans.

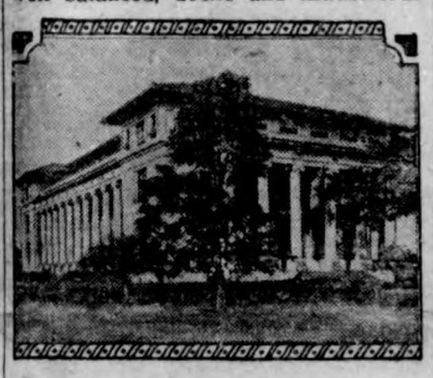
The University of the Philippines is the center of learning of the entire Orient, and is the pride of the Filipino people. It has an enrollment of 3,500 students. Santo Tomas university of Manila, older than Harvard, is another famous seat of learning.

The school system includes normal schools, agricultural colleges, twenty-seven farm schools, a nautical school and a school for the deaf and blind.

The Filipino pupil, in addition to learning English and in addition to his regular studies, learns basket making, embroidery and hat weaving, the trades peculiar to the islands, as well as the domestic sciences and pedagogy. There are more positions than can be filled by the trade school and commercial college graduates. The trade and agricultural schools produced $1,176,850 worth of goods in 1919.

There is nothing that the Filipino people take more pride in and that they are more grateful to the United States for, than their school system, which has been declared by many competent critics to be one of the finest in the world. While the system was implanted in the islands by Americans, every cent of the cost has been cheerfully borne by the Filipino people. The schools are making an English speaking race of the Filipino nation. English is the official language, and it is declared will continue to be when independence is granted.

"The Filipino boys and girls are well balanced, docile and industrious



University of the Philippines which Has an Enrollment of 3,500 Students.

pupils," says Junius B. Wood, who was sent to the islands by the Chicago Daily News to investigate conditions there. "To attend school is a privilege to a Filipino child or young man, not an unwelcome duty. In the cities those who work days go to school at night.

"Today there is hardly a barrio where youngsters cannot be found who speak English. One-third of the house of representatives and eighteen of the twenty-four senators speak English. In the next election, in 1922, the young men of the new schools will be stepping into control, and the first great goal of the public school system will have been reached."

KLEMME HAS ELECTRIC STORE

C. C. Tessier of Garner, has put a stock of electrical supplies in the building formerly occupied by Chas. Busch as a land office, next to the McCullough Barber Shop. Dr. R. M. Thomas has his veterinary office there also and will sell the supplies for Mr. Tessier. The stock consists of all kinds of lamps, sockets, fuses, plugs, switches, etc., everything needed for repairs. See his ad elsewhere in this issue.

THAT WRESTLING MATCH AT GARNER

Quite a crowd from here and nearby went to Garner last Friday evening to see the big wrestling match between Parcaut and Schober. Parcaut won the first fall in 44:50 and Schober came back and took the second fall in fifteen minutes. Then after 31 minutes of wrestling Parcaut was thrown off the platform and injured and was not able to come back. The match was given to Schober.

But the thing that interested the Klemme fans was the match between the fast (?) Bill Zeisemer of Garner and Ben Greiman of Liberty township It was just as we had predicted in the columns of the Times for the past few weeks—Ben showed that Garner would-be-wrestler just where to get off at. Ben took the Garner man to a good trimming and threw him to the mat the first time in 5 minutes with a body scissors and the second fall in 12 minutes with the same hold. Bill should go way back and sit down for he is absolutely no wrestler at all. He didn't have the appearance of a wrestler as he ran around the ring trying to keep away from Ben. Ben is all here and the county championship belt goes to him. Good Boy, Ben, we are all for you here.

THE SEWER GOING IN FAST

The sewer gang are making rapid progress and have finished the deepest digging which was through Main Street and up the street past Straatmans. They have good digging also and are sepping right along now. At this rate it will not take them long to complete the job. The disposal plant is also under construction.

METHODISTS ENJOY APRIL FOOL PARTY

The members of the First Methodist Sunday School enjoyed an April Fools' party at the Idle Hour Theatre last Friday evening. All sorts of April Fool stunts were given and that idea was also carried out in the program. After the program games were played by all and at a late hour a lunch consisting of coffee, sandwiches, pickles, cake, etc. was served. Even the lunch was "touched up" with the spirit of the evening and each and every person bit into a cork concealed in the sandwich. Loaf sugar with cork centers furnished a lot of amusement when the person who got it tried vainly to stir the sugar in the coffee and "make i sink." The evening was well enjoyed by all.

The Churches

FIRST METHODIST EPISCOPAL CHURCH

Preaching service Sunday morning at 10 o'clock.

Sunday School at the close of the preaching service at 11 o'clock.

No services in the town church on Sunday evening.

Sunday School in Liberty Township church Sunday morning at 10:15 o'clock.

Preaching at 11:30. Epworth League Sunday night at 7:30. Preaching service at 8 o'clock.

Midweek prayer services in town each Thursday evening at 7:30.

Come out and worship with us.

A. H. Meyer, Pastor

THE OLD TOWN WELL

The sewer man unearthed the old town well in the center of Elm street at the intersection of Oak street.

At an early date a two-inch well was drilled at this point and for the most part supplied the water for the bigger part of the town at that early date. There was no scarcity of surface water at that time for all that ws necessary hen was to put down a post hole and put on side boards and you had water in abundance. In those days there had been no tiling done and the surface water stood very near the top of the ground. Even where the Farmers Savings Bank and the old National bank now stand were duck ponds.

There was a windmill tower erected over this well and a windmill installed on the tower which did service to supply water for a number of years. As it was necessary at stated intervals to oil this mill, Frank Page, a brother of Sherman Page, climbed the tower for this purpose and it is supposed that the wind shifted, causing he fans to srike Mr. Page and knock him from the platform. Be that as it may, he was found at the foot of the tower so badly injured that he never regained consciousness. The oil can was found where it had been knocked from his hand and in his fall he had struck a buggy wheel, the vehicle being parked at the side of the well. No one saw him fall, consequently the cause of his fall can only be surmised.—Corwith Hustler.

STATEMENT OF OWNERSHIP

of The Klemme Times, published weekly at Klemme, Iowa, for April 1, 1921

State of Iowa,
Hancock County, ss.

Before me, a Notary Public in and for the State and County aforesaid, personally appeared R. A. Jorgenson, who, having been duly sworn according to law, deposes and says he is the publisher of the Klemme Times and that the following is, to the best of his knowledge and belief, a true statement of the ownership, management, etc., of the aforesaid publication for the date shown in the above caption, required by Act of August 24, 1912.

1. That the names and addresses of the Publisher, Editor, Managing Editor, and Business Manager are:

Publisher, R. A. Jorgenson, Klemme, Iowa.

Editor, R. A. Jorgenson, Klemme, Iowa.

Managing Editor, R. A. Jorgenson, Klemme, Iowa.

Business Manager, R. A. Jorgenson Klemme, Iowa.

2. That the owner is R. A. Jorgenson, Klemme, Iowa.

3. That the known bondholders, mortgagees, and other security holders are: None.

R. A. Jorgenson, Owner

Sworn to and subscribed before me this 1st day of April, 1921.

(SEAL) Fred A. Arnold

(My commission expires July 4, 1921)

An eleven pound baby girl was born to Mr. and Mrs. Payey yesterday.

G. I. Schaper passed away Tuesday after an illness of several months. The funeral was held today at 2 o'clock.

Horse Chestnut.

It is said that the name horse chestnut was derived from the fact that when the leaves of the tree fall there is a scar left on the twig in the shape of a horse shoe that bears marks resembling the nails of a shoe.

WITHOUT NAILS OR RIVETS

New Scientific Method of Shipbuilding Seen in Construction of Vessel at Liverpool.

Can you imagine a ship without a nail or rivet in all its hull? Do you recollect the visit to the shipyards and the army of men nailing huge timbers to the skeleton frame of a ship? And, over in the next yard, the swarm of men hammering the white hot rivets in the great plates of a battle ship? One's imagination is stretched considerably to conjure a method by which all these workmen may have their toil reduced or eliminated. Yet this is today's development in the science of shipbuilding. The steamship Fullagar has just slid down the Liverpool ways without a nail or a rivet in its hull. From stem to stern the plates are electrically welded. The Fullagar is an oil driven cargo steamer of 500 tons. She is now undergoing final tests. Experts declare that she will not only stand all the tests required, but her success as an ocean carrier will revolutionize shipping. We may now calculate what a boon the electrical welding process will be if great armies of men have to be transported on the "bridge across the seas." Not only does this method release man power for other tasks, but it enables shipyards to turn out mighty steel ships within a short space of time.

COULD USE TOMATO SEEDS

Department of Agriculture Points Out How They May Be Made a Source of Revenue.

That much valuable material is being wasted annually by throwing away tomato seeds extracted in pulping, soup, catsup and canning plants is indicated by investigations made by the United States Department of Agriculture.

Department investigators have found that more than one thousand tons of seed are thrown away annually in northern tomato-pulping plants, with large enough output of seed to pay for shipping, and that they may be made into edible oil and stock food worth about $86,000 (December, 1919). Cost of collecting and preparing the seed is estimated at about $35,000, including all proper charges, and the cost of the necessary equipment is given at not to exceed $50,000.

In addition the same plant, which would run not more than five months in the year, could be used for the handling of grape seeds and pumpkin seeds, which would distribute the overhead and cut down the cost of manufacture of the tomato-seed products.

Cavalrymen's Splendid Ride.

Col. Ezra B. Fuller, the author of a riding "anthology," has himself a notable achievement of endurance and horsemanship to his credit. During the Nez Perces campaign of 1877 Fuller, then second lieutenant of the Seventh cavalry, stationed on the north bank of the Yellowstone river, near Miles City, was ordered by General Miles to take five troopers with him and carry dispatches to General Sherman at Fort Ellis, Mont. Much of the trip had to be made running alongside of the horses, owing to the mountainous character of the country traversed and the almost impassable condition of the trails. The total distance covered was over 350 miles, which was made in four days and nineteen hours, without changing mounts.

The Domestic Optimist at Work.

"My husband has never spoken a cross word to me."

"Daughter is always at the head of her class, and she doesn't have to study a bit hard. She really seems to have more time to play than any of the other girls."

"I'm so glad you came, I assure you. One extra for dinner doesn't matter."

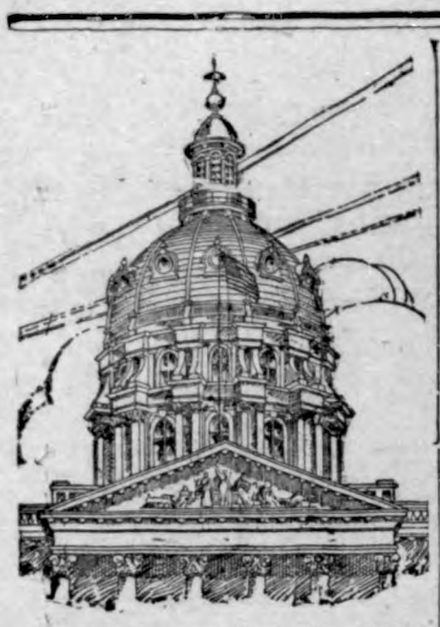
"So glad you called! I didn't care to go to the matinee, anyway."

"My husband could get a much larger salary by going with another house—in fact they are begging him to do it—but his present employers have treated him so nicely that he just won't leave them."

"Never mind breaking the vase—it was not one that I cared especially for."—From Life.

Women and Cats.

Women are like cats. If you move toward them they run away. But if you sit there and say "Puss, puss, puss," and put a saucer of milk on the floor, in due course they will be moved by curiosity to come and see what there is in the saucer. Then, click! you've got the cat by the back of the neck so that it can't scratch you. When the cat has struggled enough and discovered that it can't get away, and been tickled behind the ear, she'll sit on your lap and purr. And then, ah, then, you no longer need to say, "Puss, puss, puss!" You can say, "You damn cat!" and she'll go on sitting there, purring.—From "Caliban" by W. L. George.



UNDER THE GOLDEN DOME

Des Moines.—With adjournment of the Iowa legislature decided upon for April 8, the final rush of business is on in full force.

The house so far is far in the lead of the senate in the transaction of business, largely due to the fact that oratory is much less lengthy in the house, and business is pushed through very speedily by Speaker Arch McFarlane.

In the senate, however, many bills have taken full days to dispose of, most of them being defeated.

One of the most important bills to pass either house to date is the Olson bill providing for a uniform head tax of $3 to be levied upon every citizen of the state more than 21 years of age, regardless of sex. Proceeds from this tax are expected to reach $4,000,000, and will be distributed to the general school funds of the various independent school districts, in proportion to population.

The bill passed the senate 42 to 8, and will be acted upon by the house soon.

Would Read Bible

The Francis bill providing for the compulsory reading of ten verses from the bible daily in all school rooms passed the house after a spirited struggle. An amendment by Rankin to divide the classes in to sections, and to read ten verses of the old testament to the Jewish children and ten verses of the book of Mormon to members of the Latter Day Saints church was defeated by a big vote.

Wont Abolish Office

The senate refused to pass the Holdcegel bill providing for the consolidation of the board of parole and the board of control, the first action to be taken in the line of Governor Kendall's recommendations for a consolidation of state departments. This action forecasts the rejection of any further legislation along this line, and does not indicate that there will be any reduction in the number of jobs available for deserving party workers, or subject to the disposal of the people of the state.

Industrial Court Bill Up

The Springer bill providing for an industrial court to pass upon disputes relating to the construction and enforcement of corporation franchises was passed by the house and is now before the senate.

It practically grants indeterminate franchises to all public service corporations save telephone companies, who have a bill of their own. The bill is endorsed both by the public service corporations and members of the Iowa league of municipalities, and has a good chance of passage in the senate.

Pass Blue Sky Bill

The house passed the Weaver bill regulating the sale of corporation securities in Iowa by a practically unanimous vote. This bill was drafted by Secretary of State Walter C. Ramsay, and was amended in several particulars in committee. It will pass the senate with little change in its provisions. The bill provides for the licensing of stock salesmen, throws further safeguards upon the issue of stock, and is in general intended to protect the investor from transactions similar to the Associated and Midland Packing scandals.

Mead Bill Defeated

Action of the senate in defeating the Mead bill, which provided for the abolishing of the state highway commission, the transfering of the offices of the road department from Ames to Des Moines, and the creation of a highway engineer as head of the highways department means that no material change will be made in the highway laws at this session.

The vote on the bill was 32 to 18. Senator Pitt and Senator Price were among the leaders in the fight against the highway commission, and Senator Brookhart was another active participant. The closest division came upon a proposal to move the offices of the highway commission to Des Moines, which failed to pass on a tie vote, 25 to 25.

A considerable increase in the general state tax levy is likely, as there has been no legislation providing for any considerable amount of additional revenue.

Lieutenant Governor E. R. Moore has denied that he intends to become a candidate for governor in 1922. Senator M. B. Pitt is mentioned as a possible candidate on a platform opposing the present state highway commission and state highway laws. He would have the backing of the Iowa Homestead, it is declared.

Bonus Bill Signed

The bonus bill has been signed by the governor, and action now awaits the submitting of the matter to the general election of 1922. A proposal for a state bond issue of $22,000,000 will be submitted at that time to pay the cost of the bonus system.

To Fight Black Plague

Passage of a bill appropriating $25,000 per annum to fight the black plague and venereal disease is also likely. The house has passed the Knickerbocker bill appropriating $250,000 per annum for the purpose of fighting bovine tuberculosis in the state.

Representative Esty P. Harrison of Pottawattamie county, a newspaper publisher, and head of the appropriations committee, seems to have the inside track for the speakership of the next general assembly, and is the only representative receiving general mention for the office so far.

Consideration of the big appropriations bill will be in order in the final days of the session. For the first time drastic cuts are being made in the bills for support of the state institutions under the board of control and board of education, particularly where requests are made for appropriations for new construction.

A whole flock of bills relating to the sale of cigarettes have been presented ,including a straight license bill by Dodd, and a measure by Moon to apply the injunction and abatement acts to entirely prevent their sale. It is likely that neither of these measures will pass, and that the matter will be left as it is, without change.

A bill providing for a five per cent tax on the gross receipts of all common carriers is soon to be acted upon by the senate. Ben I. Salinger, former judge of the supreme court, has been very active in pushing the measure, and another providing for an increase in the value of railroad property for taxation.

Present indications are that the house and senate will pass the buck to Governor Kendall as to the date of the special session to complete the work of code revision, which has not been touched upon as yet. Dates suggested range from June to never, and the governor will have plenty of latitude in the matter.

Appointment of a sifting committee in both house and senate is scheduled for about April 1. Many bills which have not been passed by either house, but which are considered of vital importance will be recommended out for passage by the sifting committee, which will take over the work of all committees except that of appropriations, and take charge of all bills pending in them.

The Doolitttle vital statistics bill which would permit Iowa vital statistics to be recognized by the federal government has been recommended for passage in the house. It provides for the registration of all births and deaths by township registrars, who will be paid a fee of 25 cents each by the county. Iowa vital statistics have never been very carefully kept, and the system used is antiquated, friends of the bill declare.

The Banta bill providing for a general revision of the primary laws was defeated in the senate, or rather was sent back to committee after being drastically amended, and will not again be called out. It is therefore almost a certainty that the primary law will stand as present for another two years. A considerable sentiment exists for the modification of the present law, but the opposition is neither agressive nor numerous enough to do anything this session.

Governor Kendall again submitted the name of a woman for confirmation as a member of the board of control, Mrs. Max Mayer of Iowa City being the second to be suggested to succeed William D. Sheehan of Anamosa. The senate refused to confirm this appointment, and Governor Kendall then suggested the name of James Duncan of Fort Dodge, banker and business man, who was confirmed without delay. He will take his seat July 1.

The senate defeated, 28 to 22, the proposed bill taxing net incomes of corporations 1 per cent and thus apparently ended any possibility of legislation along this line. Opposition was based upon the complaint that Iowa industries should not be compelled to compete with outside corporations which did not pay a similar tax. Railroads particularly were opposed to the bill.

It is possible that a compromise will be agreed upon licensing the sale to persons more than 20 years of age, and applying the injunction feature to the sale to minors.

The house passed a bill prohibiting the membership in recognized farm bureaus of persons not actually farmers, when objection is raised.

Speaker Arch McFarlane of Blackhawk county will hold over for the special session, and there will be no reorganization of the house at that time.

A bill granting to osteopaths a special board for the licensing of osteopaths has been passed almost unanimously by both branches of the assembly.

1—A captain of marines at Paris Island, S. C., early in the war, had in his company a forty-seven-year-old private. The other day they met by chance on a Washington street. The captain is now Major Ronato Tittoni, U. S. M. C., and paralyzed from wounds. The private is now Secretary of the Navy Edwin Denby. 2—Scene in Santiago, Dominican Republic; congress may investigate the marines' activities during American occupation. 3—Mrs. Ruth Nicholson Melville, daughter of Senator S. D. Nicholson of Colorado, who christened the superdreadnaught Colorado, launched at Camden, N. J.

NEWS REVIEW OF CURRENT EVENTS

Germany Has Communist Revolt Resembling in Some Phases Affair of Year Ago.

MEAT STRIKE COMPROMISED

Foreign and Domestic Pressure for League of Nations—More Elastic Rulings on Volstead Law—Trouble Over Vote in Upper Silesia—Soviet Russia Wishes to Trade in U. S.

By E. F. CLIPSON.

March madness again seized Germany a few days more than one year after the troubles instigated by Doctor Kapp and General von Luettwitz in 1920. Although the Kapp-Luettwitz affair speedily was suppressed it was followed by communist uprisings similar to the ones now taking place. Last year it started with a monarchist tinge. This time the movement appears to be almost entirely communistic, financed, it is charged, by Russian gold.

Industrial districts of middle Germany contain the center of the disturbances which threaten the great ammonia, potash, anthracite and copper works. Involved are the important cities, Dresden, Leipzig, Freiburg, Plauen, Halle, Mansfield, Eisleben and a number of smaller places. Outside these areas the large shipping city of Hamburg has been the scene of violent occurrences.

Dynamite has been used extensively by the revolutionaries and various town halls and other public buildings have been damaged. In several cases prisons were stormed and their inmates liberated. Banks have been blown up in a few places and their safes raided. Some armories and ammunition stores have also fallen into the hands of the communists. Fighting behind barricades and the use of barb wire entanglements have been features.

Although the loss of life has been considerable both among the government forces and the mutineers, while the latter have gained control of important areas and violence, robbery and virtual anarchy prevail in many places, the trouble so far does not appear to equal that of last year. The fact that it is confined mostly to Prussian Saxony, the center of radicalism in Germany, does not indicate that it will not spread.

As a result of the Washington conference, and as anticipated, the packing industry strike resulted in a compromise. Representatives of the workers agreed to accept the wage reductions while the packers agreed to retain the eight-hour workday with overtime rates as fixed by a previous arbitration, and to extend the wartime arbitration agreement for six months—until Sept. 15. This puts off prospects of a strike for at least six months unless the workers by general consent repudiate the action of their representatives. Meanwhile the principal packers state they will go ahead with their plans to democratize the plants, institute shop councils, etc., in an experiment against future strife.

The question of American participation in the League of Nations continues to bob up. Notwithstanding the pre-election platform of the Republican party, Mr. Harding's campaign and inauguration utterances, and the result of the election itself, having put a supposedly definite quietus on the matter, strong influences from foreign nations and economic forces at home are being exerted toward securing American entry into some sort of covenant; possibly a modification of the one adopted at Paris.

Former Premier Viviani of France and Stephen Lauzanne, a representative Parisian journalist, visitors to this country, during the next three weeks will be in conference with President Harding, Secretary of State Hughes, other cabinet members and a number of senators and representatives. The great question agitating Washington is the extent to which their influence will prevail in formulating the peace program which the President shall submit to the coming extra session of congress.

Domestic economic considerations are involved in the fact that a return to normal conditions requires a market for American products abroad, a stabilizing of exchange rates and the establishing of a more settled state of affairs in Europe. Influences are not lacking, both inside and outside the administration, to point out that these things cannot be achieved without the strong support of the United States, acting in a league or some sort of definite agreement with other countries.

A big straw in the strong wind of foreign influence is seen in a recent decision of Great Britain to bring a speedy termination to the Mesopotamian problem by admitting the United States into full rights with nationals of the League of Nations in exploiting the oil resources of the Asiatic country. Such conditions and influences confront the President and the new congress, and the question is being freely propounded if, under the circumstances, the administration can afford to definitely turn down some form of a league.

New York has taken a straightforward method of dealing with the rent problem by releasing from taxation for ten years homes upon which construction shall begin before April 1, 1922. This strikes at the heart of the question in that it is a virtual guarantee against construction losses. If property comes down in price as a result of lower material and labor costs, the owner of a home will have compensation in the form of tax elimination. The maximum tax exemption is $5,000, which restricts the benefit to the type of home sought by people of small means. Already a boom in home building is reported. The legislatures of Illinois and several other states are struggling with the rent problem.

One of those popular elections which do not decide and speedily become unpopular, may be said to characterize the plebiscite in Upper Silesia. Germany received a heavy majority of the total vote, but it came from the larger towns and centers of population. Polish strength was manifested principally in the villages and among agricultural groups, and the contention has arisen as to whether the returns shall be interpreted by the whole majority or by village and group units. Various factors contributed to the German majority, the principal among them being that military service is no longer compulsory in Germany, whereas Polish citizens must serve two years; German factory and mine owners threatened to close their works if Poland won the plebiscite, so many Polish employees voted in favor of Germany through fear of losing their jobs; the Berlin government vaguely promised to share the big landed estates in Upper Silesia among the small land owners and Germany promised amnesty to all political offenders. Already there has been violence in the disputed territory and although the interallied commission which supervised the voting will have to decide the questions arising from it, any decision can hardly create a permanent settlement.

Enforcement of prohibition under the Volstead law has been broadened by recent rulings, whacked in several places by court actions and is threatened in its entire validity by a new suit before the Supreme court at Washington. The most important occurrence up to this time, was the eleventh hour ruling of former Attorney General Palmer that beer and wine may be dispensed on physicians' prescriptions the same as whisky, but the amount permitted, especially beer, is much greater. Several federal prohibition directors have expressed themselves to the effect that this action along with the evident intention of the prohibition department to make the rules affecting prescriptions in general more elastic, will in a short time destroy the effect of the Volstead act. Some have gone so far as to predict that it will not be long until beer and wine are dispensed by the glass at soda fountains. The same authorities also predict that while the result will be a temporary success for the liquor forces it will end in national reversion to prohibition of a drastic sort.

Several judicial decisions have recently been entered against search and seizure of intoxicants in private homes and temporary places of residence. The Supreme court suit which attacks the validity of the prohibition amendment is based on the section which makes it inoperative unless ratified within seven years. It is the contention that the section violates article 5 of the Constitution which gives congress no power to impose a limit on ratification "or to otherwise attempt to control what the legislatures of the states shall do in their deliberations." The provision attacked was offered by former Senator Harding when the prohibition amendment was being proposed in the senate. He is quoted as having stated at the time (Aug. 1, 1917) that he offered the provision in order to speed action on the amendment and place a limit on the time various states could keep it pending.

The American Legion is stirred up over the conviction and sentencing to terms in German jails of Sergeants Carl Neaf and Fred Zimmer, members of the American forces on the Rhine, who attempted to apprehend Grover Cleveland Bergdoll, convicted American slacker. Neaf was sentenced to 15 months' imprisonment and Zimmer six. The national legislative committee of the Legion has addressed a letter to the secretary of war requesting that the United States government take steps to procure from Germany the return of Bergdoll to this country and the release of the sergeants. The letter is quite severe in its terms and among other things states that "the Bergdoll case as it now stands is a disgrace to the government and a cruel and undeserved insult to the 5,000,000 men who served America in the World war."

Maj. Gen. Leonard Wood has been selected by President Harding for a mission to the Philippines which, nevertheless partakes in some respects of the character of his important sojourn in Cuba immediately after the Spanish-American war. At that time General Wood not only governed the country, but made an investigation of its principal problems and was largely instrumental in establishing conditions which made self-government possible. He is scheduled to leave for the Philippines April 5, accompanied by W. Cameron Forbes, former governor general of the islands, and several military advisors. In appointing General Wood, President Harding has signified an intention to obtain a detailed, unprejudiced report of conditions in order to execute the Jones act providing that American sovereignty shall be withdrawn when a stable government in which the natives are largely participating shall have been established. It is significant of the potential authority vested in General Wood that pending his investigation and report no governor general of the islands will be appointed.

Red Russia is now at peace with most of her neighbors and rapidly concluding trade agreements. A strong appeal has been made to President Harding for a resumption of trade with Russia. For the first time the soviet government has officially disavowed any intention of interfering in American internal affairs, thus backing down from the manifesto of the Third Internationale which proposed to overthrow by force, if necessary, the governments of the United States and other nations and substitute rule of the proletariat. Opponents in America of a resumption of trade point to the assertion once made by Lenin, that the soviet government would not hesitate to repudiate promises made to gain immediate ends.

CARDINAL GIBBONS TAKEN BY DEAT

Venerable Prelate Dies at Archiepiscopal Residence.

CHURCH CAREER IS NOTA

Primate of the American Catholic Heirarchy Receives Pope's Benediction in Last Hours—End Comes After Long Illness.

Baltimore, March 25.—James Cardinal Gibbons, archbishop of Baltimore and primate of the Catholic church in America, died at the archiepiscopal residence after a prolonged illness which mainly affected his heart, in his eighty-seventh year.

Pope Benedict, who has followed the course of Cardinal Gibbons' illness with deepest interest and sympathy, sent his blessing in the following cablegram from Rome received at the archiepiscopal residence, a short time before the cardinal's death.

"The holy father, invoking heavenly blessings and comforts on his eminence, Cardinal Gibbons, sends to him from the bottom of his heart the apostolic benediction."

Rev. Louis R. Stickney, rector of the cathedral, surrounded by members of the household and the nursing sisters in attendance upon the cardinal, imparted the blessing in behalf of the pope as the cardinal lay unconscious.

Active Over Half Century.

Active service of more than half a century in the interests of his country as well as his church, is closed by the death of James, Cardinal Gibbons. In the celebration, in 1911, of the two

James Cardinal Gibbons.

fifth anniversary of his elevation to the cardinalate, his eminence, on all the tributes paid him, expressed himself as most affected by that from William Howard Taft, his intimate friend, and then President, who said:

"Through his long and useful life Cardinal Gibbons has spared no effort in the cause of good citizenship and the uplifting of his fellowmen."

"You have portrayed your subject not, I fear, as he is, but as he should be," responded the cardinal. "To merit only can I claim, and that is the ardent love for my native country and her political institutions. I consider the republic of the United States one of the most precious heirlooms ever bestowed on mankind down the ages. It is the duty and should be the delight of every citizen to strengthen and perpetuate our government."

Wielded Large Influence.

Cardinal Gibbons, as senior bishop of the church, wielded a strong influence outside as well as within the United States. The confidant of two popes, he made several important tours to Rome, the last in August, 1914, a few days after the opening of the war, to elect the successor to Pius X. He arrived too late, however, to participate in the ceremony that elevated Benedict to the pontificate.

Upon returning to the United States he visited President Wilson, informed the latter of affairs in Europe and discussed means to bring about peace.

Cardinal Gibbons was active in war work for the allies in the war, and in a letter written to the Catholics of the archdiocese of New York in 1917, when the United States entered the conflict, urged the fullest support of the government.

A few months previously he sent $10,000 to the American committee in London for the relief of the Belgians, one of the many notable instances of his benevolence. In a sermon at Baltimore, in 1918, he praised the speech by Lloyd George and said that Germany's war aims should be

Born in Baltimore, Md., of Irish parents July 17, 1834, James Gibbons spent his youth in Ireland, but when he was a lad of fourteen years his family returned to America, settling in New Orleans, where he acted as "punctual grocer's boy."

His ambition for the priesthood began in those early days. At the outbreak of the Civil war he was ordained to the priesthood in Baltimore.

"The average American is a lover of peace," he frequently remarked. "He stands for peace at home and abroad. Let us hope that international disputes will soon be decided not by standing armies, but by permanent courts of arbitration."

CONGRESSMEN FAVOR FILIPINO INDEPENDENCE

Congressman Edward J. King of Illinois.

Washington.-"The appointed hour is here: let the Philippines be free." This was the keynote of a speech by Congressman Edward J. King of Illinois, (Republican) in which he reviewed the American occupation of the islands from the first day to the present time. He declared that the United States was honor bound to grant independence without further delay.

Congressman King is one of an increasing number of Republicans in the House who are urging quick action on Philippine independence. Mr. King is the author of a bill which provides that within one year the Philippine government, under presidential proclamation, may assemble a convention and frame a constitution.

After the constitution is ratified by the Filipino people the President may recognize the Philippine islands as "a separate and self-governing nation." The transfer of authority is to be completed within one year. Provision is made for safeguarding American investments in the Philippines and for the providing of coaling stations and submarine bases in the islands by the United States.

Word from the Philippines is that the people expect early independence and will be sorely disappointed if they do not get it.

"No nation has the right," said Congressman King "to hold another people in peonage, even though it may be argued by the professoriate that the condition is simply one of 'tutelage.'

"A little more observance of the golden rule in national and international affairs would soon dispel that desire for exploitation, the fiercest foe of freedom in the world today.

"When we went to the Philippines we declared before the whole world that we were not actuated by any selfish desire of conquest or territorial aggrandizement, but solely by humanitarian impulses."

Congressman King called attention to the fact that Filipinos are now raising funds to erect a monument to Admiral Dewey, which he said was indirectly a tribute to the American people as well as to Dewey. He recalled the cable that Dewey had sent to President McKinley, which was as follows:

"In my opinion these people (Filipinos) are superior in intelligence and more capable of self government than the natives of Cuba, and I am familiar with both."

Congressman King then recited the preamble to the Jones law, passed August 29, 1916, and declared it was a definite pledge of independence. The preamble stated "it is as it has always been the purpose of the people of the United States to withdraw their sovereignty over the Philippine Islands and to recognize their independence as soon as a stable government can be established therein."

Congressman King stated there was no question but that the Filipinos had established the specified stable government and, therefore, it is the solemn duty of the United States to grant the promised independence.

ASKS INDEPENDENCE FOR PHILIPPINES

Francis Burton Harrison

Manila. — Francis Burton Harrison, former governor general of the Philippine Islands, offered to tender his resignation eighteen months ago upon condition that the Secretary of War recommend to President Wilson that a Filipino be appointed his successor. He made the offer while in Washington in 1919.

Discussing Philippine independence, the governor general said:

"I can see in the future a very beautiful vision. When the flag of the Philippine republic shall be hoisted, when the Stars and Stripes will come floating down to the strains of 'The Star Spangled Banner'—that flag, Old Glory, so rich in happy and honorable achievements, will be made doubly dear because it will mean that the United States will have kept its word to the people of the Philippine Islands."

School of Journalism in Philippines

Manila.—A school of journalism, the first in the Far East, has been established at the University of the Philippines, in Manila.

Admission to the School of Journalism is limited to third and fourth year students who have shown marked ability in the use of English. The course is open to both men and women. A class of about 50 registered at the opening of the journalistic course.

It Might Be Worse--

Don't tear around over the tariff.

Don't get excited over politics.

Don't worry over war debts.

The world has been all thru this before and the world can stand it.

Public Utilities and the public

Costs

We shall devote this article to "Readiness to Serve," as a part of the cost of delivering electric current to the consumer, after which we shall take up the matter of the difference in the price of the various items of cost today and the price of the same items a few years ago. This will enable the reader to form an intelligent opinion as to the charges he is asked to pay for service.

Now as to the matter of "Readiness to Serve" as a part of the actual cost of service. The meaning of this phase is perhaps not well understood, and we can best explain it by an illustration.

A busiuess man has an engagement for two important meetings occurring practically at the same time, and it is necessary for him to attend both, the two meetings being held at some distauce apart. He decides to solve the difficulty by attending both of the meetings and having a taxiçab take him to the other meeting as soon as the business of the former is dispatched. He calls the taxi and orders it to report at nine o'clock. but if he is not ready to go to wait in front of the office nntil he is ready. The business proves more involved that expected, and it is noon before the business man is ready to rush over to to the second meeting. The fare between the two points was say fifty cents, but would the business man be justified in asking the driver in this occasion to carry him for fifty cents after waiting on the job three hours and his engine running all this time? You will at once say he would not. The enforced waiting in order to be able to carry the business man when he wished cost the taxi man more than the actual service. It would be manifestly unfair to ask him to pay out his money in order to be able to deliver service and then refuse to compensate him. His "Readiness to Serve" is a legitimate part of his charge.

This item of "Readiness to Serve," does not figure so prominently in a simple night service, but in all day service, it is a considerable part of the cost. The central power station must be ready at all times to deliver all the current it is called upon to furnish. This means that there must be a reserve for the unexpected user. The dynamos must be run, with all the cost of fuel, labor, and the other items that go into the normal cost, and all the time more current is being made than is being used, and all the excess is lost, because it cannot be stored as other commodities can. It is a paralell case to that of the taxi driver, and is a legitamate part of the cost of the current to those who actually use it entirely outside the better understood items of cost.

A dark or stormy day comes up, and all over toun the lights spring up until the central plant is operating at almost capacity. Now, the current was lying in wait all the time ready to make those lights, and it was costing the utility company money to keep it ready. This willl give you an idea of what is meant by "Readiuess to Serve," and make it plain that it is an actual part of the cost of production.

Next week we shall take up the matter of comparative costs between the present time rnd the pre war period showing the steady advance in most of the items.

VAGUE ABOUT "RED" LEADERS

But Young Bolshevist Soldier Had Heard of Trotzky, and Incidentally of Lenine.

I have just had a talk with a Bolshevist soldier, captured by the Poles when he was participating in a bold scouting enterprise. He is a young man twenty-one years old, coming from one of the interior departments of Russia. He is illiterate and a confirmed Bolshevik.

Discipline, he said, was very good in the Bolshevist army; still they did not obey orders because they were orders, but "as a matter of conscience." The military forms of address had been abolished and even the officers were spoken to as comrades. Naturally the soldiers stand at attention before their officers; but that was because every soldier in the army follows the bidding of his conscience and "it would be foolish" not to stand at attention before one's commander.

He had never seen a general or any of the higher officers, but he knew the commander in chief was called Trotzky, and that there was another head man. He pondered a moment trying to recall who the second one was, and then suddenly remembered, "Lenine." He knew nothing more about him, and did not know the names of any other commander.

He kept saying "Everyone on our side is a Bolshevik," and seemed to be impressed with the great power and authority of the Bolsheviki. When asked who Trotzky was he replied, "A very popular Jew." "The Jews are much liked in the army. They never allow themselves to be captured. They hate the Poles so, and the Poles hate them so—and invariably murder them—that they prefer suicide to being made prisoners."—From the Vossische Zeitung (Berlin).

HAS AN IDEA SON WAS RIGHT

Circumstances Brought Wife of United States Senator to Acquiesce In Youth's Philosophy.

Senator Miles Poindexter, from the state of Washington, used to live on a ranch.

One hot day he was in the garden weeding onions, when Mrs. Poindexter came across her eleven-year-old son Gale comfortably ensconced on the front porch enjoying the cool shade and a good book.

"Why, Gale!" she cried, "aren't you ashamed of yourself to sit here and read while your poor father is out there working in all that heat? Go and help him this minute!"

"Aw, mother," protested Gale, "I can't be bothered with weeding onions. Besides, I've got an engagement to go swimming at 11 o'clock."

About an hour later Mrs. Poindexter heard a low whistle from the onion patch, and before she could take in its significance father and son had disappeared down the hill in the direction of the swimming hole.

In telling the story Mrs. Poindexter said: "I don't know but what Gale's philosophy was the best. Today as a young naval officer he is sailing the high seas; while his father—well, his father is still weeding onions!"

Valuable Counterfeit.

A strange counterfeit turned up at a Washington bank recently—queer because it was a bogus $5 gold coin and worth about eight times as much as the genuine because it is made of platinum.

The spurious coin was made about fifty years ago and bears the date of 1869. Musty archives of the secret service contain a record of the species and the case is marked "closed." The coins were made in Maine and came to the notice of the Treasury department when the scion of a wealthy family took a quantity of them from a safety deposit box containing heirlooms and put them in circulation. All known specimens were confiscated by the secret service and it was not known until now that others were still in circulation.

Placing Blame.

A vulgar man, in any ill that happens to him, blames others; a novice in philosophy blames himself, and a philosopher blames neither the one nor the other.—Epictetus.

First Campaign Tour.

Political history shows that Horace Greeley was the first candidate for the presidency to make an extensive speech-making tour over the country. That was 48 years ago.

PROPER CARE OF YOUNG CALF

May Be Permitted to Graze With Other Cattle on Pasture, but Feed Grain Separately.

The calf may graze with other cattle on pasture, but should be fed grain separately. A bull calf should be separated from the heifers when about three or four months old. He should be kept with other bull calves or older cattle for company except at feeding time. The calf should then have a separate stall or pen.

DEHORNING IS RECOMMENDED

Operation Results in Quieter Cows and More Milk—Best Plan Is to Prevent Them.

Dehorning results in quieter cows and more milk, but horns are better prevented than removed. It is more humane to apply a little caustic to the calf than to dehorn a mature animal.

Garden Tools

We have a big assortment of hoes, rakes, spades, fork plows, etc. and also highest grade garden, flower and grass seeds.

Lawn Mowers

Big Assortment of all sizes and prices.

JACOBS & SON

Have Your Oun Garage

The many advantages of having a garage of your oun more than offset the small cost of building it. Come in at your earliest convenience and let us show you plans that will meet your needs--estimates that won't strain your purse.

Service That Saves

Our experience with materials--our knowledge of the short cuts in building--our error proof plans--our low prices--these will snrely reduce your cost to the lowest possible figures--whether you build a garage, house, barn or other building.

Let us explain this servece fully

CONGRESS HEARS DRAMATIC PLEA FROM FILIPINO

Philippine Resident Commissioner Isauro Gabaldon

Washington. — "Must the heart of America beat only for the freedom of Ireland, of Poland and of the Czecho - Slovaks, and not for the independence of the Philippine Islands?"

This was the question Resident Commissioner Isauro Gabaldon of the Philippines adressed directly to the membership of the House of Representaives in a speech which was given very close attention and was frequently applauded.

"At one time," said Commissioner Gabaldon, "Congress had before it no less than thirty resolutions expressing sympathy with the aspirations of the Irish people, if not actualy urging England to grant independence to Ireland. At that time, also the Filipinos were knocking at your door. Out of the womb of war, many European republics were born, and America has rejoiced to uphold the same. And yet the claim of the Filipinos is still unheeded. Must there be exceptions, then, in international justice?

"My plea, gentlemen of the American Congress, is that you ignore no longer the repeated requests of a deserving people for an independence that rightfully belongs to them. The granting of independence now afford: the United States a golden opportunity to give to the world unanswerable proof of its sincerity, its consistency and its altruism. It will be the greatest example of square dealing in the history of the ages.

"Do not think we are not appreciative of all you have done for us. We are. America has truly treated the Filipino people as no other nation has ever treated an alien race in all history. The high points of the American policy in the Philippines have been consistently inspired by altruism. We know that you were actuated in your labors by the desire to contribute to our own welfare.

"And we love you perhaps most of all for your solemn promise to grant us that which we hold dearer than life itself—our freedom. Independence is our national ideal. It is our all absorbing aim. It grows stronger every hour. For the spirit of nationalism never dies. Much less can it be subdued. We believe that we can never hope to be a sturdy nation if we are to rely forever on the magnanimity of the United States.

"America's task in the Philippine Islands is finished. What you have assumed as your sacred obligation in that part of the world has been fulfilled. A people with a medieval system of institutions has been transformed into a conscious nation, imbued with all that is modern in the activities of nations. And if you give us independence our gratitude to you will increase a thousand fold; it will last forever if you keep faith with us.

"There is but one issue in the Philippine question, and that is: Is there today a stable government on the Islands? In the Jones law you promised independence upon the establishment of such a stable government. Your own Governor-General has officially reported that there is a stable government in existence today, and we also have submitted plenty of evidence to substantiate its existence. Therefore, we hope and expect America will now carry out its pledge."

Church Bells.

The Angelus bell, always rung thrice a day, takes its name from the first words of the prayer. In Tuscany a bell is rung an hour before the evening Angelus, or Ave bell, and is intended to remind its hearers to say the creed. The De Profundi bell sounds one hour after the Ave. In Italy on Friday afternoon at 3 o'clock thirty-three strokes are sounded in many churches and convents in memory of Christ's death at the age of 33. The custom probably is followed elsewhere.

Articles of Incorporation of the Klemme Co-Operative Grain Company, Klemme Iowa

ARTICLES OF INCORPORATION

We, whose names are hereto subscribed, hereby associate ourselves into a body corporate under the provisions of ChapterI, Title IX, of the Code of Iowa, and acts amendatory thereof, particularly Section 1641-rl 1641-20, inclusive; assuming all the powers, rights, and privileges granted bodies corporate, and all the duties and obligations imposed by said statutes, and being bound thereby, adopting the following articles of incorporation, to-wit:

ARTICLE I. The name of this corporation shall be THE KLEMME CO-OPERATIVE GRAIN COMPANY

ARTICLE II. The principal place of business of this corporation shall be at Klemme.

ARTICLE III. The general nature of the business of this corporation shall be buying, selling and handling of grain, coal, lumber, live-stock, and all other farm produce and supplies; also, the operation of flour and feed mills and the purchase and sale of products thereof; also to act in the capacity of a general commission house to purchase, erect, operate, maintain, and control warehouses, elevators, mills and buildings of every description, and to retain, sell, convey, lease, mortgage, encumber, and improve such real estate, buildings, and personal property as the business of the company may require; also, to prepare and publish such statements, bulletins, or periodicals, and do all other acts, not contrary to the statutes of the state, as shall be necessary to the proper carrying out of the purposes herein stated, on the co-operative plan as provided by law.

ARTICLE IV. The authorized capital stock of this corporation shall be $60,000, divided into 600 shares of the par value of $100, of which not less than $20,000 shall be subscribed and paid for at the time of commencement of business of the corporation, the remainder of said capital stock to be issued as paid for, at such times as the board of directors may hereafter provide. Said shares of stock are transferable on the books of the corporation. The stock of this corporation shall be non-assessable. No shareholder in conducting the affairs of this corporation shall have more than one vote.

ARTICLE V. The corporate period of this corporation shall begin on the date the Secretary of State issues a certificate of incorporation and shall continue for a period of twenty years from said date, with the right of renewal, unless sooner dissolved by a two-thirds majority vote of the stockholders at any annual meeting, or at a special meeting called for that purpose, provided the corporation shall not be dissolved by less than a majority of the stockholders of the corporation; or by unanimous consent as provided by law.

ARTICLE VI. The affairs of this corporation shall be conducted by a board of directors, as provided in the by-laws, elected by the stockholders from their own number at each annual meeting, and who shall hold office, have such powers and perform such duties as may be provided in the by-laws.

Until the annual election on the first Monday in July, the following shall be the directors of this corporation:

NAME	ADDRESS
H. J. Stille	Garner, Iowa
Valentine Josten	Klemme, Iowa
Herman Stromer	Klemme, Iowa
C. A. Arnold	Klemme, Iowa
E. J. Arnold	Klemme, Iowa
John Larson	Klemme, Iowa
Geo. Zinn	Klemme, Iowa

ARTICLE VII. The private property of the stockholders of this corporation shall be exempt from the corporate liability except to the extent and in the manner provided by he laws of the State of Iowa.

ARTICLE VIII. This corporation shall have power to borrow money from time to time, on a vote of a majority of all the directors at any regular or special meeting, and the property, real and personal, of the corporation may be mortgaged to secure such sums borrowed, provided that the corporation shall at no time, have, or subject itself to indebtedness exceeding two-thirds of the paid-up capital stock.

ARTICLE IX. There shall be an annual meeting of the stockholders of this corporation which shall be held on the first Monday in July in each year.

ARTICLE X. The corporate seal shall be a circular disc containing the name and address of the company in the outer circle, and in the center the words, "Incorporated and Co-Opera-

KLEMME CO-OPERATIVE GRAIN COMPANY, KLEMME, IA.

BE IT REMEMBERED, That on this 12th day of March, 1921, before me, a Notary Public in and for said county and state personally appeared:

NAME	ADDRESS
E. J. Arnold	Klemme, Iowa
Geo. Albers	Klemme, Iowa
C. A. Arnold	Klemme, Iowa
H. R. Stromer	Klemme, Iowa
H. J. Stille	Garner, Iowa
John C. Larson	Klemme, Iowa
Valentine Josten	Klemme, Iowa

said persons being personally known to me as the identical persons whose names are subscribed to the foregoing Articles of Incorporation, and each for himself acknowledged the same to be his free and voluntary act and deed for the uses and purposes therein expressed.

Witness my hand and notorial seal at Klemme in the county of Hancock, State of Iowa, the day and year last written above.

(SEAL) Fred A. Arnold,
Notary Public

BY-LAWS

ARTICLE I. Directors—Number—How Elected—To Elect Officers—Must be stockholder—Removal—Vacancies—Compensation.

Section 1—The affairs of this corporation shall be managed and controlled by a board of seven directors, elected from the stockholders from their own number at each annual meeting, who shall hold office until their successors are elected and qualified.

Section 2—Directors shall be elected by ballot. They shall be elected at the first annual meeting as follows: Three for three years, two for two years, and two for one year, thereafter each director shall be elected for a three year period.

Section 3—The directors shall, within ten days from the time of their election, meet and choose by ballot from their own number a President, a Vice-President, and a Secretary-Treasurer, who shall hold office for one year, or until the election and qualification of their successors.

Section 4—If any director shall cease to be a stockholder, he shall cease to be a director.

Section 5—A majority of the share holders present at any annual meeting or at any special meeting called for that purpose, provided thirty days notice thereof has been given, shall have power to remove any director or officer for cause, and thereupon such director or officer shall cease to be a director or officer of this corporation.

Section 6—The board of directors may remove any officer for cause, by a vote of two-thirds of all the members of the board, and shall fill any vacancy caused by such removal.

Section 7—The absence of a director from three successive meetings of the board shall be deemed a resignation as director, unless such absence is decided to be unavoidable by a majority of the board. Whenever any vacancy shall occur in the membership of the board by death, resignation, or otherwise, the remaining directors shall fill office until the next annual meeting of the stockholders.

Section 8—The directors shall receive as compensation for their services $2.50 per meeting for each meeting attended, payable at the end of each fiscal year, with the exception of the Secretary-Treasurer, whose salary shall be fixed by the board of directors.

ARTICLE II. Board of Directors — Duties — Powers — Meetings — Quorum.

Section 1—The board of directors shall employ a manager of the company who shall have supervision and management of the business of the corporation, under their direction and control.

Section 2—The board of directors shall have and exercise full supervision and control over the affairs of this company. It may, in addition to hiring its regular manager and fixing his salary, employ such other persons as it finds necessary, fix their compensation and prescribe their duties; shall require any person who receives or has control of the property of the company to furnish suitable bond; shall provide such books as are necessary for the accounts of its business; shall provide suitable fire-proof protection for said books; and generally, may do any and all things necessary and convenient in the exercise of such supervision, control and powers, not contrary to these articles of incorporation, by-laws, and the statutes of the State of Iowa.

Section 3—The general method of doing business by this company shall be a profit basis. The purpose shall be to secure the highest reasonable price for produce and the lowest reasonable retail price for merchandise in keeping with business conditions. But it shall be the duty of the board of directors and of the manager to conduct the business of this company on a margin of profit that shall be large enough to insure at least a fair rate of interest on the invested capital and to provide further funds as outlined hereinafter in Article VI, Section 1, with reference to earnings.

Section 4—It shall be the duty of the board of directors to keep in close touch with the financial condition of this company, to appoint a committee from their own number to examine the books, records, documents, and correspondence of the corporation, either monthly or quarterly at the discretion of the board; but they shall at least once a year, procure a reliable accountant to audit the books and accounts of the company. They shall also take, or cause to be taken, an annual invoice of all property and merchandise belonging to the company, and shall render to the stockholders at the annual meeting, a report of the year's business, together with the financial standing of the company. In preparing these yearly statements, depreciation of property shall be preserved and filed, one copy with the President, one at the office of the company, and one with the Secretary-Treasurer.

Section 5—The board of directors shall hold regular monthly meetings on the last Saturday of each month.

Section 6—Special meetings of the board of directors may be called by the president at his discretion, or shall be called by him upon the written request of a majority of the members of the board.

Section 7—At all meetings of the board, regular or special, a majority of the directors shall constitute a quorum, and a majority vote of those present shall decide all questions. Voting by proxy at any directors' meeting shall not be allowed.

Section 8—It shall be the duty of each director to attend all meetings of the board of directors and of the stockholders.

ARTICLE III. Duties of Officers and Managers.

Section 1—The president shall preside at all meetings of the shareholders and at all directors' meetings. He may call special meetings of the board at his discretion, and on the request of a majority of the directors, he shall call special directors' meetings. He may, with the consent of a majority of the board, call a special stockholders' meeting, and shall do so upon the request of a majority of the board or the request of twenty stockholders. He shall sign all certificates of stock, sign all bonds, contracts, or other instruments in behalf of this society when so directed by the directors. He shall be the custodian of all bonds given to the company, and shall be the proper person to bring suit thereon.

Section 2—The vice-president shall perform all duties of the president in his absence or inability to act.

Section 3—The duties of the secretary-treasurer shall be to keep a true and complete record of all the meetings of the directors and of the stockholders; to sign all certificates of stock and affix the seal thereto; to sign all orders and other papers of the corporation when ordered by the directors; to keep a true record of all stock issued or transferred; to notify each officer or stockholder of all meetings as provided in these by-laws; to receive and hold all moneys or notes belonging to the board of directors, and keep the same on deposit in such bank or banks as the board may designate and pay out said moneys only upon the order of the board. When ordered by the board of directors, he shall give bond in some reliable surety or bonding company to be paid by the corporation. He shall render to the directors whenever required by them a correct report of the business of the company and shall make a complete report at each annual meeting of the shareholders.

Section 4—It shall be the duty of the manager to have general oversight and control of the business of the company, subject, however, to the action of the board of directors. He shall attend to the buying and selling of all commodities the company may see fit to handle. He shall collect all accounts due the company and sign all receipts. The manager shall give his whole time and attention to the business of the company. He shall have charge of its property and shall at all times keep same in good repair, and well and fully insured. He shall faithfully account, when requested to do so by either the directors or the stockholders, for all money and property given into his control. He shall keep accurate records and books of all transactions, dealings, and business of this company, and a copy of all correspondence, and preserve all books, contracts, papers, statements, and documents pertaining to the business of said company and exhibit same to the directors whenever and as often as they may call for them. He shall turn over all books, papers, moneys, documents, correspondence, etc., and affects of this company to the directors whenever called for, or to any person whom the directors may designate. It shall be the duty of the manager to file with the board of directors at their monthly meeting, a full and complete record of all business transactions of the company during the preceding month, it being the purpose of this report to show in so far as possible, the exact financial condition of the company. He shall give good and sufficient bond, as may be required by the board of directors, for the faithful performance of his duties as contained herein, cost of such bond, if with a surety company, to be paid by this corporation. He shall do business with such depositories or banks as the board shall choose.

During the time of his employment by this corporation, he shall not trade or deal in futures in grain or other commodities on any board of trade, whether in his own name or the name of any other person, or in the name of this corporation. The manager may, however, when in his judgment the best interests of this company demand it, deal in grain futures on any regular board of trade in what is known as "Hedging." That is to say, he may, when grain is bought or contracted for future delivery, sell futures against the same on any regular board of trade, when he considers it a better transaction than selling the cash grain to arrive; or, in case grain is being stored by the company, same having been delivered at the elevator but not yet sold to the company and the needs of the business require that this grain be shipped out to provide bin room, he may buy a future on any regular board of trade to the extent of the stored grain shipments, as an insurance or protection against loss; provided, however, that all such hedges shall not be done by the manager without the knowledge and consent of a majority of the board of directors.

ARTICLE IV. Stockholders.

Section 1—The fiscal year of this society shall end on the last Monday in June, beginning with the last Monday in June, 1921.

Section 2—The annual meeting of the shareholders shall be held on the first Monday in July of each year. Each shareholder shall be notified of the time and place of said meeting by the secretary, who shall mail a written or printed notice to the last known address of each shareholder at least ten days prior to the date of the annual meeting.

Section 3—Special meetings of the stockholders may be held as provided in Article III, Section 1, of these by-laws.

Section 4—Twenty-five shareholders personally present, shall constitute a quorum at all meetings of the stockholders, but a less number may adjourn from time to time.

Section 5—Absent members may be permitted to vote by mail in cases where it is desired to consider some specific question, provided said tion is submitted in writing at thirty days prior to the date se said meeting. In such cases, properly signed, written vote, to the secretary, or presented other person to him, shall be co exactly the seme as if they were ent in person, but they shall n sign their voting power to an member by proxy.

Section 6—Roberts Rules of shall govern the proceedings meetings of shareholders or dire

Section 7—The order of bu at all shareholders' meetings sh as follows:

1. Call to order. 2. Roll stockholders. 3. Reading of m of last meeting. 4. Report of mittees. 5. Reports of Secr Treasurer. 6. Report of ma 7. New business. 8. Electi officers. 9. Adjournment.

ARTICLE V. Stock.

Section 1—Any person so si that his membership will be m beneficial to himself and to th pany, may become a member b chasing one or more shares of

Section 2—Upon the assignm transfer of any share of stock purchaser or assignee shall im ately present the same to the tary-treasurer, who shall repor transaction at the next meeting board of directors, and when ap ed by the board, the secretary urer shall make the proper tr on the books. The assignees o chaser then becomes a member corporation. No transfer of sto this corporation shall be valid as between the parties until it tered upon the books of this cor ion. The purchaser or assignee surrender the old certificate shall be pasted in the stock certi book on its respective stub, and certificate issued therefor in the of the purchaser, who, by accep thereof, agrees to all the rules an laws of the company.

Section 3—No shares of stock be transferred until all claims of company against the owner th shall have been paid.

Section 4—No stock in this co ation shall be issued until the co ation has received payment in therefor at par, in cash or prop provided, however, that when is to be issued for anything than money, it must be subject t approval of the Executive Comm of Iowa, as provided in section 18 of the supplement to the Code, 1 and any amendments thereto.

Section 5—Any person desiri dispose of his stock in this com shall first deposit same with the retary-treasurer of the company be sold under the direction of board of directors for such person the same is not sold within th (30) days after the date of such posit, it shall be returned to the er thereof who may dispose or sell same without restriction or limita by the Company.

Section 6—No stockholder sign any bond, or sign, endorse guarantee any note, bill, draft, tract, or in any way assume any bility, written or verbal, for the efit of this corporation, without written consent of a majority of directors.

Section 7—The acceptance of stock certificate shall constitute assent of the shareholder to these laws, and each member agreed t bide by them and all future amen ments legally enacted by the C pany.

ARTICLE VI. Apportionment Earnings.

Section 1—Annually, immedia after the end of the business year, board of directors, subject to re ions by the association, at any gen or special meeting, shall apportion earnings of the company for the as follows:

First. There shall be set aside less than ten per cent of the net pr its for a reserve fund, until an mount has accumulated in said serve fund equal to 50 per cent of paid up capital stock.

Second. Five per cent of the pr its shall be set aside for an educa al fund, to be used in teaching operation.

Third. Dividends shall be m upon the paid up capital stock to determined by the board of direct not to exceed 10 per cent.

Fourth. The remainder of said profits shall be apportioned by m form division upon the amount purchases and sales of the shareho ers, and upon the wages and salar of the employees.

Section 2—The uniform divide above referred to shall be determi upon grain upon the bushel basis. upon merchandise upon the dol basis.

ARTICLE VII. Miscellaneous.

Section 1—Corporation Funds. T funds belonging to this corporati shall not be loaned.

Section 2—Credit. Credit to pu chasers shall not be extended for longer period than sixty (60) da All accounts unpaid at the expirati of said period of time shall draw per cent interest until paid.

Section 3—Shipping Clause. Wh any member or group of members the corporation has grain which wishes to ship through the corpor tion, he may do so, the corporation charge a reasonable amount as co mission for handling, said commissi to be determined by the board of rectors; provided, said member group of members delivers the gra to the elevator in car load lots so not to interfere with the general el vator business.

ARTICLE VIII. By-Laws.

Section 1.—Invalidity. The inv lidity of any portion of these by-law shall in no way affect any other tion thereof which can be given effe without such invalid part.

Section 2—To be Posted. A co of the by-laws of this company wit the names of all its officers shall b posted in its principal place of busi ness subject to inspection, as is pro vided by law.

Section 3—Amendments. These by-laws may be amended at any re ular meetng of the stockholders, or a any special meeting called for this purpose, by a majority affirmati vote of the shareholders present, pro viding a ten days notice in writing sent to each shareholder.

POULTRY

GIVE BREEDERS FREE RANGE

Most Desirable for Production of Fertile Eggs Intended to Be Used in Incubator.

(Prepared by the United States Department of Agriculture.)

Hazards which sometimes accompany the incubation of eggs are largely avoidable. Fertile eggs from vigorous breeding stock are necessary in order to obtain good hatches.

Free range for the breeders is most desirable for the production of fertile eggs with vigorous germs, but all eggs produced from such hens should not be used for incubation. Eggs that are abnormally small and poorly shaped or those having thin or very poor shells should be eliminated. Dirty eggs or those badly soiled should not be used. If it is found necessary to set slightly soiled eggs they may be cleaned by rubbing lightly with a damp cloth, care being taken not to rub off any more of the natural bloom than is necessary.

It is never advisable to use for hatching eggs that are more than two weeks old. In freezing weather eggs should be collected two or three times a day so as to prevent their being chilled. Neither a hen nor an incubator will hatch strong chicks from eggs containing weak germs or from those which have not received proper care.

In preparing the nest for the sitting hen, put from three to four inches of damp earth or a piece of grass sod in the bottom of the nest before the nesting material is put in to provide moisture. When the hen becomes broody, and before she is transferred to the nest for sitting, she should be dusted with insect powder or sodium fluoride. In doing this hold the hen by the feet with the head down, working the powder well into the feathers. This should be repeated about the eighteenth day of incubation so as to be sure that there are no lice present when the chicks are hatched.

The hen should be moved at night from the regular laying nest into the nest where she is to be set. The latter nest should be in some out-of-the-way place where the hen will not be disturbed. In order to make sure that the hen will continue to stay in the new nest, she should be started with one or two china nest eggs. If, at

Provide Comfortable Quarters for Poultry Flock.

the end of the second day when the hen should be permitted to leave her nest for flood and water, she returns in a short time, the nest eggs may be replaced with the eggs that are to be incubated.

Throughout the period of incubation the eggs and nests should be kept clean. Sometimes it will be necessary to change the nesting material. Eggs should be tested twice during the incubation period, preferably on the seventh and fourteenth days, and all infertile eggs and those with dead germs should be removed. When the eggs begin to hatch, the hen should be confined and not disturbed until the hatching is complete. If she becomes restless remove the chicks as they are hatched and keep them in a warm place until the hatch is complete, when all should be returned to the mother hen.

INCREASED EGG PRODUCTION

Highest Number of Eggs Obtained From Mash Composed of Meat Scrap and Cornmeal.

The highest egg production in poultry-feeding tests conducted by the United States Department of Agriculture were obtained from a pen receiving a mash composed of four pounds bran, four pounds middlings, 26 pounds meat scrap, and 66 pounds cornmeal.

This ration has been one of the best mashes, giving consistent high production over a period of several years, and is not distinctly different from the mash used in the wheatless ration, which has also given very good production.

SIMPLE HINTS FOR POULTRY

To Keep Young Brood in Healthy Condition Supply Clean Water and Plenty of Grit.

A successful poultryman offers a few simple hints for keeping the young brood in health, as follows: Give clean water; supply plenty of grit; feed a variety of cracked and whole grain, mostly in a dry state; keep chicks out of the grass when wet with dew or rain.

DAIRY FACTS

BUTTER FROM SWEET CREAM

Because of Its Better Keeping Qualities Larger Use of It Is Urged by Dairy Division.

(Prepared by the United States Department of Agriculture.)

The dairy division, United States Department of Agriculture, advises a larger use of sweet cream butter, because of its better keeping quality.

The United States navy is a large consumer of this kind of butter, made according to the navy specifications from unripened or sweet cream, instead of from the cream ripened to sourness, of which most creamery butter is made. For several years past it has been the practice of the Navy department to contract for butter made of sweet cream in large amounts to supply the officers and sailors. This butter is packed under the supervision of the dairy division of the United States Department of Agriculture. During the war, the personnel of the navy being enlarged, a much greater quantity of butter was needed.

The principal reason the navy desires sweet cream butter is that it keeps better. As the larger part of the butter supply is made during the summer months, it is necessary to put some of it in cold storage in order to have enough for winter, and in the course of time it develops various more or less undesirable flavors, due to long storage. Butter made from sweet cream does not develop such flavors for a much longer time, if at all. Many months after it has been made it is equal to fresh butter, provided it has been kept under proper

Inspecting Butter.

conditions; hence sweet cream butter is especially suitable for shipping to distant countries, and for long voyages.

Sweet cream butter is gradually coming into wider favor in the domestic market, the Department of Agriculture says, because some consumers prefer it. It has not so pronounced a flavor as ordinary butter, but it has a mild creamy flavor.

WASHING AND RINSING CANS

Much of Deterioration of Milk Supply Is Due to Contamination in Big Receptacles.

Much milk that is good when it leaves the stable is poor milk when it reaches the city dairy plant. The deterioration is due to contamination in the cans. In almost all cases the city dairy plants wash and sterilize the cans that they return to the farmers. The farmers, assuming that the cans are clean, fill them and return without further attention. As a matter of fact, the washing is usually well done in a city milk plant. After the sterilizing with live steam, however, the cans are capped almost immediately and almost always there is some moisture left in the can. The bacteria are never all killed and in this moisture they multiply immensely and by the time the cans are used again there are enough bacteria in them to seed the milk to the extent of many thousands of bacteria per cubic centimeter.

PROPER CARE OF YOUNG CALF

May Be Permitted to Graze With Other Cattle on Pasture, but Feed Grain Separately.

The calf may graze with other cattle on pasture, but should be fed grain separately. A bull calf should be separated from the heifers when about three or four months old. He should be kept with other bull calves or older cattle for company except at feeding time. The calf should then have a separate stall or pen.

DEHORNING IS RECOMMENDED

Operation Results in Quieter Cows and More Milk—Best Plan Is to Prevent Them.

Dehorning results in quieter cows and more milk, but horns are better prevented than removed. It is more humane to apply a little caustic to the calf than to dehorn a mature animal.

RESULTS REMARKABLE SAYS NEW YORK MAN

Prominent Rochester Citizen Tried Ten Years To Get Relief, But Tanlac Is Only Thing That Helped Him.

JAMES J. BEASLEY
Of Rochester, New York.

One of the latest to testify regarding the powers of Tanlac, the celebrated medicine which has been accomplishing such remarkable results, is James J. Beasley, 102 Elmdorf Avenue, Rochester, New York. Mr. Beasley has been chief record keeper for the Department of Water Works, city of Rochester, for thirty years and is a well known and highly respected citizen. In referring to the remarkable recovery of his health by the use of Tanlac, Mr. Beasley said:

"I have been trying for ten years to find relief from a case of dyspepsia. Nothing ever helped me to amount to anything until I got Tanlac. This is saying a great deal, for I did everything it seems that a man could do to find relief. Of course, I was hardly ever sick enough to go to bed and was most always able to keep going, but I just never felt right. At times during those ten years, my stomach would become sour like vinegar. I would have an uncomfortable bloated up feeling after eating that would last for hours. I suffered a great deal from nausea. At times my heart would flutter and palpitate and I would become alarmed over my condition. My nerves were on edge all the time, and I became irritable, nervous and restless. I had no strength or energy to do anything. In fact I wasn't like myself at all. Even a week or two ago it was an effort for me to get out of my chair and I felt as stiff and clumsy as an 'old work horse.'

"It is really remarkable what Tanlac has accomplished in my case. It has relieved me entirely of indigestion. I never have that distressing feeling any more after eating, and I feel perfectly fine in every way. I will always feel grateful for what this wonderful medicine has done for me and I am only too glad to give it my heartiest endorsement."

Tanlac is sold by leading druggists everywhere.—Adv.

Begin Right Now to Conquer Your Rheumatism

If you are going to again rely upon the liniment bottle to try to rub your Rheumatism away, you will be doomed again to nothing but disappointment. A disease that can cause so much pain and suffering is not on the surface of the skin, and cannot be rubbed away.

Many forms of Rheumatism are caused by a tiny disease germ in the blood, and in such cases the only logical treatment is to search out and remove these germs from the blood.

For this purpose there is no more satisfactory remedy than S.S.S., the fine old blood remedy that has been in use for more than fifty years, and has given such general satisfaction for Rheumatism.

Begin taking S.S.S. today, and if you will write a complete history of your case, our medical director will give you expert advice, without charge. Address Chief Medical Director, 160 Swift Laboratory, Atlanta, Ga.

Poets Who Have Sung of Cats.

Poets of all nations have sung of Puss. Of these Baudelaire came nearest to appreciating her. He wrote three great poems to cats. No other poet, unless possibly Theosphile Gautier, has created works to rival them. Taine, the celebrated French historian and critic, wrote 12 sonnets to three cats. They may be placed high in the anthology of cat verse—on a level below Beaudelaire, of course.—Exchange.

FRECKLES

Now Is the Time to Get Rid of These Ugly Spots.

There's no longer the slightest need of feeling ashamed of your freckles, as Othine—double strength—is guaranteed to remove these homely spots.

Simply get an ounce of Othine—double strength—from your druggist, and apply a little of it night and morning and you should soon see that even the worst freckles have begun to disappear, while the lighter ones have vanished entirely. It is seldom that more than one ounce is needed to completely clear the skin and gain a beautiful clear complexion.

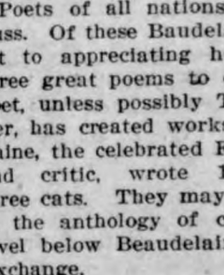
Be sure to ask for the double strength Othine, as this is sold under guarantee of money back if it fails to remove freckles.

Women to Study Architecture.

Women have been admitted for the first time as Associates of the Royal Victorian Institute of Architects and the Sydney Institute of Architects, and the new department of architecture in Sydney university has attracted a number of enthusiastic women students.

The artist who can draw a salary has no cause for complaint.

Do you Suffer from Headaches?



Mapleton, Kans.—"I have been using Dr. Pierce's medicines for over thirty years and can truly say they are the best medicines I have ever used. About thirty years ago I had sick-headaches so that half of my time I was unable to do anything. A neighbor advised me to take Dr. Pierce's Golden Medical Discovery. I took six bottles and have never been troubled with it since."—MRS. H. C. HUGHES.

Sold by druggists for the past fifty years, and has never contained a drop of alcohol. It can now be had in tablet form also. Send to Dr. Pierce's Invalids' Hotel in Buffalo, N. Y., for a ten-cent trial package.

MURINE FOR YOUR EYES often. **Soothes, Refreshes.** Safe for Infant or Adult. At all Druggists. Write for Free Eye Book. Murine Eye Remedy Co., Chicago

Night and Morning, *Have Strong, Healthy Eyes.* If they Tire, Itch, Smart or Burn, if Sore, Irritated, Inflamed or Granulated, use Murine

Welcome to His Own.

Calder (just back from his honeymoon)—What do you think! The apartment we engaged before we left has been rented over our heads. You couldn't put us up for a couple of nights, could you?

Balder—I suppose I'll have to, old man, considering that we are the people who got your apartment.—New York Sun.

A Conundrum.

Before the subject is abandoned: Why does an American doughboy close his eyes while submitting to the processes of decoration by a French army officer?—Kansas City Star.

All Run Down Now Feels Fine

Eatonic Ended His Troubles

"Eatonic is the only thing I have found to stop my heartburn and I think it has been a great help in nervous spells," writes G. C. Johnson. An upset stomach may cause lots of suffering all over the body. Eatonic helps in such cases by removing the cause of the misery, because it takes up and carries out the excess acid and gases and keeps the digestive organs in natural working order. A tablet after meals is all you need. Big box costs only a trifle with druggist's guarantee.

NEW STORY ABOUT PILGRIMS

Writers Claim Early Settlers in America Were Kidnaped From the London Virginia Company.

Some historians, notably Azell Ames, who has compiled "The Mayflower and Her Log" from original sources, assert that the skipper of the Mayflower was Capt. Thomas Jones, a rough sea dog who had led a more or less piratical career on the high seas. Between Capt. Jones and Sir Ferdinando Georges and doubtless Weston, they allege that a plot existed whereby the Pilgrims were deliberately stolen from the London Virginia company and planted on territory outside of the Virginia grant. The maneuvering about Cape Cod, according to this interpretation, was simply a part of the plot to discourage the Pilgrims from settling near the Hudson, as evidently they intended when they left Holland.

The exact identity of "Master Jones" is not clear. Historians of the Massachusetts Historical society say that the skipper was one Christopher Jones, a trustworthy man, entirely different from Capt. Thomas Jones, who was known to have a checkered career during his voyages to Virginia and other colonies. The course of American colonial history may have been greatly changed when the Pilgrims encountered the shoals and unfavorable winds off Cape Cod, but this bit of destiny can be easily exaggerated. It is sufficient here to relate that the Pilgrim colony was founded outside the jurisdiction of the London Virginia company.

PRODUCES COTTON IN COLORS

Southerner Has Succeeded in Growing Green and Brown and Is Experimenting on Black.

A. W. Brabham has submitted to the cotton exchange of Savannah four samples of colored cotton—light brown, dark brown, light green and dark green. They are the results of years of experimentation. Mr. Brabham says that other colors will appear when a number of cotton plants in his garden that are not yet fully grown begin to bear.

The botanist has not yet been able to produce black cotton, but he says he will do so in time. It would have appeared this year, he contends, if a package of the seeds of a blue-tinted cotton, mailed to him by a botanist in Delhi, India, had not gone astray. Mr. Brabham has sent for another package of these seeds, and he is convinced that if he crosses them with certain of the cottons he has already grown the result will be black.

Luther Burbank once told Mr. Brabham that he would produce black cotton for a million dollars. Mr. Brabham replied that he thought he could do it more cheaply, and thereupon started his experiments.

Process of Becoming Convinced.

Every day he called her over the telephone.

Every day she refused to see him.

But his experience with women had taught him to understand their coquetry, and he knew that her refusal was not sincere.

One morning when he telephoned she said that she would be glad to see him, but she was engaged for the day.

The next morning she was sorry to have to miss him again, but she did not have a minute free.

And the next day she wished that he had telephoned sooner, for she had just made an engagement. Would he please call again?

His experience with women taught him that her refusal was sincere.—From Life.

Canada to Allot Land to Eskimos.

It is announced from Ottawa that the Canadian government has decided to reserve for the remnant of the Eskimos a small part of the territory over which they formerly ranged at will in the varying pursuits of fishing and hunting, says the New York Evening Mail. The reservation is to consist of Banks and Victoria islands, north of the vast region, wide as the continent, known as Northwest territory, and far north of the Arctic circle.

From this reservation, and apparently the waters immediately adjacent to it, white hunters are to be excluded; and those who have begun operations on Banks island will be ousted. Thus the resources needed to sustain Eskimo life will be preserved.

Welsh Belief in Witchcraft.

Witchcraft in Wales is still in existence, as was shown recently by a case which was tried at the Glamorgan assizes. A Welsh farmer and his family, who were suffering from a skin disease, sent for a local wise woman, believing they were all cursed. The woman pronounced the family bewitched, and prescribed for a fee of $610 a small charm made of wood and cinders. Other instances of the same woman's exploits were mentioned, when for amounts varying from $500 to $1,500 she demonstrated her powers among credulous folk.

Wife Took Up Husband's Duties.

When the forest lookout on Tahquitz peak, in the San Jacinto district, California, was incapacitated this fall Mrs. Reindorp, wife of the district ranger, donned khaki, loaded blankets and grub on a horse, and took over his duties, holding the lookout post for more than a week. This is one of the incidents reported to the United States Department of Agriculture through the forest service.

Klemme and Vicinity

SEWING wanted. Mrs. Gilbert Schafer. tf.

April showers bring May flowers—so don't crab if it rains.

Mr. and Mrs. C. J. Wenkel of Meservey, were Klemme callers Tuesday

Miss Clare Merkel returned from her trip Saturday.

Mr. Henry Wille was a Garner visitor between trains last Friday.

R. R. Kester of Garner, was a business caller here Tuesday forenoon.

Miss Marian Luick of Belmond, was an over Sunday visitor at the Mrs. Mille Smith home.

Mrs. Rabbit and Mrs. Holt of Belmond, were visiting Klemme friends Monday.

How about your fishing tackle? Better look it over boys, as we will soon go fishing again.

Mr. and Mrs. Denny Conlan from Goodell, were shopping here and visiting friends last Thursday.

Mrs. Barney Dillon was up from Belmond last Thursday visiting with Klemme friends.

Ed. G. Ell received another carload of Ford Cars the other day. We understand they were nearly all sold.

Mr. and Mrs. Henry Lewis spent Sunday visiting relatives at Clear Lake.

Mrs. Albert Yahnke was a passenger to Garner Monday for a visit with friends.

Mrs. Elmer Fuller and Mrs. Marvin Barr were Mason City visitors last week Wednesday.

Miss Marian Luick of Belmond, visited Klemme friends last week Wednesday.

M. A. Fell of Garner, was a business caller in Klemme one day last week.

WANTED—Name and address of asthma sufferers. S. G. Snyder, Marengo, Iowa. 1wp.

Mrs. Arthur Wellemeyer was a Garner visitor between trains last Friday having dental work done.

FARM WANTED—Wanted to hear from owner of farm or good land for sale for fall delivery. L. Jones, Box 551, Olney, Ill. 1wp

Carl Schnieder of Garner drove over here on business Monday evening. He is the proprietor of the C. J. Schnieder store at Garner.

Miss Adna Church of Garner, was visiting with her Klemme friends on Friday and Saturday of the past week

Dr. R. M. Thomas has his office in the building formerly occupied by Chas. Busch as a land office. Doc moved in last week.

The Misses Emma Wille and Esther Swanson were at Garner last week Wednesday having some dental work done.

Mr. and Mrs. Will Kirkwood and Mrs. A. Kirkwood were business visitors at Mason City last week Wednesday.

Mr. and Mrs. J. B. Spitler drove to Belmond Saturday morning on business and while there found time to get out to their farm near Belmond.

Mrs. White and daughter Mamie, and Mrs. Hughes, were up from Goodell Saturday, shopping and visiting friends.

Mrs. J. W. Brooks who has been visiting at the home of her daughter, Mrs. Joe Starnes for several days, returned to town Tuesday.

Mrs. Henry Lewis was visiting with relatives at Clear Lake the fore part of last week and on her return home Wednesday she was accompanied by her niece Fern Brooks, who visited in Klemme for several days.

NOTICE—Call at once and give me your order for getting cattle pasturing this spring. Good feed and water and plenty of salt. Good service, five months pasturing. Telephone 2905. A. C. Lau. tfM7.

Mrs. Thompson and daughter Miss Mable, of Cedar Rapids, were Klemme visitors Monday and Tuesday. They were here looking after Mrs. Thompson's Hotel property.

Miss Mable Stearns came up from Belmond Monday for a visit with her Klemme relatives and friends. She has been tending switch board on the Belmond Telephone Company the past week.

Charlie Lewis dropped into town last Thursday evening from Hayfield, Minn. Chas and his brother Verner are operating a farm near Hayfield, and Charlie came down here on business and also to shake hands with old friends.

Mrs. Leo Wilkins who has been living in Goodell the past year, has moved back to her house here in Klemme. She moved her goods Monday. The Anderson family who lived there moved into the Maitland house and Henry Maitland and family have moved onto a farm east of Klemme.

Mrs. J. B. Spitler, and Mrs. Howard Spitler and baby Irene, were passengers to Garner last Friday morning. Mrs. Howard Spitler had some dental work done there and baby Irene had her picture taken at the Studio. In the afternoon Mr. Spitler drove up in he car to bring the ladies and baby back to Klemme.

SEEK TREASURE IN VIGO BAY

Company Under Spanish Grant Will Endeavor to Recover Some Hundred Million Dollars.

The largest amount of sunken treasure there is any record of lies at the bottom of Vigo bay, on the coast of Spain. Here a Spanish plate fleet of 17 great galleons and their escort of 23 warships were sunk 300 years ago by a combined fleet of English and Dutch war vessels.

There is no guesswork about the amount of treasure on board the galleons. It is matter of official record and is placed in the neighborhood of $140,000,000, which at the time when there was very little money in the world had a purchasing power ten times greater than now.

Of this immense sum a little was landed, taken inland and saved. A few millions fell as spoil to the victors and the balance has served as a bait to draw adventurers from everywhere to Vigo bay. A heavily financed company even now, under a concession from the King of Spain, is trying to salvage the sunken galleons and their cargoes.

All in all, not more than 20 millions have been saved from the sea, including that landed, that captured and that reclaimed by the various firms to whom concessions have been granted during the last 300 years, so it is safe to say that at least 100 millions yet remain resting on the bottom of the bay, 17 shiploads of gold, silver and precious stones!

THESE SILKS NEED NO DYE

Louisiana Man Has Discovered Method of Making the Worms Color Their Own Product.

While the silkworm has no fancy for any particular color, preferring to weave its cocoon of a drab gray so that it will not show against a gray tree trunk, one man has discovered a method whereby he can make the little spinners produce any one of the 18 shades at his pleasure. The man is Dr. Vartan K. Osigian, son of a long line of silk manufacturers, and he has an extensive silkworm farm near New Orleans.

Osigian has discovered that upon feeding the worms certain leaves they will respond by spinning certain colors. He has carried out his experiments until he has the 18 varieties of food to produce the like number of colors. The silk thus shaded will not fade in either water or sunlight. Not only has he secured colored silk, but in addition he has increased the cocoon in size until a single one provides 1,800 yards to a strand, and there are two strands to a cocoon.

The "Bolshevist Cocktail."

From the American Red Cross Bulletin of Riga: "Helsingfors.—You can tell a prohibition country by the weird and awful drinks they drink. Take Finland, for example. There they take vodka, 90 per cent, made from potatoes, not from grains, mix it with blue or huckleberry juice water, in the ratio of one to ten, and gulp down the result. It's the only way to get it down; to sip would be to give up altogether, both on account of the strength and the odor. American Red Cross dispensaries working with the Russian refugees use vodka under spirit lamps in place of alcohol.

"Near the border one gets the 'Bolshevist cocktail.' This is a combination of kerosene, vodka and ether. They run automobiles on it in soviet Russia, as gasoline is not to be had. The job of chauffeur is much sought after."

The City Dray Line

—Is prepared to do your hauling carefully and promptly. We Solicit your patronage. Charges reasoable.

Klemme, Iowa.

Liberty Township News

Mr. and Mrs. August Schaper from Illinois, have been visiting in this vicinity the past week.

The Standard Bearers Society of the Liberty Township Church will meet next Friday evening. All the young people of the community are invited.

Roy Schaefer's little baby is on the sick list this week.

The teacher and pupils of School No. 8 enjoyed a wiener roast last Friday after spending some time cleaning up the school house yard.

The Churches

METHODIST EPISCOPAL CHURCH

Public Worshp at 10:00 a. m. and 7:30 p. m.

Sunday School at 11:00 a. m.

At the morning service Miss Josephine Lier, of Khandwa, India, will speak, and the annual thank offering will be taken. In the evening the choir will repeat some of the music of the Easter cantata and Miss Lier will also speak. All welcome to all services.

A. E. Buriff, Minister

FIRST METHODIST EPISCOPAL CHURCH

There will be no services in the town church next Sunday, it being the Sunday for our communion services in Liberty Twp. church. The folks from town are all requested to meet with us in the country church both morning and evening.

The services in Liberty Township church being at 10 o'clock next Sunday. In the evening a song service at 7:30 after which the District Superintendent, L. J. Brenner, will preach.

Midweek prayer services on each Thursday evening at 7:30.

You are invited to our services. Come and worship with us.

A. H. Meyer, Pastor

METHODIST ENJOY S. S. "FEED"

You will remember that some few weeks ago a most lively Sunday School contest was held at the Methodist Episcopal Church. The contest was in the for mof "a trip to Panama" and the school was divided into two classes, the Reds and the Blues. Well the Reds were so badly beaten in the contest that it was up to them to set up the treats to the Blues who were to eat ice cream and cake with all the trimmings and the Reds themselves to eat crackers and cheese washed down with water. That "feed" was held at the Idle Hour Theatre Friday night last and a social good time was enjoyed by all. Somehow the Blue side were liberal and shared their "eats" with the Reds so that they did not have to banquet on crackers and cheese. All report a fine time.

OLD TOWN WELL FOUND HERE TOO

Some of the sewer boys were reading the article we had clipped from the Corwith Hustler last week telling how the sewer men there had struck into a place supposed to have been at one time the "old town well." Nothing on Klemme. The boys claim they dug into an old well at the intersection on the Wellemeyer corner when they went down Main Street. Perhaps some of you old timers here can enlighten us a little about the well. Was that the "old town well" or did some farmer at one time have a well at that place?

CAN YOU EAT TWO DOZEN EGGS?

This Man Almost Did

One evening last week two of the young men on the sewer gang got into an argument about eggs. "Hershy" claimed he could down two dozen, "Bill" bet him he couldn't. This little argument all started when the two were eating supper and Hershy had a real square meal to start on but he was game. Therefore they journeyed to Jim's place and had him start frying eggs. "Hershy" began the task and kept Jim hopping around to fry them fast enough. The first dozen disappeared as if by magic under the young man's belt but here he began to slow up. A dozen and a half were tucked cozily under the front side of his back at the northwest corner but then those eggs began to look big as scrambled foot balls. Hershy stuck to it and got away with twenty-three and a half fryed cackle-berries but that last half refused to budge. A bee line for the door and the twenty-three and a half came up for air. Hershy lost but was a good sport.

SPRING INVADES KLEMME GARDENS

Everybody in Klemme caught the gardening fever last week and how old mother earth was stirred up! Gardens here and gardens there were plowed and made ready. A general spring clean up of yards also took place and the old town is all spruced up ready for summer and the lawn mower.

Horse Chestnut.

It is said that the name horse chestnut was derived from the fact that when the leaves of the tree fall there is a scar left on the twig in the shape of a horse shoe that bears marks resembling the nails of a shoe.

PROGRAM

OF THE FIRST ANNUAL

Declamatory Contest

Of the Klemme High School

At the Idle Hour Theatre

FRIDAY Eve., April 15

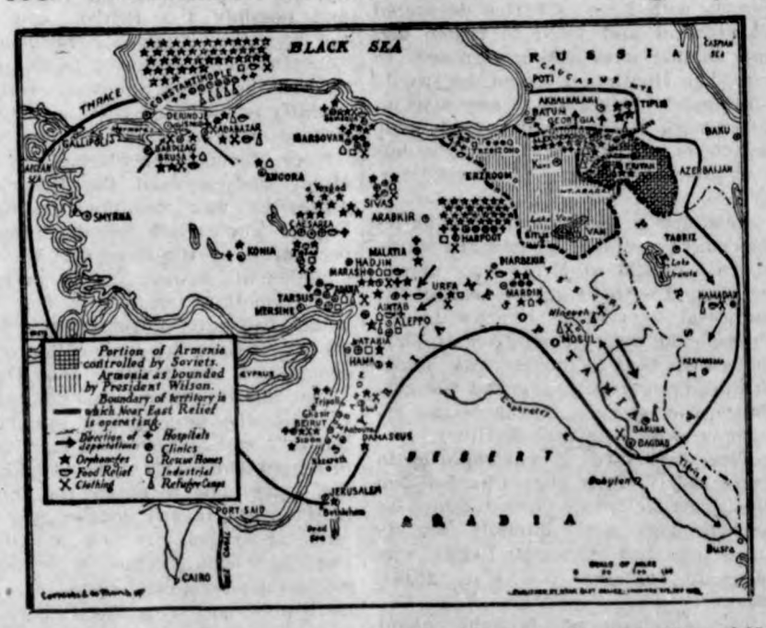
At 8:00 O'clock

Music- - - -	Orchestra
Invocation -	Rev. Arthur Meyer
Announcement - -	Mr. Wilson
Vocal Solo - -	Marie Blank
"The Littlest Rebel" -	Mildred Johnsou
"An Abandoned Elopement"	Fred Arnold
"A Sisterly Scheme" -	Dolores Koerner
"Instrumental Solo -	Mrs Sam Harvey
"Naughty Zell" - -	Blanch Medaus
"The Little Gentleman" -	Clarence Elder
"Pigs is Rigs,. - -	Howard Wiles
Music - - - -	Orchestra

Decision of Judges and awarding of Prizes.

Arthnr Wellemeyer

The Newest Near East Geography



THE accompanying map aims to show the extent of the operations of Near East Relief and also by contrast how comparatively limited is the Armenian area in the Near East controlled by the Bolsheviki.

Wherever in the Near East there are destitute Armenians, Syrians, Greeks, Jews, Assyrians, or others, needy and oppressed, regardless of race or creed, there Near East Relief follows. From Constantinople to Bagdad, from Port Said to Baku, even into Persia, the protecting arms of Near East Relief have reached until today its work is far more extensive outside the country of Armenia than within.

OBITUARIES

George I. Schaper

George Isaac Schaper was born the 29th of December, 1866, at Pearl City, Illinois, and died at his home in Klemme, Iowa, Tuesday afternoon, April 5th, 1921, at the age of 54 years, 3 months and 7 days.

Mr. Schaper was born into a Godly home and reared by devout Christian parents. Every opportunity was given him to develop a strong Christian character which he did, and which we all admired in him. He was a man of sterling qualities, a man beloved by all that knew him. He had always been a champion for the causes that were right; an ardent worker in the church, and for the things that make better men and a better world. He was superintendent of Liberty Township Sunday School for many years where he did very efficient service. He was one of the trustees and pillars of the church. He was a very liberal supporter of all benevolent causes. His was a splendid education and a well trained mind, which enabled him to make himself useful in many ways; in his young manhood he was an instructor in public schools.

Mr. Schaper was united in marriage to Miss Julia Baumgartner Feb. 27th, 1895. After the wedding he came with his young bride to Hancock county, Iowa, and located on a farm four miles west of Klemme, where they resided for 26 years. To this happy union three children were born, one daughter Roxana, and two sons Milton and Homer. His family life and home life was indeed ideal. He was a devoted husband, a kind father, a good neighbor, a splendid citizen, a Christian man.

On account of ill health in the family, he sold his farm last fall and the family moved to town the first of March. Tat his life would come to a close so soon after coming to town, no one of us expected. Today, not only the afflicted family, but an entire country-side mourns his death.

The wife has lost a devoted husband, the children a loving father, the church a devout Christian, the country a good man.

He leaves his wife, three children, five brothers, two sisters, eight nieces and seven nephews, besides many other relatives.

(By Rev. A. H. Meyer)

CARD OF THANKS

We wish to thank all those who so kindly expressed their sympathy both in words and acts of kindness, also for the beautiful floral tributes in our recent bereavement in the death of our Faher and take this means of showing our appreciation and thankfulness to everyone.

Roxana Schaper
Milton Schaper
Homer Schaper

Curtis Arnold

Curtis Carroll Arnold, son of Elmer and Nellie Arnold, was born near Klemme, Hancock county, Iowa, on March 25th, 1913, and died at the Park Hospital in Mason City, Saturday morning, April 9th, 1921, at the age of eight years and fifteen days. His death was caused by a cerebelli abscess.

Curtis was a robust fine fellow. His was a splendid physique; always full of good cheer, kind to his younger brothers, affectionate towards his parents—the sunshine in the home, he had the making of a splendid young man. About a week ago he complained of severe headaches and after consultation with one of the local doctors he was taken to the hospital at Mason City, where everything possible was done to give him relief and save his life; but all efforts proved of no avail. God, the Great Shepherd of all life, had planned it different. On Saturday morning he placed his arms around the neck of his mother and his uncle, Dr. Tice, telling them that he loved them and that they had done so much for him, after which the Angel of Death came and took him into his heavenly home. He was fully conscious until death.

He leaves to mourn his death his parents; two brothers, Wilbur and Roy; two grand-parents from his mother's side; eleven aunts, eleven uncles, eighteen cousins besides many other relatives and friends whose hearts are sad because he is gone.

(By Rev. A. H. Meyer)

Notice to Ex-Soldiers of the World War

All Ex-Soldiers of the World War will file their affidavit wrth the County Auditor, so as to enable them to take advantage of the Soldiers' Exemption Tax to the amount of five hundred dollars ($500.00.).

Write or call for application blanks.

CHRIS JACOBS
County Auditor

FAMINE FUND WORK AT HALF-WAY MARK

Thomas W. Lamont, Chairman, Tells of Relief Administered and Task to Be Completed.

The American Committee for China Famine Fund, according to a statement issued by Thomas W. Lamont, chairman, has reached the second stage of its mission of mercy of sending funds from America to feed the millions of starving famine victims in the far eastern republic. At the lowest estimate, the statement says, just as much more is needed to carry "the last 5,000,000" through to the June harvest as has already been sent.

Mr. Lamont points out that quick response by America to appeals made by President Harding and his predecessor, President Wilson, has resulted in such prompt distribution of relief that the threatened magnitude of the famine has been checked to a marked extent. A continuation of the efforts so far made, it is declared, will place the famine relief for China among America's most effective philanthropies.

The Waiting Millions

There remain, however, the statement shows, a "last 5,000,000" to be saved, and these people can be saved only by continuous and voluminous relief resulting from American subscriptions.

The statement, in part, follows:

"Quick response to the appeal of the American Committee for China Famine Fund gives us at the half-way point in our work the cheering assurance that the subscriptions from generous America already have served a great humanitarian purpose, inasmuch as relief already administered has held the famine in bounds and made it possible for America to save a multitude of human beings.

"Whereas early estimates made it seem that millions must perish, we now are advised that instead of the 15,000,000 who, it was originally feared, were doomed to death from hunger, relief at present in sight from all sources, American, Chinese and foreign, is sufficient to provide scanty rations until the June harvest for all except 5,000,000 people. These 'last 5,000,000' are destitute, according to our latest reports from the American Advisory Committee in Peking and are dependent for existence upon new help coming from outside sources, and this means America.

From All the People

"It is the earnest hope of the Committee that the number of contributions made as well as the aggregate will be such as to make our humanitarian gift, in a real sense, a gift of the American people as a whole.

"One way to make individual effort and generosity contribute toward saving China's starving population is for every one responsive to China's need, in effect, to 'pick a pal in China for a day.' The thought behind this special appeal in connection with the latter part of our effort will be for American men, women and children to choose, figuratively, a Chinese famine victim as a friend for a day and to send what they spend one day on themselves or an American friend to the China Famine Fund either through local committees, banks or churches or direct to Vernon Munroe, treasurer, Bible House, New York City.

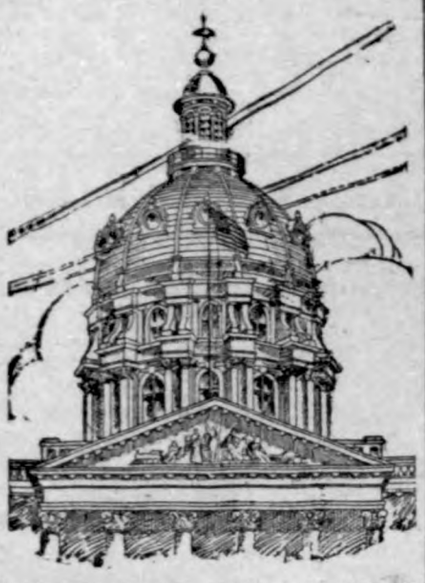
"No American is so poor that he cannot save a life at the lowest rate ever quoted, one dollar a month. Life's quotations fluctuate, sometimes in one nation, sometimes in another, but the lower the quotation the greater the opportunity of humanity, the opportunity of human beings to save human life. China is far away—6,000 miles—but hunger is hunger, whether around the corner or beyond the Pacific.

"We appeal to America to make effective the work already done in checking the China famine disaster by saving until harvest those already saved from death."

CARD OF THANKS

We wish to express our sincere thanks to the many friends and relatives who by their expressions of sympathy; the gift of flowers, or other kindly acts, helps to lighten the burden of our grief at the loss of our boy Curtis.

Mr. and Mrs E. J. Arnold



UNDER THE GOLDEN DOME

Des Moines.—Iowa's thirty-ninth general assembly is preparing to adjourn after a session marked by little legislation of revolutionary nature, and during which the conservative element has had absolute control of both branches.

With the exception of the soldier bonus law none of the measures enacted are likely to be of vital importance to the great mass of the public.

Perhaps the most important bill passed during the last weeks is the Springer bill creating a court of public service for the purpose of passing upon disputes between cities and towns and their public service corporations. This bill is similar in general plan to the public utilities commissions proposed in former legislatures, and always defeated.

As passed by the house and senate it provides for the submission of disputes relating to franchise conditions or rates to a tribunal of judges of the district court, to be appointed by the chief justice of the supreme court to pass upon any case which may arise. None of the three judges can be from the district in which the litigation is taking place, and the hearing is to be held in the city where the controversy arises, unless it is desired to hold the hearing at Des Moines, where the secretary of the court will have his office.

House Would Recall

The bill passed the house by a big vote, but just before the senate was ready to act the house repented and requested that the measure be returned by the senate. This the senate refused to do, and it then passed the bill 40 to 10.

The most vital provision of the bill is the feature which makes all franchises now in effect or to be granted in the future indeterminate in their extent. The bill provides that no public utility corporation can be deprived of its franchise as long as it complies with the law. This provision was the center of attack by enemies of the measure.

Little Constructive Work

As a general thing the legislature has been chiefly active in defeating proposed legislation, and has done very little constructive work.

The house has passed a bill to legalize the sale of cigarettes to persons more than 21 years of age, and this bill is likely to pass the senate. The house also passed a bill providing for a mild censorship of moving picture films, which will probably be defeated in the senate.

The W. C. T. U. bill to increase the age of consent from 15 to 18 years was defeated in the senate when the judiciary committee voted it out for indefinite postponement, and the senate then sent it to the sifting committee for redrafting. The bill was encumbered by a number of complicating features which resulted in its trouble in the senate.

Herring Called Upon

Clyde Herring, democratic candidate for governor, was called before the departmental affairs committee for testimony relating to any improper action by present state officials, and informed them that he had nothing to present in regard to present incumbants, but could afford them a lot of information in regard to what the previous administration had done. He was told that the committee did not feel that it had the power to go back and wash up any dirty linen of officials not now in the state service.

Do Not Heed Kendall

None of the recommendations made by Governor Kendall in his message to the assembly relating to the consolidation of departments and abolition of offices have been presented with the exception of a proposal to consolidate the board of parole and the board of control, which was beaten in the senate by a close vote. As a result there will be no material change in the organization of state house affairs during the next biennium.

The Nervig bill intended to do away with nepotism on the part of public officers was killed by the senate after having passed the house, and no action in this respect will be taken by the legislature.

An increase in the state tax levy of one or two mills is likely as a result of the appropriations which must be authorized, out the amount of the levy cannot be determined until after all appropriation bills have been passed.

Campbell Bill Passes Senate

The Campbell bill, endorsed by the farm bureau, and having as its purpose an increase of rural credits, was passed by the senate and will probably pass the house. It provides for the foundation of corporations having the authority to issue bonds issued with farm chattel mortgages or farmers warehouse receipts as security for the bonds. The bill has the backing of the farm bureau, and will be considered by the house before adjournment.

Fight Over Exemption

A bill passed by the senate providing for the exemption from taxation of property of war veterans was twice reported out by the house ways and means committee for indefinite postponement, but was placed upon the calendar by a vote of 85 to 2, and will probably pass. It provides for a $3,000 exemption for civil war veterans $2,600 to Spanish American war veterans, and $500 to world war veterans. The civil and Spanish American war veterans already have an exemption, but none is provided to the men who fought in the recent hostilities. The bill is strongly backed by the American legion.

Cities and towns are authorized to require soft drink parlors, temp bars and similar establishments to pay a license, under terms of a bill which has passed both house and senate.

The blue skybill is having considerable trouble in the senate and is likely to be defeated. Provisions of the law would injure legitimate promotion enterprises, its enemies charge.

Petit jurors will get $4 per day in the future instead of $3 as at present, if the senate passes the Nervig bill, already enacted by the house. The bill got by the house with just 55 votes. One less vote would have beaten it.

With the exception of the Olson bill, which imposes a head tax of three dollars upon every citizen, male or female, over 21 years of age, and which will probably be passed by the house during the closing days of the session, no important legislation relating to taxation will be enacted, it now seems likely, with the exception of the direct inheritance tax measure enacted some time ago.

A senate committee bill provides for the reorganization of the present system of state agents under direction of the governor and the attorney general, and the creation of a state detective bureau under the attorney general. Its passage is likely, and the old controversy over the state agents and their employment is likely to be thus ended for some time at least.

The Ingersoll bill providing for a standard gauge of four feet and six inches for all bob sleds or sleighs has been passed by both houses and senate, and will be a law by next winter. This bill has been before the legislature every session for many years, and is intended to prevent the cutting up of roads in northern Iowa during seasons of heavy snows by sleds and sleighs of narrow width between the runners.

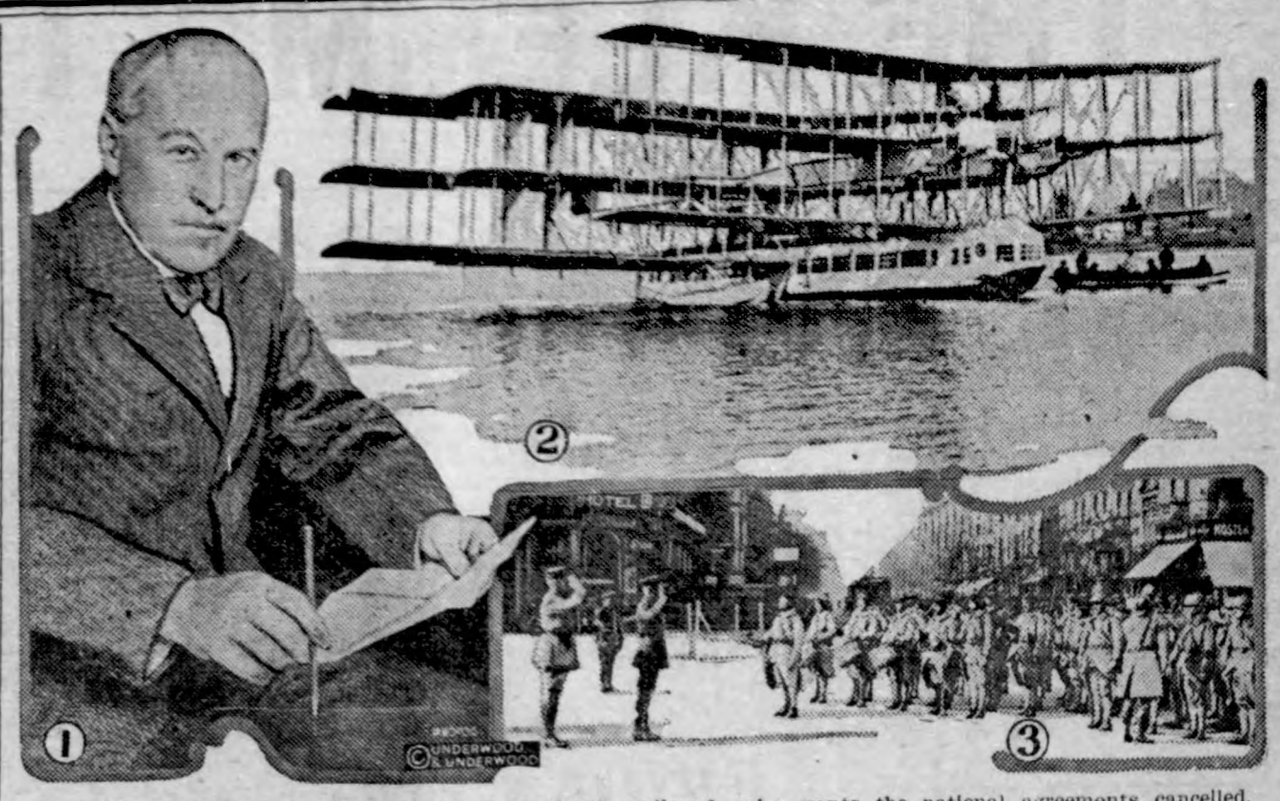
The convention authorized by the election of 1920 for the purpose of revising the constitution of the State of Iowa will meet in May of 1923, under provisions of the bill which has passed both the senate and the house. The bill provides for the nonpartisan election of 108 delegates to the convention, one from each county in the state and two from each of the nine counties having the largest population, the basis being exactly the same as that of the present house of representatives.

All bills which had not been acted upon by committees were turned over to a sifting committee in the senate upon Wednesday, March 30, and house bills not acted upon went to a similar committee a day or two later. These sifting committees take the place of all of the regular committees save those on appropriations, and will weed out such measures as are deemed worthy of attention in the final hours of the session, which adjourns April 8. About 400 bills went into the sifting committees, most of which were regarded of little importance, or had little active support.

A bill presented in both house and senate by the committee on printing would do away with the office of state document editor, now held by Ora Williams, and place the control of state printing in the hands of a printing commission named by the governor, and would permit the letting of state printing by contract to the lowest bidders. Present restrictions in legal rates, which have made it impossible to order the printing of state reports would be done away with. What action will be taken upon the bill is doubtful, and the matter is not likely to be settled until just before adjournment.

The Rumley bill, requiring all children to attend the public schools, will not get by this session of the assembly. It is now in the sifting committee in the house and will probably not be reported out.

Defeat of all proposals for a net income tax corporations, for a tax upon amusement admission, or for an occupation tax has been accomplished, unless unforeseen developments occur during the last hours of the session.



1—Vice President Atterbury of the Pennsylvania railroad, who wants the national agreements cancelled. 2—Hundred-passenger Caproni hydro-airplane which will attempt the flight from Italy to America. 3—French national anthem being played in the public square of Dusseldorf, Germany, before Generals Moorland and Gaucher, commanders of the British and French occupational forces.

NEWS REVIEW OF CURRENT EVENTS

Former Emperor Charles Makes an Attempt to Regain the Throne of Hungary.

"LITTLE ENTENTE" SAYS NO

Communist Revolt in Germany Not Yet Subdued—Defeat of Greeks by Kemalists Reported—President Harding Moves for Solution of Railway Problem.

By EDWARD W. PICKARD.

"Tired of exile and deprivation," Charles, former emperor of Austria-Hungary, made a dramatic attempt last week to regain the throne of Hungary. Influenced by reports that the Hungarians were eager for his return, he slipped across the border from Switzerland, disguised as a Tyrolean tourist and accompanied by four friends, and for a day was concealed by Bishop Mikes at Steinamanger. There Premier Teleky was summoned and tried in vain to persuade the former monarch that his hopes were not to be realized. Charles persisted in his adventure, so Teleky accompanied him to Budapest, where Admiral Horthy, the regent, had an interview with him. Charles decorated the admiral and tried to cajole him into turning over the government to him, but Horthy declared he would offer armed resistance to any attempt to overturn the present regime, and, with tears in his eyes, the ex-ruler left the palace, saying: "Farewell forever."

Returning to Steinamanger, Charles was placed under strict military supervision and Bishop Mikes was arrested, charged with being the head of the movement to restore Charles to the throne. The Spanish minister at Vienna stated that Charles was under Spanish protection and asked the government for a pass to enable the ex-ruler to cross Austrian territory.

Three days later it was reported in Paris and Vienna that Charles had proclaimed military dictatorship at Steinamanger with himself as its chief and that General Lehar was ready to support him with 15,000 troops.

This development brought about prompt action by the "little entente," Czecho-Slovakia, Jugo-Slavia and Roumania, whose troops were placed in strategic positions on the Hungarian frontiers. President Masaryk sent an ultimatum to the Hungarian government, saying that the restoration of the Habsburgs would be regarded as a casus belli by Czecho-Slovakia.

The Hungarian charge d'affaires in Vienna notified the Austrian government that Charles would return to Switzerland. At this writing it appears that the attempted coup is a dud.

Early in the week it looked as though the government forces in Germany had succeeded in quelling the great communist revolt, which was centered in Prussian Saxony. The "green" troops, armed with machine guns, captured the big Leuna nitrogen plant in Halle, together with many prisoners and vast stores of arms and ammunition, and in other places they scored important successes. Then the revolt flamed out afresh, not only in Saxony, but also in parts of the regions occupied by the allied troops. The American and Belgian occupational forces were especially involved but both quickly gained control of the situation. In Westphalia and in Weissenfels, Saxony, there was severe fighting and the communists suffered considerable losses. The attempt of the Reds to bring on a general strike apparently was a failure, however.

The entire situation in Germany is rather clouded and reports emanating from German sources are not reliable. There is little doubt that Berlin has been exaggerating the danger of general revolt and the seriousness of the "battles" with the Reds in order to accentuate its need of retaining the civil military forces whose disbandment is demanded by the allies.

For the second time the German government has filed with the League of Nations a formal protest against the occupation of additional territory by the allies; and the officials of the allied nations are proceeding with their plans to exact further penalties if Germany persists in its refusal to pay 12,000,000,000 gold marks by the first of May. There is no evidence that the Germans will pay, and some of the allies, especially the French, are convinced their former foes are actually preparing for a new war. Marshal Fayolle is quoted as saying the Germans are making cannon and machine guns, and especially are forwarding a huge aviation program, and that in the next conflict London and Paris will be deluged with bombs from supposedly "commercial" airplanes. He is convinced that unless the allies take firm action at once, Germany will never carry out the Versailles treaty.

The vigorous Greek offensive against the Turkish nationalists in Asia Minor progressed merrily until Eskishehr was reached. At this railway junction, where the Greeks were defeated some months ago, disaster again overtook them, according to dispatches from Constantinople, and after a day-long battle they were forced to retreat after losing many in killed and captured. The report of the Greek defeat may be exaggerated, for it emanates from Kemalist sources.

Greek successes in Asia Minor are not pleasing to any but the Greeks, and possibly the British, and even the "regular" Turkish government at Constantinople protested to the allies against the Greek offensive. Italy especially is sore, and relations between Athens and Rome were strained when Greece announced a blockade of Asia Minor and accused the Italians of smuggling war munitions to Kemal Pasha. The French fear that proposed occupation by the Greeks of the Dardanelles will insure British control of that important waterway, and Roumania has entered formal and bitter protest against the composition of the commission controlling the Dardanelles, insisting upon equal voting power with the Greeks and the Turks. Bulgaria will not overlook any chance to regain Thrace from the Greeks, but the latter hope to obtain the support of the Serbs in any conflict over that territory by helping them in Albania and Macedonia. Thus, according to world diplomats, war clouds are once more appearing over the Balkans.

There was one little gleam of the sun of peace through the murk of the Irish situation last week. Sir William Goulding of Dublin, a prominent railway man, and three southern Irish unionists, conferred with Cardinal Logue, primate of Ireland, at Dundalk, with the object of securing the opening of negotiations between the Irish republican parliament and the British government. Meanwhile there is no cessation of the struggle between the Sinn Feiners and the British police and soldiers in the island, every day bringing its stories of attacks, usually with bombs, on the auxiliaries and of the reprisals of the latter.

The commission of the volunteer committee of one hundred which has been conducting in this country an inquiry into the Irish question has made its report. Admitting that it labored "under the disadvantage of lacking the official British side of the case," the commission declares that "the imperial British army in Ireland has been guilty of proved excesses, not incomparable in degree and kind with those alleged by the Bryce report on Belgium atrocities, to have been committed by the imperial German army."

The report says the Irish people have had the protection of neither British nor international law and that they have been systematically subjected to a "terror" which, however, has failed to re-establish imperial British civil government and to suppress the Irish republic. The published summary of the report does not show that the Irish are blamed for anything except the secret execution of spies, traitors and enemies of the Irish republic who were condemned in ex parte hearings.

Rene Viviani, France's special envoy to the United States, has been received by President Harding, despite the ridiculous protests of the Friends of Irish Freedom, and in conversations with the Chief Executive, Secretary Hughes and other administration leaders began his task of discovering on what terms the United States will join the allied nations in restoring peace to the world. He is here, he insists, only to listen and report, and not to make any suggestions on behalf of France. For definite answers to his questions he must wait until President Harding takes up international questions with his cabinet and with leaders in congress.

Discussion of one of the administration's most serious problems—that of the railways—was taken up in earnest last week, and though to the lay mind it seems almost insolvable, the experts in such matters believe it will be solved by the interstate commerce commission and the railroad labor board working in closer conjunction than had been contemplated when the latter was created. Senator Cummins and Representative Mondell assert the machinery under the transportation act is adequate in the situation and that no further legislation will be needed. It is the position of the President and his advisers that the government should do all it can to facilitate the return of the railroads to former conditions, and it is admitted that both high freight rates and high wages must be reduced. Present rates are undoubtedly retarding greatly the movement of commodities, especially farm products, and the roads suffer in revenue accordingly. Of course the railway unions are opposing any reduction in wages, asserting this would be unnecessary were it not for willful extravagance on the part of the railroad managements. The senate committee on interstate commerce plans an investigation that shall establish the truth or falsity of the charges made by organized labor.

As had been expected, President Harding appointed Col. Jay J. Morrow governor of the Canal Zone. He also named Capt. S. E. W. Kittelle of the navy governor of the Virgin islands; Hubert Work, president of the American Medical association, first assistant postmaster general; Charles H. Burke of South Dakota, commissioner of Indian affairs; George Carter of Iowa, public printer, and Thomas Robertson of Maryland, commissioner of patents. A public task for Gen. Charles G. Dawes of Chicago has been found by the President, who has appointed him chairman of a commission of eleven to investigate the problems of soldiers' relief and to formulate a definite policy and program. The other members of the commission are all well known and competent men and women.

With the most impressive rites of the Roman Catholic church and in the presence of the greatest assemblage of church dignitaries ever seen in this country, the remains of James Cardinal Gibbons were laid to rest Thursday in the crypt of the Cathedral of the Assumption of the Blessed Virgin in Baltimore. By special decree of the pope there was sung at the mass a solemn Gregorian chant previously heard only at the funerals of sovereign rulers of the church in the Sistine chapel in Rome. Not the church alone, but all of Baltimore paid tribute to the memory of its beloved and distinguished citizen, and as the clocks of the city tolled ten, the hour of the ceremony, every wheel stopped, every activity ceased.

Sharply contrasting with this funeral in pomp and place, just as the life work of the men contrasted, was the funeral of John Burroughs, the beloved naturalist and author, who died last Tuesday on a passenger train in Ohio. On the eighty-fourth anniversary of his birth his body was interred at Roxbury, high in the Catskill mountains close to the old house in which he was born, and a large bowlder on which he often sat forms the headstone of his grave. This dean of nature writers is deeply mourned by the great and the humble alike of the entire nation.

EX-EMPEROR OF HUNGARY GUARDED

Budapest Says Charles Is Held at Steinamanger—Capital Quiet.

ALLIES READY TO STRIKE

"Little Entente" Ready to Fight—Charles Seizes Throne—Vienna Says He Will Return to Switzerland—Lehar Defiant.

Budapest, April 1.—Startling reports that former Emperor Charles was moving with troops toward the city were officially denied last night. It was declared Charles was closely guarded at Steinamanger. Perfect order prevailed in Budapest during the evening.

Paris, April 1.—Resolutions protesting against the restoration of former Emperor Charles in Hungary, and warning the Hungarian government that the consequences of such an act would be disastrous, were adopted by the council of ambassadors here. The resolutions were presented by Jules Cambon, acting in the name of the French government.

Paris, April 1.—Two authentic facts appear to stand out of the most sensational rumors relative to the attempt of former Emperor Charles to reinstate himself as head of the Hungarian government.

The first is that Charles is still in Hungary, and the second is that the "litle entente" comprising Czecho-Slovakia, Roumania and Jugo-Slavia and the "big entente" are ready to strike if the former emperor succeeds in his enterprise.

Premier Briand's newspaper, the Eclair, understands the entente governments are considering the steps they will take in the event that the Hungarian situation is not rapidly cleared up. Among these measures, it is declared, the blockade of Hungary is being considered.

Ivan Praznovsky, Hungarian minister to France, points out in a statement printed in the Figaro that communications between Paris and Budapest are interrupted, and that all mail reaching this city must come by way of Vienna, and therefore should be subjected to careful scrutiny.

The minister declares his disbelief of reports that Charles has been successful in his attempt, and says the delay in his departure from Hungary may be attributed to the necessity of obtaining the consent of the Austrian and Jugo-Slavian governments to the passage across their territories. He adds that if Gen. Lehar had gone over to the side of Charles he would have certainly have been advised.

While it is possible that a few adventurers are gathered around the former emperor, and that some battalions of troops may be ready to support him, the minister says he does not believe the army has declared for Charles, as Vienna dispatches have stated.

"Hungary," the minister concludes, "has had enough coups d'etat. While the people would, perhaps, like a monarchy, they want to have it established through regular constitutional channels.

"The situation in Hungary is improving, exchange rates are rising and, consequently, public opinion is hostile to any violent changes."

Friborg, Switzerland, April 1.—Count Andrassy, former Hungarian foreign minister, has been appointed premier of Hungary by former Emperor Charles, and has sent an ultimatum to Budapest, says a dispatch from the Hungarian capital to the Nachrichten of this city.

The dispatch declares that Admiral Horthy, the Hungarian regent, has handed over authority to the former emperor, who has been acclaimed sovereign by several garrisons of troops.

Vienna, April 1.—Official information was received in this city that former Emperor Charles, who attempted to bring about a coup d'etat in Hungary would leave that country.

The Hungarian minister in Vienna called on Chancellor Mayr and asked if, in principle, the Austrian government would permit Charles to cross Austrian territory on his way to Switzerland. Chancellor Mayr replied in the affirmative. This interview followed a visit to the chancellor by the Swiss minister, who stated his government would be willing to grant Charles safe conduct over the Swiss frontier.

Callers at the Hungarian legation were assured that the bulk of the Hungarian army was loyal to Admiral Horthy, the regent.

Budapest, April 1.—Former Emperor Charles wanted to take command of Hungarian troops in West Hungary when he arrived at Steinamanger, it is said in reports reaching here, but General Lehar refused to accede to this demand on the part of Charles.

May Stop in Japan.

Washington, April 2.—Authority has been given Maj. Gen. Leonard Wood to accept the invitation of the Japanese government to visit Japan in connection with his mission to the Philippines.

Business Not Yet Normal.

Washington, April 2.—Practically no progress toward the restoration of "normal conditions" in business and industry was made during the month of March, according to the monthly review of the federal reserve board.

..."re, you!" said the voice of the ... "Don't you know you can't put ...hotel in this burg without a li... Wot the—"

..."rning, Officer," said Randolph, ... his best to be pleasant. "I'm ...g for my fare. Any regulation ...t that?"

..."n't pull that stuff on me," said ...aw. "This ain't the Tenderloin."

...know it isn't," remarked Mr. Ran... "But I happen to be waiting ...r. Borden Milyuns, of Milyuns, ... & Milyuns. Ever heard of ...

..."re," said the cop, impressed but ...suspicious. "He lives here all ... but I ain't seen him turning down his own cars for night-hawks lately."

"Well," said Mr. Randolph, "I could tease you along for some time and make you look like a nut, but I won't. The truth is, his prize bitch, Bride of Lammermoor, is pupping tonight, and I'm here to take the lady and her litter down to the dog-show in time to get 'em settled for the opening. Messy job, but the meter is charging for it."

"There ain't a man living that could think up a lie like that, not sudden," murmured the officer, and turned to resume his beat, while Mr. Randolph promptly hit the mat in the hope of catching up with Elysium. He slept; he slept too deep for dreams, and was beyond the reach of the call of any motorhorn when Mr. Milyuns' town car tried to shoo him along at eight-thirty of a bright morning.

Once more was Mr. Randolph dragged by main force to wakefulness.

"Good-morning, Thomas," he remarked. "Is the old man up?"

"Hully gee! Mr. Randolph! What 'ave you been up to now?"

"None of yours, Thomas," said Robert Hervey, in a kindly but firm voice. "Get me a bit of paper and a pencil."

The chauffeur discovered the required articles in Mr. Milyuns' car, handed them over, and curiousiy watched Mr. Randolph write his note to the effect that Miss Imogene Pamela Thornton would receive her legal representative at Mr. Randolph's rooms in Fifty-ninth street between nine and ten. It was added that the said rooms, upon which rent had been paid to the end of the quarter, and all they contained, including the man, Tomlinson, were at the perpetual disposition of the said Miss T.

"Now, Thomas," said Mr. Randolph, "you take this in to the old man himself and tell him a chauffeur with an empty cab brought it. If you say another word I'll have you up at the union for losing me my job, and I'll lick the stuffings out of you besides. Get me?"

"Sure thing, Mr. Randolph!" said Thomas. "Leave it to me to help you

"Don't Pull That Stuff on Me," Said the Law.

make trouble whenever you feel like it. It's a slow world except for the likes of you."

As soon as the man had entered the house, Mr. Randolph started his cab and made for a point of vantage in the park, from which, in due course, he beheld the arrival of the lawyer at Fifty-ninth street. He waited long enough to make sure that the legal gentleman had penetrated to Miss Thornton; then he threw up his flag and made for the garage.

He sought out the manager.

"Say," he plunged, "Pat O'Reilly lost his job to me last night shooting craps. My clock read twenty-eight dollars this morning; here's my slip."

The manager glanced at the slip, and took a long look at Mr. Randolph.

"You're on, kid," he decided. "Take any shift you like. What's your name?"

"Slim Hervey," said Mr. Randolph promptly.

"One of them earned names," commented the manager. "All right. Go to it."

PART II.

Flesh, Spirit and the Veiled God.

Mr. Randolph spent the day getting acquainted and proved himself a good mixer. By telling a few stories that had not yet sifted down from Clubland and by standing a few drinks he soon found himself made free of all the technical information he needed and some more that was so ultra-technical that it could beat the brains that invented the delicate mechanism of the taximeter. He also established part ownership in a comfortable room in a house very much on the wrong or west side of Broadway, in fact within smelling and almost spitting distance of the North river.

While he was still in funds he bought himself a woolen khaki overcoat with one of those enormous collars which look like an inverted bucket when they are up and surpass in efficiency the traditional black mask so beloved by illustrators of the weekly press. He also had a speaking slot cut in the glass of the cab window just behind his best ear and subsequently removed and lost the slide that had been fitted over it with considerable skill and trouble.

During the next few nights he proceeded to have the time of his life; so much so that he was constantly overwhelmed with wonder at his stupidity in not having become a taxi-driver years before! It should be remembered that Mr. Randolph was of New York Yorky; he knew everybody casually, from Mr. Milyuns and his daughter, Eileen, down to the latest addition to the pitiful ranks of the midinette. More than that, so broad was his acquaintanceship that as a sporting gent he had once or twice been tipped off as to the where and when of a proposed gun-play.

In addition to being by right of birth an integral part of all the social strata of Manhattan, he knew the surface of the island and of the adjacent commoner soil of the mainland considerably better than he knew the palm of his own hand. In fact, he could scarcely ever have been conscious that he had a palm, even as a map of personal fortune; for he who is completely satisfied with the present never worries about the future and Mr. Randolph had been born content.

With such an equipment, is it to be wondered at that he found the taxi field rich with unexpected and surprising blooms? Fair flowers, he had known heretofore to nod only over tea tables and solid silver appeared suddenly transplanted to his cab and ready to nod on a stalwart shoulder. Strong male tiger-lilies of the money market, grafted to the cushions of a taxi, became complacent pillars upon which some clinging ivy twined.

In six nights he learned the sound that a banker makes when slender fingers tickle him under the chin; the gasp of a girl, first-kissed; the cry of a young man upon discovering the absence of grandfather's gold watch, his since graduation day; the cluck of a top-hat fairly sat upon in the excitement of a moment that else would have been tragic, the exasperating tap, tap, tap, of a hen-pecking tongue that explained and condoned a murder mystery in the next morning's papers, and the sob of a ruined youngster who had played with borrowed money.

All these incidents took place with people whom Mr. Randolph knew or knew of and just to show what an extremely honest young man he was, let it be said that it did not once occur to him that he need never be poor while humanity, supposedly in good standing, continued to lay itself open to blackmail at the rate of a case a night. At the same time, he was not stupid and occasionally tapped out a missive loaded with dynamite on the garage typewriter when no one was around. Here is a sample.

"Mr. Poindexter MacGuler, Sir: As I was driving you and Miss B. B. larst night who was foster-mothered by an aunt of a frend of a frend of mine, I heerd you talkin to her and all I got to say is if I see you out with her again short of the bands of matrimony I'll get another frend of mine to get Mr. Robert Herv Randolph to tell what he knows about you cheaten at cards on Dec. 23 last."

Nights that gave birth in the morning to such illiterary tit-bits could scarcely be called dull, but it was not long before Mr. Randolph found himself threatened by an unexpected monotonous employment. Unfortunately for his entertainment, his reputation as the one par excellence St. Bernard lifesaver to the inebriate elite spread rapidly throughout the Force so that the telephone was constantly burdened during the wee hours with the following: "Say, is Slim Hervey on the job? Well, when he comes in tell 'im I got another tailor-model drunk here what has lost his home address from his mind."

With suspicious suddenness Mr. Randolph proceeded to forget half his school and clubmates and cold-bloodedly leave them to their fate and a night out, not without coming to grief on at least one occasion, however. "What are you comin' over me?" demanded the irate captain of the Nth precinct. "You ain't forgot that you was vally to R. H. Randolph for seven years, have ya? Has all his frens gone on the wagon?"

It looked like a loop-hole. "Sure," said Slim Hervey promptly. "His club's near busted what with water-drinkers and softs."

"Slim Hervey," the good angel.

(TO BE CONTINUED.)

What a woman says goes—when she talks into a telephone receiver.

BEAUTY ITS LURE

Under Wonderful Charm Zanzibar Conceals Deadly Rage.

Great Metropolis of East Coast of Africa Attracts Wanderers From All Civilized Countries.

Aden, from which I had but recently departed, is a man grown gaunt and rugged in honest strife; but Zanzibar is a courtezan, whimsical, gay, sullen, presenting many aspects, writes William Ashley Anderson in Harper's Magazine.

Warm, rich, beautiful, concealing with dissembling art its sinister spots, it lavishes its charms, intoxicates with its beauty, smothers with its opulence; or suddenly, after a smoldering silence, it rends itself with rage. The screaming tornado rips its garments of verdure to tatters, hony-fingered pestilence goes leering down its dark alley ways, fever shakes the life out of its victims. And afterward, the bright sun sparkles upon the rain-washed foliage, and the island smiles again with the innocent radiance of a maiden.

Zanzibar town is the metropolis of the east coast It is Rome to the dusky pilgrim; it is Paris to the reckless wanderers from the Bantu folk of Cape Delado to the sons of the corsairs of Oman. Its clubs; its coffee shops; its cinemas; its dark, arched rooms where dusky belles from India, Arabia, the Somali coast, and Zanzibar giggle and shrill and dance monotonous dances; its spreading mango trees under whose shelter the torches burn, and the tom toms beat the measure of night-long ngomai; its shops tumbling with riches of roughly carved ivory and ebony, or hammered Cingalese silver and gems; its bazaars, gaudy with cheap cloth—kikovs, hodrunks, kanzas—bright with prints of flags and ships and emblems of royalty; the great ships lying in its roads, pouring into the lap of black Africa the increasing luxuries of Europe; the dhows bearing commerce from the Persian gulf, the Seychelles, and Madagascar—all, all and more, contribute to the renown and lure of Zanzibar.

My huge old Arab house had the reputation of being haunted. Unfortunately, I cannot prove this; but every night at two in the morning I awakened and lay for many minutes listening to the few faint sounds that tapped musically upon the bell of silence—the everlasting whispers and laughter of the waves upon the beach, the tap-tap-tap of death's head beetles in the berities of the ceiling, the rustling movement of rats, the clear silver tinkle of ships' bells in the harbor, the unexpected rattle of a chain, far off the plaintive shriek of a lemur, the stirring of palm fronds outside my window.

Turning my head, I could look out through the porticos across the water, silvery under the moon, with red and white and green lights glowing from the gray shadows of ships. A pale brooding moon sometimes gazed at me from behind a fan of palms; and then ghosts would truly steal about me, tender, ministering ghosts—memories of other days and dim dreams that may yet come true. In their arms I'd sink again to sleep.

Youthful Soldier of Fortune.

A real soldier of fortune who became a commissioned officer in the Polish army at the age of sixteen, after having returned only five months ago to the United States and "civies," could no longer resist the call of the khaki and the bugle, and in consequence enlisted as a "buck' private at the United States army recruiting headquarters. This youthful hero of campaigns against the Germans and Bolsheviki is Josef Zalot, nineteen years old. In 1917 he joined the Polish volunteers, after being educated in Philadelphia his native city, and was commissioned a second lieutenant at Camp Niagara, Ontario, Canada. After considerable fighting at Rheims and the Champagne country, followed by the armistice, he studied at a French school of arms. He accompanied General Haller' army in the spring of 1919 to the Polish front to fight against the Russians, and at the end of that campaign returned home. He is now a buck private in the Eighteenth infantry at Camp Dix, New Jersey, studying for examination as a second lieutenant.

Repairing a Buckled Ship.

In the great explosion at Halifax the British ship Curaca had her back broken. When the vessel was refloated it was found that she was buckled to the extent of nine feet two inches at the bow and six feet six inches at the stern. In that condition, says the Scientific American, she was temporarily repaired and brought to New York, where she was put in dry dock, and the water was pumped out until she touched the keel blocks amidships. Next, the plating on both sides of the ship was cut at the point where the vessel had buckled, and more water was pumped out, until both ends settled gently down upon the keel blocks and the vessel was once more straight. The task of joining the two parts was comparatively simple.

Season's Best Joke.

"What's the cause of the loud hilarity in the real estate office next door?"

"A stranger dropped in and solemnly announced that he wanted to rent a house."—Birmingham Age-Herald.

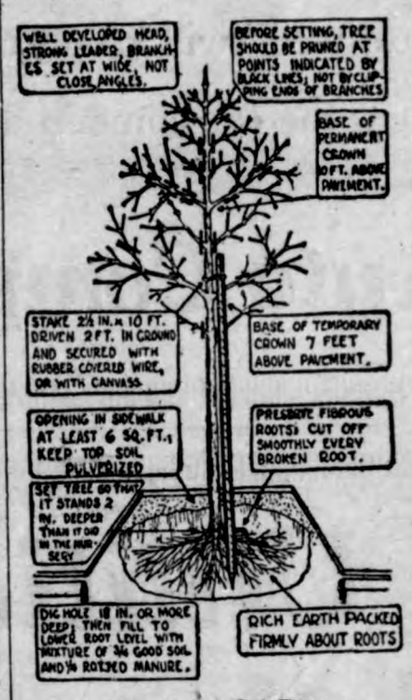
HOME TOWN HELPS

ADVICE ON PLANTING TREES

Bulletin Issued by the American Forestry Association Will Be Found to Be of Value.

The American Forestry association, Washington, has issued a bulletin entitled, "The Tree—The Memorial That Lives," written by Charles Pack, president of the association, in which are set forth instructions as to the selection of the best kinds of trees, how to secure them, prepare them, plant and care for them, and he adds a program for the ceremony of planting. This bulletin may be had for the asking. And, says Mr. Pack:

"This matter of the planting and the care of trees can be readily promoted by anyone. There are a few fundamental principles underlying the various simple operations. But the entire affair is mostly a matter of the exercise of common sense. Fortunately, the majority of us can lay claim to a fair share of this quality. There are certain conditions which are met and known requirements of tree-growth that are satisfied. By a little attention to the features of tree-planting and care, anyone may make a success of tree-planting operations and, furthermore, may care intelligently for trees after they have been planted."



How to Set Out Tree.

GOOD MOTTO FOR ANY TOWN

Excellent Spirit Shown in the Slogan "Get It Done," Recently Adopted by Kansas City.

The "get-it-done" campaign is producing an important by-product. It is speeding up business in Kansas City. The phrase sticks and makes an impression. Employee as well as employer is affected by it more or less unconsciously.

Little business matters are being attended to today that before were being put off till tomorrow. Loose ends around the store or office or factory that were allowed to accumulate are now being cleaned up. In a thousand places the effect of the advertising of these three words is showing itself.

If the thing keeps on, Kansas City will get a reputation not merely for getting things done for the municipality, but for putting a new sort of energy in its ordinary business affairs.

"Get it done!"—Kansas City Star.

Improving Rural Housing.

The country life problem as a whole cannot make consistent headway in humanizing and socializing farm life, so long as the work elements of farming smother the farm home. That farm people get accustomed to the proximity of ever-present occupational things and processes, means only that hardening invades the precincts of the farm mind and soul as it invades the farm house. A rural housing social conscience will probably at no distant day transfigure living on the farm and give rural America an air of architectural grace and land-art beauty.—Department of Agriculture Bulletin.

Walnut Has Many Advantages.

Walnut is a good tree to plant along highways, because it grows its branches high, which lets in the sun and allows the rapid drying out of the road. It is immune to fungous diseases, and, with the exception of one or two caterpillars, insects will leave it alone.

On account of its peculiar taste horses and other animals will not nibble these trees; so, taking it all around, the walnut seems to be our best tree for replanting.

Advice for Tree Prunes.

Any branch which must be taken from a tree should be cut as close as possible to the trunk, and in the case of large branches make the cut first about two feet from the trunk, to take care of the splitting of the bark and then make the final cut. Paint all cuts with a suitable preservative. A very good one is pure white lead, raw linseed oil and lampblack, mixed stiff enough so it will not run. Do not use ready-mixed paints which contain a drver.

FINE CROPS SURE

Farmers in Western Canada Jubilant at Prospect.

Splendid Winter Weather Has Put the Naturally Fertile Land in Splendid Condition, and Bountiful Yield Are Assured.

"What a delightful winter we have had," is an expression that could be heard almost anywhere when the topic of the weather became the subject of conversation. Not only in the Middle West and "down east" could it be heard, but also in the Far West, up in the Canadian West. There the same remarkable features that brought forth a wonderful winter existed. Reports from all parts of the country, from famed Medicine Hat in Alberta to Winnipeg in Manitoba, indicate that all through the winter season very little cold weather was experienced. In December, we read that golf playing had put into the discard all ice sports, that farmers were caught "red-handed" plowing their fields. In January, the Alberta yeoman got out his tractor and in his shirt sleeves was seen preparing ground for the 1921 crop. During February, in Saskatchewan, one farmer harrowed fifty acres and planted the seed. "Why, yes, of course, in March," said an Iowa farmer, who had just heard from his son, who was looking after the Western Canadian farm, "my boy writes me they had some snow, and a few cold dips, but what did that matter? The cattle and the horses came through the winter in better condition than they looked three or four months ago. Grass was plentiful on the prairies, the stubble was rich and valuable as food, and the straw stacks and groves proved ample for shelter."

Spring is now fully upon the Western Canada farmer, his machinery is all in shape for a spring's work, and he is looking forward to an excellent crop year. Last fall there was a splendid lot of moisture that permeated the ground sufficiently to leave a perfect seed bed. Indications are now that the crop will go in in the condition required for successful germination. Then, with the lengthened days of May and June, the many hours of sunshine that they bring, accompanied by showers of rain, and with a soil of which there is none richer nor more generous, there will be seen preparing for a ripening harvest the hundreds of thousands of acres of wheat, oats, barley, rye, alfalfa and corn that will make the hearts of the Western Canada farmers swell with pride as they reasonably look forward to an abundant harvest.

There is a great deal that can be said in favor of the climate of Western Canada. The most important is that those who live there, and have lived in other countries, prefer it to any they have experienced elsewhere. It is true the winters as a rule are colder than are those in countries lying much farther south, but it is also true that they are tempered by a dryness of the atmosphere that makes a lower temperature preferable to that several degrees higher where greater humidity prevails. Enervation and listlessness are unknown; the air is bracing, but the cold is not penetrating. Then the summers and the autumns—they could not be more enjoyable.—Advertisement.

A Sharp Speaker.

Mrs. Sheridan, the beautiful young Anglo-American sculptor who recently went to Russia and made busts of Lenin, Trotzky and the other Bolshevik leaders, succeeded particularly well with her bust of Trotzky.

Mrs. Sheridan, who was Miss Moreton-Frewen before her marriage, said at a dinner party:

Trotzky, you know, is famous for his sharp speeches. When I exhibited his bust in Petrograd, a lady said to Lenin:

"'What a likeness! You can see the quiver on his lips.'

"'Yes,' said Lenin, 'and the arrows coming out of it.'"

Catarrh Can Be Cured

Catarrh is a local disease greatly influenced by constitutional conditions. It therefore requires constitutional treatment. HALL'S CATARRH MEDICINE is taken internally and acts through the Blood on the Mucous Surfaces of the System. HALL'S CATARRH MEDICINE destroys the foundation of the disease, gives the patient strength by improving the general health and assists nature in doing its work.

All Druggists. Circulars free.

F. J. Cheney & Co., Toledo, Ohio.

Real Highbrow.

"It certainly does pay to have an education," said the man in household goods to the man from the rugs, over their lunch.

"As to what?" asked the ruggeur.

"W'y, this morning a woman came in and put her lorgnette to her eyes and asked me for a 'ref-use challce.'"

"Good night! What's that?"

"See—I told you it paid to have an education. I happened to recognize the woman and to know she had just moved here from Boston. So I got her a garbage pail, which was exactly what she wanted."—Philadelphia Public Ledger.

Brief Reform.

"What sore of woman is Mrs. Gadder?"

"The usual kind, I believe."

"Yes."

"After the monthly bills come in and she's had a heart-to-heart talk with Mr. Gadder she practices strict economy for twenty-four hours."—Birmingham Age-Herald.

Nothing is More Beautiful Than Life Out of Doors

Nothing makes this easier or more pleasant than the possession of a CAR.

Get the car and get the habit. If you are sick you will get well; if you are well 'twill keep you so.

But before you get the car come in and have a talk with us.

Beier Auto Company

Public Utilities and the public

Comparison of Costs

We are aware that there is a general opinion that during these times of readjustment of prices the cost of service to the consumer is due for an immediate decline, or even that there already should be a reduction. We assure our patrons that nothing would please us more than to be able to lower prices, but while the cost of production is still at the peak this will be an utter impossibility.

Now, just a few comparative figures to show what the utilities companies are up against. These figures are for the Iowa Falls Plant.

We omit the small fractions and give round numbers, but the situation is accurately stated as anyone can verify for himself. In 1916 steam coal f. o. b. Iowa Falls cost us $1.85. From that time on to the present there has been a steady advance in this very essential element, both by reason of advance in freight and additional cost of the coal at the mine, till the price $6.40 was reached in December, 1920. In other words, our coal is costing us nearly four times as much now as in 1916. That additional expense must be provided for. It might not be amiss to say that the price of coal is higher to us now than it was during the war, as the records will clearly show.

In the matter of labor in the boiler room, another necessary element of cost, the same condition. The cost of labor in 1916 was 19 cents an hour. In December 1920 it was 53 cents an hour, and in this case also it is true that our labor is costing us more today than it was during the war.

Here are two of the big items of expense, but there are others that are even more unfavorable. In the matter of repairs and replacements, which must be reckoned in with the cost of service, the prices have a good deal more tran doubled.

This means also that the ammount of depreciation is higher in a corresponding degree, the per cent of depreciation remaining toe same. This will readily be understood.

The cost of physical maintenance is higher than ever before, as our books, which are open to the public at all times, clearlyshow.

The "Cost of Maintaining the Investment," which we explained in the previous article, has almost doubled, since 1916, by reason of the advance in the money market. In 1915 money could be had for 6 per cent, while now it costs us nearly 10 percent. This is the biggest element in our costs, and with the money conditions as they are today reduced price of service is impossible without going below cost of production.

We shall go more specifically into detail in future articles.

Iowa Falls Electric Company

(A. Huntington, Engineer, Dept. of Public Relations.)

THREE PRESIDENTS ASK AID FOR CHINA

Harding, Wilson and Taft Appeal to Americans to Help Stricken Millions of Sister Republic.

The President and two ex-Presidents of the United States have joined, for the first time in the history of the country, in an appeal for a philanthropic enterprise. President Harding, ex-President Wilson and ex-President Taft are all in the forefront of the movement to send aid from America to the famine victims of China.

One of President Harding's first official acts after his inauguration, taken when he had been in the White House less than two weeks, was to renew the appeal made by his predecessor in behalf of America's sister republic in the East. President Harding said in part:

"At this, the earliest practicable moment in my administration, I desire to add my own to the many appeals which have been issued heretofore in behalf of the starving people of a large section of China. * * *

"The picture of China's distress is so tragic that I am moved, therefore, to renew the appeal heretofore made and to express the hope that the American people will continue to contribute to this humanitarian cause as generously as they possibly can."

In appointing the American committee for China Famine Fund, with his own immediate predecessor in the White House, ex-President Taft, as one of the members, and Thomas W. Lamont of New York, as chairman, President Wilson said in his proclamation:

"Not only in the name of humanity, but in that of the friendliness which we feel for a great people in distress, I venture to ask that our citizens shall, even though the task of giving is not today a light one, respond as they can to this distant but appealing cry for help."

LIFE SAVING STAMPS HELP FAMINE VICTIMS

Each "Mercy" Sticker Purchased for Three Cents Provides Food for One Day for a Chinese.

Sales of "Life Saving Stamps" by the American Committee for China Famine Fund for the benefit of China famine victims have reached a total of thousands of dollars at the end of the first month, and already the money is actually saving lives in China. Orders during the first month aggregated more than 10,000,000 stamps, which will mean—at the rate of 3 cents for each stamp—$300,000 for the Chinese when the complete returns have been made. The stamps are intended to secure a multitude of small contributions from persons who will not have an opportunity to contribute in other ways. The campaign for China is the greatest single philanthropic effort now before the American people.

Every state in the Union is now cooperating in the life saving stamp sales, and special committees are at work in more than 2,000 cities throughout the country. The circulation of the stamps is being effected by sales organizations composed of officers of the Woman's Foreign Missionary Societies, assisted by commercial organizations, schools, churches, Boy and Girl Scout Camps, Y. M. and Y. W. Christian Associations, fraternal lodges, hotel associations, boards of education and other volunteers interested in the movement to extend a helping hand to a sister republic in distress.

House to house canvassing for the sale of the stamps—which are intended to be placed on the backs of letters and packages—has proved the most effective method in the smaller communities. In the big cities the stamps have been sold to business houses, which are using them on their outgoing mail and packages. A nominal quota of ten stamps for every adult has been set by the committee, but in many centers this already has been passed. If unable to obtain stamps through a local committee write China Famine Fund Committee, Bible House, New York.

BUY CHINA LIFE SAVING STAMPS

If each person buys ten stamps at a cost of 30 cents, this community will go over its stamp quota.

Stamps can be secured from the local China Famine Fund Committee or directly from China Famine Fund, Bible House, New York City.

KLEMME IOWA

What we've done to help the man who farms

You probably felt during the fall and winter that farm products had declined more rapidly in proportion to the things you had to buy than was just.

We thought so ourselves, and did our best to rectify matters by putting clothes prices down to cost or below.

The new Hart Sceaffner & Marx clothes for spring are here now. We bought them on the new and lower cost level, and we're selling them mighty close for your benifit.

Come in and let us show you the best values you have seen for a long time

We are mentioning this week a few items necessary for the farm spring work

A good Unionall	**$3.50 to $5.00**
Oshkosh Overalls	**$2.00**
Work Shoes, blucher and outing styles	**$2.90 to $5.00**
Leather Gloves, gauntlet and short	**$1.25 to $2.50**
Cotton Flannel Gloves and Mittens at	**15c to 25c**

Rockford Hose, 15c ber pr. Work Shirts, all sizes, $1.00 each.

Merchantdise is lower as you will see by noting above prices

WANTED—One roomer. Also three rooms to rent for light housekeeping—Mrs Leo Wilkins

Well boys, guess we will have to take a day off soon and go out to the creek after some nice fat bull-heads. Are they biting? Sure they are and one Klemme fellow caught a fine mess the other day.

Mrs. C. J. Schneider and son, Carl, drove over from Garner Sunday afternoon. Mrs. Schneider visited with Mrs. Geo. Gruetzmacher and Carl spent his time chewing the rag with Ye Editor.

Miss Emma Lauritzen, of Ringsted, Iowa, came Saturday evening for a visit with her Klemme folks and friends. Emma has been operating a Linograph typesetting machine in the Ringsted Dispatch Office.

Has anybody here eaten spring chicken this season? Well one of our farmer friends brought us one the other day and it sure was fine. This is rather early for spring chickens but this one was a real nice frying size.

An item of news which we missed last week, was that W. J. Suckow, of Earlville, Iowa, was a week end visitor with Klemme relatives. He went to Forest City that Sunday where he filled the pulpit at the Congregational Church. He is a brother of H. L. Suckow.

John Miller, John Tanner, Aug. Lau, Jr., and Joe Schuldt drove to Ames Monday to attend a demonstration of stock feeding and agricultural work. The men say the trip was well worth the time and that they gained many good points on feeding as well as farming.

Mrs. John Wylie left last Friday for her home at Grinnell, Iowa, after having spent the winter months in Klemme with her daughter, Mrs. M. O. Hocum. Mr. Hocum took her to Mason City that day in his car where she took the train for her home. fl

Several Klemme men went to Garner Monday evening to see work put on in the Royal Arch degree of Masonry. A banquet at six o'clock was also given. While there we met Tommy Mitchel and Charlie Bier who came down from Swea City to see the work. They were the same good old scouts as when they resided here.

Notice is hereby given that at a Special Meeting of the Stockholders of the State Savings Bank, Klemme, Iowa the following proceedings were had and duly and legally taken, viz:

"Resolved that the Capital Stock of the Corporation be increased from Fifteen Thousand to Thirty Thousand Dollars and Article VI of the Articles of Incorporation be amended so as to read as follows.

ARTICLE VI

The amount of the Capital Stock of this Corporation shall be Thirty Thousand Dollars ($30,000.00) divided into shares of One Hundred Dollars each and the capital may be increased by the stockholders at any regular or special meeting called for that purpose and as provided by law".

State Savings Bank, Klemme, Iowa

By P. M. Griesemer, President.

D. D. Ross, Chairman,
W. H. Ramsay, Secretary

Great Baby Shrinkage.

Doctor Johnson's dictum that "births at all times bear the same proportion to the same number of people" looks rather like a wide shot in the presence of a row of figures just published by the Cambridge University Press. These figures occur in the report of a paper read by Mr. G. Udny Yule, M. A., at the university, and they show that in England and Wales the annual birth rate per thousand has been halved in the last 40 years. In the light of this comparison the present baby boom in London leaves us still far behind our grandfathers in the art of stretching the population. In the world-competition for posterity Serbia stands first and Australia last, with England last but one.—Montreal Herald.

The Average Hair Crop.

The Bible tells us that the hairs of our head are numbered, but it does not tell us even the approximate number to a square inch.

But some one has figured this out for us. He counted the hairs in a square inch on many heads.

On the average head there are a thousand hairs to each square inch. Find out the number of square inches in your scalp and you will soon know the approximate number of hairs on it.

We are also told that four hairs will suspend a one-pound weight. Therefore an average head of hair should be able to support the combined weight of two hundred people. Don't try it.--Popular Science Monthly.

Garden Tools

We have a big assortment of hoes, rakes, spades, fork plows, etc. and also highest grade garden, flower and grass seeds.

Lawn Mowers

Big Assortment of all sizes and prices.

ASPIRIN

Name "Bayer" on Genuine

Take Aspirin only as told in each package of genuine Bayer Tablets of Aspirin. Then you will be following the directions and dosage worked out by physicians during 21 years, and proved safe by millions. Take no chances with substitutes. If you see the Bayer Cross on tablets, you can take them without fear for Colds, Headache, Neuralgia, Rheumatism, Earache, Toothache, Lumbago and for Pain. Handy tin boxes of twelve tablets cost few cents. Druggists also sell larger packages. Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid.—Adv.

And She Couldn't Deny It.

I wear "stuffings" in the sides of my hair to make my "puffs" fluffier than they otherwise would be. One night in a crowded street car I was standing in front of a nice-looking young man when one of my "rats," as they are sometimes called, fell out of my hair and into his hand. It would not have been so bad if he hadn't bellowed out, "Young lady, I think this 'rat' belongs to you."—Exchange.

Thousands Have Kidney Trouble and Never Suspect It

Applicants for Insurance Often Rejected.

Judging from reports from druggists who are constantly in direct touch with the public, there is one preparation that has been very successful in overcoming these conditions. The mild and healing influence of Dr. Kilmer's Swamp-Root is soon realized. It stands the highest for its remarkable record of success.

An examining physician for one of the prominent Life Insurance Companies, in an interview on the subject, made the astonishing statement that one reason why so many applicants for insurance are rejected is because kidney trouble is so common to the American people, and the large majority of those whose applications are declined do not even suspect that they have the disease. It is on sale at all drug stores in bottles of two sizes, medium and large.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Adv.

Then There was Trouble.

"Robert," said his spouse, "father writes me that he is going to get a typewriter. What's the best kind, do you think?"

"Well," he replied unthinkingly, "I like them about twenty, with soft brown eyes."

No More Misery After Eating

Just Takes An Eatonic

"The first dose of Eatonic did me wonders. I take it at meals and am no longer bothered with indigestion," writes Mrs. Ellen Harris.

Thousands of people, like this dear lady, gratefully testify about Eatonic, which does its wonders by taking up and carrying out the excess acidity and gases which bring on indigestion, heartburn, bloating, belching and food repeating. Acid stomach also causes about seventy other non-organic ailments. Protect yourself. A big box of Eatonic costs but a trifle with your druggist's guarantee.

RAT IS SERIOUS ENEMY OF WORLD

No Other Animal or Insect Is So Dangerous and Persistent in Doing Harm.

INFLICTS IMMENSE DAMAGE

Value of Food and Property Destroyed Annually by Each Individual Rat Is Estimated at $2—Is Efficient Germ Carrier.

(Prepared by the United States Department of Agriculture.)

The necessity of a campaign of unvarying efficiency against the common brown rat, is an outstanding one. No other animal or insect is so dangerous and persistent an enemy, and no other enemy succeeds in inflicting the damage that the rat annually imposes upon humanity. The rat population of the United States is at least equal to the human population, and the same ratio holds true for practically every country under the sun. The bureau of biological survey, United States Department of Agriculture, places the value of the food and property destroyed annually by each individual rat at $2. Keeping well within the boundaries of conservatism this means that each year, in this country alone, we produce $200,000,000 worth of food to no other purpose than to feed our rats. In another way, 200,000 men in the United States are devoting all their labor to the maintenance of 100,000,000 rats.

Is Efficient Germ Carrier.

But the rodent's enmity is far from being satisfied by this huge economic injury. A frequenter of all the places that are vile and loathsome, the rat is a most efficient germ carrier. The germs of the dreaded "black death" have killed more human beings than all the wars of the world's history, and these germs are introduced into the human system by the bite of a rat flea. In India, no longer ago than 1896, the bubonic plague killed 9,000,000 persons. In Europe, during the Fourteenth century, it is believed to have brought death to 25,000,000 human beings. Other diseases, almost as dreadful, are traced to the common rat. Thus, from the standpoint of public health, as well as from the necessity of controlling the drain upon the public purse, it is essential that the rat be exterminated. Once the extermination is complete, or as nearly so as modern methods will permit, every precaution must be taken to prevent the rat from multiplying and regaining lost ground.

Exterminating Plans.

Trapping should be done continuously and systematically at all rat-infested places. Rat poisons, especially barium carbonate preparations as recently de-

Every Rat Costs the Nation $2, a Total of $200,000,000 Annually.

veloped by the biological survey, should be employed. In furthering the destruction of the rat, community or civic organization is of the greatest importance. It does no good to drive the rats from one cellar into the next if they are allowed to breed unmolested in their new quarters. When the campaign is made general the pest is allowed no rest and no opportunity to intrench in a new position. If one pair of rats is left they reproduce the original number in a little while, as rats breed five or six times a year with an average of ten to the litter.

In connection with the extermination campaigns, preventive measures should be employed against the rodent. First among these is the protection of all food supplies. This is of prime importance. The removal and destruction of refuse is the next step in prevention, as abandoned dumps and piles of waste material furnish excellent shelter and food for the rats that have been driven from the houses and cellars.

Building Should Be Rat Proof.

All buildings should be rat-proofed by the liberal use of cement and tin. Rat-proofing should be a prominent specification in all new construction and it should be applied to older buildings in the form of repairs. All drain outlets should be sealed with wire cages, or similar protective devices.

With the food supply locked away from him, and his shelter gone, starvation and exposure will add to the effectiveness of work with traps and poisons and the menace of the rat will cease to be a real hazard against American lives and property.

HENS WITHOUT WHEAT GIVE GOOD RESULTS

More Eggs Obtained From Pen of Rhode Island Reds.

Mash Containing Only 15 Per Cent Meat Scrap Gave Very Satisfactory Results—Experimenting With Green Feeds.

(Prepared by the United States Department of Agriculture.)

Poultry-feeding experiments conducted by the United States Department of Agriculture, last fiscal year, show that practically as good results can be obtained without wheat as with it in a ration. The Rhode Island Reds, in the wheatless pen, averaged 140 eggs, while those in the pen receiving wheat averaged 134 eggs. Good results were obtained with the use of garbage until the warm weather began, when there was considerable mortality, due apparently to the garbage spoiling. This work is being repeated this year with much more satisfactory results, the garbage being fed in a trough on a large wooden feeding board, which prevents it from getting on the ground and decaying.

In the use of vegetable proteins the relative order of production is the

Give Poultry Right Kind of Feed at Fixed Periods.

same as it was last year. No success has followed an attempt to substitute completely vegetable protein for animal protein. The ration used last year, a mash containing only 15 per cent meat scrap as compared with 20 to 25 per cent in the ordinary mashes, gave very satisfactory results with the heavier breeds, especially the Plymouth Rocks, in keeping the birds in good physical condition and fertility, though the egg yield was not quite so good as when the higher per cent of meat scrap was used.

New experiments were begun during the year with green feeds, comparing alfalfa meal with sprouted oats and comparing these rations with one in which vegetables were supplied. While none of these green feeds have shown marked increased production over any other, the results have emphasized the importance and value of that form of food when given in a variety.

BURN CHINCH BUG NESTS

Chinch bugs have made their appearance in certain parts of the United States.

One chinch bug destroyed now may prevent the production of hundreds to infest your wheat field later.

Chinch bugs pass the winter and early spring in wild grass and leaves, especially along hedges and fences and in the edges of woodlands adjoining cultivated fields.

Burn grasses, leaves and other trash where the bugs may have found winter refuge. The bugs not burned will be killed by exposure to the weather.

Clean up all trash and rubbish which may harbor the insects in winter.

IMPORTANT GRAIN SORGHUMS

Dwarf and Early Varieties Are Best for Higher and Drier Districts—Essential Hints.

The more important grain sorghums are included in two groups of varieties, the kafir group and the milo-durra group. Dwarf and early varieties in both groups are best for the higher and drier districts. The use of good seed of adapted varieties, a well-prepared seedbed, clean cultivation, and the right method of handling after harvest will increase the yield and quality of the grain.

EXCELLENT FOR LAND'S SAKE

Where Sweet Clover Does Not Thrive Well an Application of Limestone Is Favored.

Sweet clover is an excellent plant to grow for the land's sake under many conditions, and where it does not grow well now it can be made to grow well by applying ground limestone to the soil. It will add humus and nitrogen to the soil rapidly when plowed under, thereby increasing the fertility of the soil in these essential factors.

WIRE REPLACING OLD-TIME FENCE

Stone Walls, Split Rails and Hedges Rapidly Being Discarded by Farm Owners.

MOST IMPORTANT ELEMENTS

Essential That Ends and Corners Be Erected Firm and Solid—Posts Should Be Large Enough to Give Needed Strength.

(Prepared by the United States Department of Agriculture.)

Of all the changes wrought in the farming industry during the last century none is more noticeable than that in fencing, say specialists of the United States Department of Agriculture. All over the Eastern United States there are hundreds of miles of stone-wall fences which are monuments to the patience and thoroughness of earlier generations. Overlapping this territory, and extending west, are found fences of split rails, with their familiar weeds and berry bushes in the angles, while still farther west, where there was neither wood nor stone, are seen osage orange and other hedges. These are natural productions of the time.

The farmer usually finds today that barbed-wire or woven-wire fence will best serve his ends for new construction, and at the same time cost least. Barbed wire is used on large stock ranges where the loss of one or two animals through wire cutting is not serious, but for the farmer with fine horses, or a selected herd of cattle, large mesh woven-wire fences are coming more into use.

Ends and Corners.

The manner in which the fence is erected has much to do with its service. The ends and corners are by far the most important elements of a fence. It is essential that they remain firm and solid in order to hold the fence rigid. The first thing to consider is placing the corners. The posts used should be large enough to give sufficient strength; they should be set deep enough to prevent heaving by the action of frost; they should be braced from each direction of tension by a stout rail about 12 feet long.

Metal and concrete posts are on the market, but a great many farmers cling to wooden ones. The line posts should be approximately 4 inches in diameter. Various woods are used, including osage orange, locust, red cedar, mulberry and burr oak. They should be thoroughly seasoned and the bark removed, and to get the longest life should be dipped in creosote at a tem-

Attaching the Wire After It Has Been Stretched.

perature of about 220 degrees, long enough for the preservative to penetrate the wood. These posts are best set in the spring after the frost is out and when the ground is soft. On level ground they may be driven with a maul, but in depressions should be anchored down by 2 by 4 cross pieces spiked on the bottom of the post before setting. The distance between posts depends on the location of the fence and the numbers and kinds of stock to be turned, the average in field fences being about 20 feet.

To construct a woven-wire fence properly it is necessary to have a woven-wire stretcher, a single-wire stretcher to be used in attaching the fence to the end posts, a pair of wire cutters, a barbed-wire stretcher, a splicing tool, and hammers for stapling and fastening the wire. Barbed and woven wire may be unrolled by attaching the reel to the back of a wagon or by running a bar through the core and drawing it along with a horse.

Stretching the Wire.

After the wire is unrolled it should be drawn up to the line of posts and freed from adhering trash. The stretchers are then attached and the line wires drawn until they are so taut that they can just be pressed together. Some slack may be allowed for uneven ground. In fastening the wire on the posts the line wire should be kept as nearly horizontal as possible and allowed to follow small irregularities in the ground. The staples should permit horizontal movement of the wire, allowing the weight of the fence to come directly on the corner posts, thus taking care of contraction and expansion due to weather conditions. A woven-wire fence is not complete without a strand of barbed wire above it; this prevents the stock from reaching over and crowding it down.

FINEST HORSES USED IN GOVERNMENT STUD

Troubador of Willowmoor Won Ribbon at Chicago Show.

Morgan Stallion McMahon Was Made Champion at Vermont 1920 Fair—Excellent Records Made by Other Animals.

(Prepared by the United States Department of Agriculture.)

The United States Department of Agriculture's stud of Morgan horses at Middlebury, Vt., contains excellent specimens of the Morgan breed. This fact was demonstrated when Troubadour of Willowmoor, the premier stallion at the farm, won the Morgan stallion class at the 1919 international show at Chicago. At the 1920 Vermont state fair the Morgan stallion McMahon was made champion. McMahon is sired by Scotland, a stallion bred by the late Joseph Battell and for the past several years owned by the Department of Agriculture. Scotland and McMahon's dam, Beauty, are both sired by General Gates, for many years at the head of the government farm stud. McMahon is a full

One of the Stallions in the United States Department of Agriculture's Stud.

brother of Heather, winner of the mare championship at the Vermont state fair in 1916. The Reserve champion at the last Vermont state fair was sired by Bennington, who was bred and has since remained the property of the government. Bennington is also sired by General Gates and out of a mare purchased in Kentucky.

Castor, a gelding bred by the United States Morgan horse farm, is sired by General Gates, and out of Babe, by Bob Morgan. Castor finished both the 1919 and 1920 endurance rides of 300 miles, and is still a sound, useful horse at farm work, under saddle, or in light harness.

Dolly, a registered Morgan mare that finished sixth in the 1920 endurance contest was bred on the remount plan under the supervision of the Department of Agriculture, and received her preparation at the United States Morgan horse farm. Dolly is sired by Dewey, also a Morgan horse farm product, being a full brother to Bennington.

START GARDEN EARLY

An early beginning in preparing the land and planting gardens is of much importance. Regardless of the seasons it is well to get an early start. That "planting over" may sometimes be necessary cannot be denied. But little is lost when garden land must be planted over, for the labor necessary to prepare the land is always well employed. Much is lost if early maturing vegetables are planted too late. Get your garden land ready and plant on time.

LOSS FROM INFERIOR SEEDS

Farmer Is Cautioned to Make Test in Home Germinator in Advance of Planting.

American farmers suffer losses every year through inferior seed, the United States Department of Agriculture finds. If seed is foul with weeds or if the seeds are dead, the loss cannot be made up once the crop is in the ground. If a crop is to be planted in April, discovery of poor seed in May does no good. The remedy is to test seeds in a home germinator in advance of planting.

Small samples of seed are counted out and sowed in moist soil in some shallow receptacle like a kitchen plate. The plate may be kept near the stove or anywhere to maintain a temperature conducive to germination. When the plants have had time to sprout, a count of the results will give a good indication of the value of the seed.

TURKEYS INCREASE IN SIZE

Standard Weight of Bronze Variety Brought Up to About 25 Pounds for Young Toms.

By judicious breeding, turkeys have increased markedly in size since domestication. The wild turkeys of today average in weight about 12 pounds for young toms and eight pounds for young hens, while the standard weight for the Bronze variety is 25 pounds for young toms and 16 pounds for young hens.

JOY BROUGHT INTO HO

WORDS MADE NO DIFFERENCE

Hearers Might Have Found It Hard to Understand, but Old Friends Were Satisfied.

Two lifelong residents of an Indiana city meet daily at the noon hour, one going to lunch, and the other returning to work. Their habits have become so regular that they usually meet at the same place on consecutive days. As neither hears well, their brief forms of greeting have become stereotyped, but the other day something slipped and this is what was overheard:

"Mornin', Mr. Jones—nice weather we're having," said the one, oblivious of the fact that it was pouring rain.

"No, Mrs. Smith ain't doin' so well lately. Reckon the weather ain't the best in the world nowadays," was the reply.

"Goin' to attend the revival meetings this week, Mr. Jones?" said the first.

"Yes, you come and see us one of these days," was the parting answer.

His Theory.

Wilbur, age seven, rushed into his home after school and his first request was for bread and jam. His grandmother, after complying with the request, jokingly told the boy that he would "never grow up" if he continued to eat so much bread and jam, whereupon Wilbur answered:

"Grandma, I believe that's why you're so old. You don't eat any bread and jam."

Down on the Farm.

"How does Farmer Jones take it now that cider is illegal?" "Oh, he takes it hard."—American Legion Weekly.

Our affections are our life. We live by them; they supply our warmth.—Channing.

POULTRY CACKLES

DISINFECTING DOES NOT KILL

Painting Roosts and Dropping Boards of No Value in Destroying Chicken Parasites.

(Prepared by the United States Department of Agriculture.)

There have been many advocates of the theory that chicken lice can be killed by painting the roosts and dropping boards or the whole interior of the poultry house with various oil mixtures, the idea being that the vapors or gases arising from these points penetrate the feathers of the roosting fowls and kill the lice. This method has been given a very extensive trial by specialists of the United States Department of Agriculture, and not one of the 42 different preparations tested was found to be of any value. These preparations contained one or more of

Dusting Is Most Satisfactory Method of Killing Vermin.

the following ingredients: Phenols, tar oils, hydrocarbon oils, creosote oil, carbon disulphid, wood-tar distillate, benzol, nitrobenzene, naphthalene, anthracene oil, and pyridine.

In these experiments the roosts and dropping boards or the whole interior of the house were thoroughly painted or sprayed just before the fowls went to roost, and all doors, windows, and ventilators were closed during the first night. Five badly infested fowls were used in each test, and at the end of one week examination was made for living lice. Although an occasional dead louse was found on the dropping boards, in no case was the treatment of any practical value. Since many of these preparations were found to be effective when used as fumigants in small boxes, it is apparent that the ineffectiveness of house treatment is due to the fact that the fumes do not become concentrated enough to kill the lice. Tests were also made with lime-sulphur applied in the same way; this also was found to be of no value.

GIVE CHICKENS FREE RANGE

Growing Fowls Are Enabled to Obtain Quantities of Bugs, Worms, Green Feed, Etc.

When the garden crops have reached maturity or are far enough developed to suffer little damage from chickens the flock should be given free range. There are times in late summer and early fall when the benefit received by the poultry will exceed the slight injury some garden products may incur.

Free range enables growing chickens to obtain quantities of green feed, bugs, worms and other things. The chickens therefore require less grain and are less liable to sickness or disease. Exercise and ability to range for even a few hours a day is beneficial to a flock that has been kept in confinement during spring and early summer.

CONTROL OF LICE AND MITES

Dust Bath Will Aid Materially, but Should Not Be Depended Upon Entirely.

While it is well to provide a good dust bath for chickens, it cannot be depended upon for louse and mite control, say specialists of the United States Department of Agriculture. It is far better to eradicate the pests completely. The main difficulty about depending upon dust baths is that some fowls seldom dust themselves, and those which dust freely never completely free themselves of ice. The dust bath should be kept under cover and may consist of fine road dust with coal ashes added.

WATCH HATCHING DUCK EGGS

Care Must Be Taken That Empty Shells Do Not Telescope Over Eggs Just Pipped.

When hatching duck eggs under a hen, watch the eggs while ducklings are hatching and remove empty shells from the nest at once. Sometimes empty shells telescope over eggs just pipped, causing the death of the unhatched duckling. If the hen is at all nervous and inclined to tramp on the ducklings, it is well to remove them as soon as hatched to a warm lined basket until all are hatched.

Horticultural Points

PREVENT INJURY BY BORERS

Soap Wash Applied to Every Part of Tree Is Recommended as Superior to Spraying.

There are two borers which work on apple trees—the round-headed apple-tree borer and the flat-headed borer. They are quite common, and not many orchards are free from them. The flat-headed borer makes a tunnel between the bark and the sap-wood, and in young orchards the trees are frequently completely girdled. The round-headed borer is perhaps the most common. The young larvae bores through the bark and for a time works just under the bark. After a year, if they are undisturbed, they work clear into the heartwood. These borers work in trees from two to three years, constantly making a larger tunnel.

Trees should be examined during the fall and again during the spring for "gumming" or excreta. The gum should be cleared away and then use a knife rather sparingly and never cut crosswise of the grain of the wood.

There are no sprays or washes, safe to use, which will kill the borers in the apple trees, but a good soap wash, applied to every part of the trunk of tree will prevent the adults from laying eggs on the trees and prevent the larvae from boring in the trees. A good wash is made as follows: One gallon soft soap, one gallon hot water and one-half pound carbolic acid; this should be stirred thoroughly, and after 24 hours diluted with 30 gallons of water and applied as a wash. Some make a stronger solution by doubling the amount of carbolic acid. The eggs of these borers are laid during June and July, so it is important that the wash be applied in time to prevent the females from laying eggs on the trees.

There are other borers which work on cherry and peach trees. These cherry-tree borers may be controlled in same manner as the apple-tree borer. These borers do not usually become very numerous, but while they are working they do considerable damage and some check should be put upon their work. The peach-tree borer may be controlled by spraying with

Round-Headed Apple-Tree Borer Working in Young Service Tree.

lime-sulphur, just as the buds begin to swell. The currant bush borer is controlled by cutting out and burning the old, infested stems in May. The raspberry cane borer may be dealt with by cutting out and destroying infested canes or shoots along toward the last of June.

BEST ORCHARD-GRASS SOILS

Plant Favors Well-Drained Rich Loam and Will Not Thrive on Infertile Sandy Soil.

Orchard grass does best on well-drained rich loam soils. It will not succeed on poor sandy land. While it will grow on soils too sour for, and will withstand drought better than timothy, orchard grass is apt to be injured by severe northern winters. The important advantage of this plant is that it thrives in a partial shade, making it suitable for orchard and woodland pastures.

POOR POLICY TO BAND TREES

Only Question of Time Before Material Kills Tree, Especially Those With Thin Bark.

Results in some quarters seem to indicate that it is a poor policy to band trees with sticky greasy material to prevent insects going up. While it prevents the insects climbing, it seems to be only a question of time when the material kills the tree, especially thin-barked trees. Remove the material each autumn and replace on another part of the tree if it is to be used at all.

CONTROL OF SCALE INSECTS

Spraying May Be Done at Two Different Periods of Year and for Different Purposes.

The control of scale insects of all kinds is chiefly by spraying, and this operation may be carried on at two entirely different periods of the year and for two entirely different purposes. In one case the spraying is done when the trees are not in foliage, that is, in the late autumn or early spring, and these sprays are known as dormant sprays because of the dormant condition of the trees.

PITTSBURG MAN MAKES WONDERFUL STATEMENT

Declares Tanlac Enabled Him to Eat Better, Sleep Better and Work Better. — Has Gained Thirty Pounds.

HARRY M. ALLEN
Of Pittsburg, Pa.

"I consider Tanlac the grandest medicine in the world, for I have actually gained 30 pounds in weight since I began taking it. It has just simply filled me with new life and energy and for the first time in years I can sit down to the table and enjoy three square meals a day like other people. In fact, Tanlac has made me eat better, feel better, sleep better and work better, and I guess that's all a man can expect of a medicine.

"Before I took Tanlac, I was off 25 pounds in weight and was so badly run down I was hardly able to do my work. Nothing seemed to agree with me and my food invariably soured on my stomach. I would always have an uncomfortable bloated up feeling in my stomach, and although I tried many kinds of medicines, I never got relief until I took Tanlac.

"I also suffered considerably at times from Rheumatism, but this has all disappeared. In fact, this wonderful medicine has made a new man out of me in every way. I feel years younger and can do as much work as in any day of my life.

"Of course, I am only too glad to give you my testimonial because I want other people who are suffering as I did to take this medicine and get relief."

The above remarkable statement was made by Harry M. Allen, residing at 1009 Saint Martin Street, Pittsburg, Pa., a well known employee of the Oliver Iron & Steel Company of that city. Mr. Allen is a well known member of the United Presbyterian Church and is highly respected by all who know him.

Tanlac is sold by leading druggists everywhere.—Adv.

HAS AN EDUCATIONAL VALUE

Good Newspaper Is Very Much More Than a Mere Purveyor of the World's News.

The newspapers are made up by men trained in bringing together all the most important of the world's happenings and condensing them so that you can grasp them with little difficulty.

If yours is a good newspaper, it is interesting, for nothing is really news that isn't interesting. Read it carefully. It is your history of the most interesting of all the periods of the world's history—the times in which you are living.

You can get an excellent education by reading the newspapers attentively and following up the suggestions that come to you while reading them.

If you do not read them, and read them carefully, you will always be rusty and behind the times, though you have taken all the degrees the greatest university can confer.—John Blake, in Chicago Daily News.

Don't Forget Cuticura Talcum

When adding to your toilet requisites. An exquisitely scented face, skin, baby and dusting powder and perfume, rendering other perfumes superfluous. You may rely on it because one of the Cuticura Trio (Soap, Ointment and Talcum). 25c each everywhere.—Adv.

Some Wind.

A stranger in New Mexico became very much excited and alarmed at the continued high wind, which carried tons of sand through the air during the day. He remarked to an old resident that it seemed to be an awful windstorm. The old resident replied:

"Windstorm? This ain't no windstorm. Why, stranger, last week the wind was blowing. You've seen ground squirrels? Well, I saw one of them 30 feet in the air—digging a hole in the sand."—Exchange.

Stop the Pain.

The hurt of a burn or a cut stops when Cole's Carbolisalve is applied. It heals quickly without scars. 30c and 60c by all druggists or send 30c to The J. W. Cole Co., Rockford, Ill.—Adv.

Natural.

"I saw you weeping at the picture show."

"Well, it was a moving picture."

Weak and Miserable?

Does the least exertion tire you out? Feel "blue" and worried and have daily backache, lameness, headaches, dizziness, and kidney irregularities? Sick kidneys are often to blame for this unhappy state. You must act quickly to prevent more serious trouble. Use *Doan's Kidney Pills*, the remedy recommended everywhere by grateful users. *Ask your neighbor!*

An Iowa Case

Mrs. Mary Christensen, Sabula, Ia., says: "I had an attack of kidney trouble and lame back. A constant dull pain made me very nervous and I felt tired out. Doan's Kidney Pills were so highly spoken of that I decided to give them a trial. They soon removed the lameness and backache and I have had no return of the trouble since."

News Reported By The K. H. School

HIGH SCHOOL NEWS IN BRIEF

HIGH SCHOOL HAPPENINGS

Reported by the Staff --

The recent Declamatory Contest was a very successful one, indeedi. It was well attended and, to judge by the sentiments expressed by those who were present, it was greatly enjoyed. To clear up all misunderstandings, we will state that the girls and the boys compeed separately, which gave the honors for first place among the girls to Blanche Medaus, and among the boys to Fred Arnold. Every one of the contestants did remarkably well, which reflects much credit upon Miss McKahan who acted as their coach.

A play entitled "Tompkin's Hired Man" will be given by the Sophomore class on the evening of April 29th—just a week from Friday—at the Idle Hour Theatre. This has been talked about a good deal, and it will be worth seeing. Keep the date in mind and come!

We have a rare treat in store for you. As you no doubt already know, Prof. Wilson served in France for some time during the war. While there, he secured a large number of interesting photographs of French scenery and village life. He has had slides made of the views, and they will be thrown on the screen for your entertainment on Friday evening, May the 6th, at the local theatre. A program will also be given by the pupils of the school, which should prove an interesting attraction. You will certainly want to attend for the proceeds will be utilized to purchase base ball equipment for the H. S. nine. Remember, Friday, May 6th.

Bert Trumbell brought his short sojourn at Klemme High to a close recently. We bid him farewell and wish him the best of luck—if there is such a thing as luck.

Vona Green and Mable Swartz were absent Monday.

The Freshies have charge of the chapel exercises this week.

THE DECLAMATORY CONTEST

The contest was a success beyond our hopes. Not that we feared for the contestants: the earnest, persistent work they have been doing for the past few weeks under the able leadership of Miss McKahan was sufficient assurance that they would be not only a credit, but an honor to the school, but in arranging the details for such an event one is apt to get pessimistic over the little difficulties that arise. In spite of these, we expected the contest to be good. If we are to believe the expressions of appreciation that were given at the close, it was excellent.

Financially the event was a success in spite of the weather. The receipts were about fifty dollars, which will cover all expenses such as hall rent, advertising, prizes, war tax and incidentals. There may be a small surplus which with the consent of the Board of Education, we hope to put into something for the benefit of the school.

Our earnest hope it that the event may be an annual affair and that definite rules may be formulated for conducting it. This would make it an event to be looked forward to by ambitious pupils.

Much credit is due Miss McKahan for her sacrifice of time and effort in making the contest a complete success.

Harry E. Wilson.

NOTICE OF APPOINTMENT OF ADMINISTRATOR

Notice is Hereby Given, That the undersigned has been duly appointed and qualified as Administrator of the Estate of G. I. Schaper, late of Hancock County, State of Iowa, deceased.

All persons indebted to the estate are requested to make immediate payment; and those having claims against the same will present them, duly authenticated, to the undersigned, for allowance.

Liberty Township News

Miss Mildred Anderson who has been assisting Mrs. H. J. Stille with her house work the past couple of weeks, returned to her home last Sunday.

Mrs. Paul Stille and children returned home last Sunday after spending a couple of weeks at Dows visiting relatives.

Mr. Carolus who had about thirty acres of oats seeded almost a month ago was obliged to seed it over on account fo the frost.

Some of the ctizens of school district No. 8 met at the schoolhouse last Thursday evening. They are planning on standardizing the school.

The center school ends next Friday. They are planning on having a picnic. We believe this is the first school in the Township to be out. The kiddies are undoubtedly rejoicing over the event.

A large number of young people from this locality took in the Declamatory Contest at Klemme last Friday evening and reported it well worth the trip.

The recent frosts have caught a great many people unawares and as a result they have to buy a new radiator for the old tin lizzie.

Avery Township News

Mrs. Nettie Roth closed her school April 15th for the year. At the noon hour friends gathered at the school house with well-filled baskets. Weiners were also roasted which was great fun. All report a good time.

Gertrude Wilkins is taking care of her grandma at Goodell, who is quite sick.

Fred Bachman and Tom Nelson and son assisted in helping Ed Rooks saw wood last Saturday.

Mr. and Mrs. Martin Jensen and two children were callers at Garner one day last week.

Wm. Jefferson Bell visited at the home of his parents last Sunday.

M.r and Mrs. Robert Roth visited with Henry Buseman and family Sunday.

School closed at Avery No. 2 Friday, April 15th. Kenneth Bell and Harvey Nelson ran a race to see which could go all year without being absent or tardy. Kenneth went every day without being absent or tardy and Harvey missed 1½ days. They both worked hard not to miss a day. The teacher gave Kenneth a silk necktie for going every day.

Avery Center News

Mrs. Helen Kirkwood of Klemme, has been visiting at the home of her father and brother during the past week.

Ray Wilkins and Mr. and Mrs. Glenn Latch visited at the Lyman home in Garner last Sunday.

Miss Effie Johnson is spending a week's vacation at her home here.

L. E. Avery has been on the sick list but is somewhat better at present.

Lee Lewis reurned from Hampton the latter part of the week but expects to go back again soon.

Mr. Chas. Beilefeldt has been on the sick list during the past week.

Miss Marvel Chase visited in Goodell last Wednesday and also visited school there.

Mr. and Mrs. Anton Knipp visited at the Fred Wilkins home last Sunday

Several of the young people of this neighborhood attended the dance in Goodell Friday evening.

Mrs. Wilkins, who has been quite sick, is a little better at this writing.

Mrs. Nettie Bachman-Rhodes closed her school Friday in Avery No. 2, with a picnic which was enjoyed by many of that community.

Twin Lakes News

Mrs. Elmer Schneider was a Garner visitor Tuesday.

Miss Mattie Brass is enjoying a vacation and is visiting at her home here.

E. J. Schneider and Elmer Anderson autoed to Ames last week khere they were in attendance at the Stock Show.

Gertrude Wilkins and Dorothy Allaben spent the week end at the Harberts home last week.

The little son of Mr. and Mrs. Pete Peterson who has been on the sick list is better at this time.

Mrs. Christie and daughter visited at the Julius Nolte home the latter part of last week.

Miss Mattie Brass was a Belmond visitor Thursday.

Miss Thelma Carpenter closed a very successful term of school in Twin Lake Township. District No. 5, last Friday.

Local Items

Mr. and Mrs. T. F. Mitchell of Swea City spent Sunday with Klemme relatives. Mrs. Mitchell came especially to see her folks, Mr. and Mrs. Chas. Keraus, who had just returned from California. They drove down in their Ford Coupe.

Wanted—Cattle to pasture for the season. John Panhoff, Phone 307

Mr. Pavey's mother returned to her home at Mount Auburn last Thursday after spending a couple of weeks visiting her son and family. Of course, she was mainly attracted here by her new granddaughter, Juanita May Pavey.

Little Berns Missman took his first trip alone to Belmond Friday evening. Berns is quite a little man now and was real proud of his accomplishment. Daddy put him on the train here and relatives met him at the other end of the line.

Mr. and Mrs. Chas. Keraus returned from their California trip Saturday afternoon. They have been in the sunny state during the winter and horoly enjoyed the trip. They took numerous side trips to see the country and spent some time in the Grand Canyon. Their many Klemme friends are glad to welcome their return.

SALESMAN WANTED—To represent Moorman Mfg. Co., Quincy, Ill., selling old line stockmen's supplies in territory around Klemme. Perfectly legitimate article that can be sold only by man who is perfectly square. The pay is above the average. No investment. No collecting or deliveries to be made. You are home every night. Will arrange for a personal interview. Write at once to E. E. Beverlin, Box 71, Des Moines, Iowa. 1wp

CLEAN UP NOTICE

The public is most earnestly requested and advised that all garbage, manure and waste of whatever kind, shall be removed from yards, vacant lots, streets and alleys, and that constant and persistent efforts shall be made to keep the town clean.

Dumping refuse, manure or waste of any kind on vacant lots, streets or alleys is not permitted. The town dumping ground is maintained as a place for disposing of waste and for the burial of dead animals.

Attention should be given to this matter and your garbage cleaned up not later than April 30th, 1921.

Each drayman has a key to the dump ground and are ready to haul out your garbage at any time you ask them.

F. J. Wenck, Mayor
and Chairman of Board of Health.

This Critical World.

It's impossible to please everybody, and if a girl has what we, in our ignorance, consider a good figure the neighbor women say she is bunchy.—Ohio State Journal.

WILL THE CHURCHES OF KLEMME MERGE?

There is at present a movement on foot to merge the two Methodist Churches of Klemme which we believe the public as a whole are very much in favor of. By all means the merger should take place. In expressing our views of the matter we do not take sides with either church but will endeavor to express the general public feeling here and especially of those who are not connected with either of the churches proposing a merger, or consolidation.

From our standpoint of view it is pure folly to maintain two churches of the same denomination and language in a place as small as Klemme. It would be just as much sense to conduct two schools of the same language and following the same identical course of study. It is a waste of the Lord's money to pay the salary of two preachers, the upkeep of two churches when one preacher can take care of the charge and the upkeep of one church would be sufficient and the money thus saved could be used for other purposes and also one preacher could be released to serve in another field when preachers are scarce at this time and many churches are now without a minister. That is but one good reason why a merger should be effected here.

It may sound easy to consolidate the two Methodist churches of Klemme but both sides are to be considered and one must not give up any more than the other, which will of course be a hard matter. The conference question seems to be the main stumbling block in the way but, both being under the same Bishop and two superintendents. Of course there is competition there and neither one of the superintendents want to loose his hold. As far as the conference is concerned all indications point to a merger there in the future. The Methodist Episcopal church is under the jurisdiction of the Northwest Iowa Conference and the First Methodist is under the Northwest German Conference, so there you are and the same Bishop makes the appointments for both churches here.

Instead of Co-Operation for the work of God there has been competition here, which is entirely wrong in our point of view. There should by all means be harmony and the 'scrap' between the churches should cease. It is all foolishness and everybody is tired of the everylasting 'church fight' between the two churches here. One church is just as much to blame as the other, it always takes two to make an argument and arguments sometimes lead to hostilities. Better to get together while the iron is hot, forget personal feelings and start all new. The churches should consolidate and everybody bury their little old hatchet and wrok for the good of the community. We would suggest that if a consolidation were affected that a new minister be hired here, that all old members of the board on either church should be asked to resign, organize an entirely new body and then work for cooperation and not competion. It would be a grand church and would be the best thing which ever happened to Klemme. Eventually with both congregations under the same roof, a strong membership, a firm financial footing and good fellowship a new church home would soon loom up that would be amply large to take care of the growing congregation, the money saved would hire one of the best men obtainable and above all there would be HARMONY.

By all means CONSOLIDATE the two Methodist Churches of Klemme, but keep in mind that sacrifices must be made and above all consider the future and weigh both sides of the question carefully.

KLEMME GIRL MARRIED FRIDAY

Miss Emma Lauritzen, a daughter of Mrs. Einar Salling of this place, was united in marriage to Mr. Thorvold Christensen of Ringsted, Iowa, last Friday morning at Garner. Rev. Webb of the Methodist Church there performed the ceremony which was witnessed by the bride's mother and her brother, Adolf. The happy couple came back to Klemme and Mrs. Salling prepared a wedding dinner. That evening the couple left for Waterloo and other points to spend their honeymoon trip. Mrs. Christensen has been working in the printing office at Ringsted for some time and the groom has been folowing the painting and decorating trade there. We extend congratulations.

The Churches

METHODIST EPISCOPAL CHURCH

Public worship at 10:00 a. m. and 8:00 p. m. Note the change in the hour of evening worship.

Sunday School at 11:00 a. m.

At the morning service the sacrament of the Lord's Supper will be administered. The evening sermon will deal with reconstruction work in Europe and will be illustrated with the use of sixy-five beautifully colored stereopticon views, thus giving the opportunity of seeing as well as hearing the story of the wonderful work being done there.

You will be heartily welcome at all these services.

A. E. Buriff, Minister

FIRST METHODIST EPISCOPAL CHURCH

Preaching service Sunday morning at 10 o'clock.

Sunday School at the close of the preaching service, at 11 o'clock.

Epworth League Sunday night at 7:30.

Preaching service at 8:00 o'clock.

Liberty Twp. Sunday School meets at 10:15 o'clock.

Preaching service at 11:30.

Epworth League Sunday night at 7:30.

Prayer services on each Thursday evening at 7:30.

Come and worship with us next Sunday. The orchestra will play for us.

A. H. Meyer, Pastor

SUPT. WILSON WILL GO TO OSSIAN

Supt. Harry Wilson, who has been with the Klemme Schools the past term has accepted a position as supt. at the Ossian, Iowa, schools for the coming year at a salary of $2,000 which is considerably more than he could receive here. We congratulate him on his good fortune. The school at Ossian is a good large one and he will have four high school teachers as assistants. Mr. Wilson is without a doubt the best man who ever served this school, at least during our residence here and we believe we express the sentiment of the community when we say we are indeed sorry to have him leave as he has been instrumental in developing the school here. However, we wish him all success in his new location.

BEIER AUTO COMPANY SOLD TO JOHN TERHUFEN

Tuesday a deal was closed between Henry Beier and son, Carl, whereby they sold their garage business to John Terhufen. We understand the deal included the building, equipment and stock. Mr. Terhufen took charge immediately.

ODD FELLOWS HAVE DOINGS

The Odd Fellows here had a big time last week Thursday evening. Quite a number of Odd Fellows came over from Garner in cars, bringing their degree team with them, and gave nine candidates the first degree. Afer the work all enjoyed a feed consisting of sandwiches, ice cream and coffee. Rev. Buriff acted as toastmaster for the occasion. All report a most excellent time.

Horse Chestnut.

It is said that the name horse chestnut was derived from the fact that when the leaves of the tree fall there is a scar left on the twig in the shape of a horse shoe that bears marks resembling the nails of a shoe.

Happiness Not All.

There is in man a higher than love of happiness; he can do without happiness and instead thereof find blessedness.—Carlyle.

Daily Thought.

I go on with what I am about as if there were nothing else in the world for the time being. That is the secret of all hard-working men.—Kingsley.

To Their Discredit.

Those who are the most accomplished do not always accomplish the most.—Boston Transcript.

Good Example.

Aunt Polly was milking in the cow lot, and her politically excited son found her there. "Maw, you're a Democrat, ain't you?" he asked. She made no answer, but he persisted: "Say, maw, ain't you a good Democrat?" Finally she said, emphatically: "I hain't nothin'. I'm a woman milkin' a cow. You go in the house and shut up!"

ON GUARD AGAINST FORGE

Men of Money Devise Secret S... Which Inform Bank Cashiers Th... Checks Are Genuine.

So clever is the modern forger t... the man who relies on a signatu... which is hard to copy is liable at ... moment to find himself victimized ... his account depleted.

In order to prevent the success... uttering of a forged check, sev... men have hit upon devices which e... the smartest criminal could hardly ... tect.

For instance, there is an Ameri... millionaire who makes a tiny blot ... some part of the check as a sign ... the bank cashier that it is genuine. ... one forger in a thousand would ... tribute a blot to anything but ca... lessness, and quite a number of wo... be swindlers have found themselv... pulled up sharply on presenting ... unblotted check over the counter.

Another man has hit upon the i... of apparently making a mistake ... the date in the right-hand top c... ner of the check, which mistake ... rectified by the crossing out of ... wrong numeral and the substitut... of the correct one. The check for ... would hardly regard such an app... ent blunder as the result of deliber... intention.

A Frenchman with whom this s... ject was discussed stated that his o... method is an almost infallible o... Whenever he writes a check, he tak... the precaution of tearing it out of ... check book in such a manner that ... tiny shred of the counterfoil rema... attached to the draft. This is an ... timation to the bank that the ch... is genuine.

Perhaps, however, the most extra... dinary device is that adopted by ... wary Hebrew. He makes a point ... carefully perfuming every check be... ing his signature with a certain sc... which is very difficult to obtain.

Johnson's Tour of 1866.

Johnson's "Swing 'round the Circ... was an expression frequently to be h... with in the fall of 1866, and was a... plied to a speech-making tour ma... by President Johnson about that ti... President Johnson left Washingt... August 28, 1866, in compliance w... a request that he would lay the corn... stone of a monument to be erec... to Stephen A. Douglas, in Chica... September 6. He was attended by ... distinguished party, including seve... members of his cabinet. General Gr... and Admiral Farragut also were ... the party. The route was by way ... Philadelphia, New York and Alba... In one of his speeches the preside... referred to himself as one havi... "swung around the entire circle" ... public service, from alderman to pre... dent. The phrase "took" with new... paper reporters, and so came to ... generally applied to his tour. Joh... son's welcome was mixed, for pa... sions ran high in those times. Th... general attitude was, however, cou... teous, and even cordial. In this r... spect St. Louis contrasted very fav... ably with some other large citie... Cleveland, Chicago and Springfie... had extended to him no official reco... nition, while at Indianapolis he w... hooted. On the whole, Johnson's to... did not strengthen his position in t... country, serving, as it did, but to in... tensify the fury of the opposition.—... Kansas City Star.

Tasmania's Artesian Water.

The dry season experienced in Ta... mania last summer caused the sta... government to examine the coun... known as the Midlands for artesia... water. The area surveyed was a... proximately 500 square miles. Th... investigation has shown that there ... no artesian water in the Midland... but that there exist definite sub-a... tesian basins from which appreciab... quantities of water of very fair qu... ity may be drawn. The investigatio... the first of its kind in Tasmania, wi... make a valuable asset of the Midland... and will furnish data from which va... uable conclusions can be drawn as ... the conditions affecting irrigation.

Soldiers Make Money on Rats.

Inducements in the way of bounti... are offered to the French soldiers ... induce them to hunt the rats which in... fest the barracks. The bounty tak... the form of money considerations and ... an increased allowance of wine. One ... man obtained a release from duty fo... a few days and spent the nights ... hunting the rodents, and his succe... was so great that one man from ea... company was assigned to the sa... duty and the results of these assaul... was astonishing.

Origin of Pensions.

The practice of pensioning or insu... ing sick and wounded soldiers is said ... to have been started in England by ... Oliver Cromwell.

Optimistic Thought.

To do nothing is the happiness of the miserable.

Uncle Eben.
